3. *Comm.:* Curled hair for stuffing sofas, cushions, &c., is carded by hand-cards, which straighten, disentangle, and clean it; this is taken in bunches and spun into a rope, the next top, as the bunch is called, being interplaced with the loose strands of the former. The rope is wound on a wheel, and the coil steeped in water for three or four hours, and dried in a hot oven. The ropes are then untwisted, the hairs torn apart, and are ready to form stuffing. Curled-hair cords are also used for clothes-lines, and when fine for fishing-lines. Long and fine horse-hairs are used for the bows of violins and other instruments of this class; also for making hair-cloth (q.v.).

4. *Fire-arms:* A spring or other contrivance in one form of rifle or pistol-lock, which is freed by the hair-trigger, and, striking with the tumbler-catch, releases the tumbler.

¶ (1) *Not worth a hair:* Of no value.

(2) *To a hair:* To an extreme nicety.

(3) *To split hairs:* To cavil or quibble about trifles; to be over-nice.

(4) *Both of a hair:* Both alike.

hair-bracket, *s.*

Ship-build.: A moulding which is inserted at the back of or runs aft from the figure-head.

hair-brained, *a.* [HARE-BRAINED.]

hair-branch, *a.*

Bot.: Having villose branches.

Hair-branch tree:

Bot.: Trichocladus crinitus, a Cape genus of the Hamamelideæ.

hair-breadth, *haire-breadth, *s. & a.*

A. *As substantive:*

1. *Ord. Lang.:* The breadth or diameter of a hair; a very small or minute distance, amongst the Jews reckoned at $\frac{1}{10}$ of an inch.

2. *Bot.:* The twelfth part of a line. (*Lindley.*) A third of the Jewish estimate. [1.]

"Seven hundred chosen men left-handed could sling stones at an *hair-breadth*, and not miss."—*Judges* xx. 16.

B. *As adj.:* Of the breadth of a hair; exceedingly narrow or close.

"His *hair-breadth* 'scapes and all his daring schemes."
Cowper: Tirocinium, 230.

hair-broom, *s.* A broom or brush made of hair.

hair-brush, *s.* A brush for dressing and smoothing the hair; they are made of bristles assorted by colour, strength, and quality, and put up in a superior manner, hard, soft, or silky, according to purpose or taste. The better class are trepanned, a mode of fastening the bunches without gluing a veneer over the wires.

hair-cells, *s. pl.*

Anat. (Of the ear): Epithelial cells sur-

mounted by a brush of fine, short, stiff hairlets. There are two rows of them. The outer hair-cells are parallel to, and the inner ones applied against the inner side of the rods of Corti in the ear.

hair-compass, *s.* A pair of dividers, one of the legs of which is provided with a set screw and spring, admitting of very nice adjustment.

hair-cord, *s.*

Fabric: A kind of cotton goods, the warp of which consists of corded ribs.

hair-divider, *s.* [Hair-compass.]

hair-dresser, *s.* One whose trade is to dress and cut the hair; a barber.

hair-dye, *s.* A preparation used for dyeing or altering the colour of the hair.

hair-flag, *s.*

Bot.: The genus Plocamium.

hair-glove, *s.* A glove or covering for the hand, used for rubbing the skin while in the bath.

hair-grass, *s.*

Bot.: The genus Aira (q.v.).

* **hair-lace,** * **here-lace,** *s.* A fillet or band for tying up the hair. (*Skelton: Elinour Rumming.*)

hair-lichen, *s.*

Pathol.: Lichen pilaris, a species of lichen in which the papulæ appear only at the roots of the hairs. It is often due to derangement of the stomach, especially from the abuse of alcoholic liquors.

hair-like, *a.* Like or resembling hair; very fine.

hair-line, *s.*

1. The fine line or up-stroke of a letter.
2. A kind of type having all fine face-lines.
3. A fleshing-line of horse-hair.

* **hair-needle,** *s.* A hair-pin (q.v.).

hair-oil, *s.* Perfumed oil used in dressing the hair.

hair-pencil, *s.* A fine brush for painting. Small tufts of hair inserted into quills. The hairs of the camel, fitch, sable, badger, squirrel, martin, minever, European polecat, raccoon, goat, and other animals, are used for brushes of different qualities. A small tuft of the hairs is collected with the points all in one direction, and the bunch is bound with a strong thread, and passed point first through a wet quill, so that the point projects to the required distance. The quill shrinks tightly upon the bunch in drying. The various sizes require the quills of the crow, pigeon, goose, turkey, or swan. Larger bunches are secured in tin. Principally used by artists in water-colours, and to some extent by house and sign painters in fine work.

hair-picker, *s.* A machine for cleansing and straightening hair for manufacturing purposes.

hair-pin, *s.*

1. A pin used in fastening up the hair. A corking-pin.
2. A forked pin commonly used by ladies in securing the braids or bands of hair.

hair-pointed, *a.*

hair-pyrites, *s.*

Min.: A native sulphuret of nickel which occurs in capillary filaments of a yellow-gray colour.

hair-rope, *s.* A rope made of hair twisted together.

Hair-rope picker: A machine for unwinding and picking to pieces hair-rope which has been twisted, wetted, and baked to give a permanent curl to the hair.

hair-salt, *s.*

Min.: The name given by the workmen in the mines of Idria in Carniola to Epsomite, which there occurs in silky fibres.

hair-seating, *s.* A kind of hair-cloth mixed with cotton interwoven, used for the seats of chairs, couches, &c.

hair-shaped, *a.*

Botany:

1. The same as filiform, but more delicate, so as to resemble a hair.
2. Finely ramified; used of the inflorescence of some grasses. (*Lindley.*)

hair-shirt, *s.*

Eccles. & Ch. Hist.: The hair-shirt is an instrument of penance, made of horse-hair; strictly speaking it is a broad band rather than a shirt, and is worn round the loins, affording the wearer continual occasion of mortification. Ascetic writers strongly recommend it as a remedy for temptations against purity. Roman theologians see in Ps. xxxv. 13 the first instance of its use. Formerly the practice of wearing such uncomfortable garments was much more common, even among the laity, than it is in what ascetic writers call "these effeminate times," when the use of the hair-shirt is confined to the severer religious orders. Among the Carthusians it forms part of each monk's ordinary apparel.

hair-side, *s.*

Leather-man.: The grain side.

hair-sieve, *s.* A sieve or strainer with a haircloth bottom.

hair-space, *s.*

Print.: The thinnest space used by printers.

hair-splitter, *s.* One who makes very minute or nice distinctions.

"It is not the cavilling *hair-splitter.*"—*De Quincey: Autobiog. Sketches,* i. 51.

hair-splitting, *s.* & *a.*

A. *As subst.:* The act or practice of making or insisting upon very minute distinctions in argument.

B. *As adj.:* Given to making very minute distinctions in argument; quibbling.

hair-spring, *s.*

Horol.: The recoil spring of a watch-balance. It is made of fine steel wound upon reels like thread. To the naked eye it is a round hair, but under a glass it is seen to be a flat steel ribbon, about $\frac{1}{1250}$ of an inch in thickness, or about one-half the thickness of an average human hair. In a straight line it is a foot long, it weighs $\frac{1}{1500}$ of a pound Troy.

hair-streak, *s.*

Entom.: The English name of the butterfly genus Thecla, which belongs to the Lycænidæ. The Black Hair-streak is *Thecla W. album;* the Brown Hair-streak, *T. betulæ;* the Dark Hair-streak, *T. pruni;* the Green Hair-streak, *T. rubi;* and the Purple Hair-streak, *T. quercus.*

hair-stroke, *s.* A hair-line in penmanship; a cerith.

hair-tail, *s.*

Ichth.: The genus Trichiurus, which belongs to the Cepolidæ, or Ribbon Fishes. The Silvery Hair-tail, *Trichiurus lepturus,* is sometimes twelve feet long. It inhabits the Atlantic, and has been taken on the British coast.

hair-trigger, *s.* The secondary trigger of a gun, whose movement is effected by a very slight force, and unlocks a secondary spring device called a hair. [Hair, II. 4.]

hair-worker, *s.* One who makes bracelets, brooches, earrings, &c., out of human hair.

hair's-breadth, *s.* The same as Hairbreadth (q.v.).

häir'-bell, *s.* [Harebell.]

häir'-cloth, *s.* [Eng. *hair,* and *cloth.*] Stuff or cloth made wholly or in part of hair, and used for the covering of chairs, couches, cushions, &c. In the form of a shirt it was formerly much used in penance. Horse-hair for the manufacture of haircloth is principally derived from South America. It is first sorted according to colour, and then hackled. A number of tufts are then placed between the teeth of two cards, and the longer hairs removed by hand, so as to leave only those of uniform length. Hair is curled by forming it into a rope, which is afterwards boiled, and then baked so as to set the kink in the hairs. Haircloth is made from the longer and better varieties. The hair is first dyed, usually of a black colour, and is merely employed as the weft of the cloth, the warp being composed of cotton or linen thread, according to quality and purpose.

"They stopped the mine betweene when they list one while with sacks and *haircloth,* otherwhiles with doores."—*P. Holland: Livius,* p. 986.

haircloth-loom, *s.* The warp of the web is of black linen yarn; the hair weft is thrown with a long hooked boxwood shuttle, or a long rod having a catch hook at its end. The weaver passes the shuttle through the shuttle-way when it is opened by the treadles; a child presents a hair to the catch of the shuttle, and the weaver draws it through the shed and beats it up by two motions of the batten. The hairs are laid in a trough of water to keep them supple. The warp is dressed with paste, and the haircloth is well hot-calendered to give it lustre.

* **häire,** *s.* [Hair.]

* **häired,** *a.* [Eng. *hair; -ed.*] Having hair; generally in composition, as black-*haired,* light-*haired,* long-*haired,* &c.

* **häir'-ĕn,** *a.* [Eng. *hair; -en.*] Made of hair.

"His *hairen* shirt and his ascetic diet."—*Jeremy Taylor.*

* **häir'-hŭng,** *a.* [Eng. *hair,* and *hung.*] Suspended or hanging by a hair.

"Man, whose fate . . .
Endless, *hairhung,* breeze-shaken, o'er the gulf
A moment trembles." *Young.*

häir'-ĭ-nĕss, *s.* [Eng. *hairy; -ness.*]

I. *Ord. Lang.:* The quality or state of being hairy; the state of abounding or being covered with hair.

"The *hairiness* therefore will be occasioned in those parts where the mother fancied it to be."—*Digby: Of Bodies,* ch. xxxviii.

2. *Bot.:* Having hairs rather longer and more rigid than those of a downy or pubescent plant. Example, *Galeopsis Tetrahit.*

häir'-lĕss, *a.* [Eng. *hair; -less.*] Destitute of or wanting hair; bald.

"White beards have armed their thin and *hairless* scalps
Against thy majesty."
Shakesp.: Richard II., iii. 2.

* **häir'-lĕt,** *s.* [Eng. *hair;* dimin. suff. *-let.*] A little hair.

"A stronger lens reveals to you certain tinlest *hairlets.*"—*G. Eliot: Middlemarch,* bk. i., ch. vi.

häir'-pŏw-dĕr, *s.* [Eng. *hair,* and *powder.*] A scented powder made of fine flour or starch, used for sprinkling the hair; its use is now confined to men-servants.

"Our earth, even in the microscope, appeared to consist of as small particles, as the finest *hairpowder* to the naked eye."—*Boyle: Works,* iii. 104.

hairst, *s.* [See def.] Harvest. (*Burns: Hallowe'en.*)

häir'-wŏrm, *s.* [Eng. *hair,* and *worm.*]

Zoology:

I. (*Sing.*) The genus Gordius (q.v.).

2. (*Pl.*) The order Gordiaceæ (q.v.).

"Neither ulighous coats, gnat-worms, acari, *hair worms.*"—*Browne: Cyrus' Garden,* ch. iv.

häir'-ў, *a.* [Eng. *hair; -y.*]

I. *Ordinary Language:*

1. Overgrown or covered with hair.

"The tail of the latter [stoat] is always tipt with black, is longer in proportion to the bulk of the animal, and more *hairy.*"—*Pennant: British Zoology: Stoat.*

2. Consisting of hair.

3. Resembling hair; hairlike.

"A *hairy* comet, threatening death and ruin."
Massinger: Unnatural Combat, i. 1.

II. *Bot.:* Covered with short, weak, thin hairs, as the leaf of *Prunella vulgaris.* (*Lindley.*)

hāith, *interj.* [A corrupt. of *faith* (q.v.).] A petty oath: in faith.

"And when her lovely form I see,
Oh, *haith,* she's doubly dear again!"
Burns: I'll Aye Ca' In.

hāi-tsāi', *s.* [Chinese.] A viscous substance used by the Chinese and Japanese as a glue or varnish. It is supposed to be derived from an algal, *Plocaria tenax.* Called also Chin-chon.

hāi'-vĕrş, hā'-vĕrş, *s.* [Haver.] Idle talk, chatter, gossip.

"Wi' clavers and *haivers,*
Wearing the day awa'."
Burns: To the Gudewife o' Wauchope House.

haj, hadj, *s.* [Arab. *haj* = a pilgrim to Mecca, pilgrimage to Mecca, the Mecca caravan; cf. also *hajj, hajjat* = a pilgrimage to Mecca.] A pilgrimage to Mecca.

ha'-jĕ, ha'-ğĕ, *s.* [Arab.]

Zool.: The Egyptian Hooded Snake, *Naia haje.* It is very venomous, and of the same genus as the Indian Cobra.

ha'-ji, ha'-jeē, had'-ĝî, had'-ĝeē, *s.* [From Arab. *haj* (q.v.).] A pilgrim to Mecca. The true Arabic is, however, *haj* for a male pilgrim, and *hajjat* for a female one. (*Catafago.*)

hăj'-ĭ-lĭğ, *s.* [Hilelgie.]

hāke (1), **haak,** *s.* [Norw. *hakefisk* = hook-fish—*i.e.*, a fish with a hooked under-jaw, from *hake* = a hook; cf. A.S. *hacod* = a pike; Ger. *hecht;* M. H. Ger. *hechet;* O. H. Ger. *hachit* = a pike.]

Ichth.: Merlucius vulgaris, a fish belonging to the same genus as the cod and the coal-fish. It has ten and twenty-nine rays in each of the two dorsal fins, eleven in the pectoral ones, seven in the ventral ones, twenty-one in the anal fins, and nineteen in the tail. The body is dusky-brown above, lighter beneath. It grows to between three and four feet in length. It is found on the coasts of England, Ireland, Norway, and Southern Europe.

"The coast is stored with mackrel and *hake.*"—*Carew: Survey of Cornwall.*

hāke (2), *s.* [Etym. doubtful.] A lazy fellow.

* **hāke** (3), *s.* [Icel. *haki;* Sw. *hake;* Dan. *hage.*] A hook, a pot-hook.

hāke (4), *s.* [Hack (3), *s.*]

1. A rack for feeding cattle or horses.

2. A frame for holding cheeses.

hāke (5), *s.* [Hackle, *s.*] As much flax or hemp as is hackled at once.

"This head of hair—a *hake*
Of undressed tow, for colour and quantity."
R. Browning: Christmas Eve, xiv.

hāke, *v.t.* [Hake (2), *s.*] To idle or loiter about; to live lazily.

hā'-kē-a, *s.* [Named by Schreber after Baron Hake, a patron of the botanical gardens at Hanover.]

Bot.: A genus of Proteaceæ, tribe Folliculares, family Grevilliдæ. More than 100 species are known, all of them tall shrubs or small trees from Australia and Tasmania.

ha'-kĕm, ha'-kĭm, *s.* [Arab. *hakim* = a sage, a philosopher; a doctor of medicine.] A term generally used in English books describing the East for a physician.

Ha'-kĕm-īte, *s.* [See def.] Relating to Hakem.

1. *Gen.:* Relating to Hakem, a Fatimide caliph, who ruled in Egypt from A.D. 996 to 1021.

2. *Spec.:* Relating to astronomical tables published while he reigned. Some of these were constructed by Ebn Yunis, others by Abul-Wefa about A.D. 1000.

* **hake-ney,** *s.* & *a.* [Hackney.]

hākes'-dāme, *s.* [Eng. *hake,* and *dame.*] In Cornwall the name given to a fish of the cod family, the Forked Hake, or Great Forked Beard, *Phycis furcatus.*

* **hake-ton,** *s.* [Hacqueton.]

* **hăk'-ŏt,** *s.* [Eng. *hake;* dimin. suff. *-ot.*] A fish of the hake kind.

ha-la'-cha, *s.* [Heb. הֲלָכָה (*halakah*) = the rule by which to go, the binding precept, the authoritative law, from הָלַךְ (*halak*) = to go.]

Hebrew Lit.: One of two branches of exposition in the Midrash or most ancient Jewish exposition of the Old Testament, the other being the Hagada (q.v.). The object of the Halacha was to ascertain the bearing of the Mosaic law upon matters to which it did not directly allude.

ha-lach'-ĭc, *a.* [Heb. *halacha;* suff. *-ic.*] Relating to or containing the Halacha (q.v.).

halachic-exegesis, *s.*

Hebrew Lit.: Exegesis (interpretation) of the Mosaic law, and the Old Testament generally, on the principle of the Halacha (q.v.). (*Ginsburg.*)

hă-lad'-rŏ-ma, *s.* [Gr. ἁλάδρομος (*haladromos*) = the bounding race, in zoology, from ἅλλομαι (*hallomai*) = a spring, a bound, or from ἅλς (*hals*) = the sea, and δρόμος (*dromos*) = a course, a running, a race.]

Ornith.: A genus of natatorial birds, family Procellaridæ (Petrels). They are found in New Zealand.

hā-lā'-tion, *s.* [Eng. *hal(o);* suff. *-ation.*]

Phot.: An appearance, as of a halo of light, surrounding the edge of a dark object in a photographic picture developed upon iodide of silver, and causing a disagreeable, unnatural hardness to the outline.

hăl'-bĕrd, hăl'-bĕrt, * **hol-berd,** *s.* [O. Fr. *halebarde,* from M. H. Ger. *helmbarte, halenbarte;* Ger. *hellebarte* = an axe to cleave a helmet, as if derived from Ger. *helm* = a helmet, and *barte* = a broad axe. But the real meaning is a long-handled axe, from M. H. Ger. *halm* = a handle, *barte* = a broad axe. (*Skeat.*)] A weapon formerly much used by soldiers, consisting of a pole about five feet in length, surmounted by a head of steel, partly crescent-shaped. The pole-axe was its prototype. It took a great variety of fanciful forms, and was occasionally decorated with gilding, the blade being frequently perforated with ornamental devices. It ultimately became a mere decorative weapon, to be used for display in public ceremonials, and as part of the paraphernalia of home troops, or palatial guardsmen. It now only survives in Scotland, where it is borne by town officers when in attendance on borough magistrates.

HALBERDS.

"The soldiers defended desperately with musket pike, and *halbert.*"—*Macaulay: Hist. Eng.,* ch. xiii.

¶ *To send to the halberds:* To cause to be flogged. The force of the expression lies in the fact that at one time soldiers were tied to halberds fixed in the ground to receive their punishment. (*Voyle.*)

halberd-headed, halbert-headed, halberd-shaped, *a.*

Bot.: [Hastate].

halberd-weed, *s.* Neurolæna.

hăl'-çy-ŏn, * **hăl'-çĭ-ŏn,** *s.* & *a.* [Lat. *halcyon, alcyon* = a kingfisher; Gr. ἀλκυών, ἀλκυών (*alkuōn, halkuōn*), from the popular belief that the weather was always calm when the kingfishers were breeding.]

A. *As substantive:*

I. *Ordinary Language:*

1. *Lit.:* The kingfisher. It was popularly supposed that these birds neated and laid their eggs in seaweed, &c., floating on the sea, and that they had the power of calming the sea.

"Thus lovely *halcyons* dive into the main."
Cowper: Table Talk, 566.

2. *Fig.:* Calm, peace, quietness.

"The man would have nothing but *halcyon.*"—*Richardson: Clarissa,* ii. 4.

II. *Zool.:* A genus of Alcedinidæ, sometimes called Halcyonidæ (Kingfishers), sub-family Alcedininæ (q.v.). The bill is long, very straight, cylindrical, the sides widened, the base more or less depressed. *Halcyon leucocephalus* is found in India.

B. *As adjective:*

1. Pertaining or belonging to the halcyon or kingfisher.

"From their *halcyon* beaks."
Shakesp.: Lear, ii. 2.

2. Peaceful, calm, happy, pleasant. [Halcyon-days.]

"Hurried from the *halcyon* cot,
Where Innocence presides."
Cunningham: The Contemplatist.

halcyon bill, halcyon's bill, *s.* The bill of a kingfisher. It was an old superstition, which Browne, in his *Vulgar Errours* (bk. iii., ch. x.), says is "yet not made out by reason or experience," that the body of a kingfisher, hung up so as to move freely, would always turn its breast to the quarter whence the wind was blowing.

"But now, how stands the wind?
Into what corner peers my *halcyon's bill?*
Ha! to the east? yes; see how stand the vanes?
East and by south." *Marlowe: Jew of Malta,* i. 1.

halcyon days, *s. pl.*

1. (See extract.)

"The halcyones are of great name and much marked. They lay and sit about mid-winter when dales be shortest; and the time whiles they are broodie is called the *halcyon dates:* for during that season the sea is calm and navigable, especially in the coast of Sicilie."—*P. Holland: Plinie,* bk. x., ch. xxxii.

2. Days or a time of peace, quiet, and tranquillity.

"If Anna's happy reign you praise,
Pray, not a word, of *halcyon-days.*"
Swift: Apollo's Edict.

* **hăl-çy-ō'-nĭ-an,** *a.* [Eng. *halcyon;* *-ian.*] Halcyon, peaceful, calm, tranquil, quiet.

"Those peaceful and *halcyonian* days, which the church enjoyed for many years."—*Mede: On Churches,* p. 52.

hăl-çy-ŏn'-ĭ-dæ, *s. pl.* [Mod. Lat. *halcyon* (q.v.); Lat. fem. pl. adj. suff. *-idæ.*]

Ornith.: The name given by Swainson and others to the family of birds called in English Kingfishers. It is the same as Alcedinidæ (q.v.).

hăl'-çy-ŏn-ŏĭd, *a.* [Gr. ἀλκυόνειον (*alkuoneion*), ἀλκυόνιον (*alkuonion*) = a zoophyte like the halcyon's nest, and εἶδος = form.]

Zool.: One of the Alcyonidæ. A better spelling is Alcyonoid.

hăl-çy-or'-nĭs, *s.* [Gr. ἀλκυών (*alkuōn*) = the kingfisher, and ὄρνις (*ornis*) = a bird.]

Palæont.: A genus of fossil birds, apparently belonging to the Alcedinidæ (Kingfishers). *Halcyornis toliapicus* is found in the London clay (Eocene).

* **hald,** *v.* & *s.* [Hold, *v.* & *s.*]

* **hald-en,** *pa. par.* [Holden.]

hāle, * **hāil,** * **haile,** * **haill,** * **heil,** * **heyl,** *a.* & *s.* [Icel. *heill;* Sw. *hel;* Dan. *heel;* cogn. with A.S. *hál* = whole.]

A. *As adjective:*

I. Whole, sound; in health and safety; not impaired in health.

"Last year we thought him strong and *hale;*
But now he's quite another thing."
Swift: On Death of Dr. Swift.

2. Whole, perfect, entire, unbroken, uninjured.

B. *As subst.:* Health, safety, welfare.

"All heedless of his dearest *hale.*"
Spenser: Astropel, 103.

hāle, * **halen,** * **halie,** * **halieñ,** *v.t.* & *i.* [A.S. *holian, gehalian* = to acquire, get; cogn. with O. Sax. *halôn* = to bring, fetch; Dut. *halen* = to draw, pull; Dan. *hale;* Sw. *hala;* Ger. *holen* = to haul; O. H. Ger. *holón, halón* = to fetch.]

A. *Trans.:* To drag or pull by force; to haul.

"Four maned lions *hale,*
The sluggish wheels."
Keats: Endymion, ii., 643.

B. *Intrans.:* To drag or pull with force; to haul.

"Betweene this plucking and *haling,* there was no strength left in the midst."—*P. Holland: Livius,* p. 83.

hāl'-ēr, *s.* [Eng. *hale,* v.; *-er.*] One who drags, pulls, or hauls; a hauler.

hā-lēş'-ĭ-a, *s.* [Named by Ellis after Dr. Stephen Hales, F.R.S., who, in 1745, published a work on vegetable statics.]

Bot.: A genus of Styracaceæ, tribe Styraceæ. It contains the snowdrop or silver-bell trees of the United States. They are shrubs or

small trees, with two or three flowers, bearing a certain resemblance to those of snowdrops. They appear all along the stem before the leaves come out, and are succeeded by bunches of pretty, large-winged, juiceless drupes.

half (*l* silent), ***halfe**, *s., a., & adv.* [A.S. *healf, half;* cogn. with Dut. *half;* Icel. *hálfr;* Goth. *halbs;* Ger. *halb;* O.H. Ger. *halp;* Sw. *half;* Dan. *halv.*]

A. *As substantive:*

1. One of two equal parts of a thing; a moiety. (It is used of quantity, extent, amount, distance, or of anything capable of being divided in fact or in idea.)

"When a square cut in *halves* makes two triangles, those two triangles are still only the two *halves* of the square."—*Clarke: On the Attributes*, prop. 8.

* 2. A side, a part.

"Loke upon thy lyft *half* quath hue, lo war he standith.
Ich loked on my lyft *half*, as the ladye me tauhte."
Piers Plowman, p. 24.

3. A term at school.

"It has stopped the boats this *half*."—*Sir G. C. Lewis: Letters*, p. 3.

¶ Properly followed by *of*, but the preposition is commonly omitted: as in *half a pound, half an acre, half a mile*, &c.

B. *As adj.:* Consisting of a half or moiety; being one of two equal parts into which anything is divided.

C. *As adverb:*

I. *Ordinary Language:*

1. To the extent of a half or moiety; equally.

"*Half* admiring, *half* ashamed."
Scott: Lady of the Lake, vi. 7.

2. To a certain extent or degree.

"'Fayre sir,' said she, *halfe* in disdaineful wise."
Spenser: F. Q., II. ix. 38.

3. In compos., partially, imperfectly, not fully: as, *half*-taught, *half*-done, &c.

II. *Bot.:* Sometimes used for one side, as half cordate = cordate on one side only.

¶ (1) *In half* (properly *into halves*): as, To break *in half.*

(2) *To cry halves:* To claim a moiety or equal share.

(3) *To go halves:* To share anything equally with another.

(4) *Half and half:*

A. *As subst.:* A mixture of two malt liquors, especially of porter and ale.

B. *As adj.:* Languid, spiritless. (See extract under HAND, *s.* II. 4 (3).)

¶ Obvious compounds: *Half-articulate, half-bared, half-buried, half-clad, half-closed, half-concealed, half-dead, half-divine, half-learned, half-lifted, half-lit, half-mad*, &c.

half-baked, *a.*

1. *Lit.:* Not quite baked.

half-breed, *s.*

A. *As substantive:*

Anthropology:

1. *Gen.:* The offspring of parents of different races, though the term is usually confined to the children of a European and a Red Indian, in the vast majority of instances the male parent being white. Wilson (*Prehistoric Man*, ii. 260) says that the children of an Indian and a white wife are reported to be superior to other half-breeds.

"The French *half-breeds* at the Red River are a gigantic race."—*Wilson: Prehistoric Man*, ii. 262.

2. *Spec. (Pl.):* Two tribes, one at Red River Settlement, chiefly employed in agriculture, the other subsisting by hunting. The rise of independent half-breed tribes is specially interesting, as it is "the first step towards the evolution of a distinct race." Whether more than the initiatory step will be taken seems problematical. Archdeacon Hunter, a Roman Catholic clergyman at Red River, states that though the offspring descended from mixed blood does not fail, it becomes very difficult to determine whether their descendants are whites or half-breeds, so that their absorption is apparently only a question of time.

"In the field . . . the superiority of the *Half-breeds* is strikingly manifest."—*Wilson: Prehistoric Man*, ii. 264.

B. *As adjective:*

1. Sprung from such a union as that described under A. 1.

2. Belonging to or connected with either of the tribes described under A. 2.

"The *Half-breed* buffalo-hunters are not to be regarded as approximating to the nomad Indians."—*Wilson: Prehistoric Man*, ii. 262.

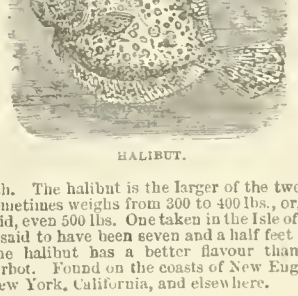
Ornith.: A genus of Aquilinæ (Eagles). *Haliastur indus* is the Pondicherry eagle, called by the English in India the Brahmany Kite. It flies above rivers, pouncing upon the fish, which are its chief food.

hăl'-ĭ-bŭt, hŏl'-ĭ-bŭt, * hăl'-lĭ-bŭt, *s.* [Mid. Eng. *hali* = holy, and *butte* = a flounder; Dut. *heilbot, helbut*, from *heilig* = holy, and *bot* = a plaice; Ger. *heilbutt, heiligebutte, hellbutt, hellebutt, helligbutt: heilig* = holy, and *butt* = a flounder. So named because it was commonly eaten on holidays.]

Ichth.: Hippoglossus vulgaris, one of the Pleuronectidæ (Flat Fishes). It is a fish so much akin to the turbot, that in Scotland it generally bears that name. The genuine turbot, *Rhombus maximus*, is, however, a different



HALIBUT.

fish. The halibut is the larger of the two. It sometimes weighs from 300 to 400 lbs., or, it is said, even 500 lbs. One taken in the Isle of Man is said to have been seven and a half feet long. The halibut has a better flavour than the turbot. Found on the coasts of New England, New York, California, and elsewhere.

hăl-ĭ-chœr'-ŭs, *s.* [Pref. *hali-* (2), and Gr. χοῖρος (*choiros*) = a young pig.]

Zool.: A genus of Phocidæ (Seals). *Halichœrus gryphus* is the Gray Seal, found on the coast of Ireland, but more abundantly in Greenland.

hăl-ĭ-chŏn'-drĭ-a, *s.* [Pref. *hali-* (2), and Gr. χονδρος (*chondros*) = corn, grain, cartilage.]

Zool.: A genus of Horny Sponges. *Halichondria oculata* is common on portions of the British coast.

hă-lĭc'-ō-rē, *s.* [Pref. *hali-* (2), and Gr. κόρη (*korē*) = a girl.]

Zool.: A genus of Manatidæ (Sea cows). *Halicore cetacea* is the dugong (q.v.)

ha-lĭc'-tŭs, *s.* [Gr. ἁλίζω (*halizō*) = to gather together, to assemble. (*Agassiz.*)]

Entom.: A genus of solitary bees, family Andrenidæ, occurring both in America and in Europe. Nearly 200 species are known.

* **hăl-ĭ-dăm,** *s.* [See def.] Probably the same as Halidom (q.v.), but by some taken to mean holy dame—*i.e.*, the holy or blessed dame or virgin.

"So help him God alle myght, and that *halidam.*"
Robert de Brunne, p. 110.

* **hăl'-ĭ-dŏm,** * **hal-i-dome,** * **hal-li-dome,** * **hol-li-dam,** *s.* [A.S. *hálgidóm* = holiness, anything holy or sacred, a relic, &c.]

1. A word used in adjurations; a sacred word of honour; a religious oath.

2. Lands belonging to a religious foundation.

"Within the *halidome* or patrimony of the Abbey."
—*Scott: Monastery,* ch. v.

hăl-ĭ-eŭ'-tĭcs, *s.* [Gr. ἁλιευτικός (*halieutikos*) = pertaining to fishing; ἡ ἁλιευτικἠ (*hē halieutikē*) = the art of fishing; ἁλιεύς (*halieus*) = a fisherman.] A treatise on fishes or the art of fishing; ichthyology.

Hăl'-ĭ-făx, *s.* & *a.* [See def.]

A. *As substantive:*

1. A town in Yorkshire, 14 miles W.S.W. of Leeds.

2. The capital of Nova Scotia.

B. *As adj.:* Of or belonging to either of these places.

Halifax-flags, *s. pl.*

Geol.: The same as Yorkshire-flags (q.v.). (*Rutley.*)

* **hăl'-ĭ-măss,** *s.* [A.S. *hálig* = holy, and *mass.*] The feast of All Souls; All Hallowmass.

"She came adorned hither like sweet May;
Sent back like *halimass,* or shortest day."
Shakesp.: Richard II., v. 1.

* **hăl-ĭ-ŏg'-ra-phĕr,** *s.* [Gr. ἅλιος (*halias*) = belonging to the sea; ἅλς (*hals*) = the sea; and γράφω (*graphō*) = to write.] One versed in haliography; one who writes about the sea.

* **hăl-ĭ-ŏg'-ra-phy,** *s.* [Haliographer.] That department of science which treats of the sea; a description of the sea.

hăl-ĭ-ō'-tĭd, *s.* [Haliotidæ.]

Zool.: One of the Haliotidæ.

"The *Haliotids* constitute a very beautiful genus."
—*Lamarck,* as transl. in *Eng. Cycl.,* iii. 22.

hăl-ĭ-ō'-tĭ-dæ, *s. pl.* [Mod. Lat. *haliot(is)* (q.v.); Lat. fem. pl. adj suff. *-idæ.*]

Zool.: Ear-shells. A family of gasteropodous molluscs, order Prosobranchiata, section Holostomata. Shell spiral, ear-shaped, or trochiform; aperture large, nacreous, outer lip notched or perforated, no operculum. Animal with a short muzzle and two branchial plumes.

hăl-ĭ-ō'-tĭs, s. [Gr. ἅλιος (*halias*) = marine, and οὖς (*ous*), genit. ὠτός (*ōtos*) = an ear.]

Zool.: Ear-shells; the typical genus of the family Haliotidæ (q.v.). The shell, which is striated, is ear-shaped with a small flat apex, a very wide iridescent aperture, the outer angle perforated with a series of holes. Known species: recent, seventy-five, from Britain, India, China, Australia, California, &c.; fossil, four, from the Miocene onward. The shell, on account of its beautiful colors, is much used for ornament, yielding what is known as "Mother of Pearl." Several species are used for food.

hăl-ĭ-ō'-tŏĭd, *a.* [Mod. Lat. *haliotis* (q.v.), and Gr. εἶδος (*eidos*) = form, appearance.]

Zool.: Resembling the Haliotis (Ear-shell) in form.

hăl'-ĭ-plŭs, *s.* [Gr. ἁλίπλους (*haliploos*), a contr. for ἁλίπλοος (*haliploos*) = (1) covered with water, (2) (later) sailing on the sea, pref. *hali-* (2), and πλοῦς (*plous*), contr. for πλόος (*ploos*) = a voyage.]

Entom.: A genus of beetles, family Dytiscidæ. Sharp enumerated thirteen species as British. They are small active water beetles.

hā'-lĭte, *s.* [Gr. ἅς (*hals*), genit. ἅλος (*halos*) = a grain or lump of salt, rock salt, and λιθος (*lithos*) = a stone.]

Min.: Under this designation Dana described common salt. The *Brit. Mus. Cat.* prefers to make halite a synonym of salt (q.v.). (See also Rock salt.)

hăl-ĭ-thēr'-ĭ-ŭm, *s.* [Pref. *hali-* (2), and Gr. θηρίον (*thērion*) = a wild animal.

Paleont.: A genus of Sirenia, having, according to Professor Flower, an ossified thigh-bone articulated to a well-defined acetabulum in the pelvis, thus making some approach to an ordinary hoofed quadruped. (*Darwin: Origin of Species,* 6th ed., p. 302.)

† **ha-lĭt'-u ŏŭs,** *a.* [Lat. *halitu(s)* = a breathing; Eng. adj. suff. *-ous.*]

1. *Ord. Lang.:* Like breath or vapour; vaporous. (*Boyle: Works,* i. 100.)

2. *Physiol.* (*Of the air in the lungs*): Produced by breathing.

hăl'-ĭ-tŭs, *s.* [Lat., from *halo* = to breathe out.]

Anat., Chem., &c.:

† 1. Breath. [Breathing.]

2. An exhalation attended by a faint smell arising from newly drawn blood. (*Quain.*)

* **halk,** * **halke,** * **haulk,** *s.* [A.S. *healc.*] A corner, a nook; a retired or secret place. (*The Reader to Geffrey Chaucer. Speght,* 1598.)

hâll, * **halle,** * **haulc,** *s.* [A.S. *heall, healh;* cogn. with Dut. *hal;* Icel. *hall, hóle;* O. Sw. *hall.* From the same root as A.S. *helan* = to hide or conceal; Lat. *celo. Hall* and *cell* are thus doublets.]

1. A large room or apartment, especially one in which public meetings are held; a room devoted to the transaction of public or corporate business, or the holding of entertainments. It is frequently found in composition: as, a town-*hall,* a music-*hall,* &c.

"Then ye souldiers of the debite toke Jesus vnto the comon *hall.*"—*Bible* (1551), *Matt.* xxvii.

2. A building in which courts of justice are held: as formerly in Westminster *Hall.*

"The great *Hall* was built by William Rufus."—*Pennant: London,* p. 114

3. In the Universities the large apartment in which the scholars dine in common.

¶ Hence used for the dinner itself.

4. A manor-house: from the residences of the lords of manors being "occasional" courts of justice.

"Captain Sentry, my master's nephew, has taken possession of the *hall* house, and the whole estate."—*Addison: Spectator,* No. 517.

5. Any large mansion; the residence of a squire.

6. A room at the entrance of a house; a vestibule; an entrance lobby.

7. The room in a mansion in which the servants dine, &c.; a servants' hall.

8. In the University of Oxford, an unendowed college.

9. In the University of Cambridge, a college, endowed or unendowed.

¶ *A hall, a hall!* A cry or exclamation to make room or clear the way for any particular purpose.

"*A hall, hall,* give room and foot it, girls."
Shakesp.: Romeo & Juliet, i. 5.

¶ Obvious compounds: *Hall-clock, hall-door, hall-lamp, hall-window.*

***hall-beard,** *s.* A dining-table.

"Young Selby, at the fair *hall-board,*
Carved to his uncle and that lord."
Scott: Marmion, i. 22.

hall-dinner, *s.* A dinner in a public hall: specif., the students' dinner in the hall of a college.

Hall-mark, *s.*

I. *Lit.:* An official stamp affixed by the Goldsmiths' Company and certain other officers to manufactured gold and silver articles as a guarantee of the standard.

II. *Fig.:* Any mark or sign of genuineness.

***hall-table,** *s.*

1. A dining-table.

"The huge *hall-table's* oaken face
Scrubbed till it shone, the day to grace."
Scott: Marmion, vi. (Introd.)

2. A table in the hall or entrance of a house.

* **hâll'-age** (**age** as **ĭj**), *s.* [Eng. *hall; -age.*] A toll paid for the sale of goods or merchandise in a hall.

hăl'-laṇ, hăl'-lŏn, hal-land, *s.* [Etym. doubtful.]

1. A mud wall, or what is called a cat-and-clay wall, in cottages, extending from the fore wall backwards, as far as is necessary to shelter the inner part of the house from the air of the door when opened.

"She sat quietly beyond the *hallan,* or earthen partition of the cottage."—*Scott: Waverley,* ch. xl.

2. A screen, a seat of turf at the outside of a cottage.

* **hăl-laṇ-shāk-ĕr,** * **hal-land-sheckar,** * **hal-lon-shak-er,** *s.* [Hallan.]

1. A sturdy beggar.

"Had seen me than staakin about like a *hallen-shaker,* you wou'd hae taen me for a water-wraith."—*Journal from London,* p. 4.

2. A beggarly knave; a low fellow. (*Dunbar: Bannatyne Poems,* p. 44.)

3. One who has a mean or shabby appearance.

"I, and a wheen *hallenshakers* like myself."—*Scott. Antiquary,* ch. iv.

Hăl'-lĕ-aṇ, a. [From Halle in Suabia.] Of or belonging to Halle.

Hallean-heretics, *s. pl.*

Ch. Hist.: A name given to the Cathari, the Waldenses, or the Petrobrusians, in the thirteenth century.

† **hăl-lĕ-flĭn'-tę, hăl-lĕ-flĭn'-tą,** *s.* [Sw.]

Petrol.: The same as Felstone (q.v.). Called also Eurite, and Petrosilex.

"Dr. Hicks has recorded the presence of an incipient foliation in the *halleflinta* ("Arvonian") of St. David's."—*Quar. Jour. Geol. Soc.,* xxxvii. 216.

¶ The form halleflinte is in Rutley's *Study of Rocks* (2nd ed.), p. 214.

hăl-lĕ-lū'-jąh, ăl-lĕ-lū'-ĭą, hăl-lĕ-lū'-ĭąh (**j** and **i** as **y**), *s.* [Gr. Ἀλληλούια (*Allelouia*); Heb. הַלְלוּיָהּ (*Hallelu-Yah*) = Praise ye Jehovah.]

A. *As substantive:*

Scrip. & Ecclesiol.: An ascription of praise to God (see def.), occurring at the commencement of many psalms, as cvi., cxi., cxii., cxiii., &c. Hence it became a doxology in the Jewish synagogues. We read in the Book of Revelation that "much people in heaven" said Allelulia, as did the four and twenty elders and the four living creatures (Rev. xix. 1, 3, 4, 6), these coupling it with Amen. The verses just quoted aided Alleluia, or Hallelujah, in becoming what it now is, a doxology in the Christian church, though the meaning is unknown to many who at times use it as an ejaculation.

"In those days, as St. Jerome tells us, any one as he walked in the fields, might hear the ploughman at his *hallelujahs.*"—*Sharp,* vol. viii., Ser. 4.

B. *As adj.:* Of, belonging to, containing, ejaculating, or singing hallelujahs.

"And tune the *hallelujah* song anew."
Byron: An Epistle to a Gentleman of the Temple.

hallelujah lass, *s.* The name given to those female officers and members of the Salvation Army, who take part in the public services of that body. (*Pall Mall Gazette,* May 2, 1884.)

hăl-lĕ-lū-jăt'-ĭc (**j** as **y**), *a.* [Heb. *hallelujah, t* euphonic, and suff. *-ic.*] Of or belonging to hallelujahs, or to sacred compositions containing them.

hăl'-lĭard (**i** as **y**), *s.* [Halyard.]

* **hăl'-lĭ-dŏme,** *s.* [Halidome.]

* **hâl'-lĭ-ĕr** (**l**), *s.* [Eng. *hall; i; -er.*] A student who resides in a hall or college at Oxford. [Hall.]

"The students also that remaine in them, are called hostelers or *halliers.*"—*Holinshed: Descrip. of England,* ch. iii.

* **hâl'-lĭ-ĕr** (2), *s.* [Hale, *v.*] A net for catching birds.

* **hăl'-lĭon** (**i** as **y**), **hăll'-yon,** *s.* [Etym. doubtful; cf. *scullion.*]

1. A rogue, a worthless fellow. (*Scott: Rob Roy,* ch. iv.)

2. A clown, a boor. (*Davidson: Seasons,* p. 26.)

3. A gentleman's servant out of livery.

4. An overbearing and quarrelsome woman.

hăl'-līte, *s.* [Named from Halle, in a garden of which town it was first found in 1830.]

Min.: The same as Aluminite (*Dana*), a mineral for which the *Brit. Mus. Cat.* prefers the name Websterite (q.v.).

***hâll'-mōte, *hâl'-mōte,** *s.* [Eng. *hall*, and *mote.*] A court, now called a court-baron (q.v.).

hăl-loô', hal-loa, hal-low, hol-lo, *v.i. & t.* [Halloo, *s.*]

A. *Intransitive:*

1. To cry or call out with a loud voice; to cry halloo in order to attract attention.

"I'll tarry till my son come: he *hallowed* but even now." *Shakesp.: Winter's Tale*, iv. 3.

2. To call after dogs to encourage them; to cheer dogs on with cries.

"The shepherd him pursues, and to his dog doth *halloo*." *Drayton: Poly-Olbion*, s. 13.

B. *Transitive:*

1. To call out loudly; to shout out.

"*Hallooing* your name to the reverberate hills." *Shakesp.: Twelfth Night*, i. 5.

*2. To shout or call out loudly to.

"He that first lights on him
Halloo the other." *Shakesp.: Lear*, iii. 1.

*3. To chase with shouts.

"*Halloo* me like a hare." *Shakesp.: Coriolanus*, i. 8.

*4. To encourage with shouts; to cheer or urge on.

"He *halloos* on the whole pack against me."—*Dryden: Vindication of the Duke of Guise.*

hăl-loô', *interj. & s.* [According to Skeat, from A.S. *ealá* = ah lo! But cf. Fr. *halle* = a cheering or setting on a dog; *haller* = to hallow or encourage dogs with hallowing (*Cotgrave*); Ger. *halloh.*]

A. *As interj.:* An exclamation to call attention; a loud shout; a call to cheer on dogs while hunting.

B. *As subst.:* A cry to attract attention or to cheer on dogs.

"They got again into their canoes; gave us some *halloos*; flourished their weapons."—*Cook: Voyage*, bk. iii., ch. iv.

hăl'-lō-tȳpe, *s.* [First element doubtful; Eng. *type* (q.v.).]

Phot.: The same as Hellenotype (q.v.).

hăl'-lōw, *halghien, *hal-ewe, *hal-ow, *hal-owe, *hal-we, *v. t.* [A.S. *hálgian* = to make holy; *hálig* = holy. Wallis, more than two hundred years ago, said of this word *fere desuevit* (it has almost fallen into disuse), but such language would be out of place now. (*Trench: English Past & Present.*)] [Holy.]

*1. To make holy; to consecrate; to set apart or dedicate for holy or religious purposes or uses; to sanctify.

"To dedicate and *halowe* the monastery of Seynt Denys."—*Fabyan*, vol. i., ch. cxxxii.

2. To make sacred or worthy of reverence.

"Of lofty hopes, he to the world went forth
A favoured being, knowing no desire
Which genius did not *hallow*."
Wordsworth: Left upon a Seat.

3. To reverence as holy; to revere.

"*Hallowed* be thy name."—*Matthew* vi. 9.

*4. To bless.

"There they were wed and *hallowed* of the priest."
A. C. Swinburne: Tristram of Lyonesse, ii.

***hăl'-lōw, *hal-owe, *hal-we,** *s.* [A.S. *hálga*, def. form of *hálig* = holy.] A saint.

"They may not plese hem [God]: ne non of his *halowes*."—*Chaucer: Persones Tale.*

hallow-day, *s.* The feast of All Hallows or All Saints.

hallow-fair, *s.* A market held on All Saints Day.

Hăl'-lōw-e'ĕn, *s.* [An abbreviation for *Alle halowene tyd* = All hallows tide: *halowene* = gen. pl. of Mid. Eng. *halowe*, or *halwe* = a saint.] The eve or vigil of the feast of All Hallows or All Saints. Burns's poem of Hallowe'en will preserve for future anthropologists the superstitious observances of the Scottish peasantry in the eighteenth century, at the annual recurrence of the day.

Hăl'-lōw-măs, *s.* [An abbreviation for *All Hallow Mass* = the mass or feast of All Hallows or All Saints.] The feast of All Hallows or All Saints, celebrated on Nov. 1.

"She came adorned hither like sweet May,
Sent back like *Hallowmas*, or shorter'st of day."
Shakesp.: Richard II., v. 2.

*** Hallowmass-rade,** *s.* The name given to a general assembly of warlocks and witches, formerly believed by the vulgar to have been held at this season. (*Cromek: Remains of Nithsdale Song*, p. 283.)

hăl-lóy'-sīte, hăl-lóy'-līte, *s.* [Named after Dr. d'Halloy, a French geologist.]

Min.: A clayey or earthy mineral, white, grayish, greenish, yellowish, bluish, or reddish; opaque or translucent, and of pearly to dull lustre. Hardness, 1·2; sp. gr., 1·8 to 2·4. Compos.: silica, 37·12 to 39·50; alumina, 22·05 to 41·27; water, 16·0 to 26·5, &c. Dana recognises four varieties: (1) Ordinary Halloysite, including Galapectite, Pseudosteatite, and Glagerite; (2) Smectite, (3) Lenzinite, and (4) Bole, all which see. Occurs in many places in veins or beds of ore, or in granite. (*Dana*, &c.)

Hăll'-stădt, *s.* [See def., A.]

A. *As substantive:*

Geog.: A market town in Upper Austria, built on the west side of the Lake of Hallstadt.

B. *As adj.:* Of or belonging to the place mentioned under A.

Hallstadt-beds, *s. pl.*

Geol.: Certain strata on the northern flank of the Austrian Alps, corresponding to the St. Cassian beds on their southern declivity. Thickness 800 to 1,000 feet. Age Upper Trias. Fossils more than 800; marine fossils chiefly molluscs. (*Lyell*, &c.)

hăl-lû'-çĭn-āto, *v.i.* [Lat. *hallucinatus*, pa. par. of *hallucinor* = to wander in mind, to rave.] To wander in mind, to err, to blunder, to stumble.

hăl-lû-çĭn-ā'-tion, *s.* [Lat. *hallucinatio, allucinatio*, from *hallucinor, allucinor* = to wander in mind.]

I. *Ordinary Language:*

1. A wandering in the mind; a mistake; a blunder.

"This must have been the *hallucination* of the transcriber."—*Addison.*

*2. A defective or impaired state of the vision.

II. *Physiol.:* Delusion (q.v.); belief in the existence of things which have no real existence. Deaf people hear sounds and blind see visions. No person can convince an insane person that the sounds he believes he hears, or that the forms he believes he sees, are other than real and substantial, the hallucination being the false conception which he is unable to distinguish from a true perception. [Illusion.] Vertigo, or dizziness, presents a vivid hallucination of movement either of the body of the person suffering from it or of things surrounding him which are really at rest. Double vision, in a certain stage of drunkenness, partakes of this nature, though it is rather an illusion than a hallucination.

*** hăl-lû'-çĭn-ā-tŏr,** *s.* [Lat.] One who is under the influence of hallucinations; a blunderer.

*** hăl-lû'-çĭn-ā-tŏr-ȳ,** *a.* [Lat. *hallucinator.*] Pertaining to or of the nature of hallucinations.

hăl'-lŭf, *s.* [Abyssinian.]

Zool.: Phacochœrus or *Phascochœrus Æliani*, or an allied species of wart-hog, occurring in Abyssinia. [Wart-hog.]

hăl'-lŭx, *s.* [Lat. *allex* = the thumb, or great toe.]

Anatomy:

1. *Human:* The great toe.

2. *Comp.:* The innermost of the five normal digits of a vertebrate foot. (*Huxley.*)

*** hâlm** (*l* silent), *s.* [Haulm.]

halm-grass, *s.*

Bot.: (1) *Elymus arenarius;* (2) *Carex arenaria.*

hăl'-ma-lille, *s.* [Ceylonese (?).]

Bot.: Berrya Ammonilla. [Berrya.]

hăl-ma-tŭr'-ŭs, *s.* [Gr. ἅλμα (*halma*) = a spring, a leap, a bound; ἅλλομαι (*hallomai*) = to leap, and οὐρά (*oura*) = tail.]

Zool.: A sub-genus of kangaroos, genus Macropus. *Halmaturus* or *M. antilopinus*, the Antelopian kangaroo; has short stiff horns like those of some antelopes. It inhabits the north of Australia. *Halmaturus elegans* (*Macropus ruficollis*) is the red-necked kangaroo of New South Wales.

*** hăl'-mōte, * hăl'-ĭ-mōte,** *s.* [Hallmote.]

hā'-lō, *s.* [Lat. *halos* (genit. and accus. *halo*) = Gr. ἅλως (*halōs*) = a round threshing-floor, the disc of the sun or moon or of a shield; a halo.]

1. *Literally:*

Physics & Meteor.: A circle round an object when the latter is steadily looked at. The impression of the halo is opposite to that of the object, so that, if the object is bright, the halo is dark, and *vice versa*. Haloes are of two types, encircling and opposite; the former including simple haloes, compound haloes or halo systems, and finally coronas; the latter comprehending rainbows, fog-bows, and mist or mountain spectres. The word is often used in connection with the moon and the sun. Haloes round these heavenly bodies consist of colored light, produced by the refraction of the light passing from the luminary through the surrounding haze. When a halo is increasing in size it prognosticates dry weather; when it diminishes in magnitude, rain is then probably not far off. Humboldt once saw a halo round the planet Venus.

2. *Fig.:* An ideal glory investing an object.

"Glory's self is twilight, and displays
A melancholy *halo*." *Byron: Childe Harold*, iv. 165.

*** hā'-lō,** *v.t. & i.* [Halo, *s.*]

A. *Trans.:* To surround with or as with a halo.

"Like yonder spots of our roadside lamps,
Haloed about with the common's damps."
R. Browning: Christmas Eve, lv.

B. *Intrans.:* To form into a halo; to surround as a halo.

"The fire
That *haloed* round his saintly brow."
Southey: Thalaba, bk. ix.

hăl-ō-bā'-tēş, *s.* [Gr. ἅλς (*hals*), genit. ἁλός (*halos*) = the sea, and βάτης (*batēs*) = one that treads or covers; βαίνω (*bainō*) = to walk, to go.]

Entom.: A genus of Heteroptera, family Nepidæ. It is found on the surface of the sea within the tropics, often far from land. (*Swainson & Shuckard.*)

*** hā'-lōed,** *a.* [Eng. *halo; -ed.*] Surrounded with or as with a halo.

"Elicit from the gloom some *haloed* face bending over me with strange pity."—*C. Brontë: Jane Eyre* ch. ii.

hăl'-ō-gĕn, *s.* [Gr. ἅλς (*hals*) = salt, and γεννάω (*gennaō*) = to produce.]

Chem.: The electro-negative radical of a haloid salt. This term is also used for the monad elements chlorine, bromine, iodine, and fluorine, as their sodium salts resemble sea salt, which is chloride of sodium, NaCl. The physical properties of Cl, Br, and I, correspond with the difference of their atomic weights, Cl 35·5, Br 80, and I 127, the weight of bromine vapour being the mean of that of chlorine and iodine. Chloride is a gas, bromine a liquid, and iodine a solid at ordinary temperatures. Chlorine has the greatest chemical affinity for hydrogen, and iodine for oxygen, that of bromine being intermediate.

hą-lŏg'-ĕn-oŭs, *a.* [Eng., &c., *halogen* (q.v.); *-ous.*] Belonging to or in any way connected with the halogens; generating haloid salts.

hăl-ŏg'-ĕ-tŏn, *s.* [Gr. ἅλς (*hals*) = the sea, and γείτων (*geitōn*) = a neighbour.]

Bot.: A genus of Chenopods. *Halogeton tamariscifolium*, a native of North America, is there called Spanish Worm-seed, and is a powerful anthelmintic.

hā'-lŏid, *a. & s.* [Gr. ἅλς (*hals*) = salt, and εἶδος (*eidos*) = form.]

A. *As adjective:*

Chem.: A name given to salts formed by the union of a halogen element with a metal, as NaCl sodium chloride, or by the union of a radical which does not contain oxygen with a metal, as KCN, cyanide of potassium.

B. *As subst.:* A haloid salt.

hą-lŏm'-ĕ-tĕr, *s.* [Gr. ἅλς (*hals*), genit. ἅλος (*halos*) = salt, and μέτρον (*metron*) = a measure.] An instrument for measuring the forms and angles of salts and crystals. [Goniometer.]

hą-lō'-nĭ-a, *s.* [Gr. ἁλωνία (*halōnia*) = a threshing floor.]

Palæobotany: A genus of fossil plants proposed by Lindley and Hutton, and adopted by Unger, &c., for stems having a surface like that of Lepidodendron combined with the branching of the Coniferæ. But in 1848 Mr.

John S. Dawes, F.G.S., showed that the branching was really dichotomous like Lepidodendron itself. (*Quar. Jour. Geol. Soc.*, iv. 289.) They are now regarded as Lycopodiaceæ. Prof. Morris enumerates five British species, all from the Coal Measures.

hăl'-ō-phȳte, *s.* [Gr. ἅλς (*hals*), genit. ἁλός (*halos*) = the sea, and φυτόν (*phuton*) = a plant.]

Botan. Geog.: A plant growing in a salt marsh, and producing soda salts. Examples, Salicornia, Salsola, &c. Halophytes is not a term used in classification, the salt-marsh plants being devoid of affinity to each other.

hăl-ō-rą-gā'-çē-æ, hăl'-ō-rā'-ĝĕ-æ, *s. pl.* [Mod. Lat. *haloragi(is)*; Lat. fem. pl. adj. suff. *-aceæ, -eæ.*]

Bot.: Hippurids. An order of epigynous exogens, alliance Myrtales. It consists of herbaceous plants or under shrubs, with alternate, opposite, or whorled leaves; small flowers, either axillary or in terminal panicles; the calyx adherent, its limb two to four-toothed or undivided; petals inserted into the summit of the calyx or absent; stamens inserted in the same place, as many as the petals or fewer; ovary inferior; style none; stigma papillose or pencil-formed; fruit dry, indehiscent, membranous or bony, with one or more cells; seed solitary, pendulous. The species, which are scattered over the world, are generally found in wet places. Genera described eight, species seventy. None of them have any important uses, except those of the genus Trapa. The order may be a degenerate state of Onagraceæ. It has two tribes, Haloragеæ and Trapeæ (q.v.).

hăl-ō-rā'-ĝĕ-æ, *s. pl.* [Mod. Lat. *haloragi(is)*; Lat. fem. pl. adj. suff. *-eæ.*]

Botany:

1. The typical tribe of Haloragaceæ (q.v.).
2. The same as HALORAGACEÆ (q.v.).

hăl-ō-rā'-ĝĭs, *s.* [Gr. ἅλς (*hals*), genit. ἁλός (*halos*) = the sea, and ῥάξ (*rhax*), genit. ῥαγός (*rhagos*) = a berry, a grape.]

Bot.: The typical genus of the tribe Haloragеæ and the order Haloragaceæ (q.v.). *Haloragis citriodora* is fragrant.

hā'-lō-scōpe, *s.* [Eng. *halo*, and Gr. σκοπέω (*skopeō*) = to view, to see.]

Optics: An instrument invented by M. Bravais for exhibiting the phenomena connected with halos, parahelia, &c. It comprises prisms and a mirror, which revolve rapidly about an axis, and two plates of glass for intercepting the light. The rotating prisms receive the light from a lamp in a darkened chamber, the refracted rays assuming the form of the parahelion circle.

hăl-ŏt'-rĭch-īte, hăl-ŏt'-rĭch-īne, *s.* & *a.* [Gr. ἅλς (*hals*), genit. ἅλος (*halos*) = salt, and θρίξ (*thrix*), genit. τριχός (*trichos*) = hair.]

A. *As substantive:*

Mineralogy:

1. *Of the form* Halotrichite:

(1) *Halotrichite of Glocker:* A yellowish white mineral, with silky fibres and an inky astringent taste. Compos.: sulphuric acid, 35·9; alumina, 11·5; protoxide of iron, 8·1; water, 44·5 = 100. Found at Hurlet and Campsie, near Glasgow, in Finland, Rhenish Bavaria, at Ooromiah, in Persia, in which last it is used making fine ink, &c.

(2) *Halotrichite of Hausmann:* The same as Alunogen (*Dana*), called in the *Brit. Mus. Cat.* Keramohalite (q.v.).

2. *Of the form* Halotrichine: A silky ashen mineral from the Solfatara, near Naples. (*Dana.*) The *Brit. Mus. Cat.* makes it simply a synonym of Halotrichite (q.v.).

B. *As adj.:* Of or belonging to the minerals described under A.

¶ Dana has a Halotrichite group of minerals including Mendozite, Pickeringite, Apjohnite, Bosjemannite, and Halotrichite (q.v.).

Bot.: A genus of Cinchonads, family Guettardidæ. The flowers are delightfully fragrant.

Hăm-īl-tō'-nĭ-ăn, *a.* [See def.]

1. *Gen.:* Of or belonging to any person of the name of Hamilton.

2. *Spec.:* (See the compound).

Hamiltonian-system, *s.* The name given to the system of teaching languages popularized in England by James Hamilton, though it was known long before his day, and was recommended by Locke in his *Thoughts Concerning Education*, § 167. James Hamilton was born in 1769, and in early life went to Hamburg, where he studied German under a French refugee named D'Angelis. After twelve lessons he was able to read an easy book, his tutor having discarded the use of a grammar, and translated stories for his pupils word for word. Hamilton commenced business in Paris, but on the rupture of the Treaty of Amiens, he was made a prisoner of war, and in 1814 went to America, intending to become a farmer. He changed his plans, however, and, adopting the method of D'Angelis, attained considerable success as a teacher of languages. He returned to England in 1823, and was very successful in Manchester. His plans excited a great deal of attention and no slight amount of opposition. Sydney Smith warmly defended them in the *Edinburgh Review* of June, 1826, and says that the Hamiltonian system "teaches an unknown tongue by the closest interlineal translation, instead of leaving a boy to explore his way by the lexicon or dictionary," and "postpones the study of grammar till a considerable progress has been made and a great degree of practical grammar has been acquired. The following are the opening words of the Gospel of St. John in Italian on the Hamiltonian system:—

than once; the courses separate. Fifty-eight species are known, from the Neocomian to the Chalk. Found in strata in Europe, India, and South America. (*S. P. Woodward.*)

2. (*Of the form* Hamite): The English name for any fossil shell of the genus Hamites [1].

Hăm'-īte (2), *s.* [Heb. חָם (*Chham*) = as adj., warm, hot; as subst., Ham, the youngest son of Noah; *-ite.*] A descendant of Ham, a negro, an Ethiopian.

Hăm-ĭt'-ĭc, *a.* [Eng., &c. *Hamit(e); -ic.*]

Ethnol. & Philol.: Of or belonging to Ham, his descendants or their languages. The name corresponds to the term Semitic for the Syro-Arabian languages, but there is difficulty in connection with both, for Canaan was the son of Ham, but his descendants apparently spoke Phœnician, which was not an Hamitic, but a Semitic tongue. The term is sometimes used for the great but imperfectly known family of distinctively African languages.

hăm'-kĭn, *s.* [Etym. doubtful.] A pudding made of a shoulder of mutton.

hăm'-lĕt, *hame-lest, *hame-lat, *hame-lette, *ham-il-let, *s.* [O. Fr. *hamel*; dimin. suff. *-et*; O. Fris. *ham* = a home; cogn. with A.S. *hām* = Eng. *home.*] A small village; a little cluster of houses in the country. (*Tennyson: Death of Wellington*, vii.)

***hăm'-lĕt-ĕd,** *a.* [Eng. *hamlet*; *-ed.*] Living or settled down in a hamlet or village.

"Unactively lives *hamleted* in some untravelled village."—*Fetham: Resolves.*

hăm'-mel, *s.* [Hemmel.] A small shed and enclosure used for sheltering cattle for fattening.

hăm'-mĕr, *ham-er, *s.* [A.S. *hamor*; cogn. with Dut. *hamer*; Icel. *hamar*; Dan. *hammer*; Sw. *hammare*; Ger. *hammer*; O. H. Ger. *hamar.*]

I. *Ordinary Language:*

1. *Literally:*

(1) A tool or instrument for driving nails, beating metals, &c., and consisting of an iron or steel head fixed crosswise on a handle.

"The armurers also
With file and *hammer* priking to and fro"
Chaucer: C. T., 2,511.

(2) Anything resembling a hammer in its shape, action, or use, as the striker of a clock.

2. *Fig.:* Anything destructive, overwhelming, or ruining.

"That renowned pillar of truth and *hammer* of heresies, St. Augustine."—*Hakewill: On Providence.*

II. *Technically:*

1. *Fire-arms:* Formerly, the hammer of the flint-lock was the steel cover of the priming-pan, and the parts connected therewith which received the blow of the flint which was held in the cock. The hammer of the percussion-lock is the striking part itself.

2. *Machines:* In addition to the hand implement called a hammer, large ones moved by machinery are used in manufactories. Thus there are power-hammers and steam-hammers, the former moved by any potent natural agent, as water or steam; the latter specifically by steam.

3. *Music:* A small padded mallet by which the string of a piano is struck.

¶ (1) *Geological hammer:*

Geol.: A hammer suited for the use of geologists. At least two such implements are required—one for rough-hewing specimens, the other for reducing them to smaller dimensions. The first should have a heavy head, with one end wedge-shaped, the other flat and square or rounded. The material should be Swedish iron, with well-tempered but not brittle steel ends welded on. The shaft should be thirteen, fourteen, or more inches long. (*Rutley.*)

(2) *Hammer and tongs:* Violently.

"Mr. Malone fell upon them *hammer and tongs.*"—*H. Kingsley: Ravenshoe*, ch. lx.

hammer-axe, *s.* A double tool, having a hammer at one side of the handle and an axe at the other.

hammer-beam, *s.*

Arch.: A beam in Gothic architecture which projects from the wall, and forms a sort of bracket-support for the tie-beams of an ornamental roof. Hammer-beams never extend across an apartment; and their ends are commonly decorated with carvings, very frequently representing emblazoned shields. They are often used also in the principals of Gothic roofs to strengthen the framing and to diminish the lateral pressure that falls upon the walls. The hammer-beam is generally supported by a rib rising up from a corbel below, and in its turn forms the support of another rib, which, with that springing from the hammer-beam on the opposite side, constitutes an arch.

Hammer-beam roof: A roof, the feet of the principal rafters of which are connected by a tie-beam, but usually rest in corbels. Half-rafters, carrying a vaulted superstructure, usually span the severy.

hammer-catcher, *s.*

Music: A padded shoulder which catches the hammer on its return.

hammer-cloth, *s.*

Carriage: The cloth which covers a coach-box; so called from the old practice of carrying a hammer, nails, &c., in the box of the seat, or from *hamper*; but, according to Skeat, *hammer* is here an adaptation of Dut. *hemel* = (1) heaven, (2) a tester, a covering; cognate with Sw., Dan., & Ger. *himmel* = (1) heaven, (2) a tester.

HAMMER-CLOTH.
A, Bells; B, C, D, Plaits.

hammer-dressed, *a.*

Mason: Dressed or prepared with a hammer; specifically applied to building-stone dressed with a pointed hammer or pick.

hammer-engine, *s.*

Mach.: A variety of the direct acting vertical steam engine, in which the supporting frame resembles that of a steam-hammer.

hammer-fish, *s.* [*Hammer-headed shark.*]

hammer-harden, hammer-hard, *v.t.* To beat metal with a hammer while cold, to close the pores and condense the texture.

"*Hammer-hard* is when you harden iron or steel with much hammering on it."—*Moxon.*

hammer-head, *s.*

1. *Ord. Lang.:* The cross piece of iron forming the head of a hammer.

"Because it was fashioned like a little mallet or *hammer-head*, it was and is at this day called in Latine *malleolus*."—*P. Holland: Pliny*, bk. xvii., ch. xxii.

2. *Zool.:* The same as Hammer-fish (q.v.).

hammer-headed, *a.*

Zool.: Having a head resembling a hammer.

¶ (1) *Hammer-headed bat:*

Zool.: *Hypsignathus monstrosus*, closely allied to White's Fruit Bat, but differing from all other Pteropine bats in the extraordinary size and shape of its head, which, owing to the muzzle being enormously developed, has a hammer-like appearance. It was discovered by Du Chaillu in Western Africa, and described by Dr. Allen of Philadelphia. (*Duncan.*)

(2) *Hammer-headed shark:*

Zool.: A British fish, *Zygæna malleus*, and the genus Zygæna itself. The sides of the head are greatly produced in a horizontal direction. Sometimes called Hammer-fish.

hammer-man, *s.* One who beats or works metal with a hammer; one who has charge of all that relates to the mechanical treatment of iron by the hammer.

hammer-mark, *s.* A mark of the hammer, left from forging.

hammer-oyster, *s.*

Zool.: The molluscous genus Malleus, and especially *Malleus vulgaris.* It is not of the genuine Oyster family (Ostreidæ), but is one of the Aviculidæ. When young it is like an ordinary Avicula, but, as it advances in age, the two ears lengthen more and more, so as to be always increasingly hammer-like. It inhabits the Indian Archipelago.

hammer-sedge, *s.*

Bot.: *Carex hirta.*

hammer-slag, *s.*

Metal.: The coating of oxide of iron formed on iron by heat, which is removed by hammering the metal when cold. "It is black, opaque, slightly metallic in lustre, melts at a high temperature, and is strongly magnetic." (*Percy.*)

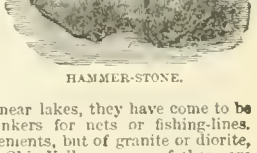
hammer-stone, *s.*

Anthropology:

1. A stone implement held in the hand and used as a hammer by the Neolithic flint-workers.

"The *hammer-stones* used in the manufacture of flint hatchets appear to have been usually quartzite pebbles."—*Evans: Ancient Stone Implements*, p. 29.

2. The name given to certain rarer stone implements of Neolithic age from their resemblance to mining hammers. From their showing no traces of use, and their usual material, sandstone, being unsuitable for the purpose of hammering, perhaps, also, from their having been often found near lakes, they have come to be classed as sinkers for nets or fishing-lines. Similar implements, but of granite or diorite, occur in the Ohio Valley; some of them are



HAMMER-STONE.

from three to four inches long. They show no signs of abrasion, and may have been used as bolas (q.v.), or, according to Evans (*Ancient Stone Implements*, ch. x.), as sinkers. But their use cannot be determined with certainty.

hammer-wort, *s.* The herb Pellitory. (*Halliwell.*)

hăm'-mẽr, *v.t. & i.* [HAMMER, *s.*]

A. *Transitive:*

I. *Literally:*

"And the smith his iron measures *hammered* to the anvil's chime." *Longfellow: Nuremberg.*

* 2. To work out or forge in the mind with intellectual labour; to excogitate. (Generally followed by *out.*)

"Indeed, I sometimes *hammered out* a line." *Gay,* Ep. 1, *To a Lady.*

* 3. To patch up, to frame. (Followed by *up.*)

"Some spirits, by whom they were stirred and guided in the name of the people, *hammered up* the articles."—*Hayward.*

B. *Intransitive:*

I. *Literally:*

1. To work with a hammer.

2. To make a noise like a hammer; to act as a hammer; to beat.

"Round him busily hewed and *hammered*
Mallet huge and heavy axe."
Longfellow: Musician's Tale.

II. *Figuratively:*

1. To be busy in thought; to be working or pondering in the mind.

"Nor need'st thou much importune me to that,
Whereon this month I have been *hammering.*"
Shakesp.: Two Gentlemen of Verona, i. a

2. To be in agitation or debate.

"A thousand things are *hammering* in his head."—*Dryden: Sir Martin Marr-all,* i. 1.

3. To attack persistently. (Followed by *at.*)

"Better to clear prime forests . . .
Than *hammer at* this reverend gentlewoman."
Tennyson: Princess, iii. 118.

* **hăm'-mẽr-ą-ble,** *a.* [Eng. *hammer; -able.*] That may or can be fashioned or formed with a hammer; malleable.

supinator muscles, flexors and extensors, the former on the palmar aspect of the hand, the latter on the back, and with nerves and blood-vessels, ligaments, articulations, skin, nails, and in most cases, on the back of the hand, especially in the male sex, a quantity of hair.

(2) *Compar.*: All vertebrate animals have their anterior extremities terminated by bones corresponding to those of the human hand, but the latter is more complicated and susceptible of being used for a greater variety of purposes than in their case. The footprints of the Labyrinthodont Amphibians are so much like those which would be left by a hand that they were called originally Cheirotherium. As genuine internal bones do not exist in the Invertebrata, parts superficially resembling the human hand are not homologous with the anatomical structure of that organ in man.

2. *Horol.*: The pointer or index-finger of a watch, clock, or counter: hour, minute, seconds, as the case may be; or known by the dial to which it belongs, as in the respective dials of the gasmeter or other dial-register.

"An idler is a watch that wants both *hands*."
Cowper: Retirement, 631.

3. *Firearms*: The small of a gun-stock.

4. *Cards:*

(1) The cards held by a single player.

"When they came and looked over the *hands*, a game the like of which had never been seen was played for their edification."—*Pall Mall Gazette*, April 17, 1884.

(2) A game at cards.

(3) A part or share in a game of cards.

"Your half-and-half players who have no objection to take a *hand*."—*Lamb: Essays of Elia; Mrs. Battle.*

(4) One of the players in a game of cards; the eldest hand is the player next after the dealer, in the order in which the cards are dealt.

(5) A single round in a game, in which all the cards dealt are played.

5. *Tennis, Rackets, &c.*: A player's turn to serve the ball.

6. *Commercial:*

(1) Five of any article of sale: as, five oranges or five herrings make a *hand*.

(2) A bundle or head of tobacco leaves tied together without the stem being stripped.

(3) A shoulder of pork. (*Mrs. Gaskell: Sylvia's Lovers*, ch. iv.)

B. *As adjective:*

I. Belonging to or used by the hand; common in composition.

(2) *Of time*: (*Shakesp.: Macbeth*, v. 4).

* 2. *At any hand*: On any account; at any rate.

"Let him fetch off his drum *at any hand*."
Shakesp.: All's Well That Ends Well, iii. 6.

* 3. *At no hand*: On no account.

4. *At the hand or hands of*: From, through; by the agency or medium of.

"Let Tamar dress the meat in my sight, that I may eat it *at her hand*."—*2 Samuel* xiii. 5.

5. *At first hand*: Directly from the producer or originator; fresh, new, direct.

6. *At second hand*: From an intermediate source; not directly.

7. *By hand*:

(1) With the hands, as distinguished from the use of instruments or machines: as, a drawing done *by hand*.

(2) By the medium of a messenger or agent: as, To send a letter *by hand*.

(3) A term applied to the artificial rearing of children or the young of the lower animals.

"Be grateful, boy, to them which brought you up *by hand*."—*Dickens: Great Expectations*, ch. iv.

8. *For one's own hand*: For one's self; for one's own account or interest.

9. *From hand to hand*: From one person to another.

"Lapse *from hand to hand*."
Tennyson: Talking Oak, 258.

* 4. Anything which hangs from another body, as fruit from a tree.

"A storm, or robbery, call it what you will,
Shook down my mellow *hangings*, nay, my leaves."
Shakesp.: Cymbeline, iii. 3.

II. *Technically:*

1. *Physiol.:* In cases of hanging, death seldom results from pure asphyxia, but is usually in some degree owing to apoplexy and injury to the spinal cord. In attempted suicide, bleeding from the jugular vein and artificial respiration may be tried for resuscitation. In difficulty of inducing artificial respiration, laryngotomy and tracheotomy should be performed, and the lungs inflated through the opening in the neck. In judicial hanging, the noose ought to be so adjusted as to produce immediate dislocation of the spinal column, death in that case being instantaneous.

2. *Law:* Hanging is the penalty of wilful murder. Hanging, drawing, and quartering were once the punishment of treason.

hanging-bird, *s.*

Ornith.: The Baltimore Oriole. [Hang-nest.]

hanging-bracket, *s.* The same as Hanger, I. 3.

Hăn-sē-ăt'-ĭc, *a.* [HANSE.] Of or pertaining to the Hanse-towns, or their confederacy.

Hanseatic-league, *s.*

Hist.: A celebrated confederacy formed in the thirteenth century between certain commercial towns, with the view at once of restraining the rapacity of kings and nobles, and clearing the Elbe, the German Ocean, and other places from the pirates and robbers by which they were then infested. It began on a small scale in 1239, when Hamburg entered into an alliance with Ditmarsch and the district of Hadeln, Lübeck in 1241 being added to the League. Brunswick came into it in 1247, other towns following at irregular intervals. The confederated towns or cities were arranged in four divisions, the chief places in each being Lübeck, Cologne, Brunzwig, and Danzig. Becoming powerful, the League concluded treaties with monarchs, raised troops, and made war, as if it had been an independent political power, as the East India Company was destined to do in future years. At the time when the League flourished most, it consisted of eighty-five confederated towns. In 1266 it established a factory in London, called the Steelyard. It had other factories over Europe, the chief being at Bruges, Novogorod, and Bergen. It gave a powerful impulse to commerce, and when in 1631 it in large measure fell to pieces, it left behind various free republics which continued for a long period of time.

"*Happily* the principles of human nature afford abundant security that such theories will never be more than theories."—*Macaulay: Hist. Eng.*, ch. ii.

3. In a happy manner, state, or condition; in a state of happiness.

"Indeed it is impossible to live without caring, at least, to live *happily*."—*Sharp: Sermons*, vol. iv., ser. 1.

4. With address, skill, or dexterity; gracefully.

hăp'-pĭ-nĕss, * **hap-pi-nesse,** *s.* [Eng. *happy*; *-ness.*]

1. Good luck, good fortune.

2. The quality or state of being happy; felicity; a state in which all desires are satisfied; the pleasurable sensations arising from the gratification of all desires, and the enjoyment of pleasure without pain.

"Any condition may be denominated happy in which the amount or aggregate of pleasure exceeds that of pain: and the degree of *happiness* depends upon the quantity of this excess."—*Paley: Moral Philosophy*, bk. i., ch. vi.

3. Fortuitous elegance, unstudied grace.

¶ *Happiness* admits of degrees, since every individual is placed in different circumstances, either of body or mind, which fit him to be more or less *happy*. *Felicity* is not regarded in the same light; it is that which is positive and independent of all circumstances: domestic *felicity* and conjugal *felicity* are regarded as moral enjoyments, abstracted from everything which can serve as an alloy. (*Crabb: Eng. Synon.*)

hăp'-pit, happed, *a.* [Hap (1), *v.*]

hăp'-pȳ, * **hap-pie,** * **hap-pye,** *s.* [Eng. *hap* = chance, luck; *-y.*]

Milton: P. L., xii. 587.

7. Well suited for any purpose or occasion; apt, felicitous.

"Her pencil drew whate'er her soul designed,
And oft the *happy* draught surpassed the image in her mind."
Dryden: To Mrs. Killigrew.

8. Favourable, fortunate, lucky, prosperous: as, A *happy* omen.

"Ports and *happy* havens."
Shakesp.: Richard II., i. 3.

9. Dexterous, ready, skilful.

¶ *Happy* and *fortunate* are both applied to the external circumstances of a man; but the former conveys the idea of that which is abstractedly good, the latter implies rather what is agreeable to one's wishes. A man is *happy* in his marriage, in his children, in his connections, and the like: he is *fortunate* in his trading concerns. *Happy* excludes the idea of chance; *fortunate* excludes the idea of personal effort; a man is *happy* in the possession of what he gets; he is *fortunate* in getting it. In the improper sense they bear a similar analogy. (*Crabb: Eng. Synon.*)

¶ (1) *Happy man be his dole:* [Dole, *s.*].

(2) *Happy-go-lucky:* Careless, thoughtless, improvident.

"In the *happy-go-lucky* way of his class."—*Reade: Never Too Late To Mend*, ch. xv.

happy-family, *s.* An assemblage of animals of diverse and even opposite habits and propensities living together peaceably.

* **hăp'-pȳ,** *v.t.* [Happy, *a.*] To make happy, to felicitate.

23. Done in, or given to, excess: as, *hard* drinking, a *hard* drinker.

II. *Technically:*

1. *Physics:* Offering a relatively great resistance to any other thing brought in contact with it. [Hardness.]

2. *Grammar:*

(1) Applied to the sound of *c*, as in *can*, *g*, as in *goat*, or *ch*, as in *chemical*, as distinguished from the sounds of the same letters in *city*, *gin*, and *church*.

(2) Applied to the consonants *f*, *k*, *p*, *s*, and *t*, and the sound of *th* in *thin*, which can be pronounced without any voice sound, as distinguished from the consonants *v*, *g* (as in *gate*), *b*, *d*, *z*, and *th* in *thine*, which cannot be so pronounced.

3. *Art:* This term, as applied to a work of art, designates that rigidity of drawing which characterises the works of the mediæval artists. It is also applied to colouring, when a want of softness and delicacy is apparent in a picture. It is generally used to designate a style which rejects the grace, and too rigidly adheres to the mere mechanism of art.

4. *Manège:* Insensible to the action of the bit: as, a *hard* mouth.

B. *As adverb:*

I. *Ordinary Language:*

1. With force, energy, or vigour; vigorously, energetically, earnestly, diligently.

2. A ford or passage across a river.

3. A hard bottom of gravel laid across a swamp or at a muddy boat-landing.

4. A pier or landing-place on a river.

5. An esplanade or paved roadway by the seaside.

¶ (1) *Hard* and *solid* respect the internal constitution of bodies, and the adherence of the component parts; but *hard* denotes a much closer degree of adherence than *solid*. Wood is always a *solid* body, but it is sometimes *hard*, and sometimes soft: water, when congealed, is a *solid* body, and admits of different degrees of *hardness*. In the improper application, *hardness* is allied to insensibility; *firmness* to fixedness; *solidity* to substantiality: a *hard* man is not to be acted upon by any tender motives; a *firm* man is not to be turned from his purpose; a *solid* man holds no purposes that are not well founded.

(2) *Hard* is a much stronger term than *difficult*, which signifies merely not easy. *Hard* is therefore positive, and *difficult* negative. A *difficult* task cannot be got through

without exertion, but a *hard* task requires great exertion. (*Crabb: Eng. Synon.*)

¶ (1) *Hard by:* Close or near at hand (*adv. & prep.*).

(2) *Hard up:* In want of money; needy; in urgent want of something.

"And for my pillow stuffed with down,
The *hardish* hillocks have supplied my turn."
Greene: Alphonsus, iv.

***har-dle,** *s.* [HURDLE.]

hard-lў, *adv.* [Eng. *hard*; *-ly.*]

1. In a hard or difficult manner; with difficulty, with trouble; not easily.

"These oracles are *hardly* [hardily] attained,
And *hardly* understood."
Shakesp.: 2 Henry VI., i. 4.

2. With rigour, severity, or harshness; rigorously, oppressively.

"Many men believed that he was *hardly* dealt with."—*Clarendon.*

* 3. Severely, unfavourably, unkindly.

"The grieved commons
Hardly conceive of me."
Shakesp.: Henry VIII., i. 2.

4. Harshly, unwelcomely.

"Such information comes very *hardly* and harshly to a grown man; and, however softened, goes but ill down."—*Locke.*

5. Coarsely, roughly; not softly or delicately.

"Heaven was her canopy, bare earth her bed;
So *hardly* lodged."
Dryden: Ovid; Metamorphoses, i.

6. Scarcely, barely.

"An asperity *hardly* to have been expected from a man of so much sense."—*Macaulay: Hist. Eng.*, ch. xii.

* 8. Confidently, hardily; with confidence or hardihood.

* 9. Grudgingly, reluctantly, unwillingly; with a feeling of ill-will.

"If I unwittingly, or in my rage,
Have aught committed that was *hardly* borne."
Shakesp.: Richard III., ii. 1.

* 10. Excessively, to excess.

"The deceased had been drinking *hardly*."—*Daily News*, August 8, 1891.

hard'-nĕss, * hard-nesse, *s.* [Eng. *hard*; *-ness.*]

I. *Ordinary Language:*

1. The quality or state of being hard, solid, or compact; solidity, density, firmness; compactness; power of resisting penetration or separation.

"*Hardness* is a firm cohesion of the parts of matter that make up masses of a sensible bulk, so that the whole does not easily change its figure."—*Locke.*

2. Difficulty of accomplishment.

"Oh, *hardness* to dissemble!"
Shakesp.: Othello, iii. 4.

3. Laboriousness, toilsomeness, fatigue, difficulty; as labour, hardwork, toil.

"Enured to *hardnesse* and to homely fare."
Which them to warlike discipline did trayne."

9. Sternness, inflexibility.

10. Unreasonableness, injustice.

11. Sourness, acidity, roughness.

12. That quality in water which renders it unfit for washing purposes.

13. Niggardliness, parsimony.

II. *Technically:*

1. *Art:* Stiffness, harshness, want of refinement; academic drawing rather than artistic feeling.

"Sculptors are obliged to make many ample folds, which are insufferable *hardnesses*, and more like a rock than a natural garment."—*Dryden: Dufresnoy.*

2. *Physics:* The resistance which bodies offer to being scratched or worn by others. It is not the same as resistance to compression or to a blow. Thus glass is harder than wood, but wood resists a stroke from a hammer which would splinter glass. The relative hardness of bodies is ascertained by testing which will scratch the other.

3. *Min.:* The scale of hardness is the following: Talc, rocksalt or gypsum, calcspar, fluorspar, apatite, felspar, quartz, topaz, corundum, diamond. When in this work it is said that a mineral has a hardness of 5, it means that it is just as hard as apatite. The scale is that of Mohs.

***har'-dŏck, * hor'-dŏck,** *s.* [A.S. *hâr* = boar, and Eng. *dock.*] A kind of dock with whitish leaves; the hoar-dock; probably the Burdock (q.v.).

"*Hardocks*, hemlock, nettles, cuckoo-flowers."
Shakesp.: Lear, iv. 4.

hards, * heord-en, * herds, * hyrdys, *s. pl.* [A.S. *heordan.*] The coarse or refuse part of flax.

"As a deed sparcle of bonys, ether of *herdis* of flex."—*Ancren Riwle*, p. 418.

hard'-ship, *s.* [Eng. *hard*; *-ship.*]

1. Toil, fatigue, hard labour; whatever oppresses the body.

"Yet worn he seemed of *hardship* more than years;
And pale his cheek with penance, not with fears."
Byron: Corsair, ii. 3.

2. Oppression, injury, injustice.

¶ For the difference between *hardship* and *grievance*, see GRIEVANCE.

hard'-wāre, hard'-wäre-măn, *s.* [Eng. *hardware*; *-man.*] A term including articles of metal for sale, such as cooking utensils and mechanics' tools. Sometimes distinguished as builders' hardware, domestic hardware, and tools. The great seats of the manufacture of hardware are Birmingham and Sheffield.

"One William Wood, an *hardwareman*, obtains by fraud a patent in England to coin copper to pass in Ireland."—*Swift: Drapier's Letters.*

hard-wĭck'-ĭ-ą, *s.* [Named by Roxburgh after Major-Gen. Thos. Hardwick, F.R.S., F.L.S., &c.]

Bot.: A genus of Leguminous plants, sub-order Cæsalpinieæ, tribe Cynometreæ. *Hardwickia binata*, an Indian tree, is described by Sir Joseph Hooker as a most elegant tree, tall, erect, with elongated coma, and the branches pendulous. One was 120 feet high, and "as handsome a monarch of the forest as I ever saw." (*Hooker: Himalayan Journals*, i. 50, 54.)

har'-dў, * har-di, *a.* & *s.* [O. Fr. *hardi*, properly the pa. par. of *hardir* = to make bold; O. H. Ger. *hartjan*; M. H. Ger. *herten* from O. H. Ger. *harti*; Ger. *hart* = hard.]

A. *As adjective:*

* 1. Bold (a sense which it still retains in the familiar phrase fool*hardy*).

"'Hap helpeth *hardy* man alway,' quoth he."
Chaucer: Legend of Good Women.

* 2. Overconfident; full of confidence or assurance; bold, stubborn.

* 3. Strong, hard, firm, compact.

"Is a man confident of his present strength? An unwholesome blast may shake in pieces his *hardy* fabric."—*South: Sermons.*

* 4. Inured to fatigue or toil; capable of bearing fatigue, exposure, or hardships.

"The Bactrians bee the most *hardyest* people among those nacions."—*Brende: Quintus Curtius, fo. 66.*

5. Capable of bearing exposure to the weather.

"Our casques the leopard's spoils surround,
With Scotland's *hardy* thistle crowned."
Scott: War Song.

B. *As substantive:*

Forging: A chisel or fuller having a square shank for insertion into a square hole in an anvil, called a hardy-hole, which is sometimes occupied by a smaller anvil, fullering-tool, or caulking-swage, in which in a steel-faced plate is sunk a vertical groove, and the faces on each side of the groove are inclined, so as to give the proper taper to the inner sides of the caulk when the horseshoe is placed within the groove.

hardy-hole, *s.* [HARDY, B.]

hardy-shrew, *s.* The shrew-mouse (q.v.).

***hard-yn,** *a.* [Eng. *hard*; *-en.*] Made of coarse flax or hards.

hăre, *s.* [A.S. *hara*; Dan. & Sw. *hare*; Icel. *heri*; Dut. *haas*; N. H. Ger. *hase*; O. H. Ger. *haso*; Sanse. *ça̧ça* = a hare; *ça̧* = to jump.]

1. *Zoology:*

(1) *Sing.:* Various species of Lepus, specially *Lepus timidus*, found in most parts of Europe. It does not make a burrow like the rabbit, but lurks in a seat or form, which it varies according to the season, and in severe weather betakes itself to the woods. It is, properly speaking, a nocturnal animal and is very prolific. There are about a dozen different species in the United States and other parts of America, among them the Polar, Northern, Swamp, and Marsh Hares.

(2) *Pl.:* The family Leporidæ (q.v.).

2. *Scrip.:* The hare of Scripture (Hebrew אַרְנֶבֶת (*arnebheth*). Lev. xi. 6 and Deut. iv. 7) seems to be correctly rendered. It is here arranged with the ruminants, perhaps on account of a certain movement of the lips like that of those animals, but modern science places it among the rodents, with which its anatomical construction entirely agrees.

3. *Law:* The hare is a beast of warren, protected by the game laws.

4. *Astron.:* Lepus, one of the fifteen ancient southern constellations.

¶ *To make a hare of:* To render a person ridiculous; to expose the ignorance of any person.

"What *a hare* Mat *made of* him . . . and did not lave him a leg to stand on!"—*Carleton: Traits & Stories; The Hedge-school.*

hare-kangaroo, *s.*

Bot.: (1) *Ochroma Lagopus*, (2) *Trifolium arvense*, (3) [*Hare's-foot-fern*].

Hare's-foot fern:

Bot.: *Davallia canariensis.* The resemblance to a hare's foot is in its scaly creeping rhizome.

hare's-lettuce, hare's-palace, *s.*

Bot.: *Sonchus oleraceus.* [SONCHUS, SOW-THISTLE.]

hare's-tail, hare's-tail grass, *s.*

Bot.: *Lagurus ovatus.* It is a soft, hairy, annual tufted grass, found in Guernsey and in continental Europe.

• **hāre,** *v.t.* [HARE, *s.*] To fright, to harass, to worry, to excite.

"To *hare* and rate them, is not to teach but vex them."—*Locke: On Education*, § 67.

hāre'-bĕll, hāir'-bĕll, *s.* [Eng. *hare* or *hair*, and *bell.* Hooker & Arnott call the plant *hair-bell*; Sir Joseph Hooker *harebell.*]

HAREBELL.

Bot.: *Campanula rotundifolia*, the round-leaved bell-flower. A plant with large bell-shaped blue flowers, and leaves of three forms, the round root-leaves, from which the name *rotundifolia* was given, withering so soon that few people notice their existence; the lower cauline leaves lanceolate, the upper ones linear. Common on pastures, heaths, and tops of walls, especially in hilly regions in various countries of Northern Europe. Also found in the United States and the northern parts of Asia and Africa. It is also called Bluebell.

"God told him it was June; and he knew well,
Without such telling, *harebells* grew in June."
E. Browning: Paracelsus, iii.

A. *Intrans.:* To listen, to hear, to heed, to hearken.

"His men below cryde out to him, and prayed
Him to retire, but he no whit would *harke*."
Harrington: Orlando Furioso, bk. xxxix.

B. *Trans.:* To listen to.

"This king sat thus in his nobley,
Herking his ministralles hir thinges pley."
Chaucer: C. T., 10,892.

¶ The word is now but little used, except in the imperative mood as an interjection or ejaculation. It is also used in combination as a cry to stimulate or direct hounds: as, *Hark forward! Hark away! Hark back!* is used to call hounds back when they have passed the scent; and, figuratively, the verb to *hark back* is used in the sense of returning to some point or matter from which a temporary digression has been made.

harl, *s.* [Etym. doubtful, but perhaps a corruption of *hards* (q.v.).]

I. The filaments of flax; any filamentous substance.

"The general sort are wicker hives, made of privet, willow, or *harl*."—*Mortimer.*

Chem.: $C_{13}H_{14}N_2O$. An alkaloid contained in *Peganum Harmala*, a plant growing in the Crimea. The seed coating contains Harmaline and Harmine. They are extracted by dilute sulphuric acid, and then precipitated by a solution of NaCl., in the form of chlorides, the alkaloids may be separated by adding ammonia, the harmine being first precipitated. Harmaline can be converted into harmine by the action of oxidizing agents. Harmaline forms yellow bitter salts. (*Watts: Dict. Chem.*)

har-măt'-tan, *s.* [Arab., said to be originally from the Fanti language, in Western Africa; Fr. *harmattan;* Sp. *harmatan;* Ital. *armatano.*] A dry hot wind blowing from the interior of Africa to the Atlantic, between Cape Verde, in 14° 43' N., and Cape Lopez, 0° 36' S., in December, January, and February. It is generally attended by fog, through which the sun shines red. It hurts vegetation and prejudicially affects man, drying up the eyes, the mouth, &c., even peeling off the skin. On the other hand, it tends to terminate fever and dysentery, and to mitigate cutaneous diseases. It corresponds to the sirocco of Italy, and, to a certain extent, to the Indian and Australian hot wind. [HOT WIND, SIROCCO.]

har'-mĕl, *s.* [Arab.]

Bot.: Peganum Harmala, a strongly scented plant, common in Southern Europe and Asia Minor, and introduced into English gardens. The Turks use the seeds as a spice and to make a red dye.

harm'-fŭl, * **harm'-fŭll,** * **harme-full,** *a.* [Eng. *harm; -ful(l).*] Hurtful; injurious; detrimental; causing or tending to cause harm or damage.

"But not without that *harmful* stroke."
Shakesp.: Lear, iv. 2.

harm'-fŭl-lў, * **harme-ful-ly,** * **harm-ful-lie,** *adv.* [Eng. *harmful; -ly.*] In a harmful, hurtful, or injurious manner; so as to cause harm, hurt, or injury; hurtfully; injuriously.

"Spending his time not only vainly, but *harmfully*, in such kind of exercise."—*Ascham: Schoolmaster*, pt. ii.

harm'-fŭl-nĕss, *s.* [Eng. *harmful; -ness.*] The quality or state of being harmful; hurtfulness.

har'-mīne, *s.* [Eng., &c. *harm(aline); -ine.*]

Chem.: $C_{13}H_{12}N_2O$. An alkaloid contained in *Peganum Harmala*, along with Harmaline (q.v.). Harmine is insoluble in water and forms colourless salts.

harm'-lĕss, * **harme-less,** * **harm-les,** *a.* [Eng. *harm; -less.*]

1. Free from power, tendency, or desire to harm; not hurtful or injurious; innocuous; innocent.

"So Eden was a scene of *harmless* sport,
Where kindness on his part who ruled the whole
Begat a tranquil confidence in all."
Cowper: Task, vi. 364.

2. Free from harm, hurt, or damage; unhurt, uninjured, undamaged: as, To hold a person *harmless.*

harm'-lĕss-lў, * **harm-les-ly,** *adv.* [Eng. *harmless; -ly.*] In a harmless manner; innocently; innocuously; without causing or receiving injury.

"Unnumbered pleasures *harmlessly* pursued."
Cowper: Retirement, 784.

harm'-lĕss-nĕss, *s.* [Eng. *harmless; -ness.*] The quality or state of being harmless; innocuousness; innocence.

"Its *harmlessness* or malignity is the only matter of enquiry."—*Warburton: Divine Legation.* (Pref.)

har-mō'-nĭ-ą, Har-mō'-nĭ-ą, *s.* [Of the form *harmonia;* Gr. ἁρμονία (*harmonia*), here = a means of joining, a fastening; of the form *Harmonia* (Def. 3.).] [HARMONY.]

1. *Anat.:* The term employed to denote the simple apposition of comparatively smooth surfaces or edges, as in the case of the two superior maxillary bones. (*Quain.*)

2. *Astron.* (*Of the form* Harmonia): An asteroid, the fortieth found. It was discovered by Goldschmidt on March 1, 1856.

3. *Class. Mythol.:* A daughter of Mars and Venus, who became the wife of Cadmus. Called also Harmonia and Hermione.

har-mŏn'-ĭc, har-mŏn'-ĭck, *a.* & *s.* [Fr. *harmonique*, from Lat. *harmonicus;* Gr. ἁρμονικός (*harmonikos*), from ἁρμονία (*harmonia*) = harmony (q.v.).]

A. *As adjective:*

I. *Ordinary Language:*

1. Of or pertaining to harmony or music.

2. Concordant; musical; harmonious; consonant.

"In full *harmonic* number joined."
Milton: P. L., iv. 687.

II. *Technically:*

1. *Math.:* Applied to numbers, terms of certain ratios, proportions, &c., which have certain relations or properties resembling those of musical concords. [HARMONIC-PROPORTION.]

2. *Music:* Applied to the sounds produced by a vibrating string or column of air, when it is sub-divided into its aliquot parts.

B. *As substantive:*

Music:

1. One of the sounds produced by a vibrating string or column of air, when it is sub-divided into its aliquot parts.

2. An artificial tone produced in a stringed instrument (1) by varying the point of contact with the bow, or (2) by slightly pressing the string at the nodes or divisions of its aliquot parts (½, ⅓, ¼, &c.) In wind instruments, harmonics are produced by varying the intensity of the air-current from the mouth. (*Grove.*)

"These accessary sounds, which are caused by the aliquots of a sonorous body vibrating at once, are called *harmonics*."—*Sir W. Jones: Essay on the Imitative Arts.*

3. (*Pl.*) The science or doctrine of musical sounds.

harmonic-interval, *s.*

Music: The distance between two chords or between two consonant notes.

harmonic-proportion, *s.*

Math.: [HARMONICAL-PROPORTION].

harmonic-scale, *s.*

Music: The scale formed by a series of natural harmonics.

harmonic-stops, *s. pl.*

Music: Organ stops, both flute and reed, having tubes twice the normal length, but pierced with a small hole in the middle. Harmonic flute stops are of great purity and brilliancy: they are of eight or four feet pitch. Harmonic piccolos are of two feet pitch. Harmonic reed stops (tromba, tuba, trumpet, &c.) are generally on a high pressure of wind, one of the great advantages of all harmonic stops being that they will take a very strong pressure of wind without overblowing. The fact is, that the harmonic-tube, having two synchronous vibrating columns of air, partakes of the nature of a pipe already overblown to its first harmonic, the octave.

harmonic-triad, *s.*

Music: The chord of a note consisting of its third and perfect fifth; a common chord.

har-mŏn'-ĭ-cą, *s.* [Gr. ἁρμονικός (*harmonikos*), from ἁρμονία (*harmonia*) = harmony.]

Music:

1. A musical instrument formed of a number of glasses which are tuned by filling them more or less with water, and are played by touching them with the dampened finger. The less the quantity of water, the lower is the tone of the scale. Called also musical glasses. The instrument is said to have been invented by a German, and was improved by Dr. Benjamin Franklin. A stringed form is ascribed to Stein (1788). Dr. Franklin's consisted of a nest of hemispherical glasses, tuned, and arranged on a revolving spindle impelled by a treadle, the tips of the fingers being applied to the edges of the glasses to produce the tones.

2. A small wind instrument. A mouth-organ. At the edge is a series of holes which conduct the breath to free reeds, like those of an accordeon.

har-mŏn'-ĭc-ąl, *a.* [Eng. *harmonic; -al.*] The same as HARMONIC (q.v.).

"They will soon conclude, . . . that the *harmonical* soul . . . is merely a fiction and a dream."—*Clarke: Fifth Reply to Leibnitz.*

harmonical-curve, *s.*

Math.: A curve into which a musical chord is supposed to be inflected when put into motion so as to excite a sound.

harmonical-interval, *s.*

Music: [HARMONIC-INTERVAL].

harmonical-mean, *s.*

Math.: A term applied to a mean between two quantities, as A and B, when it is double a fourth proportional to the sum of the quantities and the quantities themselves: thus $\frac{AB}{A+B}$ being the fourth proportional to A+B : A : : B, then $\frac{2AB}{A+B}$ is the harmonical mean.

harmonical-proportion, *s.*

Math.: The relation between four quantities when the first is to the fourth as the difference between the first and the second to the difference between the third and fourth: that is when A D : : A ~ B : C ~ D. So also three quantities are said to be in harmonical proportion when the first is to the second as the difference between the first and second to the difference between the second and third.

harmonical-series, *s.*

Math.: A series of numbers in continued harmonical proportion.

har-mŏn'-ĭc-ąl-lў, *adv.* [Eng. *harmonical; -ly.*]

1. *Ord. Lang.:* In an harmonical manner;

melodiously; harmoniously; suitably, fitly, by harmony.

"Intending to declare *harmonically* the harmony of the four elements of the soul."—*P. Holland: Plutarch*, p. 1,022.

2. *Math.*: In harmonical progression: as, a line *harmonically* divided.

har-mŏn'-ĭ-chord, *s.* [Gr. ἁρμονικός (*harmonikos*) = harmonical, and χόρδη (*chordē*) = a chord.]

Music: An instrument played like a pianoforte, but sounding like a violin. The tone is produced by the pressure of the keys, which sets a revolving cylinder of wood, covered with leather, and charged with rosin, in action over the strings. It has also been called piano-violin, violin-piano, tetrachordon, &c.

har-mŏn'-ĭ-çĭ, *s. pl.* [Gr. ἁρμονικός (*harmonikos*) = harmonical.] The followers of the Pythagorean system of music as opposed to that taught by Aristoxenus. They were also called Musici. The Aristoxenians viewed music as an art governed by appeal to the ear; the Pythagoreans, as a science founded on physical laws.

har-mŏn'-ĭ-cŏn, *s.* [Gr. neut. sing. of ἁρμονικός (*harmonikos*) = harmonical.]

1. An instrument only used as a toy; it consists of free reeds enclosed in a box in such a way that inspiration produces one set of sounds, respiration another.

2. A musical instrument consisting of a large barrel-organ, containing, in addition to the ordinary pipes, others to imitate the different wind-instruments, and an apparatus to produce the effects of drums, triangles, cymbals, &c., so that the combined sounds produce the effect of a military band.

¶ *Chemical harmonicon:* An open tube, the air of which is made to sound by means of a luminous jet of hydrogen, coal-gas, &c., placed beneath the tube. The sound is produced by a series of small explosions which take place as the oxygen of the air combines with the hydrogen of the jets.

har-mō'-nĭ-oŭs, *a.* [Fr. *harmonieux*, from *harmonie* = harmony (q.v.).]

1. Of or pertaining to musical harmony or concord; musically concordant or consonant.

"Your songs confound
Our more *harmonious* notes."
Cowper: Task, III. 787.

2. Having the several parts adapted and proportioned to each other; symmetrical.

"By an *harmonious* sympathy promote the perfection and good of the whole."—*Glanvill: Vanity of Dogmatizing*, ch. v.

3. Living or acting in concord, peace, or friendship; agreeing in action or feeling.

har-mō'-nĭ-oŭs-lў, *adv.* [Eng. *harmonious*; *-ly.*]

1. In a harmonious manner; melodiously; with harmony or concord of sound.

2. With just adaptation and proportion of parts to each other; symmetrically.

"How came the Asterisms of the same nature and energies to be so *harmoniously* placed at regular intervals."—*Bentley: Sermons*, iii.

3. In harmony or concord; with agreement or union of feeling and action.

"To see publick and private virtues not dissonant and jarring, and mutually destructive, but *harmoniously* combined."—*Burke: Present Discontents.*

har-mō'-nĭ-oŭs-nĕss, *s.* [Eng. *harmonious*; *-ness.*] The quality or state of being harmonious; concord, consonance, symmetry.

har-mŏn'-ĭ-phŏn, *s.* [Gr. ἁρμονία (*harmonia*) = a fitting or adapting, harmony, and φώνη (*phōnē*) = sound.]

Music: A small instrument with a keyboard, in which the sounds are produced by small metallic tongues, acted upon by air blown through a flexible tube. It consists of a series of free reeds similar to those used in the harmonium, placed in a tube shaped like a clarinet. The compass of the instrument is two octaves with intermediate semitones; the keys are arranged in a manner similar to those of a pianoforte, that is to say, all the notes of the normal scale are in one row and the chromatic notes in another.

har'-mŏn-ĭst, *s.* [Eng. *harmon(y)*; *-ist.*]

I. *Ordinary Language:*

1. One who sings or plays in harmony; a writer on harmony; a musical composer.

2. One who treats of and shows the harmony or agreement between corresponding passages of different authors. [HARMONY, ¶.]

"Of which obedience, his most precious death is, by our most excellent *harmonist*, declared to be the consummation."—*Nelson: Life of Dr. George Bull.*

II. *Ch. Hist.* (*Pl.*): A sect founded by two brothers, George and Frederick Rapp, who emigrated from Wurtemburg to the United States in 1803. Soon afterwards they founded the town of Harmony in Pennsylvania. In 1815 they built New Harmony in Indiana. The name of this settlement became celebrated through the place having been purchased in 1823 or 1824 by Robert Owen as a suitable locality for carrying out his views as to the reorganization of society. In 1825 the Harmonists removed to a new settlement, which they called Economy. They have community of goods, and consider marriage a civil contract.

† **har-mŏn-ĭst'-ĭc,** *a.* [Eng. *harmonist*; *-ic.*] Of or pertaining to harmony; comparative.

"The *harmonistic* exegesis of the anti critical school."—*W. Robertson Smith: Old Testament*, lect. iii., p. 67.

* **har'-mŏn-ĭte,** *s.* [Eng. *harmon(y)*; *-ite.*] The same as HARMONIST (q.v.).

har-mō'-nĭ-ŭm, *s.* [HARMONY.]

Music: A keyed wind instrument whose tones are produced by the forcing of air through free reeds. The better class of harmoniums have several sets of vibrators, of different pitch, and of various qualities of tone. The stop called expression is a mechanical contrivance by which the waste-valve of the bellows is closed, so that the pressure of the foot has direct influence on the intensity of the sounds produced. A tremolo is produced by causing the wind to quaver as it passes through the reeds. The vox angelica gives a delicate undulating tone, which is produced by two sets of vibrators to each note tuned slightly apart.

* **har-mō'-nĭ-ŭm-ĭst,** *s.* [Eng. *harmonium*; *-ist.*]

Music: A player or performer upon the harmonium.

har-mŏn-ĭ-zā'-tion, *s.* [Eng. *harmoniz(e)*; *-ation.*] The act of harmonizing; the state of being harmonized.

har'-mŏn-ĭze, *v.t.* & *i.* [Eng. *harmon(y)*; *-ize.*]

A. *Transitive:*

1. To make harmonious; to combine, set, or arrange according to the laws of harmony or counterpoint.

"A music *harmonizing* our wild cries."
Tennyson: Sea Dreams, 247.

2. To make melodious, harmonious, or pleasing to the ear.

3. To adjust, set, or arrange in proper proportions; to arrange so that the several parts are justly and fitly adapted and suited to each other.

"And bluest skies that *harmonize* the whole."
Byron: Childe Harold, ii. 48.

4. To make in concord or agreement with other things.

"To seek the distant hills, and there converse
With Nature: there to *harmonize* his heart."
Thomson: Summer, 1,332.

5. To restrain, to rein in, to keep in subjection.

"And every passion aptly *harmonized*."
Thomson: Summer, 467.

B. *Intransitive:*

1. To form a concord; to be in harmony or concord; to agree in sounds or effect: as, Two voices *harmonize* together.

2. To be in concord or agreement; to agree in feeling or action; to be or live in peace and concord.

3. To agree together in effect or result: as, The facts *harmonize.*

har'-mŏn-ĭz-ĕr, *s.* [Eng. *harmoniz(e)*; *-er.*]

1. One who harmonizes or arranges sounds according to the rules of harmony.

2. One who arranges or adjusts things in symmetrical order.

"The constant *harmonizer* of the whole world."—*Cudworth: Intell. System*, p. 489.

3. A harmonist.

har-mō-nŏm'-ĕ-tĕr, *s.* [Gr. ἁρμονία (*harmonia*) = harmony, and μέτρον (*metron*) = a measure.]

Music: An instrument for ascertaining the harmonic relation of sounds. It often consists of a single string with movable bridges.

har'-mŏn-ў, * **ar-mon y,** *s.* [Fr. *harmonie*, from Lat. *harmonia*, from Gr. ἁρμονία (*harmonia*) = a joining, harmony; ἁρμός (*harmos*) = a joining; ἁρω (*arō*) = to fit or join.]

I. *Ordinary Language:*

1. The just adaptation of parts to each other, so as to form a symmetrical and connected whole.

"This *harmony* of mind
Where purity and peace immingle charms."
Thomson: Summer, 550.

2. In the same sense as II. 2.

3. The science which treats of the harmonizing of sounds.

4. A melodious or harmonious arrangement of sounds; music.

"Heaven's *harmony* is universal love."
Cowper: Progress of Error, 78.

5. Concord or agreement in views, feelings, sentiments, manners, &c.; peace; friendship; unity.

"Attentive to universal *harmony*, [he] often forgets that he himself has a part to sustain in the concert."—*Goldsmith: Citizen of the World*, let. lxvi.

6. A book bringing together and showing the agreement between parallel or corresponding passages of different authors.

¶ Harmonies of the Old Testament aim at placing the several books, or portions of them, in chronological order, showing how they illustrate each other, as, for instance, what light the prophetic books shed on the historical ones, or *vice versa*. Harmonies of the New Testament have it for one leading object to compare and show the mutual consistency of the four gospels. Another is to arrange the epistles in chronological order, and use the undesigned coincidence between portions of them and the Acts of the Apostles, to illustrate and confirm the authority of both. The earliest known harmony of the gospels, is that of Tatian, a Syrian of the second century. Ammonius followed in the third, and Eusebius in the fourth. In 1537 Andreas Osiander published a similar work, as did Calvin in 1553, and other writers. Since then such harmonies have become numerous.

II. *Technically:*

1. *Anat.*: [HARMONIA, 1].

2. *Music:* A just proportion of sound; musical concord; the accordance, concord, or consonance of different sounds which pleases the ear, or a succession of such sounds called chords. In its earliest sense among the Greeks this word seems to have been a general term for music, a sense in which our own poets often use it. But from its meaning of "fitting together," it came to be applied to the proper arrangement of sounds in a scale, or, as we should say, to "systems of tuning."

"The delicacy of hearing, and taste of *harmony* has been formed upon those sounds which every country abounds with."—*Addison: Spectator*, No. 29.

¶ For the difference between *harmony* and *concord*, see CONCORD.

¶ (1) *Artificial harmony:*

Music: A mixture of discords and concord.

(2) *Close harmony:*

Music: Said when the sounds composing each chord are placed so near to each other that no sound belonging to the chord could again be interposed between any of those already present.

(3) *Figured harmony:*

Music: Said when one or more of the parts move, during the continuance of a chord, through certain notes which do not form any of the constituent parts of that chord.

(4) *Harmony of the spheres:*

Ancient Phil.: The assumption of Pythagoras that everything in the great Kosmos must be harmoniously arranged, and that since the planets were at the same proportionate distances from each other as the divisions of the monochord, in passing through the ether they must make a sound varying according to the diversity of their magnitude, velocity, and relative distance. He thought that Saturn gave the deepest and the Moon the shrillest sound, as the one was farthest from, and the other nearest to the earth. (*G. H. Lewes.*)

(5) *Natural harmony:*

Music: The harmonic triad or common chord.

(6) *Perfect harmony:*

Music: Harmony with untempered concords only.

(7) *Pre-established harmony:*

Metaph.: In the philosophy of Leibnitz a harmony established by God at the creation among all monads, which, excessively minute as they were, still represented the universe. Through their influence the body and soul act independently of each other, each obeying its own laws as freely as if the other did not exist, and yet with the same result as if they influenced each other. They are, in the opinion of Leibnitz, like two clocks, one formed to strike, the other simply to indicate the hour. They move in harmony, but each is independent of the other.

(8) *Spread harmony:*

Music: When the sounds of a chord are placed at such a wide distance from each other, that some of them might be again interposed between the sounds already present.

(9) *Tempered harmony:*

Music: When the notes are varied by temperament (q.v.).

har'-mōst, *s.* [Gr. ἁρμοστής (*harmostēs*), fr. ἁρμόζω (*harmozō*) = to fit together, to rule.]

Gr. Antiq.: The name given to those governors of the Greek Islands and towns in Asia Minor sent out into a subject or conquered town by the Lacedæmonians during their supremacy after the Peloponnesian war; the governor of a colony.

har'-mō-tōme, *s.* [Gr. ἁρμός (*harmos*) = a joint, and τομός (*tomos*) = cutting; τέμνω (*temnō*) = to cut.]

Min.: A monoclinic subtransparent or translucent brittle mineral, occurring in twin crystals; colours white, gray, yellow, red, or brown; streak, white; hardness, 4·5; sp. gr., 2·44 to 2·45. Compos.: silica, 46·10 to 48·49; alumina, 15·24 to 17·65; baryta, 19·12 to 21·60; water, 13 to 15·24. It is found in amygdaloid phonolite, trachyte, in gneiss, and in metallic veins. Morvenite is a variety of it. Occurs at Strontian, in Argyleshire, in Dumbartonshire, in Bohemia, the Hartz Mountains, Norway, &c.

harn, *s.* & *a.* [A.S. *heordan.*] [Hards.]

A. *As subst.:* Very coarse linen.

"Her cutty sark o' Paisley *harn.*"
Burns: Tam O'Shanter.

B. *As adj.:* Made of flax hards; coarse.

"And a certain man drew a bow at a venture, and smote the king of Israel between the joints of the *harness.*"—*1 Kings* xxii. 34.

3. The gear or tackle by which a horse or other animal is yoked to and made to draw a vehicle or the like; the working gear of a horse or other animal of draught.

"Or wilt thou ride? Thy horses shall be trapp'd,
Their *harness* studded all with gold and pearl."
Shakesp.: Taming of the Shrew, Ind. ii.

4. The apparatus in a loom by which the sets of warp-threads are shifted alternately to form the shed. The harness of a loom is termed the mounting; and the whole apparatus concerned in the motions of the warp-threads is the shedding. [Loom.]

* 5. The salt beef issued to men in the Navy and the merchant service. It was so called either from a belief that it was prepared from horse-flesh, or from its extreme toughness. Called also Salt-horse.

℞ *To die in harness:* To spend one's life to the last in one's business, profession, or occupation.

*** harness-bearer, * harness-bear-er,** *s.* An armour-bearer.

"Vellocatus his servant and *harnesse-bearer.*"—*Speed: Great Britaine,* bk. v., ch. vi., § 12.

harness bell, *s.* A small bell, usually of globular form, and carrying a bullet, attached to some part of the harness to produce a jingling sound; a sleigh-bell.

harness-board, *s.*

Weav.: The compass-board of a loom, having holes through which pass the neck twines.

harness-cask, harness-tub, *s.*

Naut.: A large cask or tub with a rim cover, containing a supply of salt meat for immediate use.

harness-clamp, *s.*

Sadd.: A kind of vice used to hold leather while being stitched.

harness-currier, *s.* One who prepares or dresses leather for harness or saddlery purposes.

harness-hook, *s.*

1. A hook or bracket on which harness is hung.

2. A check-rein hook on the gig-saddle.

harness-leather, *s.* A kind of leather from which harness is made. It is blacked on the grain side.

harness-maker, *s.* One who makes harness, saddlery, &c.

harness-pad, *s.* A lining or soft wad beneath a saddle to keep the harder portions from galling the back of the animal.

harness-plater, *s.* A worker in electro-plating, who plates the metal-work of harness.

harness-room, *s.* A room attached to a stable, warmed by a stove, and used for putting away harness.

harness-saddle, *s.* The part of the harness which rests across the back, and to which the girthing portions are attached. Upon it are the terrets and check-rein hook, and from it proceeds the back-strap, which reaches to the crupper.

harness-snap, *s.* A hook for attaching the reins to the bit-rings, the breast-strap to the hame-rings, &c.; a snap-hook.

harness-tub, *s.* [Harness-cask.]

harness-weaver, *s.* A weaver employed in the manufacture of the more complicated patterns of shawls, &c. (*Scotch.*)

har'-nĕss, ***har-nesche,** ***har-nesse,** *v.t.* [O. Fr. *harnascher.*] [Harness, *s.*]

* 1. To arm; to dress or equip in armour or arms.

"Those that sleep in Jesus shall God bring with Him, and *harness* them with the bright armour of light and immortality."—*H. More: Mystery of Godliness,* bk. iv., ch. xviii.

* 2. To equip or fit out for defence; to arm.

"They saw the camp of the heathen, that it was strong and well *harnessed,* and compassed round about with horsemen."—*1 Maccabees* iv. 7.

3. To put harness on, as on a horse.

"My horse is *harnessed* and chained to my plough."—*Hale: Origin of Mankind,* p. 50.

har'-nĕss-ĕr, *s.* [Eng. *harness; -er.*] One who harnesses.

*** har'-nĕss-mĕnt,** *s.* [Eng. *harness; -ment.*] Equipment, outfit.

harn'-păn, *s.* [A.S. *hærnes;* Icel. *hjarni* = brains.] The brain-pan.

"'Weize a brace of balls through his *harn-pan,*' said a second."—*Scott: Rob Roy,* ch. xxxiii.

harns, *s. pl.* [A.S. *hærnes.*] Brains.

"I'll e'en hirple awa there wi' the wean, for it will knock its *harns* out, puir thing."—*Scott: Antiquary,* ch. xv.

*** ha'-rō, * ha'-rōw, * hăr'-rōw,** *exclam.* [O. Fr. *haro.*] A cry anciently used in Normandy as a call for help or to raise a hue-and-cry.

"'*Harrow!* the flames which me consume,' said he, 'Ne can be quencht.'"—*Spenser: F. Q.,* II. vi. 49.

harp, * harpe, *s.* [A.S. *hearp;* cogn. with Dut. *harp;* Icel. *harpa;* Dan. *harpe;* Sw. *harpa;* Ger. *harfe;* O. H. Ger. *harpha;* Fr. *harpe;* Ital. *arpa.* Perhaps connected with Lat. *crepo* = to crackle. (*Skeat.*)]

I. *Ordinary Language:*

1. In the same sense as II. 2.

* 2. An Irish coin of the value of one halfpenny, so called from the figure of a harp on it.

3. A screen or sieve for sifting grain and clearing it of the seeds of weeds.

4. An oblong apparatus, consisting of a frame filled up with parallel wires similar to the strings of a harp, and used as a screen for sifting sand.

5. A concave grating in a scutching-machine, through which refuse escapes as the cotton is beaten and driven forward by the revolving beater.

II. *Technically:*

†1. *Astron.:* A name sometimes given to the ancient northern constellation generally termed Lyra, the Lyre.

"Next shines the *Harp,* and through the liquid skies
The shell, as lightest, first begins to rise." *Creech.*

2. *Music:* A stringed instrument of triangular form, furnished with gut strings. It has a compass varying from three to six octaves and a half, according to the size of the instrument. There are several kinds of harps still in use: (1) The triple or Welsh harp, with three rows of strings, two rows tuned diatonically in unisons or octaves, the third or inner row arranged to supply the accidentals, sharps or flats. The strings are thin, and the tone is consequently consonant with the character of the strings. This harp is derived from, and is almost identical with, the Irish harp. (2) The double harp, with two rows of strings is less inconvenient but equally imperfect; all alterations of the pitch of the strings having to be made with the thumb. (3) The single-action pedal harp, with one row of strings, containing a compass of nearly six octaves. There were seven pedals which altered by a semitone the pitch of the note to which each pedal belonged. The imperfection of the mechanism of the pedals involved the player in many difficulties, and rendered it in some keys quite useless. (4) The double action pedal-harp, the invention of Erard. The harp was a favourite instrument among the ancient Britons and the Anglo-Saxons. The old laws of Wales, the Triads, specify the use of the harp as one of the three things necessary to distinguish a freeman or gentleman from a slave. Preteaders were discovered by their unskilfulness in "playng of the harp." The same laws forbade a slave to touch a harp, either out of curiosity, or to acquire a knowledge of it, and none but the king, his musicians, and other gentlemen, were permitted to possess one. The harp was exempt from seizure for debt, as it was presumed that he who had no harp lost his position, and was degraded to the condition of a slave. (*Stainer & Barrett.*)

harp-seal, *s.*

Zool.: *Phoca grœnlandica* or *Calocephalus grœnlandicus,* the Greenland seal. The resemblance to a harp is in two large brown, oblique bands meeting near the shoulders, and then running separately along the sides and up the hind legs, where they become brighter, till they finally disappear in the white of the under parts. The hair is dry, close, and not woolly, except when the animal is very young. It is found in the Arctic Ocean, in Greenland, Newfoundland, Iceland, the north and north-east of Asia. It has been met with on the British coast.

harp-shell, *s.*

Zool.: The molluscous genus Harpa (q.v.).

*** harp-star, * harpe-starre,** *s.* The same as Harp, *s.*, II. 1.

"The *harpe-starre* Fidicula goeth downe, and is no more seene."—*P. Holland: Plinie,* bk. xviii., ch. xxvi.

harp-string, *s.* One of the gut-strings of a harp.

"And the *harp-strings* a clangour made."
Longfellow: Musician's Tale.

harp-stringing, *a.* Suited for playing on the harp.

harp, * harpe, *v.i.* & *t.* [A.S. *hearpian.*] [Harp, *s.*]

A. *Intransitive:*

2. *Fig.:* To dwell incessantly upon anything; to speak or write persistently on the same subject or idea. (Followed by *on* or *upon.*)

"Neither will I importune you, nor dull your ears with *harping* still upon this unpleasant thing."—*P. Holland: Livius,* p. 54.

*** B.** *Transitive:*

* 1. To touch upon; to hit.

"Thou has *harped* my fear aright."
Shakesp.: Macbeth, iv. 1.

2. To sift, screen, or separate by means of a sieve.

¶ *To harp on one string:* To dwell persistently and too much upon one subject, so as to weary the hearers.

"King Henry thereto would not condiscende, but still *harped* on thys stryng."—*Hall: Henry VII.* (an. 6).

har'-pa, *s.* [Lat. = a harp.]

Zool.: Harp shell. A genus of gasteropodous molluscs, family Buccinidæ. The shell is ventricose, ribbed transversely; the spire small; the aperture large, notched in front; the animal with a very large foot. Known species, recent, twelve, from the Indian Ocean, the Pacific, &c.; fossil, four, from the Eocene onward. (*S. P. Woodward.*)

har-păc-tĭç'-ĭ-dæ, *s. pl.* [Mod. Lat. *harpactic(us)*; Lat. fem. pl. adj. suff. *-idæ.*]

Zool.: A family of Entomostracous Crustaceans, legion Lophyropoda, order Copepoda, sect. Gnathostoma. [HARPACTICUS.]

har-păc-tĭç-ĭ-næ, *s. pl.* [Mod. Lat. *harpactic(us)*; Lat. fem. pl. adj. suff. *-inæ.*]

Zool.: A sub-family of Harpacticidæ (q.v.).

har-păc'-tĭ-cŭs, *s.* [Gr. ἁρπακτικός (*harpactikos*) = knavish, thievish; ἅρπαξ (*harpax*) = robbing, rapacious; ἁρπάζω (*harpazō*) = to snatch away, to carry off.]

Zool.: The typical genus of the sub-family Harpacticinæ and the family Harpacticidæ (q.v.). It has the body elongated, or broad and depressed, the head united with the first thoracic segment, the first and second abdominal rings in the female ovalescent, the first pair of antennæ eight or nine jointed, the second pair of foot-jaws strongly developed. (*Brady: Monog. of British Copepoda; Ray Soc.*, 1880.)

* **har'-pa-gŏn,** *s.* [Lat. *harpagonem*, accus. of *harpago* = a grappling-iron.] A grappling-iron.

"There were deulsed certeine instruments wherewyth they might pull downe the workes that their enemyes made, called *harpagons.*"—*Brende: Quintus Curtius*, fo. 54.

har-pa-gŏph'-ĭ-tŭm, *s.* [Lat. *harpago* = a grappling-iron; Gr. ἁρπαγή (*harpagē*) = seizure, and φυτόν (*phuton*) = a plant.]

Bot.: A genus of Pedaliaceæ. It is proposed that the Grapple-plant, generally called *Uncaria procumbens*, should be termed *Harpagophytum procumbens* [GRAPPLE-PLANT], and a Madagascar species, also with reflexed hooks like grappling-irons on the fruit, *H. leptocaryum.* (*Suppl. to Treas. of Bot.*)

har-pa-gor'-nĭs, *s.* [Gr. ἁρπαγή (*harpagē*) = seizure, rapine, and ὄρνις (*ornis*) = a bird.]

Palæont.: A gigantic bird of prey from the Post-Tertiary strata of New Zealand.

har-păl'-ĭ-dæ, *s. pl.* [Mod. Lat. *harpal(us)*; Lat. fem. pl. adj. suff. *-idæ.*]

Entom.: A family of predatory beetles, having the four anterior tarsi of the males enlarged, the inside of the anterior tibiæ with a deep notch, and moderately long antennæ. Most of them are voracious insects of prey, though Zabrus is said to feed exclusively upon corn, and Amara upon the roots and tender shoots of grass and other plants. The family is very extensive, and is diffused throughout the world. Probably about 500 are known. Many are British. [HARPALINÆ, HARPALUS.]

har-pa-lī'-næ, *s. pl.* [Mod. Lat. *harpal(us)*; Lat. fem. pl. adj. suff. *-inæ.*]

Entomology:

1. According to Swainson, a sub-family of Carabidæ. It is equivalent to the Harpalidæ of some entomologists.

2. Sometimes used in a more restricted sense for those Harpalidæ which have the four anterior tarsi of the males dilated.

har'-pa-lŭs, *s.* [Gr. ἁρπαλέος (*harpaleos*) = greedy.]

Entom.: The typical genus of the family Harpalidæ, or the sub-family Harpalinæ. In 1855 about 134 species were known from the four great continents and Australia. Sharp enumerates twenty-nine species as British.

har-pĕd'-ĭ-dæ, *s. pl.* [Mod. Lat. *harpes*, genit. *harped(is)*; Lat. fem. pl. adj. suff. *-idæ.*]

Palæont.: A family of Trilobites, having a large cephalic shield of horseshoe form, with its posterior angles greatly lengthened, and the margin perforated by pores; the thoracic segments twenty-five or twenty-six.

harp'-ĕr, * **harp-are,** * **harp-ere,** *s.* [A.S. *hearpere.*]

1. A player on the harp; a harpist.

"I heard the voice of *harpers* harping with their harps."—*Revelation* xiv. 2.

2. A brass coin current in Ireland in the reign of Elizabeth, and so called from the figure of a harp on it. It was about the size of a shilling, and of the value of one penny.

"A two-pence I had to spend over and above; besides the *harper* that was gathered amongst us to pay the piper."—*Ben Jonson: The Gipsies Metamorphosed.*

har'-pēş, *s.* [Gr. ἁρπή (*harpē*) = (1) a bird of prey, (2) a rapacious sea-fish, (3) a sickle.]

Palæont.: The typical genus of the family Harpedidæ (q.v.).

harp'-ĭng, *pr. par., a., & s.* [HARP, *v.*]

A. *As pr. par.:* (See the verb).

B. *As adj.:* Pertaining to the harp; fitted or intended for playing on the harp; as, *harping* melodies. (*Milton: Nativity*, 115.)

C. *As substantive:*

1. *Ord. Lang.:* The art or science of playing on the harp; a performance on the harp.

"In hymns and *harpings* and self-seeking prayers."
Byron: Cain, I. 1.

2. *Shipbuilding:*

(2) A ribband trimmed to the shape of and bolted to the cant bodies, to hold them together till planked.

¶ *Cat-harpings:*

Naut.: The frapping of the shrouds to the masts below the tops.

harping-iron, *s.* A barbed javelin. The word is derived from its capacity for clawing or grasping. A harpoon (q.v.).

"The boat which on the first assault did go,
Struck with a *harping-iron* the younger foe."
Waller: Battle of Summer Islands, 132.

harp'-ĭst, *s.* [Eng. *harp*; *-ist.*] A player upon the harp; a harper.

"That Ægrian *harpist*, for whose lay
Tigers with hunger pinde and left their pray."
Browne: Britannia's Pastorals, bk. i., s. 5.

har-poon', * **har-pon,** *s.* [Dut. *harpoen*, from Fr. *harpon* = a grappling iron, from *harpe* = a dog's claw or paw, a harp; Sp. *arpon*; Ital. *arpagone*, from Lat. *harpago* = a hook, a grappling-iron.] A barbed javelin used to pierce and fasten to whales. It has a broad, flat, triangular, barbed, sharp head, and a shank about two feet long, furnishing a socket for the shaft. A line, about seventy fathoms long, is attached to the harpoon, and runs out rapidly as the struck fish dives below the surface.

"And like the lightning's flame
Flew our *harpoons* of steel."
Longfellow: Discoverer of the North Cape.

harpoon-fork, *s.*

Agric.: A form of hayfork worked by tackle, and used in pitching hay from the load to put it into a rick, or in loading a waggon from a rick.

harpoon-gun, *s.* A gun or contrivance used in whale-fishing for firing a harpoon.

harpoon-rocket, *s.* A combination of bomb and lance for killing whales. It has an explosive shell at its head, and is propelled by a rocket charge after being fired from a gun. The hinged barbs are secured to the breech-piece in the tube, and the line connected by a looped shank.

har-poon', *v.t.* [HARPOON, *s.*] To strike, catch, or kill with a harpoon.

har-poon'-ĕr, * **har-poon-eer',** *s.* [Fr. *harponeur.*] One who strikes or pierces the whale with a harpoon; the man who throws the harpoon from a whale-boat.

"On the yard-arm the *harpooner* sits."
Grainger: Sugar-Cane, bk. ii.

* **harp-our,** *s.* [HARPER.]

* **harp'-rĕss,** *s.* [Eng. *harper*; *-ess.*] A female player on the harp.

* **harp'-sĭ-chŏn,** * **harp-si-cŏn,** *s.* [A corruption of O. Fr. *harpecorde.*]

Music: The old name of the spinet and harpsichord (q.v.).

"On the *harpsicon* or virginals."—*Parthenia Sacra* (1633), p. 144.

harp'-sĭ-chord, * **arp-si-chord,** * **harp-sc-chord,** *s.* [O. Fr. *harpecorde*, from *harpe*, and *chorde, corde* = a chord. The *s* is apparently an intrusion. Ital. *arpicordo.*]

Music: A stringed instrument with a key-board, similar in form to a modern grand pianoforte, by which it has been superseded. As the pressure of the fingers upon the keys, when heavy or light, made no difference in the quantity of tone produced, the harpsichord sometimes had two key-boards, one for the

loud, the other for the soft tones. There were also stops in some instruments, by means of which the tones could be modified by connecting the mechanism with or detaching it from the three, or even four strings, with which each tone was furnished. The keys were attached to levers, which at their ends had slips of wood, called "jacks," furnished with plectra of crow-quill or hard leather; these struck or twanged the strings, and produced the tone, which has been likened to "a scratch with a sound at the end of it." (*Stainer & Barrett.*)

"If he the tinkling *harpsichord* regards
As inoffensive, what offence in cards?"
Cowper: Progress of Error, 148.

harpsichord-graces, *s. pl.*

Music: Certain turns and ornaments employed in playing upon the harpsichord, introduced for the most part as compensation for the lack of sustaining power in the instrument.

* **harp-si-col,** * **harp-sc-col,** *s.* [HARPSICHORD.]

* **harp'-stèr,** *s.* [Eng. *harp*; fem. suff. *-ster.*] A female player on the harp; a harpress.

har'-pў, *s.* [O. Fr. *harpie, harpye*, from Lat. *harpyia*, from Gr. ἅρπυιαι (*harpuiai*), from ἁρπάζω (*harpazō*) = to seize.]

A. *As substantive:*

1. *Class. Antiq.:* Three fabulous winged monsters, daughters of Neptune and Terra, represented with the face of a woman, the body of a vulture, and fingers armed with sharp claws; their names were Aëllo, Celæno, and Ocypete. They emitted an infectious smell, and spoiled whatever they touched by their filth.

"Celeno foule mishapen bird, and *harpies* more
right fell."
Phaer: Virgil: Ænead iii.

2. *Her.:* The harpy is represented in heraldry as a vulture with the head and breast of a woman.

3. *Ornithology:*

(1) The Harpy-eagle (q.v.).

(2) The genus Harpyia (q.v.).

(3) A name sometimes given to a bird of prey, the Marsh Harrier (*Circus æruginosus*). Called more fully the White-headed Harpy. It is the Harpaye or Busard Harpaye of the French. [CIRCUS-HARRIER (2).] In England it is known also as the Moor-buzzard and the Duck-hawk. It preys chiefly on rabbits, water-birds, fish, &c. [CIRCUS.]

4. *Fig.:* An extortioner; a rapacious or ravenous animal; a plunderer.

"I am content to have purchased, by the loss of fortune, an escape from a *harpy*, who had joined the artifices of age to the allurements of youth."—*Rambler*, No. 192.

B. *As adj.:* Rapacious; ravenous; extortionate.

"Drive the *harpy* race from Helicon afar."
Cowper: Ode to Mr. John Rouse. (Trans.)

harpy-eagle, *s.*

Ornith.: *Thrasaetus Harpyia.* Linnæus considered it a vulture, and called it *Vultur har-*

pyga. Cuvier removed it to the true eagles, founding first the sub-genus or genus Harpyia (q.v.), and by many writers it is still called *Harpyia destructor*. Its crest is dull-black, margined with gray; the upper parts of the body and wings are mostly black, the under ones white, except a black collar round the neck; feathers of the legs white, with transverse bars. Immature birds are mottled, and have been described as different species. The harpy is a very powerful bird, about three and a-half feet high, inhabiting New Granada, Guayana, and Mexico. [HARPYIA.]

harpy-footed, *a.* With claws like a harpy. (*Milton: P. L.*, ii. 596.)

har'-pỹ-a, *s.* [HARPY.]

Zool.: A genus of Pteropinæ (Fruit-eating bats). *Harpya pallasii* has an expansion of wing approaching two feet, and is from the Moluccas.

har'-pỹ-ĭ-a, *s.* [Lat. *harpyia, harpya.*] [HARPY.]

Ornith.: A genus of Falconidæ, sub-family Aquilinæ. The bill is convex above, with a slight tooth in the upper mandible; the nostrils semilunar, transverse; the tarsi very strong, scutellated, feathered only at the base; the claws very strong and sharp. [HARPY-EAGLE.] Cuvier, who introduced the term Harpyia, defined it as containing Fisher Eagles with short wings, but the affinity is not close. The harpy does not seem to fish.

*** har'-quĕ-hūse**, *** har'-quĕ-hŭss**, *s.* [ARQUEBUSE.]

hau'-ÿne, hau'-ÿn-ite (au as ow), *s.* [Named after the very eminent crystallographer and mineralogist the Abbe Rene-Just Haüy, born in 1743, and died in 1822.]

A. *As substantive:*

1. *Min.:* An isometric mineral, crystallizing in dodecahedrons, octahedrons, &c. Lustre, vitreous or greasy; colours, blue or green; hardness, 5·5 to 6; sp. gr. 2·4 to 2·5. Compos.: Silica, 32·0; alumina, 27·4; lime, 2·9; soda, 10·5; sulphuric acid, 14·2 = 100. Found in lava at Mount Somma and in volcanic rocks at Mount Dor, in Puy de Dome, &c. Hauyne or Hauynite has an affinity to noscan and sodalite, the three being all silicates of alumina and soda. Dr. A. von Lasaulx Rosenbuah and Mr. Frank Rutley, F.G.S., think that hauyne and noscan may be mere varieties of the same species. The form haunynite is in Dana, hauyne in the *Brit. Mus. Catal.* and in Rutley.

2. *Petrol.:* Hauyne occurs plentifully in most phonolites.

B. *As adj.* (*Of the form* hauyne): Of, belonging to, or containing the mineral described under A. 1.

hauyne-basalt, *s.*

Petrol.: A basalt, having as its chief constituents leucite, nepheline, hauyne, augite, and magnetite, with occasionally some olivine and apatite. It is called also hauynophyr. (*Rutley.*)

"He *hath* neither Latin, French, or Italian."
Shakesp.: Merchant of Venice, i. 2.

¶ *Have* is used largely as an auxiliary verb to form various compound tenses. In the use it originally had its proper force of possession, as in, I *have* found a knife—*i.e.*, I have in possession a knife which had been lost and has been found by me; or in, I *have* received a letter,—*i.e.*, I have a letter which has been written to me. The construction was afterwards extended so as to include cases where the possessor of the object and the performer of the action were not the same, as in, I *have* sent a letter. It is also used with intransitive verbs, as in, He *has* gone. *Have* is used as an auxiliary of necessity, obligation, or compulsion, with the complete infinitive; as, I *have*, I *had*, or shall *have*, to do it.

¶ * (1) *Have after:* Follow, let us follow.

"*Have after*, to what issue will this come."
Shakesp.: Hamlet, i. 4.

Anat.: Of or belonging to Clopton Havers, an English physician and writer of the seventeenth century.

haversian-canals, * **haversian-tubes,** *s. pl.*

Anat.: Certain canals in bone, to which attention was first called by Havers. The haversian canals are the protectors of the blood-vessels constituting the nutritive system of the bones. In the spaces between the haversian canals are the lacunæ and their canaliculi. Every haversian canal has a number of lacunæ round it, connected to it, and also to each other, either directly or indirectly by the canaliculi projecting from them. The haversian canals, as a general rule, lie almost parallel to the compact tissue; they are smallest near the surface of a bone, and largest near its centre. The haversian system forms a network in all bones, long, short, flat, &c. There is not a pore to be seen in the articular facets of the femur or other bone covered by cartilage, not even canaliculi or haversian canals penetrate, but all other parts of the bones are porous. The cancelli are formed by the absorption of the walls of the haversian canals.

haversian folds and fringes, *s. pl.*

Anat.: Certain fringes or folds in the synovial membrane, considered by Havers to be mucilaginous glands.

haversian-lamellæ, *s. pl.*

"In the 24 of Edward III. it was made felony to steal a *hawk.*"—*Pennant: British Zoology: Falconry.*

2. A sharper, a cheat.

II. *Technically:*

1. *Plastering:* A piece of board ten inches square, and held by a handle at the bottom; it is used to hold a small quantity of plaster, and is grasped by the plasterer's left hand, while his right wields the trowel.

2. *Ornithology:*

(1) *Sing.:* The name of the several species of the genera Accipiter and Astur (q.v.). The Sparrow hawk is *Accipiter nisus,* the Goshawk, *Astur palumbarius. Nauclerus furcatus* is sometimes called the Swallow-tailed hawk; it is, however, a kite.

(2) *Pl.:* The sub-family Accipitrinæ, called more fully Sparrow Hawks. The bill is short suddenly curved from the base, with a large festoon in the upper mandible. The wings are short, the quills internally emarginate at their base. The tail is rounded. The male is often much smaller than the female. The anterior claws are very unequal. Hawks are generally distributed over the globe. They usually fly low when in pursuit of their prey, which consists of small birds and mammals. They build in trees, laying from three to five spotted eggs.

¶ Obvious compound: *Hawk-headed.*

hawk-bell, *s.* A bell attached to the foot of a hawk.

hawk-bill, *s.* A pair of pliers with curved nose, to hold pieces in blow-pipe soldering.

Hawk-bill-tooth saw: A saw having curving, hooked teeth, somewhat resembling the upper mandible of the hawk.

hawk-boy, *s.*

Plast.: A boy who attends on a plasterer, placing the supply of plaster or mortar on the hawk.

hawk-moths, *s. pl.*

Entom.: The group of moths called Sphingina, Sphinges, or Sphingides. Their flight is not unlike that of a hawk in quest of its prey, for which reason they are called hawk-moths. Their antennæ are thicker in the middle than at either end. They fly by twilight. Sometimes their larvæ have a horn on the tail. Formerly they were made equal in rank to the Butterflies (Day-fliers), and the Moths (Night-fliers). Now the moths proper and hawk-moths are combined under the lepidopterous sub-order Heterocera, of which they constitute the first group Sphingina, only of equivalent rank to the Bombycina, the Nocturna, the Geometrina, &c. The hawk-moths are divided into four families. Zygænidæ, Sphingidæ, Sesiidæ, and Ægeriidæ (q.v.). (*Stainton*, &c.)

hawk-nut, *s.*

Bot.: The common Earth-nut, *Bunium flexuosum.*

hawk-owl, *s.*

Ornithology:

1. The Great Snowy Owl or Harfang, *Surnia nyctea.* [HARFANG.]

2. *Pl.:* The genus Surnia. The size is large, the head and ears small, the facial disc imperfect, the wings long, the tail considerably lengthened, cuneated or graduated, the flight diurnal. (*Swainson.*)

hawk's-beard, *s.*

Bot.: The composite genus Crepis (q.v.).

hawk's-bill, *s.*

1. *Horol.:* A catch-piece attached to a vibrating arm, which acts as a detent in the rack of the striking part of a clock, and assists in producing the proper number of strokes.

2. *Zool.:* The same as *Hawk's-bill turtle* (q.v.).

¶ *Hawk's-bill turtle:*

Zool.: *Chelone imbricata*; a species of turtle which has the shell imbricated and elliptically keeled, the carapace spotted and rayed: in the young, the ends of the carapace obliquely truncated. The flesh is not good for eating; the eggs are good. The horny epidermis plates of the carapace furnishes the tortoise-shell of commerce. The animal inhabits the Indian Ocean and the warmer parts of the Atlantic.

II. *Technically:*

1. *Anatomy:*

(1) *Human:* The skull or cranium. The greater

part of the head consists of an osseous ovoidal capsule for the protection of the brain (q.v.). The face proper consists of the upper and lower jaws. The skull in old age becomes composite like the sacrum in the adult. The margins or sutures of the cranial bones, twenty-two in number, excluding the hyoid bone, correspond to the articular processes in the trunk. In youth the flat cranial bones are connected by a double lamina of cartilage; notwithstanding the junction of the margins, they grow by the increase of one cartilage, and the ossification of the other. Like the arch in the movable vertebræ, we have the arch in the head; in the lower part there are bones physiologically connected with the head bones of the neck. There are three segments in the head:—(*a*) The posterior, beginning from the cervical vertebræ below, the occipital segment, consisting of a single bone, in reality four bones; a part of it lies at the base of the cranium at the back of the face, but the greater part extends up the back of the cranium. It consists of a ring, lateral sides, and an arch. (*b*) The anterior, consisting of the frontal and ethmoid bones. The only vestige here of the vertebral foramea, is the Foramen Cæcum. (*c*) The central segment; in the middle line below, and cut in two halves by the mœsial plane is the sphenoid bone, but along with it are two bones, the temporal, attached to its outer portions or great wings, composing the basis of the arch completed by the two parietal bones. These segments are divided by the lambdoidal sutures, and coronal. The head is divided into a base and a vault or calvarium; the inner aspect is called the cerebral, the other, the superficial, external, &c., aspect. The bone on the outside of the cranium is not so dense as it is on the inside, in accordance with a law of construction in all animal and vegetable bodies, a law of part, and a law of place. Some anatomists count four segments, the two temporal bones constituting the fourth. [CRANIUM.]

(2) *Comp.:* The vertebrata have a head homologous in its anatomy with that of man. That of the Annulosa is homologous in functions, but not in parts. The Cephalopodous and Gasteropodous Molluscs have heads, the Conchifera, sometimes called Acephala, want them. Most animals of lower organization than these are destitute of heads. The heads of vertebrates, while homologous in parts, differ considerably in form and general adaptation. The vertical face of man, for instance, is replaced in the lower orders by a horizontally prolonged face, the bones of which become enormously extended in the case of the sword-fish and the saw-fish. Striking special adaptations are seen in the case of the elephant, whose nasal organ is developed into an enormous trunk, and whose upper incisor teeth are developed into great tusks. Various other special adaptations might be named. In insects and crustaceans the mouth opening is vertical, instead of horizontal, as in vertebrates.

2. *Arch.:* The capital (Lat. *caput* = a head) of a column.

3. *Books, &c.:* The top of a standing book; sometimes gilded that the dust may be blown off.

"He adopted the Dyak costume, and became a notorious *head-hunter.*"—*Keppel: Visit to the Indian Archipelago*, i. 141.

2. *Pl.:* A name given to several races or tribes, notably to the Dyaks and Kyans of Borneo and Celebes, on account of their savage mania of hunting for heads, generally by nocturnal ambuscades, and treasuring them as trophies. Tylor (*Prim. Cult.*, i. 414) connects the barbarous custom with the rite of funeral human sacrifice, and says that the Dyaks considered that the owner of every human head they could procure would serve them in the next world, where their rank would depend on the number of heads they had taken in this. The present of a head is exacted from every aspirant to a Dyak bride. The influence of Sir James Brooke did a great deal to discourage head-hunting, and it is now fast disappearing. Kean (*Journ. Anthrop. Inst.*, ix. 294), says that the practice also exists, with almost identical circumstances, among the wild Kirkis, Nagas, and Garos of the eastern frontier of Bengal, while traces of it are found among the Baltaks and some other races of the Indian Archipelago.

head-hunting, *s. & a.*

A. *As sub-t.:* The practice of raiding for the purpose of collecting human heads.

"Some of the young Dyaks have plainly stated that they would give up *head-hunting*, were it not for the taunts and gibes of their wives and sweethearts."—*Keppel: Visit to the Indian Archipelago*, I. 129

6. A scolding, a lecture.

II. *Anat. & Phys.:* It is on the auditory nerve, the *portio mollis* of the seventh pair, situated in the temporal bone, that the sonorous undulations make their impression, the vibrations being propagated through the surrounding medium, generally air, by the corresponding waves or undulations they produce in it. A slight laxity of the *membrana tympani* is usual, permitting vibrations in accordance with grave or deep tones; by the action of the *tensor tympani* this may be tightened so as to vibrate with sharper or higher tones. This sense may be increased by cultivation, as in the case of musicians, and in people exposed to danger or living by hunting. The pitch depends on the number of vibrations in a given time, the high notes being the quickest, and the low the slowest. The strength or loudness depends on the force and extent of the vibrations. The timbre or quality of musical sounds, as of the flute, violin, &c., all sounding a note of the same pitch, depends on differences of form in the undulations.

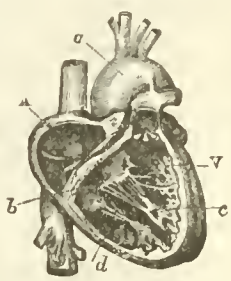
II. *Technically:*

1. *Arch.:* The central solid portion or core of a twisted column.

2. *Anatomy:*

(1) *Human:* The central organ of circulation, enclosed in a membrane, the pericardium, and lying between the two layers of pleura, the mediastinum, with the base directed upwards and backwards to the right shoulder, and the apex downwards and forwards between the fifth and sixth ribs, and to the left. The under side is flattened and rests on the diaphragm, the upper rounded and convex, formed by the right ventricle and partially by the left; above these are the auricles whose appendages project forwards, overlapping the root of the pulmonary artery, the large anterior vessel at the root of the heart, crossing obliquely the commencement of the aorta (*a*). The right is the venous side of the heart, the left arterial. [CIRCULATION.] The right auricle (A) is larger than the left, and more complex in structure; it has two valves, the eustachian and the coronary. There is not the same pyramidal form in the left ventricle as in the right; the apex of the heart is also the apex of the left ventricle, and therefore larger than the right. The valves of the right ventricle (v) are the tricuspid (*b*) and semilunar; of the left the mitral (bicuspid) and semilunar. The auriculo-ventricular opening connects the auricles and ventricles, and in connection with the ventricular valves we have the *columnæ carneæ* (*c*), of which there are three sets, and the *chordæ tendineæ* (*d*). There are three layers of fibres in the ventricles—the external, middle, and internal—their peculiar spiral arrangement causing the tilting forwards of the cardiac apex. The fibres of the auricles are in two layers—the external and internal; and the left auricle is thicker and more fleshy than the right. From the right ventricle arises the pulmonary artery, conveying the venous blood to be aërated in the lungs; the infundibulum is a prolongation of the anterior wall. The left auricle contains the four pulmonary veins returning the blood to the heart, thence to the left ventricle, and thence to the aorta, to be distributed to every part of the body, returning by the superior and inferior *vena cava* to the right auricle.



HEART.
A. Right Auricle. v. Right Ventricle. *a.* Aorta. *b.* Tricuspid Valve. *c.* Columnæ Carneæ. *d.* Chordæ Tendineæ.

(2) *Compar.:* In the lowest animals we have no bloodvessels, every part absorbing nutritious fluid for itself; the lower Entozoa, and even the embryo in man in its early stage, are examples. The jelly-fish is the lowest form of life with circulatory vessels, and the higher Entozoa, then in the Sea-Urchin and Star-fish, we come to contractile power and pulsation in part of the chief vessel; and in the higher order of worms and in insects this is divided into cavities, until, in the molluscs, we come to a distinct sac, with muscular walls and two chambers—an auricle and ventricle—in fact, a systemic heart. Then in fishes we have a two-chambered heart, not commencing at systemic circulation, but at the origin of respiratory movement. Among the higher reptiles, we find the circulation approaching that in birds and mammals, till we get the double heart, as in man.

B. *As substantive:*

1. The same as Heartburn (q.v.).

2. Discontent; jealousies; secret enmity.

"Fast by her side a listless maiden plied,
With aching head, and squeamish *heart-burnings*."
Thomson: Castle of Indolence, i. 77.

heart-cam, *s.*

Mach.: A form of cam which serves for the conversion of uniform rotary motion into uniform rectilinear reciprocating motion. The principle of its construction is, that for each successive equal part of one half revolution of the cam, the rod must have been moved by its periphery through a corresponding equal part of its entire stroke.

heart-certain, *a.* Thoroughly certain. (*Keats: Endymion*, i.)

heart-cockle, *s.*

Zool.: Isocardia, a genus of molluscs, family Cardiidæ (Cockles). [Isocardia.] [Heart-shell.]

*** heart-dear,** *a.* Sincerely beloved; tenderly loved.

"When your own Percy, when my *heart-dear* Harry,
Threw many a northward look to see his father."
Shakesp.: 2 Henry IV., ii. 3.

*** heart-deep,** *a.* Rooted in the heart; deeply rooted.

heart-disease, *s.* A generic term in common use for various affections, which are known to the medical profession by specific names. There are valvular and aortic diseases; fatty degeneration, dilatation, palpitation, irritability, hypertrophy, and syncope of the heart; endocarditis, pericarditis, and dropsy (q.v.).

*** heart-drops,** *s. pl.* Tears of sincere affection.

"Affection's *heart-drops*, gushing o'er,
Had flowed as fast." *Byron: To Thyrza.*

*** heart-eating,** *a.* Preying on or wearing away the heart.

heart-failure, *s.* Now recognized as a frequent cause of sudden death.

heart-felt, *a.* Felt in the heart; deeply felt; sincere.

"All vanished;—'twas a *heart-felt* cross."
Wordsworth: Blind Highland Boy.

heart-free, *a.* Unaffected by love, heart-whole. (*Tennyson: Maud*, I. ii. 11.)

*** heart-grief,** *s.* Heart-ache; anguish of mind; heart-felt grief.

*** heart-hardness,** *s.* Hardness of heart; insensibility of feeling.

*** heart-hatred,** *s.* Deep, strong, or bitter hatred; detestation.

*** heart-heaviness,** *s.* Heaviness or depression of the spirits; sadness.

*** heart-heavy,** *a.* Depressed in spirit.

heart-like, *a.* Like a heart in shape or form.

heart-moth, *s.*

Entom.: Dicycla oo, a moth of the family Cosmidæ. Found in the south of England, but rare.

heart-pea, *s.*

Bot.: The same as Heart-seed (q.v.).

*** heart-quake,** *s.* A trembling of the heart.

"*Heart-quakes* shook the joints."
Chapman: Homer.

heart-rending, *a.* Heart-breaking; causing the greatest anguish of mind; overpowering with grief.

"Materials for the darkest and most *heart-rending* tales."—*Macaulay: Hist. Eng.*, ch. xiii.

*** heart-rising,** *s.* A rising of the heart; opposition.

heart-robbing, *a.* Depriving of heart or thought; ecstatic.

"A melting pleasance ran through every part,
And me revived with *heart-robbing* gladness."
Spenser. (*Worcester.*)

heart-scald, heart-scaud, *s.*

1. The same as Heart-burn (q.v.).

2. Remorse, regret.

heart-seed, *s.*

Bot.: The genus Cardiospermum (q.v.).

heart-shaped, *a.*

Bot.: The same as Cordate (q.v.).

heart-shell, *s.*

Zool.: Isocardia cor, a mollusc of the Cockle family. [Heart-cockle.]

heart-sick, *a.*

1. Sick at heart; pained in mind; deeply afflicted.

"*Heart-sick* exiles, in the strain,
Recalled fair Scotland's hills again!"
Scott: Marmion, iii. 9.

2. Caused by or expressive of grief of heart.

"Unless the breath of *heart-sick* groans,
Mistlike, infold me from the search of eyes."
Shakesp.: Romeo & Juliet, iii. 3.

heart-sickening, *a.* Causing sickness, depression, or grief of heart; saddening.

heart-sickness, *s.* Depression of heart or spirits; sadness.

heart-sinking, *s.* Depression of spirits; despondency.

heart-sore, *s.* & *a.*

A. *As subst.:* A cause of deep sorrow or pain.

"His only *heart-sore* and his only foe."
Spenser. (*Todd.*)

"*Heart-struck*, with chilling gripe of sorrow stood,"
Milton: P. L., xi. 264.

*** heart-swelling,** *a.* Causing the heart to swell; rankling in the heart.

"Through proud ambition and *heart-swelling* hate."
Spenser. (*Todd.*)

*** heart-swoln,** *a.* Puffed up or swollen with pride. (*Wordsworth: Old Cumb. Beggar.*)

heart-urchins, *s. pl.*

Zool.: Spatangidæ or Brissidæ, a family of Echinoidea.

heart-wheel, *s.* One form of cam-wheel, which acts by a regular impulse and recession to reciprocate the object against which it impinges. [Heart-cam.]

heart-whole, *a.*

1. Having the heart or affections free or untouched; not affected by love.

2. With unbroken spirits or courage; undismayed.

3. Of a single or sincere heart.

"Not any pilgrim that is taken captive by violent hands, if he keeps *heart-whole* towards his Master, is, by the laws of providence, to die by the hand of the enemy."—*Bunyan: Pilgrim's Progress*, pt. ii.

heart-wood, heartwood, *s.*

Bot., &c.: The central portion of the wood of exogens, which is also the oldest, and has had more time to harden than that more recently deposited. The same as Duramen (q.v.).

*** heart-wounded,** *a.* Struck to the heart with grief or anguish.

"The queen, without reflection due,
Heart-wounded, to the bed of state withdrew."
Pope: Homer; Odyssey iv. 1,038.

heart's blood, *s.* The same as Heart-blood (q.v.).

heart's ease, heartsease, *s.*

1. *Ord. Lang.:* Ease, tranquillity, or peace of mind.

"Such men as he be never at *heart's ease*
Whiles they behold a greater than themselves."
Shakesp.: Julius Cæsar, i. 2.

2. *Bot.* (*Of the form* heartsease)*: Viola tricolor.* The leaves, which have long petioles, are ovate-oblong or lanceolate-crenate, the stipules leafy, pinnatifid; the sepals with long auricles; the flowers in the wild form a quarter of an inch to an inch and a quarter in diameter, purple, whitish, or golden yellow, or parti-coloured. Sir Joseph Hooker describes four varieties. The heartsease occurs in Britain, in Arctic Europe, North Africa, and various parts of Asia. It has been long cultivated in gardens, and has run into many varieties. Called also the Pansy (q.v.).

heart (*e* silent), *v.t.* & *i.* [Heart, *s.*]

A. *Transitive:*

* 1. To give heart or courage to; to encourage, to hearten.

2. To build, as the interior of a rubble wall, solidly, with stone and mortar.

B. *Intrans.:* To form or grow into a compact head or mass, as a plant.

heart'-bŭrn (*e* silent), *s.* [Eng. *heart*, and *burn.* A misnomer, for it is not an affection of the heart.]

Pathol.: The popular name for Cardialgia (q.v.).

¶ The anatomical meanings of the Greek καρδία (*kardia*) are (1) the heart, and (2) the cardiac extremity of the stomach, the stomach itself. It is used in the word cardialgy in the latter sense, now a forgotten one. To avoid ambiguity, gastralgy has of late been substituted for cardialgy as the name of heartburn.

heart'-ĕd (first *e* silent), *s.* [Eng. *heart*; *-ed.*]

1. Having a heart; only used in composition.

"See his diet be so light and little
He grow not thus high *hearted* on't."
Beaum. & Flet.: Island Princess, ii. 1.

"Forget not then
With richest dung to *hearten* it again."
May: Virgil; Georgic i.

***heart'-ęn-ĕr** (first *e* silent), ***hart'-ęn-ĕr,** *s.* [Eng. *hearten ; -er.*] One who or that which gives courage or spirit; an encourager.

"A coward's *hartener* in warre,
The stirring drumme keepes lesser noise from farre."
Browne : Britannias Pastorals, bk. i., s. i.

hearth (*e* silent), *** herth, * herthe,** *s.* [A.S. *heorth ;* cogn. with Dan. *huard ;* Sw. *härd ;* O. H. Ger. *hert ;* Ger. *herd.*]

I. *Ordinary Language :*

1. *Lit. :* The floor of a fireplace ; that part of the floor of a room on which the fire stands, generally of brick or stone.

"Preparing on the *hearth* his mean repast."—*Bolingbroke : Reflections upon Exile.*

2. *Fig. :* The fireside ; the domestic circle ; the house or family itself.

"I will not hurt your *hearth.*"
Shakesp. : Coriolanus, iv. 5.

II. *Technically :*

1. *Metall. :* The floor in a reverheratory furnace on which ore, metal, &c., is exposed to the action of the flame from the furnace. The hearth has a domed ceiling, and is divided from the furnace by a bridge, over which the flame passes. [REVERBERATORY-FURNACE.]

2. *Naut. :* The grate and apparatus employed for cooking the food for the ship's company.

hearth-bottom, *s.*

Metall. : The sandstone, usually a grit or coarse variety, used as the bed of the blast furnace.

hearth-brush, hearth-broom, *s.* A small hair-broom for brushing up ashes and tidying around the hearth of an open grate.

hearth-cinder, *s.* The fused mass, the slag, found on the finery hearth.

hearth-ends, *s. pl.*

Metall. : Particles of unreduced lead ore, expelled by decrepitation and the blast from the lead-smelting furnace. This becomes mixed with lime and fuel used in smelting, and is collected from time to time, is washed to remove earthy particles, and then smelted.

*** hearth-money, * hearth-penny,** *s.* A tax on hearths. It existed from the time of the Conquest, was legalized by 13 & 14 Charles II., and abolished in 1688. The amount was two shillings for each hearth, the money being paid to the church and poor-rates.

"The revenue of the *hearth-money* is very grievous to the people."—*Parl. Hist. William & Mary* (an. 1688-9).

*** hearth-penny,** *s.* [HEARTH-MONEY.]

*** hearth-plate,** *s.*

Metall. : A cast-iron plate forming the sole of the hearth of a forge or finery furnace.

*** hearth-tax,** *s.* The same as HEARTH-MONEY (q.v.).

"In the mean time, to gratify the people the *hearth-tax* was remitted for ever."—*Evelyn : Memoirs*, March 8, 1689.

*** hearth'-ęn** (first *e* silent), *s.* [Eng. *hearth ; -en.*] A small bundle of wood.

*** hearth'-lĕss** (first *e* silent), *a.* [Eng. *hearth ; -less.*] Destitute of a hearth.

"While thou, Ferrara ! . . . shall fall down,
And, crumbling piecemeal, view thy *hearthless* walls."
Byron : Lament of Tasso, ix.

hearth'-stōne (first *e* silent), *s.* [Eng. *hearth*, and *stone.*]

1. The stone forming the hearth ; the fireside.

2. A soft kind of stone used for whitening hearths, doorsteps, &c.

heart'-ĭ-lў (*e* silent), *** hert-e-li, * hert-e-liche, * hert-i-li,** *adv.* [Eng. *hearty ; -ly.*]

1. From the heart ; with the heart ; willingly, cordially, zealously.

"They seem to choose *heartily* their father's ways."
—*Bunyan : Pilgrim's Progress*, pt. ii.

2. Vigorously, eagerly, freely.

"And in due time feeds *heartily* on both."
Cowper : Conversation, 338.

heart'-ĭ-nĕss (first *e* silent), *s.* [Eng. *hearty ; -ness.*]

1. Sincerity, cordiality, ardour, warmth, zeal.

"He gently complained of Burnet, who loved and admired him with a truly generous *heartiness.*"—*Macaulay : Hist. Eng.*, ch. xiv.

2. Vigour, strength ; as, the *heartiness* of one's appetite.

heart'-lĕss (first *e* silent), *** hart-lesse, * herte-les,** *a.* [Eng. *heart ; -less.*]

1. Destitute or deprived of a heart ; having no heart.

2. Destitute of feeling or affection ; cruel, insensible to feeling.

"The *heartless* parasites of present cheer."
Byron : Childe Harold, i. 9.

* 3. Destitute of courage or spirit ; faint-hearted, spiritless.

"Hunt the *hartlesse* hare till she were tame."
Spenser : Shepheards Calender ; Dec.

heart'-lĕss-lў (first *e* silent), *adv.* [Eng. *heartless ; -ly.*]

1. In a heartless, unfeeling, or cruel manner.

* 2. Without heart, courage, or spirit ; timidly, faint-heartedly

heart'-lĕss-nĕss (first *e* silent), *** heart'-less-nesse,** *s.* [Eng. *heartless ; -ness.*] The quality or state of being heartless ; want of feeling, affection, or courage.

*** heart'-lĕt** (first *e* silent), *s.* [Eng. *heart ;* dimin. suff. *-let.*] A little heart.

hearts (*e* silent), *s.* A game at cards, the object in which is to take no hearts or as few as possible.

*** heart'-sŏme** (first *e* silent), *a.* [Eng. *heart ;* suff. *-some.*]

1. Inspiring with heart or courage ; encouraging, inspiriting.

2. Full of mirth or spirits ; merry, cheerful, lively.

heart'-ў (*e* silent), *** hert-i, * hert-y, * herte-ly,** *a.* [Properly *heartly*, from Eng. *heart ; -ly* = like.]

1. Pertaining to or proceeding from the heart ; sincere, cordial, warm.

"*Hearty* his laugh and jovial was his song."
Scott : The Poacher.

2. Sincere, free from dissimulation ; having the heart zealously engaged in anything.

* 3. Good-natured, kind.

"My *hearty* friends
You take me in too dolorous a sense."
Shakesp. : Antony & Cleopatra, iv. 2.

4. Full of health, sound, strong, healthy, hale : as, a *hearty* man.

5. Sound, strong, durable, free from flaw.

"Oak, and the like true *hearty* timber, being strong in all positions, may be better trusted in cross and transverse works."—*Wotton : Architecture.*

6. Strengthening, nourishing : as, *hearty* living.

7. Full, abundant, satisfying.

* 8. Eminent.

¶ *Hearty* and *warm* express a stronger feeling than *sincere ; cordial* is a mixture of the *warm* and *sincere.* . . . It is peculiarly happy to be on terms of *cordial* regard with those who stand in any close relation to us. The man himself should be *hearty ;* the heart should be *warm ;* the professions *sincere*, and the reception *cordial.* (*Crabb : Eng. Synon.*)

*** hearty-hale,** *a.* Good or wholesome for the heart. (*Spenser.*)

hēat, * heate, * heet, * hete, * heete, *s.* [A.S. *hĕtu, hæto*, from *hât* = hot ; cogn. with Dan. *hede*, from *hed* = hot ; Sw. *hetta*, from *het* = hot ; Icel. *hiti ;* Dut. *hitte ;* Ger. *hitze ;* O. H. Ger. *heizi.*]

I. *Ordinary Language :*

1. *Literally :*

(1) In the same sense as II.

(2) The sensation produced on bodies by the near approach or touch of heat in excess of that in the body.

(3) High temperature ; the greatest accumulation of heat, or the time of such accumulation ; hot weather.

"They came down into the valley and found the intolerable *heats* there."—*Bacon.*

(4) An indication or sign of high temperature ; redness, flush, high colour.

"It has raised animosities in their hearts, and *heats* in their faces, and broke out in their ribbons."—*Addison :*

(5) A degree to which a body is heated.

"The *heats* smiths take of their iron are a blood-red *heat*, a white flame *heat*, and a sparkling or welding *heat*."—*Moxon.*

* (6) Fermentation, effervescence.

(7) The quality of being hot in the mouth.

"The *heat* of the ginger." *Shakesp : Henry V.*, iii. 7.

2. *Figuratively :*

(1) The utmost ardour, violence, vehemence, or fury ; as, the *heat* of battle.

(2) Agitation or inflammation of mind ; fire of temper ; vehemence ; intense excitement.

"A rage whose *heat* hath this condition,
That nothing can allay, nothing but blood."
Shakesp. : King John, iii. 1.

(3) Fiery temperament or disposition ; mettle ; fire.

"Took fire and *heat* away from the best-tempered courage." *Shakesp. : 2 Henry IV.*, i. 1.

* (4) Haste, pressure, urgency.

"The *heat* is past ; follow no further now."
Shakesp. : 2 Henry IV., iv. 3.

* (5) Animation, fire ; as, The *heat* of eloquence.

"With all the strength of *heat* and eloquence."
Addison : Cato, iii. 1.

* (6) Any violent action uninterrupted ; a single effort.

"Many causes are required for refreshment betwixt the *heats.*"—*Dryden :*

II. *Technically :*

1. *Forging :*

(1) The mass or piece of iron undergoing forging.

(2) A single exposure to the fire : as, To shape a horseshoe at a single *heat.*

2. *Phys. :* In natural philosophy the term heat is used chiefly to mean, not the sensation which our bodies feel when we say that they are hot, but the particular state or condition of matter which causes this sensation. Two hypotheses regarding heat have had advocates :

(1) *The Theory of Emission :* It supposes heat to be caused by a subtle imponderable fluid surrounding the molecules of bodies so as to envelop them in a "heat atmosphere." These have a repelling effect on each other, thus tending to loosen or even dissolve cohesion. [EMISSION.]

(2) *The Theory of Undulation :* Advocated by Melloni and others. It supposes that heat is caused by an oscillatory or vibratory motion of the particles of a body. It is thus a condition of matter and not a substance. The hottest bodies are those in which the vibrations move quickest through the widest space. This is now the accepted hypothesis. It is called also the Mechanical or Dynamical Theory of Heat. [UNDULATORY.]

Heat makes bodies, whether solid, liquid, or gaseous, expand, while cold contracts them. [EXPANSION.] Water is a partial exception to the rule. [WATER.] In the case of a solid, heat can produce fusion at a certain definite temperature ; in that of liquids vaporisation. It is transmitted by radiation (q.v.), or by conduction (q.v.). Radiant heat is that produced by radiation, and the expressions ray of heat, thermal ray, or calorific ray may be used so as to correspond to the terms ray of light and luminous ray. Latent heat is that which is absorbed by solid bodies when they are subjected to calorific influence far more than sufficient to make them melt, and when at the very time they are in process of fusion. The heat does not raise the temperature of the solid till it is completely liquefied. It was discovered by Black, who taught it, in A.D. 1762. There is also a latent heat of vaporisation, being heat absorbed by liquids when being converted into vapour. Latent is opposed to sensible heat. Heat may be reflected or refracted [REFLECTION], or by being irregularly reflected in all directions, it may become scattered or diffused heat ; reflection and refraction may also polarise its rays, as happens to those of solar light. The heat which falls on a body is called incident heat. Specific heat is the quantity of heat required to raise the temperature of a body of a given weight 1° ; the unit of measure being the quantity required to raise the same weight of water to the same temperature. Heat may be produced by solar radiation, chemical action, friction, pressure, percussion, absorption, and imbibition ; by the conduction of powerful magnets and bodies in motion, &c. When moderate it is measured by the thermometer (q.v.), when great by a pyrometer (q.v.). It is used as a force or agent in the steam-engine and many other machines. It has a mechanical equivalent. (*Ganot*, &c.)

3. *Racing :* A single course in a race or contest consisting of two or more separate contests.

¶ For the difference between *heat* and *fire*, see FIRE.

heat-apoplexy, *s.*

Pathol.: A name for sunstroke (q.v.).

heat-engine, *s.* A thermo-dynamic engine in which motive power is produced by the development of heat. Such are steam and hot-air engines, and others which are effective by the explosion of gas, &c.

*** heat-oppressed,** *a.* Feverishly excited, heated.

"Proceeding from the *heat-oppressed* brain."
Shakesp.: Macbeth, ii. 1.

heat-spectrum, *s.*

Physics: The spectrum of calorific rays. As a beam of light after passing through a prism is dispersed into a spectrum (q.v.) of visible colours, which differ in apparent brightness, so the perceptible warmth is also dispersed into a band, which differs in various regions in the amount of heat and the special qualities of that heat. The heat is greatest of all at the extreme end of, or just beyond the visible red. Modern science only recognizes waves of different lengths and periods, each of which is adapted to produce certain effects. Thus it is that the most powerful heat-waves are slower than the slowest visible waves.

hēat, * heat-en, * hct-en, * het-in, *v.t.* & *i.* [A.S. *hǽtan,* from *hât* = hot; Icel. *heita;* O. H. Ger. *heizen.*]

A. *Transitive:*

I. *Literally:*

1. To make hot; to communicate heat to; to cause to become warm or warmer.

"They should *heat* the furnace one seven times more than it was wont to be *heated.*"—*Daniel* iii. 19.

2. To cause to ferment.

"Hops lying undried *heats* them, and changes their colour."—*Mortimer: Husbandry.*

II. *Figuratively:*

1. To warm with heat or vehemence of passion or desire; to excite.

"*Heated* through and through with wrath and love."
Tennyson: Princess, iv. 145.

2. To excite; to make feverish or excited.

"Ay, to see meat fill knaves, and wine *heat* fools."
Shakesp.: Timon of Athens, i. 1.

* 3. To run a heat over, as in a race.

"Ere with spur we *heat* an acre."
Shakesp.: Winter's Tale, i. 2.

B. *Intransitive:*

1. To become hot or warm by the communication of heat.

2. To become hot or warm by the process of fermentation; to ferment.

3. To become excited; to warm, to agitate.

"Let my liver rather *heat* with wine."
Shakesp.: Merchant of Venice, i. 1.

4. To cause heat or feverishness in the body.

"Whatever increaseth the density of the blood . . . *heats,* because a denser body is hotter than a rarer."
—*Arbuthnot: On Aliments.*

hēat, * heate, *pa. par.* [Heat, *v.*] Heated.

"Seven times more than it was wonte to be *heate.*"—*Geneva Bible* (1561), *Daniel* iii. 19.

hēat'-ẽr, *s.* [Eng. *heat; -er.*] One who or that which heats; specif.

1. A stove or furnace for warming a building, dry-house, or portion of a machine, as a calendering apparatus in a paper-mill, &c.

2. A block of iron, made red-hot in a fire, and then placed in an urn or smoothing-iron.

3. A pan in which the juice of sugar-cane, or the water gathered from the maple, receives a preliminary heating before reaching the evaporating-pan.

*** hēat'-fûl,** *a.* [Eng. *heat; -ful(l).*] Full of heat or warmth; hot.

hēath, * heeth, * hethe, *s.* & *a.* [A.S. *hadh;* Icel. *heidhi;* Sw. *hed;* Dan. *hede;* Dut. & Ger. *heide;* O. H. Ger. *heida;* Goth. *haithi.* Skeat thinks it to be from an Aryan base, *kaita* = a pasture, a heath.]

A. *As substantive:*

I. *Ordinary Language:*

1. *Generally:*

(1) An open space of country, not necessarily covered by the plant mentioned under II. 1.

"When Zephirus eke with his sote brethe
Inspired hath in every holt and *hethe*
The tender croppes." *Chaucer: C. T.,* 6.

(2) Such a space covered thickly with herbs and shrubs.

"For the *heath,* which was the third part of our plot, I wish it to be framed as much as may be to a natural wildness. Trees I would have none in it, but some thickets."—*Bacon: Essays: Of Gardens.*

2. *Specially:*

(1) The species described under II. 1.

(2) The open spaces covered with it.

II. *Technically:*

1. *Botany:*

(1) (*Sing.*) The genus Erica (q.v.).

¶ The Cross-leaved heath is *Erica tetralix;* the Cornish heath, *E. vagans;* St. Dabeoc's heath, *Dabœcia polifolia.* Berried heath is the genus Empetrum (q.v.). Irish heath, *Menziesia;* Moor heath, *Gypsocallis;* and Sea heath, *Frankenia;* the Native heath of Otago, *Leucopogon Fraseri;* the Palm heath, *Rickea pandanifolia;* and the Scotch heath, *Erica cinerea.*

(2) (*Pl.*) The order Ericaceæ, by Lindley called Heathworts.

2. *Script.:* עֲרוֹעֵר (*aroer*), עָרְעָר (*aroer*) (Jer. xvii. 6, xlviii. 6), probably not a plant at all, but rendered by Gesenius bare, needy. Cf. Aroer the city, the name probably meaning ruins (Josh. xii. 2, &c.); also written *Arōr,* עֲרִיר (Judg. xi. 26.)

3. *Entom.:* A butterfly, moth, or other insect occurring on heaths.

¶ Common heath is *Fidonia atomaria,* a Geometer Moth; Large heath is *Epinephele Tithonus,* and Small heath, *Cœnonympha Pamphilus,* both British butterflies, family Satyridæ (*Newman*).

B. *As adj.:* Or or belonging to a heath in any of the senses given under A.

¶ Obvious compounds: *Heath-clad, heath-covered,* &c.

heath-bell, *s.*

Bot.: The same as Heather-bell (q.v.).

"Let the wild *heath-bell* flourish still."
Scott: Marmion, iii. (Introd.)

† heath-berry, *s.*

Bot.: Empetrum nigrum. [Crowberry.]

heath-bird, *s.* The heath cock (?).

"Like *heath-bird,* when the hawks pursue,
A barge across Loch Katrine flew."
Scott: Lady of the Lake, iii. 12.

heath-eggar, *s.*

Entom.: Lasiocampa callunæ, a moth of the family Bombycidæ, found on heaths in Scotland, the S.W. of Ireland, &c.

heath-flower, *s.* The flower of any heath, probably in the example *Calluna vulgaris.*

"Vainly did the *heath-flower* shed
Its moorland fragrance round his head."
Scott: Lady of the Lake, i. 33.

heath-game, *s.* The same as Heathcock (q.v.).

heath-grass, *s.*

Bot.: The genus Triodia (q.v.). *Triodia decumbens* is the Decumbent Heath grass. (*Hooker & Arnott.*)

† heath-pea, *s.*

Bot.: Lathyrus macrorhizus, formerly *Orobus tuberosus,* the Tuberous Bitter Vetch. [Bitter-vetch.]

heath-plant, *s.* Heath, heather.

heath-pout, *s.*

Ornith.: The heathcock (q.v.). Pout is a corruption of poult.

"Not *heath-pout,* or the rarer bird
Which Phasis or Ionia yields,
More pleasing morsels would afford
Than the fat olives of my fields."
Dryden: Second Epode of Horace.

heath-rivulet, *s.*

Entom.: Emmelesia ericetata, one of the Geometer Moths. (*Newman.*)

heath-rustic, *s.*

hēa'-ṭhen, * he-then, * he-thene, * hæthene, *s.* & *a.* [A.S. *hǽthen,* from *hǽth* = heath (q.v.).; Dut. *heiden,* from *heide* = heath; Icel. *heidhinn,* from *heidhr;* Sw. *heden,* from *hed;* Dan. *heden,* from *hede;* Ger. *heiden,* from *heide;* Goth. *haithno* = a heathen woman, from *haithi* = heath.]

A. *As substantive:*

I. *Ordinary Language:*

* 1. A dweller on the heath.

2. An uncivilised man, a barbarian.

"And the *hethene* men deden to vs not litel courtesie."—*Wycliffe: Acts* xxviii. 1.

3. A hoyden, used of a man as well as of a woman. [Hoyden.] (*Trench.*)

4. In the same sense as II. 2 (q.v.).

II. *Technically:*

1. *Scripture:*

(1) *Old Test.:* A Gentile, one not a Jew; but with the further implication that he worshipped false gods, or that, if he served Jehovah, he did so by forbidden methods, and that, in consequence of his erroneous faith, he, or at least his fellow worshippers, practised moral abominations abhorrent to the true people of God. Heathen is the rendering of the Heb. word גּוֹיִם (*goim*) = peoples, nations, foreigners, gentiles; heathens in the special sense. In the A.V. it is sometimes rendered "nations," sometimes "gentiles," and sometimes "heathens." Cf. Lev. xxv. 44, xxvi. 45, 2 Sam. xxii. 44, 2 Kings xvi. 3, xvii. 15, xxi. 2, 2 Chron. xxviii. 3, xxxiii. 2, xxxvi. 14, Psalms ii. 1, cxxxv. 15, Jer. x. 2.

2. *New Testament:*

(*a*) In the same sense as No. 1.

(*b*) Those who are not of the Christian or Jewish faiths.

(2) *Theol., Missions, &c.:* The non-Christian portion of mankind, excluding the adherents of Judaism and Mohammedanism, as also Deists and Atheists.

¶ New views tend to take root first in cities and towns, then to spread to villages, and finally to affect the open country. The word heathen obtained its modern theological sense when the towns were Christian and the country chiefly of the prior ethnic faith. (Cf. the etym. of the word pagan.)

B. *As adjective:*

1. *Lit.:* Of or belonging to the portion of mankind defined under A. II. 2.

"Let him be to thee as a *heathen* man and a publican."—*Matthew* xiii. 17.

2. *Figuratively:*

(1) Unenlightened.

(2) Barbarous.

"The *heathen* Danes have left several traces of their religion in the upper part of Teesdale."—*Scott: Rokeby,* iv. 1. (Note.)

2. *Fig.:* Barbarous, rapacious, cruel.

"That execrable Cromwell made a *heathenish* or rather inhuman edict."—*South.*

hēa'-ṭhen-ĭsh-lў, *adv.* [Eng. *heathenish; -ly.*] In a heathenish manner; as the heathens do.

"The King's statues, . . . which, it seems, were too *heathenishly* naked to be exposed."—*Walpole: Anecdotes of Painting,* vol. ii., ch. iii.

hēa'-ṭhen-ĭsh-nĕss, *s.* [Eng. *heathenish; -ness.*] The condition of being heathenish; heathenism.

"The obscenity, ribaldry, amorousnesse, *heathishnesse,* and profanenesse of most play-bookes."—*Prynne: Histrio-Mastix,* 2 iv. 1.

hēa'-ṭhen-ĭsm, *s.* [Eng. *heathen; -ism.*]

1. *Lit.:* The system of belief prevalent among the heathens viewed as if it were a unity.

"Not less zealous in our Christianity than Plato was in his *heathenism.*"—*Milton: Tetrachordon.*

2. *Fig.:* Debased moral condition.

*** hēa'-ṭhen-ize,** *v.t.* [Eng. *heathen; -ize.*] To render heathen.

"The continuance of these unscriptural terms . . . *heathenizes* all the common people."—*Account of Mr. Firmin's Religion* (1698), p. 63.

hēa'-ṭhen-nĕss, *s.* [Eng. *heathen; -ness.*] Heathenish state; heathendom, as opposed to Christendom.

heather-blutter, heather-bleat, heather-bleater, *s.*

Ornith.: The Common Snipe, *Scolopax gallinago.* (*Scotch.*)

heather-cow, *s.* (*Scotch.*)

1. A tuft or twig of heath. (*Hogg: Winter Tales*, i. 243.)

2. In Galloway a besom made of heath.

hēath'-ẽr-ȳ, *a.* [Eng. *heather*; *-y.*] Abounding in or covered with heath; heathy; like heath.

"The antlered monarch of the waste
Sprung from his *heathery* couch in haste."
Scott: Lady of the Lake, i. 2.

hēath'-wŏrţ, *s. pl.* [Eng. *heath*, and *worts.*]

Bot.: The name given by Lindley to the order Ericaceæ (q.v.).

hēath'-ȳ, *a.* [Eng. *heath*; *-y.*] Full of or covered with heath.

"The fugitives sat on the *heathy* grass."—*Cooper: Hide & Seek*, p. 214.

hēat-ĭng, *pr. par., a., & s.* [HEAT, *v.*]

A. *As pr. par.:* (See the verb).

B. *As adj.:* Causing or tending to cause, or promoting warmth or heat; exciting; stimulating; stirring.

C. *As subst.:* The act or process of warming or imparting heat to anything.

"The *heating* of the oven."—*Shakesp.: Troilus & Cressida*, i. 1.

heating-apparatus, *s.* A contrivance for warming buildings. This is effected in various ways, by means of close stoves, hot air, steam, or hot water flues, gas, or open fires.

heating-surface, *s.*

Steam-eng.: The fire-surface or amount of surface exposed on one side to fire and the other to water. The allowance per horse-power varies according to the type of the boiler.

heating-tube, *s.*

Steam: A water-tube in a steam-boiler surrounded by flame and connecting at each end with a water-space.

***hēat'-ĭng-lȳ,** *adv.* [Eng. *heating*; *-ly.*] In a heating manner; so as to cause or communicate heat.

***hēat'-lĕss,** *a.* [Eng. *heat*; *-less.*] Destitute of heat; without heat or warmth.

hēave, *heve, *heven, *v.t. & i.* [A.S. *hebban* (pa. t. *hóf*, pa. par. *hafen*): cogn. with Dut. *heffen*; Icel. *hefja*; Sw. *häfva*; Dan. *hæve*; O. H. Ger. *heffan*; Ger. *heben*; Goth. *hafjan.*]

A. *Transitive:*

I. *Ordinary Language:*

1. *Literally:*

(1) To lift, to raise. (Generally with the idea of effort and painfulness.)

"[Geraint] *heaved* his blade aloft."
Tennyson: Geraint & Enid, 572.

(2) To raise, draw, or force from the breast or heart.

"She *heaved* the name of father pantingly forth."
Shakesp.: Lear, iv. 3.

(3) To cause to rise.

"Who *heave* the white bosom, and wave the dark hair."
Scott: Last Words of Cadwallon.

* (4) To cause to swell; to fill.

"The glittering finny swarms,
That *heave* our friths."
Thomson.

(5) To throw, to cast, to send; especially of something weighty.

"Up the high hill he *heaves* a huge round stone."
Pope: Homer; Odyssey xi. 736.

* **2.** *Figuratively:*

(1) To raise; to elevate in condition; to exalt.

"One *heaved* on high, to be hurled down below."
Shakesp.: Richard III, iv. 4.

(2) To puff up; to elate.

"The Scots, *heaved* up into high hope of victory."—*Hayward.*

II. *Technically:*

Nautical:

1. [*To heave down.*]

2. To haul on a rope or cable.

3. To cast the lead in sounding.

B. *Intransitive:*

I. *Literally:*

1. To be thrown, forced, or raised up; to rise.

2. To rise and fall as with alternate or successive motions: as the waves of the sea, the lungs in difficult or rapid respiration, the earth during an earthquake, &c.

"Rough Torre began to *heave* and move."
Tennyson: Elaine, 1,060.

3. To retch; to make an effort to vomit.

* **II.** *Figuratively:*

1. To pant, as after severe labour or exertion.

2. To labour, to struggle.

"The church of England had struggled and *heaved* at a reformation ever since Wycliffe's days."—*Atterbury.*

¶ (1) *To heave in stays:* To bring a ship's head to the wind.

(2) *To heave down:* To careen.

"The ship also was so leaky that I doubted it would be necessary to *heave* her *down* at Batavia."—*Cook: Voyages*, vol. ii., bk. iii., ch. vii.

(3) *To heave astern:* To draw the vessel aft.

(4) *To heave and set:* To ride hard.

(5) *To heave short:* To bring the ship above the anchor.

(6) *To heave in sight:* To come into sight or view.

(7) *To heave at the capstan, windlass, &c.:* To turn the capstan, windlass, &c., by means of bars, handspikes, &c.

hēave, *s.* [HEAVE, *v.*]

I. *Ordinary Language*

1. *Literally:*

(1) An upward motion or swelling, as of the waves of the sea; the lungs in heavy or hard respiration; the ground in an earthquake, &c.

"None could guess whether the next *heave* of the earthquake would settle them on the first foundation, or swallow them."—*Dryden.*

(2) The act of throwing, lifting, or casting; as, a *heave* of a stone.

(3) An effort to rise; a struggle.

* **2.** *Figuratively:*

(1) A rising of the breast: a sigh.

"There's matter in these sighs; these profound *heaves*
You must translate." *Shakesp.: Hamlet*, iv. 1.

(2) An effort to vomit; a retching.

II. *Technically:*

1. *Farriery (Pl.):* A disease in horses, characterized by heavy and laborious respiration.

2. *Min.:* A displacement of the strata or mineral vein by a dislocation.

heave-offering, *s.*

Judaism: The rendering of the Heb. word תְּרוּמָה (*terumah*) = (1) an oblation, an offering, a gift, (2) a sacrifice consecrated by elevating it; רוּם (*rum*) = to elevate oneself. When Aaron was consecrated high priest, Moses and his coadjutors were enjoined to sanctify or set apart the shoulder of the ram used for the consecration, called the shoulder of the heave-offering, which was to be waved and heaved up. It thenceforth became Aaron's and his sons', as an offering by the Israelites from their peace offerings to Jehovah. Similar arrangements were to be carried out in all future time (Exod. xxix. 27, 28), and all heave-offerings were to belong to Aaron and his sons, with their legitimate successors (Num. xviii. 8, 19).

They were specially given in connection with peace offerings (Lev. vii. 11–14). Heave-offerings were to be given when the first bread of the land was consumed, and in connection with the produce of the threshing-floor (Num. xv. 19–21; cf. Deut. xii. 6). Even tithes were looked on as heave-offerings (xviii. 24); so was a share of the prisoners, animals, and other prey taken in war (xxxi. 28, 29, 41).

"Ye shall offer a cake of the first of your dough for an *heave-offering.*"—*Numbers* xv. 20.

heave-shoulder, *s.*

Judaism: The shoulder of the ram used in the consecration of Aaron, used as a heave-offering. [HEAVE-OFFERING.]

"So supper came up. And first a *heave-shoulder* and a wave-breast were set on the table before them."—*Bunyan: Pilgrim's Progress*, pt. ii.

heaven, Heaven (as **hĕv'n**), *** heef-en, * heof-en, * heof-ene, * heov-en, * hev-en, * hev-ene,** *s.* [A.S. *heofon, hiófon, hefon*; O. Icel. *hifinn*; O. Sax. *hevan.*]

I. *Ordinary Language:*

1. *More or less literally (Of the form* heaven):

(1) The atmosphere surrounding the globe.

"And fowl that may fly above the earth in the open firmament of *heaven.*"—*Genesis* i. 20.

(2) The region beyond the atmosphere, studded with stars.

"I will multiply thy seed as the stars of the *heaven.*"—*Gen.* xxii. 17.

(3) The abode of God and the blessed. [II. 1.] With reference to the two foregoing meanings, this is sometimes called the heaven of heavens (Deut. x. 14; 1 Kings viii. 27), or the third heaven.

"Caught up to the third *heaven.*"—2 *Cor.* xii. 2.

2. *More or less figuratively:*

(1) *Of the form* heaven:

(*a*) Any place considered as a supremely blessed one in which to live.

"Ere Douglasses to ruin driven,
Were exiled from their native *heaven.*"
Scott: Lady of the Lake, ii. 8.

†(*b*) A person association with whom would, it is believed, cause the highest felicity.

"The *heaven* thou preachest or the *heaven* thou art."
Moore: Veiled Prophet of Khorassan.

(*c*) Love, viewed as the sweetest of felicity.

(*d*) Any social, intellectual, moral, or other elevation, sublimity of position, or of ascent.

"O, for a muse of fire, that would ascend
The brightest *heaven* of invention."
Shakesp.: Henry V. i. (Chorus.)

(2) *Of the form* Heaven:

(*a*) God.

"*Heaven* from above, and Conscience from within,
Cries in his startled ear—Abstain from sin!"
Cowper: Progress of Error, 47.

(*b*) The imaginary pagan divinities. In this sense often in the plural.

¶ The exclamation, Heavens! may have originally been an appeal in some moment of great excitement for aid to the heathen gods.

II. *Technically:*

1. *Theol.:* The place or state of the blessed.

(1) *Ethnic belief:* Heaven among the Greeks and Latins was regarded as the home of the greater gods, not as the abode of the just after death. In Hesiod (*Works & Days*, i. 165) there is a reference to the Islands of the Blest, where the heroes of the Fourth Age were to pass a second life. Afterwards the Elysian Fields, by Pindar placed in the extreme west, though they often were thought to be beneath the earth, were supposed to be the home of the spirits of the just. In most of the ethnic beliefs, heaven, as a state, is a realization of the earthly *summum bonum.* There are three chief sites of the ethnic heaven: (1) Some distant part of this earth: "The seats of happiness are represented by some Hindu writers to be vast mountains on the north of India" (*Dalton: Descr. of the People of India*, p. 485); (2) below the earth (*Virgil: Æneid* vi. 637, *sqq.*), as many of the lower races still think; and (3) in the extreme west, an opinion with poetic beauty in its favour, since it is in that region the Sun descends to his home, the land where, according to the solar myths, there is no more night.

(2) *Jewish:* Many passages relate to heaven, or the heaven of heavens, as the special abode of God (1 Kings viii. 27) and very high (Job xxii. 12). With regard to man, the references in the Old Testament to a state of existence beyond the present are few; these few, however, assign joy and pleasure to the righteous (Psalm xvi. 10, 11), attended by resplendent glory (Dan. xii. 2, 3).

(3) *Christian:* The heaven of blessedness is spoken of as if its locality was upward from the earth (Luke xxiv. 51; John i. 32; Rev. xi. 12, xxi. 10). God, whom the disciples and Christians generally were taught to address as their Father, is there (Matt. v. 16, 45, 48; vi. 9); Christ came thence at first (1 Cor. xv. 47), and, when His mission to earth was complete, reascended thither (Luke xxiv. 51). The Holy Spirit was sent down from heaven (1 Pet. i.

12); the throne of God is there (Rev. iv. 2; v. 1); nay, in one sense, all heaven is that throne (Matt. v. 34). Innumerable angels are in heaven, surrounding the Divine throne (Rev. v. 11); there is a temple also (Rev. xi. 19; xiv. 17; xvi. 17). Multitudes of persons, sealed as the servants of God, out of every nation, shall be there, clothed in white robes, and with palms in their hands (Rev. vii. 3, 9). They shall no more hunger or thirst, or feel undue heat or any sorrow (13–17). This felicity will not be reached till after the resurrection when this corruptible shall put on incorruption, and this mortal immortality, death, the last enemy, being destroyed (1 Cor. xv. 26, 54).

2. *Symbolism:* Heaven, in the Table of Symbols of the early ages, is represented by the segment of a circle, sometimes of blue, or of the three colours of the rainbow; the universe by a globe of blue.

¶ *Host of heaven:*

1. The stars.

"And when thou seest the sun, and the moon, and the stars, even all the *host of heaven*."—*Deut.* iv. 19.

2. Angels.

"I saw the Lord sitting on his throne, and all the *host of heaven* standing by him on his right hand and on his left."—1 *Kings* xxii. 19.

¶ Obvious compounds: * *Heaven-aspiring, heaven-banished, heaven-commissioned, heaven-daring, heaven-defying, heaven-guided, heaven-loved, heaven-protected,* &c.

***heaven-begot,** *a.* Begotten by a celestial power; heaven-born.

"If I am *heaven-begot*, assert your son."
Dryden. (*Todd.*)

heaven-born, *a.* Born of a celestial power; sent from heaven; inspired.

"The *heaven-born* poet must stand forth."
Wordsworth: Excursion, bk. vii.

heaven-bred, *a.* Produced or taught in heaven; of divine origin; divine.

"Much is the force of *heaven-bred* poesy."
Shakesp.: Two Gentlemen of Verona, iii. 2.

heaven-bridge, *s.*

Compar. Relig.: A bridge, sometimes called the Bridge of Death, supposed to reach from this world to heaven, spanning the abyss of hell. Along this bridge the souls of the departed must travel: the good to pass over in safety, the wicked to fall into the abyss. It is spoken of under different names in the Zend-Avesta (*Sacred Books of the East*, iv. 213), in the Rabbinical literature (*Midrash. Yalkut Reubeni*, s.v. Gehinnom), and the Preliminary Discourse (§ iv.) to Sale's translation of the Korân. This bridge exists in the mythology of the Javanese, the Karens, the Bornese, the Greenlanders, and the Indians of North and South America. It has a place in the myth of Baldur; it lingers in the North Country aong of "The Brig o' Dread," and to this day the peasant of Nièvre tells of a little board,

"Pas pu longue, pas pu large
Qu'un ch'veu de la Sainte Viarge,"

put by St. John between the earth and Paradise.

"Among these people the *Heaven-bridge* is a sword; those who cross become men, those who dare not women."—*Tylor: Early History of Mankind* (ed. 1878), p. 360.

***heaven-built,** *a.* Built by the agency of the gods.

"His arms had wrought the destined fall
Of sacred Troy, and razed her *heaven-built* wall."
Pope: Homer; Odyssey i. 4.

heaven-descended, *a.* Sent down from heaven; heaven-born.

heaven-directed, *a.*

1. Raised or pointing towards the sky.

"Who taught that *heaven-directed* spire to rise?"
Pope: Moral Essays, iii. 261.

2. Taught, guided, or directed by the power of heaven.

"O sacred weapon; left for truth's defence;
To all but *heaven-directed* hands denied."
Pope: Ep. to Sat. ii. 214.

heaven-fallen, *a.* Fallen from heaven; driven from heaven.

heaven-gate, *s.* The gate or entrance of heaven.

"The unwelcome news
From earth arrived at *heaven-gate*."
Milton: P. L., x. 22.

heaven-gifted, *a.* Bestowed by heaven. (*Milton: Samson Agonistes*, 36.)

heaven-god, *s.*

Compar. Relig.: The sky personified and worshipped as the supreme deity. The heaven-god of the primitive Aryan was Dyu, the bright sky, afterwards Dyaus pitar, the Heaven father, consort of the Earth mother. The Ζεὺς πατὴρ of the Greeks was credited with all celestial phenomena. A fragment from Sophocles (293)—which Plumptre translates

"The air is Zeus, Zeus earth, and Zeus the heaven.
Zeus all that is, and what transcends them all"—

and one line of Ennius—

"Aspice hoc sublime candens, quem omnes invocant Jovem"—

preserved for us in Cicero (*De Nat. Deor.*, iii. 4)—show that among the Greeks and Latins the heaven-god became later the god of heaven. Tylor (*Primitive Culture*, ii., 231 *sqq.*) traces a similar development in the religion of the North-American Indians, the Zulus, the tribes of Western Africa, the Tatar tribes; and among the Chinese Tien (Heaven) is in personal shape the Shang-ti, or Upper Emperor, the lord of the Universe.

"With such evidence perfectly accords the history of the *Heaven-god* among our Indo-European race."—*Tylor: Primitive Culture*, ii. 234.

heaven-guided, *a.* Guided or directed by the powers of heaven.

heaven-gulf, *s.*

Compar. Relig.: The same as the River of Death (q.v.).

"The *heaven-gulf* which has to be passed on the way to the Land of Spirits has a claim to careful discussion."—*Tylor: Early History of Mankind* (ed. 1878), p. 363.

*** heaven-hued,** *a.* Of the colour of the skies; blue, azure. (*Shakesp.: Complaint of a Lover*, 215.)

heaven-inspired, *a.* Inspired by heaven; divinely inspired.

heaven-kissing, *a.* Touching, as it were, the sky; exceeding lofty, reaching into the clouds. (*Shakesp.: Hamlet*, iii. 4.)

heaven-sent, *a.* Sent or commissioned by God.

"The creed and standard of the *Heaven-sent* Chief."
Moore: Veiled Prophet of Khorassan.

heaven-touched, *a.* Touched by Divine power.

"Your *heaven-touched* hearts disdain the sordid crime."
Thomson: Castle of Indolence, ii. 61.

heaven-tree, *s.*

Compar. Relig.: The mythic tree or vine which figures in many primitive beliefs as affording a means of ascent from the regions underground to the surface of the earth, or from the surface of the earth to the sky. Tylor says that variants of this myth have been found in the Malayan and Polynesian districts, in North and South America, in Borneo, the Celebes, and in New Zealand. In this country it survives in the nursery tale Jack and the Bean Stalk, which, strangely enough, is little koowo among cognate peoples.

"There was a *heaven-tree* where people went up and down, and when it fell it stretched some sixty miles."—*Tylor: Early History of Mankind* (3rd ed.), p. 357. (Note.)

*** heaven-warring,** *a.* Warring or fighting against heaven. (*Milton: P. L.*, ii. 424.)

heaven-worshippers, *s. pl.* [Cœlicolæ.]

***heaven** (as **hĕv'n**), *v.t.* [Heaven, *s.*] To place in heaven; to make supremely happy.

"He *heavens* himself on earth."—*Adams: Works*, i. 194.

*** heaven-ize (heaven** as **hĕv'n),** *v.t.* [Eng. *heaven; -ize.*] To render divine or fit for heaven.

"But, O my soul, if thou be once soundly *heavenized* in thy thoughts and affections, it shall be otherwise with thee."—*Bishop Hall: Sol.* 80.

*** heaven-like, * heaven-lyke (heaven** as **hĕv'n),** *a.* [Eng. *heaven: -like.*] Heavenly (q.v.).

"Meune farre aboue the common sorte, or as you woulde saye, *heauenlyke* felowes."—*Udal: Marke* viii.

heaven-li-ness (heaven as **hĕv'n),** *s.* [Eng. *heavenly; -ness.*] The quality or state of being heavenly; heavenly nature.

"Your *heavenliness*
Hath now vouchsafed itself to represent
To our dim eyes." *Sir J. Davies: Orchestra.*

heaven-ly * heaven-lye, * heven-li (heaven as **hĕv'n),** *a.* & *adv.* [A.S. *heofonlic.*]

A. *As adjective:*

1. Of or pertaining to heaven; celestial; inhabiting heaven; fixed in the heavens.

"To stop the course of the *heavenly* bodies."—*Farmer: On Miracles*, ch. i., § 1.

2. Fit or united for heaven; divine, angelic; supremely blessed or excellent.

"'Twas bright, 'twas *heavenly*, but 'tis past."
Moore: Fire-Worshippers.

*** B.** *As adv.:* In a manner resembling that of heaven; like a celestial being.

"She was *heavenly* true." *Shakesp.: Othello*, v. 2.

¶ For the difference between *heavenly* and *celestial*, see Celestial.

¶ Obvious compounds: *Heavenly-born, heavenly-guided, heavenly-harnessed,* &c.

heavenly-annunciation, *s.* The annunciation of Jesus by the angels from heaven.

¶ *Order of the Heavenly Annunciation:*

Eccles. & Ch. Hist.: An order of nuns founded by Victoria Fornari, in 1602, by permission of the Archbishop of Genoa.

heavenly-fruit, *s.*

Bot.: The genus Diospyros.

heavenly-minded, *a.* Having the affections or heart set on heaven and heavenly things.

heavenly-mindedness, *s.* The quality or state of being heavenly-minded.

heaven-ward (heaven as **hĕv'n),** *adv.* [Eng. *heaven; -ward.*] Towards heaven.

hēav'-ĕr, *s.* [Eng. *heav(e); -er.*]

I. *Ord. Lang.:* One who or that which heaves or lifts; specifically, a labourer employed in docks in landing goods from barges, &c.; also in composition, as a coal-*heaver.*

2. *Naut.:* A handspike; a staff employed in setting up the topmast shrouds, in frapping the topmasts, &c.

hēaves, *s. pl.* [Heave, *s.*, II. 1.]

hĕav'-ĭ-lȳ, *adv.* [Eng. *heavy; -ly.*]

1. In a heavy manner; with great weight.

2. In a strong, violent, or fierce manner; violently, furiously.

* **Hē'-brā-ĭze,** *v.t.* & *i.* [Gr. Ἑβραίζω (*Hebraizō*).]

A. *Trans.*: To make Hebrew; to convert into a Hebrew idiom.

B. *Intrans.*: To speak Hebrew; to act according to Hebrew manners or fashions.

Hē'-brew (ew as ô), *s.* & *a.* [Fr. *Hébreu*; Lat. *Hebræus*; Gr. Ἑβραῖος (*Hebraios*); from Heb. עִבְרִי (*Hibhri*), from עָבַר (*Habhar*) = to pass; or, in the opinion of Gesenius, a primitive word connected with עֵבֶר (*Hebher*) = the region beyond the Euphrates. Hence the Septuagint renders it Περάτης (*Peratēs*) = a stranger from a foreign land.]

A. *As substantive:*

1. *In the Bible generally*: An appellation given in the Bible to the Israelites. It was used chiefly by foreigners, or by Jews when addressing foreigners.

"For indeed I was stolen away out of the land of the *Hebrews*."—*Genesis* xl. 15.

2. *In part of the New Testament (Pl.)*: The Jews who spake the later "Hebrew,"—*i.e.*, the Aramæan—in contradistinction to the "Grecians" or Hellenists—*i.e.*, Jews—who spoke Greek.

"There arose a murmuring of the Grecians against the *Hebrews*."—*Acts* vi. 1.

3. The language spoken by the Israelitish nation. [Hebrew language.]

B. *As adj.*: Of or belonging to the Israelites or their tongue.

"The *Hebrew* servant which thou hast brought unto us."—*Genesis* xxxix. 17.

¶ (1) *Hebrew character*:

1. *Palæography*: The character in which the Hebrew language is now written. This, called the square character, was not the earliest. The general opinion is that it came into use only in the centuries immediately preceding the birth of Christ, or even about the commencement of the Christian era itself. The character on the Maccabee coins is like the Samaritan, rather than the square Hebrew

one. Gesenius, however, attributes the introduction of the square character to Ezra, and considers that the letters on coins were intentionally of archaic form. At first there were no vowel points. Those now existing were supplied by the Masorites about the seventh century of the Christian era.

(2) *Entom.:* A moth, *Tæniocampa gothica*, of the family Orthosidæ. The "Hebrew character" on the wings is a black mark, like the figure 7 or a prostrate L.

2. *Hebrew Language:*

Philol.: The language spoken by the Hebrews (q.v.). Prof. Max Müller divides the Semitic "family" of languages into three "classes" or sub-families: Arabic or Southern, Hebraic or Middle, and Aramæan or Northern. Under the second category he includes (1) Biblical Hebrew, (2) the Samaritan, as existing in the Samaritan Pentateuch, third century A.D.; (3) the Carthaginian or Phœnician of inscriptions. In the earliest books of the Old Testament it is already found in a high state of development. Only two periods of the language are traceable, a golden and a silver age. The latter was characterized by an increasing infusion of Aramæan words and idioms. This process began with the rise of the Assyrian power; it advanced when the colonists were brought from the East to occupy the place of the ten tribes carried into exile; and it became yet more firmly established during the Babylonian captivity. During the exile the common people lost their native tongue, though the upper classes spoke it; and the Hebrew tongue of the New Testament (Acts xxii. 2) is Aramæan. The parentheses after the Hebrew words in the Encyclopædic Dictionary are transliterations and not pronunciation marks.

¶ *Epistle to the Hebrews:*

Scrip. Canon: One of the most important epistles of the New Testament. Clement of Rome referred to it about A.D. 96, as did Justin Martyr in the second century, followed in due time by many other Christian fathers. When the epistle was written, the temple worship seems still to have continued (v. 1–4, viii. 3, ix. 25, &c.), which would place its date earlier than A.D. 70, the year when Jerusalem was destroyed. Its author was not one of those who had heard Jesus, but belonged to the generation immediately succeeding (ii. 3). Who he was, is a question which has excited difference of opinion both in ancient and modern times. The Greek fathers generally attributed the epistle to St. Paul; the Latin Churches in Europe and Northern Africa were long of a different opinion, but by the commencement of the fourth century the Eastern view largely prevailed, in the West as well as in the East, and by the commencement of the fifth century it was everywhere dominant. Jerome and Augustine had much influence in giving it currency, which it retained to the Reformation. Erasmos, Cardinal Cajetan, Luther, Calvin, Beza, and others, revived the old doubts. The Council of Trent gave a decision in favour of St. Paul, but in Protestant countries the question is still held to be a debateable one. Passages such as x. 34 and xiii. 23 might well have been written by St. Paul during his imprisonment at Rome, and there are a multitude of expressions in Hebrews like those of the epistles admitted to be St. Paul's. But, taken as a whole, the Greek composition is more finished and more rhetorical than that of the apostle. If Paul was not the author, who was? The early Church said Clement of Rome or St. Luke or Silas, called also Silvanus; Luther suggested Apollos, a much more probable opinion, which has since been ably defended in Germany by Semler, Bleek, De Wette, Tholuck, &c.

The "Hebrews" to whom the epistle was addressed were the Jewish converts to Christianity, specially those resident in Palestine, to whom Aramæan was vernacular, though they knew Greek. Some fathers thought that the Greek epistle was translated from Aramæan, but it has all the characteristics of an original writing. The Old Testament quotations are from the Septuagint, even where it differs from the Hebrew, as if the author had not been familiar with the latter tongue. His treatment of types, symbols, &c., is suggestive of Philo and the Alexandrian writers, but this is not conclusive as to the epistle having been written in Egypt.

Its canonical authority was accepted in the early Church by many who denied its Pauline authorship. Eusebius places it among his Homologoumena (q.v.), and there has never been any impeachment of its integrity.

Internal evidence shows that the Palestinian Christians to whom it was addressed were in great danger of being seduced or persecuted again into the Judaism, which they had left (x. 32–39). The epistle was designed to keep them stedfast. It opens with arguments for the divinity of Christ and His consequent superiority to the angels. Hence Christianity bestowed through Him is superior to Judaism communicated by means of angels (i., ii. 1–3); He, a son, is superior to Moses, a servant, (iii. 5, 6); His everlasting priesthood is superior to that of Aaron (vii.); His sacrifice was an effective one, of which those of Judaism were only types and shadows (ix.); Christianity was founded on the New Coveoant, which was to abide, while the Old one decayed and was ready to vanish away (viii. 13). Let the converts hold fast their Christian belief (ii. 1–3, x. 32–39), avoid apostasy (vi. 4–9), and imitate the ancient worthies, whose animating principle was faith (xi.), seeking for a "continuing city" in another world rather than in this (xiii. 14).

Hebrew-wise, *adv.* In an opposite sense; in allusion to the fact that Hebrew is read from right to left, and that Hebrew books commence where books in European languages end.

> "The thesis, *vice-versâ*, put

1. A rack or frame for holding fodder for cattle.

2. A door; especially one partly of lattice-work.

3. The latch of a door.

4. A fish trap.

II. *Technically:*

1. *Spin.:* The fly of a spinning-wheel.

2. *Weav.:* A device through which the yarns pass from the warping-mill to the reel on which they are wound for transference to the warp-beam of the loom. The heck-box slides vertically on a bar as the reel rotates, and thus disposes the warp spirally on the reel. The heck consists of a series of steel pins with eyes, through each of which one thread passes. The heck is in two parts, one a little raised from the other. The eyes of the parts being alternate, by raising one of them a little, the bands of the warp are separated; when the other part of the heck is raised, the position is reversed, the former upper band becoming the lower. This produces the lease, which is tied up, to form a guide for setting it in the loom.

heck-box, *s.*

Weav.: A box suspended between the travers on which the bobbins of warp yarn are mounted, and the warping-frame on which the yarns are wound. It divides the warp threads into two sets, one for each beddle (q.v.).

hĕck (2), *s.* [Etym. doubtful.] The bend or winding of a stream.

hē'-dŏn-ĭşm, *s.* [Fr. *Hédonisme* (Littré), from Gr. ἡδονή (*hēdonē*) = delight, enjoyment; prop. of sensual pleasure.]

Anc. Philos.: The tenets of the Cyrenaic school of philosophy, founded by Aristippus, a disciple of Socrates. Aristotle calls him a Sophist, possibly because he demanded payment for his instruction. He taught that pleasure was the end of life, and that it was the duty of a wise man to enjoy pleasure without being controlled by it. The control was to be acquired by knowledge and culture. Horace, in one verse, tersely sums up the philosophy of Aristippus—

"Et mihi res, non me rebus, subjungere conor."
Epist. I. i. 18.

The most eminent of the Cyrenaic school were Arêtê, the daughter of the founder, her son, surnamed from her teaching Metrodidaktos, Theodorus the Atheist, and his scholars, Bio and Euhemerus. [EUHEMERISM.] Auniceris the Younger sought to ennoble the Hedonic principle by reckoning civil and social duties among the things which afford pleasure, yet he asserted that our efforts for the benefit of others should have an egoistic motive. Later the Cyrenaic doctrine gave way to Epicureanism. [EPICUREAN.]

Hē'-dŏn-ĭst, *s.* [Eng. *Hedon(ism); -ist.*] One who accepts the Hedonic philosophy; one who makes pleasure the end of life.

Hĕ-gĕl'-ĭ-ạn, *a. & s.* [*G. F. W. Hegel; -ian.*]

A. *As adj.:* Pertaining to or in any way connected with Hegelianism (q.v.).

"Philosophy begins then, on the *Hegelian* principle, by our gaining a clear conception of the laws of thought."—*Morell: Speculative Philosophy* (2nd ed.), ii. 167.

B. *As subst.:* One who accepts the teaching of Hegel.

"As he increased in years, Schelling became very bitter against the *Hegelians.*"—*History of Pantheism,* ii. 204.

Hĕ-gĕl'-ĭ-ạn-ĭşm, *s.* [Eng., &c. *Hegelian; -ism.*]

Philos.: The system outlined by George Frederick William Hegel (1770—1831) in his *Encyclopädie.* His teaching is in some degree a systematization of Schelling's ideas [IDEALISM, SPINOZISM], in their turn a development of those of Fichte. Michelet (*Gesch. der Syst. der Philos.* ii. 604) claims for Hegel the invention of a new method—the principle of the Identity of the Subject with the Object. Logic with Hegel is not an examination of the forms of thought, but of thoughts themselves, for whatever is true of the thought, is true of the thing. Hegelianism deals with (1) Logic, (2) The Philosophy of Nature, (3) The Philosophy of the Intelligence. The whole system is contained in the Logic, of which the other parts are but an application. The first proposition is, Being and Non-Being are the same. This gives two contraries; there must be a relation to make them real. Unite them, and that is the Becoming (*Werden*). In this idea are two elements—a NON-Being from which it is evolving, and a Being which is evolved. Hegel claimed to be Conservative and orthodox, and Baring Gould (*Origin of Relig. Belief* (ed. 1882), ii. 40), says that "if the modern intellect is to be reconciled to the dogma of the Incarnation, it will be through Hegel's discovery." On the other hand, the Young Hegelians—Strauss, Bruno Baur, Feuerbach, and others—assert that their doctrines, radical in politics and rationalist in religion, are legitimate deductions from the system of Hegel.

"*Hegelianism* is here taken in a wide sense."—*Adamson: Fichte,* p. 219. (Note.)

* **hĕg-ĕ-mŏn'-ĭc,** * **hĕg-ĕ-mŏn'-ĭc-ạl,** *a.* [Gr. ἡγεμονικός (*hēgemonikos*), from Gr. ἡγεμών (*hēgemōn*) = a leader, a guide; ἡγέομαι (*hēgeomai*) = to rule or guide.] Ruling, predominant, chief.

"The judgment being the *hegemonical* power, and director of action, if it be led by the overbearings of passion."—*Glanvill: Vanity of Dogmatizing,* ch. xxiii.

* **hĕ-gĕm'-ŏ-nỹ,** *s.* [Gr. ἡγεμονία (*hēgemonia*), from ἡγεμών (*hēgemōn*) = a leader, a guide.] Leadership, predominance, superiority; applied to the relation of one state to another, or to a number of others confederated.

* **hegge,** *s.* [HEDGE, *s.*]

hĕġ'-ĭr-ạ, *s.* [A.S. *hijrah* = separation, flight.] The flight of Mohammed from Meeca, on the night of Thursday, July 15, 622, from which the Mohammedans begin their reckoning of time; any similar flight. In calculating dates reckoned from the Hegira, it should be remembered that the Mohammedan year has only 354 days. To transform a Mohammedan into a Christian date, not merely must 622 be

aubtracted from the latter, but the remainder must be multiplied by 365·52, and divided by 354.

Hei'-del-bĕrg, *s.* & *a.* [See def. A.]

A. *As substantive:*

Geol.: A city of Baden, thirty-two miles N.N.E. of Carlsruhe.

B. *As adj.:* Of or belonging to the place described under A.

Heidelberg Catechism, *s.*

Eccles.: A catechism, first published at Heidelberg in 1563, drawn out by Zechariah Ursinus for the use of the Reformed Church, and published in the Palatinate. It was received beyond this limit, was approved by the Synod of Dort, and was the model on which the Westminster Assembly framed the Shorter Catechism. (*Mosheim,* &c.)

hĕif'-ĕr, * **haif-are,** * **hai-fre,** * **hayf-are,** * **hek-fere,** * **hei-fre,** *s.* [A.S. *heáhfore,* from *heáh* = high, and *fear* = an ox.] A young cow. (*Thomson: Spring,* 807.)

heĭgh (*gh* silent), *interj.* [Imitative.] An exclamation used to call attention or encourage.

heigh-ho, * **hai-ho, hey-ho,** *interj.*

1. An expression of disappointment, languor, uneasiness, or regret.

"'Tis almost five o'clock, cousin: 'tis time you were ready; by my troth I am exceeding ill, *hey ho!*"—*Shakesp.: Much Ado About Nothing,* iii. 4.

* 2. An expression of joy or exultation.

heĭght, * **heĭghth** (*gh* silent), * **highth,** * **highte,** * **heyghth,** * **heighthe,** * **heithe,** * **heght,** * **heghte,** *s.* [A.S. *heáhdhu, héhdhu,* from *heáh* = high; cogn. with Dut. *hoogte,* from *hoog* = high; Icel. *hæðh,* from *hár* = high; Sw. *höjd,* from *hög;* Dan. *höide,* from *höi;* Goth. *hauhitha,* from *hauhs* = high; O. H. Ger. *hôhida.*]

1. The quality or state of being high, elevated, or raised above the ground; elevation; eminence; elevated position.

"'Fortifyed with a hyll of a great *heyghth.*"—*Golding: Cæsar,* fo. 29.

2. The altitude or distance which anything rises above its foot, basis, or foundation.

"Fifty the breadth, the *height* (least of the three)
Full thirty cubits." *Drayton: Noah's Flood.*

¶ The height of mountains or other elevations is measured in one or other of two ways: by trigonometry or by the barometer.

3. An elevated, high, or lofty place; an eminence; a summit.

"Beyond yon mountain's hoary *height.*"
Dryden: Horace, bk. I., lx.

4. Size; stature.

"She is about my *height.*"
Shakesp.: Two Gentlemen of Verona, iv. 4.

5. Elevation or pre-eminence in rank, office, society, &c.; high rank, position, or station.

"By him that raised me to this careful *height.*"
Shakesp.: Richard III., i. 3.

* 6. Elevation or dignity, as of language, expression, sentiment, &c.

* 7. Degree of latitude; the latitudes being considered higher as they approach the poles.

"Guinea lieth to the north sea, in the same *height* as Peru to the south."—*Abbot.*

8. The utmost or highest degree or pitch; the fullest extent or degree.

"Richard falls in *height* of all his pride."
Shakesp.: Richard III., v. 3.

¶ * (1) *At height:* In the prime of power or strength. (*Shakesp.: Hamlet,* i. 4.)

* (2) *To the height:* To the fullest extent; in the highest or fullest degree.

"He's traitor *to the height.*"
Shakesp.: Henry VIII., i. 2.

* **heĭght** (*gh* silent), *v.t.* [Height, *s.*] To raise to a height; to exalt; to heighten.

"Had their several chambers delicately *heighted.*"—*Adams: Works,* i. 421.

heĭght'-ĕn (*gh* silent), *v.t.* [Eng. *height; -en.*]

I. *Lit.:* To make high or higher; to raise; to elevate.

II. *Figuratively:*

1. To elevate or raise in rank or position; to exalt.

"Being so *heighten'd,*
He watered his new plants with dews of flattery."
Shakesp.: Coriolanus, v. 5.

2. To raise or elevate in quality; to improve; to increase.

"*Heightned* and invigorated, by being compared with the contrary evil."—*Cudworth: Intel. Syst.,* p. 220.

3. To raise in degree; to increase; to aggravate.

"Foreign states used their endeavours to *heighten* our confusions."—*Addison: On the War.*

4. To set off to advantage by means of a foil or contrast; to make brighter, stronger, or more evident.

"Here again the comedian had an opportunity of *heightening* the ridicule by action."—*Goldsmith: The Bee,* No. 2.

heĭght'-ĕn-ĕr (*gh* silent), *s.* [Eng. *heighten; -er.*] One who or that which heightens.

* **heĭghth** (*gh* silent), *s.* [Height.]

heĭ'-mĭ-a, *s.* [Named after Dr. Helm, a Berlin physician.]

Bot.: A genus of Lythraceæ, tribe Lythreæ. *Heimia salicifolia* or the Hanchinol (q.v.).

hein'-oŭs (**ei** as **ā**), * **hain-ous,** * **hayn-ous,** *a.* [O. Fr. *haïnos,* from *haine* = hate, *haïr* = to hate; Fr. *haineux;* cf. Goth. *hatyan, hatjan* = to hate.] Hateful; odious; detestable; abominable; flagrant; atrocious; wicked in the highest degree.

"Geue none eare to their *haynous* heresies."—*Sir T. More: Workes,* p. 318.

¶ *Heinous* and *flagitious* are both applied to offences against human or divine law, but the latter is the stronger term. An offence is *heinous* from its very nature; it becomes *flagitious* on account of its extreme features.

hein'-oŭs-lў (**ei** as **ā**), * **hain-ous-ly,** * **hayn-ous-ly,** * **hein-ous-lie,** *adv.* [Eng. *heinous; -ly.*] In a heinous manner or degree; hatefully; odiously; abominably; atrociously.

"This very lawe is often transgressed, and that *haynously* euen in the church."—*Hackluyt: Voyages,* i. 581.

hein'-oŭs-nĕss (**ei** as **ā**), * **heyn-ous-nesse,** *s.* [Eng. *heinous; -ness.*] The quality or state of being heinous; atrocity.

"Truly affected with the *heinousness* of his guilt."—*Jortin: Ecclesiastical History.*

heir (as **ār**), * **heire,** * **heyr,** * **heyre,** * **eir,** * **eyr,** *s.* [O. Fr. *heir, eir,* from Lat. *heres* = an heir.]

I. *Literally:*

1. One who succeeds or is entitled to succeed another in the possession of lands, tenements, and hereditaments by descent; one who is by law the inheritor of anything after the present possessor; one in whom the title to an estate by inheritance is vested by law; an inheritor.

An *heir* therefore is he upon whom the law casts the estate immediately on the death of the ancestor."—*Blackstone: Commentaries,* bk. ii., ch. 14.

2. One who inherits, takes, or receives anything from an ancestor: as, A child is *heir* to the disease of his father.

* **II.** *Fig.:* That which is procreated or begotten; a child; a production.

"The first *heir* of my invention."—*Shakesp.: Venus & Adonis.* (Dedic.)

¶ *Heir by custom:* An heir claiming by certain customary modes of descent attached to the land.

heir-apparent, *s.* (See extract.)

"*Heirs-apparent* are such whose right of inheritance is indefeasible, provided they outlive the ancestor; as the eldest son, who must be heir to the father whenever he happens to die."—*Blackstone: Comment.,* bk. ii., ch. 14.

heir-at-law, heir-general, *s.* One who by the common law succeeds to the lands and tenements of his father or ancestor at his death.

heir-loom, *s.* [Heirloom.]

heir-presumptive, *s.* (See extract.)

"*Heirs-presumptive* are such who, if the ancestor should die immediately, would in the present circumstances of things be his heirs; but whose right of inheritance may be defeated by the contingency of some nearer heir being born: as a brother, or nephew, whose presumptive succession may be destroyed by the birth of a child; or a daughter, whose present hopes may be hereafter cut off by the birth of a son."—*Blackstone: Comment.,* bk. ii., ch. 14.

heir-special, *s.* An heir who succeeds to an estate in the order pointed out by some instrument determining such special course of descent.

* **heir** (as **ār**), *v. t.* [Heir, *s.*] To be heir to; to inherit.

"One only daughter *heired* the royal state."
Dryden: Virgil; Æneid vii. 79.

* **heir'-dŏm** (**heir** as **ār**), *s.* [Eng. *heir; -dom.*] The state or condition of an heir; succession by inheritance; heirship.

heir'-ĕss (**heir** as **ār**), *s.* [Eng. *heir; -ess.*] A female heir.

heir'-lĕss (**heir** as **ār**), *a.* [Eng. *heir; -less.*] Destitute of or having no heir.

"*Heirless* it hath made my kingdom."
Shakesp.: Winter's Tale, v. 1.

heir'-loom (**heir** as **ār**), *s.* [Eng. *heir,* and Mid. Eng. *loom* = a piece of property; furniture.] [Loom, *s.*]

1. A personal chattel which by special custom descends to the heir with the heritable estate.

"Thus an *heirloom,* or implement of furniture, which by custom descends together with an house, is neither land or tenement, but a mere moveable: yet being inheritable is comprised under the general word hereditament."—*Blackstone: Comment.,* bk. ii., ch. 2.

2. Any special inheritance; property handed down by inheritance.

"This tumour by a king might cured be alone:
Which he an *heirloom* left unto the English throne."
Drayton: Poly-Olbion, s. 11.

heir'-shĭp (**heir** as **ār**), *s.* [Eng. *heir; -ship.*] The quality, state, character, or position of an heir; succession by inheritance.

"I shall first review the laws of *heirship* by proximity of blood; and, secondly, the laws of *heirship* by appointment, which is either by adoption during life, or by testamentary disposition."—*Sir W. Jones: Commentary on Isæus.*

* **heirship movables,** *s. pl.*

Scots Law: The best of certain kinds of movables, which the heir was entitled to take, besides the heritable estate; the distinction was abolished in 1868.

heĭs-tĕr'-ĭ-a, *s.* [Named after Laurence Heister, Professor of Botany at Helmstadt. He died in 1758.]

Bot.: A genus of Olacaceæ. *Heisteria coccinea* is a tree with white flowers, found in Martinique and other West Indian islands; its red fruits are eaten by pigeons. It was once erroneously supposed to furnish the Partridge-wood of the cabinet-makers.

* **hei-sugge,** *s.* [A.S. *hege* = a hedge.] The hedge-sparrow.

hē'-jăl-ap, *s.* [Eng. *he* = male, and *jalap.*]

Comm.: The same as Male Jalap (q.v.).

hĕj'-ĭr-a, *s.* [Hegira.]

hĕl'-a-mўs, *s.* [Gr. ἐλλός (*hellos*), ἐλλός (*ellos*) = a young deer, a fawn, and μῦς (*mus*) = a mouse.]

Zool.: The name given by F. Cuvier to a genus of mammals, called by Illiger Pedetes. It resembles Dipus, containing the Jerboas. It contains the *Helamys* or *Pedetes caffer,* or Cape Jerboa. It is about the size of a hare, and advances by leaps and bounds. Its Dutch names mean Leaping and Mountain Hare. It does damage to the green and ripe grain crops adjacent to the mountains where it lives. [Pedetes.]

hĕl-arc'-tŏs, *s.* [Gr. ἥλιος (*hélios*) = the sun, and ἄρκτος (*arktos*) = a bear.]

Zool.: Sunbear; a genus of Ursidæ (Bears). They have smooth glossy hair, feed chiefly on honey or the young shoots of the cocoanut tree, and are milder in their disposition than the more typical members of the family. *Helarctos malayanus* is the Malayan Sunbear, of which the Borneau one, *H. euryspilus,* may be perhaps only a variety.

hĕl-cŏl'-ō-ġў, *s.* [Gr. ἕλκος (*helkos*) = a wound, an ulcer, and λόγος (*logos*) = a discourse; Fr. *helcologie.*]

Med.: The branch of medical science which treats of ulcers.

hĕl'-cō-plăs-tў, *s.* [Gr. ἕλκος (*helkos*) = a wound, an ulcer, and πλαστός (*plastos*) = formed, moulded; πλάσσω (*plassō*) = to form moulds, to shape.]

Surg.: The process of replacing the epidermic integument, destroyed by an ulcer, by transferring to the injured spot a piece of skin from the corresponding part of the individual or of some other person.

hĕld, *pa. t.* & *pa. par.* [Hold, *v.*]

* **hēle** (1), *v.t.* [A.S. *helan.*] To hide, to cover, to conceal.

* **hēle** (2), *v.t.* [Heal.]

* **hēle** (1), *s.* [Heel, *s.*]

***hēle** (2), ***heale,** *s.* [A.S. *hǽl, hœlu.*] Health, safety, welfare.

"Thy soule *hele.*" *Morte Arthure,* 3,655.

***hēle'-lĕs,** *a.* [Mid. Eng. *hele* = health, and *les* = less.] Without safety, cure, or remedy

† Hĕl'-ĕn-a, *s.* [St. Helena, the queen of Constantius Chlorus. It was she who built the church of the Holy Sepulchre. The name was derived remotely from Gr. Ἑλένη (*Helenē*), Helen, wife of Menelaus, the taking away of whom caused the war of Troy. Curtius derived the name from Gr. ἑλάνη (*helanē*), ἐλένη (*helenē*) = a torch; while Max Müller considers it akin to the Vedic Sarama, the goddess of the dawn.]

Meteor.: An old Roman name still current among Italian sailors for a single light appearing to sailors. It was deemed by them unfavourable, whilst a double one, termed Castor and Pollux, was deemed propitious. They are varieties of St. Elmo's Fire (q.v.).

hĕ-lĕn'-ĭ-ĕ-æ, *s. pl.* [Mod. Lat. *Helenī(um);* Lat. fem. pl. adj. suff. *-eæ.*]

Bot.: A sub-tribe of Composites, tribe Senecioniдeæ.

hĕl'-ĕ-nĭn, hĕl'-ĕ-nīne, *s.* [Mod. Lat. *Helen(ium),* in the botanical name *Inula Helenium,* and suff. *-in, -ine* (*Chem.*) (q.v.).]

Chem.: A crystalline substance existing in the root of elecampane, *Inula helenium.* Obtained by exhausting the root with hot alcohol, and purifying the crystals till they melt at 110°. They are colourless, inodorous needles: the mother liquid contains *Inula camphor.*

hĕ-lĕn'-ĭ-ŭm, *s.* [Lat. *Helenium;* Gr. ἑλένιον (*helenion*) = a plant, perhaps elecampane. (*Liddell & Scott.*)]

Bot.: The typical genus of the sub-tribe Heleniеæ (q.v.). The species are yellow-flowered American plants.

hē-lĭ-, hē-lĭ-ō-, *pref.* [Gr. ἥλιος (*hēlios*) = the sun. [HELIACAL.]

hē'-lĭ-ac, hē-lĭ'-ac-al, *a.* [Gr. ἡλιακός (*hēliakos*) = of or belonging to the sun; ἥλιος (*hēlios*) = the sun; cf. Sanse. *sura* = the sun; Lat. *sol;* Goth. *sunna;* Eng. *sun* (q.v.).]

Astron.: Closely connected with the sun; rising just before the sun; a term used when a star rises just before the sun. As the sun moves in its orbit, a particular star which had for some time risen after the sun or with him, remaining however invisible, owing to his beams, will at length rise a sufficient length of time before him to be seen. When it does so, this is called its heliacal rising, or it is said to rise heliacally. As in bygone ages the precession of the equinoxes has made various stars in succession rise heliacally, a means, of which Sir Isaac Newton made use, is afforded of computing ancient dates, in cases in which observers have accurately recorded which star in any year rose heliacally.

"The cosmical ascension of a star we term that, when it ariseth together with the sun, or the same degree of the ecliptic wherein the sun abideth; and that the *heliacal* (ascension), when a star which before for the vicinity of the sun was not visible, being further removed, beginneth to appear."—*Browne: Vulgar Errours,* bk. iv., ch. xiii.

heliacal-year, *s.*

Astron.: The same as CANICULAR YEAR (q.v.).

hĕ-lī'-a-cal-lȳ, *adv.* [Eng. *heliacal; -ly.*] In a heliacal manner.

"*Heliacally,* that is, its emersion from the rays of the sun."—*Browne: Vulgar Errours,* bk. iv., ch. xiii.

hĕl'-ĭ-ăn'-thĕm-ŭm, *s.* [Pref. *heli-* (q.v.), and Lat. *anthemum;* Gr. ἄνθεμον (*anthemon*), the same as ἄνθος (*anthos*) = a flower.]

Bot.: Rock-rose, a genus of Cistaceæ (q.v.). It contains herbs or under-shrubs, with five petals; stamens, as a rule, many; an imperfectly three-celled capsule, with many seeds. About thirty species are known, from Europe, West Asia, and North America. Sir Joseph Hooker divides the genus into three subsections: Helianthemum proper, Turberaria, and Pseudos-cistus. *H. Canadense,* the Frost Weed or Rock-rose, is a widely distributed plant of the United States, being found in dry fields and woods from Canada to Florida. It is distinguished by its flowers, with large, bright-yellow petals, in a terminal corymb. The species are numerous, and found in the Eastern as well as the Western Continent. *H. vulgare,* the Common Rock-rose of England, has beautiful yellow flowers, which appear from July to September. Above a hundred and thirty foreign species are cultivated in gardens, where they have run into double-flowered varieties. [ROCK-ROSES.]

hĕl-ĭ-ăn'-thoid, *a.* [Mod. Lat. *helianthoida* (q.v.).]

Zool.: Resembling a sun-flower; of or belonging to the Helianthoida.

helianthoid-polypes, *s. pl.*

Zool.: The Helianthoida (q.v.).

"The *helianthoid-polypes,* of which the common sea-anemones of our coasts may serve as an example."—*Hist. Animal Kingdom,* p. 57.

hĕl-ĭ-ăn-thoid'-a, *s. pl.* [Pref. *heli-;* Gr. ἄνθος (*anthos*) = a flower, and εἶδος (*eidos*) = form.]

Zool.: An order of Polypes, now ranked in the order Zoantharia, of the class Actinozoa, called also Hexacorolla (q.v.). [ZOANTHARIA.]

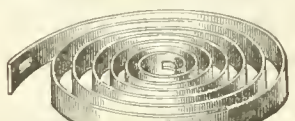
hĕl-ĭ-ăn'-thŭs, *s.* [Gr. ἥλιος (*hēlios*) = the sun, and Gr. ἄνθος (*anthos*) = a blossom, a flower; cf. also Lat. *helianthes;* Gr. ἡλιανθές (*hēlianthes*) = a fabulous magical herb.]

Bot.: Sunflower, a genus of Compositæ, tribe Senecionidæ, sub-tribe Coreopsideæ. *Helianthus annuus* is the Sunflower (q.v.), *H. tuberosus,* the so-called Jerusalem Artichoke. [ARTICHOKE.]

hĕl'-ĭc-al, *a.* [Lat. *helix* (genit. *helicis*), from Gr. ἕλιξ (*helix*), (genit. ἕλικος) (*helikos*) = a spiral line, a helix.] Having many convolutions; spiral.

"The screw is a kind of wedge multiplied or continued by a *helical* revolution about a cylinder."—*Wilkins.*

helical-spring, *s.* A spring whose coils have a gradually decreasing diameter, as the mainspring of a watch. It may lie in one



HELICAL-SPRING.

plane, like a fake of rope, one layer of rope as coiled up; or it may be like the architectural helix or the helix of a shell, and assume a conical form.

hĕl'-ĭ-cal-lȳ, *adv.* [Eng. *helical; -ly.*] In a helical or spiral manner; spirally.

hĕl-ĭ-chrȳ'-sē-æ, *s.* [Mod. Lat. *helichrys(um);* Lat. fem. pl. adj. suff. *-eæ.*]

Bot.: A sub-tribe of Composites, tribe Senecioniдeæ.

hĕl-ĭ-chrȳ'-sŭm, *s.* [Lat. *heliochrysos;* Gr. ἡλιόχρυσος (*hēliochrusos*) = a kind of everlasting flower; pref. *helio-,* and Gr. χρυσός (*chrusos*) = gold. Named from the radiated flower heads, often of a golden hue, though sometimes also white, pink, or crimson.]

Bot.: The typical genus of the tribe Helichrysеæ (q.v.). *Helichrysum orientale,* a native of Crete and Africa, is the Immortelle of the French.

hĕ-lĭç'-ĭ-dæ, *s. pl.* [Lat. *helix;* Gr. ἕλιξ (*helix*), genit. ἕλικος (*helikos*) = twisted; as subst., anything spiral; with Lat. fem. pl. adj. suff. *-idæ.*]

1. *Zoology:* Land Snails, a family of gasteropodous mollusca, order Pulmonifera, section Inoperculata. The shell is external, and in general large enough to contain the entire animal, the aperture closed during hybernation by an epiphragm. The animal has a short retractile head, with four retractile tentacles, the upper pair the longer, and with eye specks at the tips. More than 1,600 species have been described. They are of world-wide distribution. Genera: Helix, Vitrina, Succinea, Bulimus, Achatina, Pupa, Clausilia, &c. Forbes and Hanley enumerate forty-six British species of Helicidæ. [HELIX.]

2. *Palæont.:* The family came into existence as long ago as the Carboniferous period, with the genera Pupa, Dawsonella, and the sub-genus Zonites. Then, after a long interval, it reappears in the Tertiary. The gap has arisen because *land* snails could not occur largely as fossils in strata chiefly marine.

hĕ-lĭç'-ĭ-form, *a.* [Lat. *helix* (genit. *helicis*) = a spiral line, and *forma* = form.] Having the form of a helix; helical, spiral.

hĕl'-ĭ-çin, *s.* [Gr. ἕλιξ (*helix*) = ivy, and *-in* (*Chem.*).]

Chem.: $C_{13}H_{16}O_7$. A glucoside formed by the action of very dilute nitric acid on salicin. Helicin crystallizes in white slender needles, which melt at 175°. An aqueous solution of helicin is converted by sodium amalgam into salicin. Boiled with dilute acids or alkalia, it is converted into glucose $C_6H_{12}O_6$, and salicylic aldehyde $C_6H_4{\cdot}OH{\cdot}CO{\cdot}H$.

hĕl-ĭ-çī'-na, *s.* [Lat. *helix, helicis* [HELIX]; Gr. ἑλίκη (*helikē*) = winding, twisting, as of a shell-snail; neut. pl. adj. suff. *-ina.*]

Zool.: A genus of gasteropodous molluscs, family Cyclostomidæ. The shell is globose, depressed, or keeled, with a nearly square or semilunar aperture, having a shelly or membranous operculum; animal with long slender pointed tentacles. Known recent species 162, from the West Indies, the Pacific, &c. Not yet found fossil.

hĕl'-ĭ-çine, *a.* [Gr. ἕλιξ (*helix*); as subst. = the tendril of the vine or that of ivy; and suff. *-ine.*] Of, belonging to, or resembling a tendril. Not confined to botanical descriptions; for in anatomy there are helicine arteries.

† hĕl'-ĭ-çite, *s.* [Lat. *helix* (genit. *helicis*); suff. *-ite.*]

Palæont.: A fossil snail of the genus Helix.

hĕl'-ĭ-cō-grăph, *s.* [Gr. ἕλιξ (*helix*), genit. ἕλικος (*helikos*)=a spiral line, and γράφω (*graphō*) = to write, to draw.] An instrument for describing helices. A small wheel rotates on the screw shaft and revolves around the fixed point, moving towards or from the said centre, according to the direction of its revolution; a pencil describing a helix. The distances between the intersections of an ordinate with the spiral are equal to the pitch of the screw.

hĕl'-ĭ-cō-gyr'-ate (yr as ir), *a.* [Gr. ἕλιξ (*helix*), genit. ἕλικος (*helikos*) [HELIX], and Eng. *gyrate* (q.v.).]

Bot.: Having a ring or gyrus carried obliquely round it. Example, the apore-cases of Trichomanes.

hĕl'-ĭ-cōid, *a.* & *s.* [Gr. ἑλικώδης (*helikōdes*), ἑλικοειδής (*helikoeidēs*) = of winding form; ἕλιξ (*helix*) [HELIX], and εἶδος (*eidos*) = form.]

A. *As adjective:*

1. *Ord. Lang.:* Spirally curved; curved like the spire of a univalve shell; spiral.

2. *Bot.:* Twisted like a snail-shell. The term is used specially when the cyme of a monocotyledonous plant has its flowers arrayed in succession in a spiral form around a pseudothallus or axis of one-peduncled cymes or sarmentidia, formed by a series of successive peduncles fitted into each other in such a way that they seem to form but one and the same stalk. Example, *Hemerocallis fulva.* (*Lindley.*)

B. *As subst.:* A curved surface generated by a right line in such motion about a fixed right line that every point in the former shall move uniformly in the direction of the latter, preserving a uniform angular motion about it.

helicoïd parabola, *s.*

Geom.: A curve arising from the supposition that the common or Apollonian parabola is bent or twisted till the axis comes into the periphery of a circle, the ordinates still retaining their places and perpendicular positions with respect to the circle, all these lines remaining in the same plane.

hĕl-ĭ-cōid'-al, *a.* [Eng., &c. *helicoid; -al.*] The same as HELICOID, *a.* (q.v.).

"The formation of the right and left-handed *helicoidal* crystals."—*Brit. Assoc. Rep.* (1853), p. 405.

Hĕl'-ĭ-cŏn, *s.* [Gr.]

1. *Geog.:* A mountain in Bœotia, in Greece, near the Gulf of Corinth, sacred to Apollo and the Muses. On it were situated the fountains Hippocrene and Aganippe, the supposed grand sources of poetic inspiration.

2. *Music:* A form of wind-instrument of metal, resembling a French-horn, but having keys and valves. They are made *en suite,* that is, of various sizes and compass.

hĕl-ĭ-cō'-nĕ-æ, *s. pl.* [Lat. *helicon(ia)*; fem. pl. adj. suff. *-eæ.*]

Bot.: A tribe of Musaceæ, having solitary seeds, and the fruit a capsule bursting through the partitions. [HELICONIA.]

hĕl-ĭ-cō'-nĭ-a, *s.* [Lat. *Helicon* (q.v.), and fem. sing. adj. suff. *-ia.*]

1. *Bot.:* The typical genus of the tribe Heliconeæ (q.v.). The root of *Heliconia psittacorum*, and that of *H. Bihai*, are eaten in the West Indies. *H. Mariæ Alexandrovnæ*, a Grenada species, named after the Empress of Russia, produces a fibre of economic value.

2. *Entom.:* A genus of butterflies, the typical one of the sub-family Heliconinæ, or the family Heliconidæ (q.v.). It occurs in tropical America.

hĕl-ĭ-cōn'-ĭ-an, *a.* [Eng. *Helicon*; *-ian.*] Of or pertaining to Helicon.

hĕl-ĭ-cŏn'-ĭ-dæ, hĕl-ĭ-cō'-nĭ-ī, *s. pl.* [Lat. *helicon(ia)* (q.v.), and fem. pl. adj. suff. *-idæ*, or masc. *-ii.*]

Entom.: A family of butterflies. They are not eaten by birds or by monkeys.

hĕl-ĭ-cō-stĕ'-gą, *s.* [Gr. ἕλιξ *helix* (genit. ἕλικος (*helikos*) [HELIX]; and Gr. *στέγη* (*stegē*) = a roofed place, a room.]

Zool.: The typical genus of Helicostegidæ (q.v.).

hĕl-ĭ-cō-stĕg'-ĭ-dæ, *s. pl.* [Mod. Lat *helicosteg(a)*; Lat. fem. pl. adj. suff. *-idæ.*]

Zool.: A family of Rhizopoda, order Polythalamia, with spirally arranged chambers, like minute cephalopods, to which, however, they are not at all akin.

hĕl-ĭ-cō-trē'-ma, *s.* [Gr. ἕλιξ (*helix*), genit. ἕλικος (*helikos*) [HELIX], and Gr. *τρῆμα* (*trēma*) = that which is pierced, a hole.]

Anat.: A small opening at the extremity of the cochlea in the ear.

hĕ-lĭc-tĕr'-ĕ-æ, *s. pl.* [Mod. Lat. *helicter(es)*; Lat. fem. pl. adj. suff. *-eæ.*]

Bot.: A tribe of Sterculiads. The leaves are simple and the flowers perfect.

hĕl-ĭc'-tĕr-ēs, *s.* [Gr. ἑλικτήρ (*heliktēr*) = anything twisted: an armlet, an earring. Named from the screw-like appearance which the five twisted carpels of the fruit present.]

Bot.: The typical genus of the tribe Helictereæ (q.v.). *Helicteres Isora* is known to Anglo-Indians as twisted stick, twisted horn, or twisty. A decoction of the root of *Helicteres Sacarotha* is used in Brazil as a remedy for venereal complaints.

hĕl-ĭc'-tĭs, *s.* [Gr. ἥλη (*hēlē*) = solar heat, and ἴκτις (*iktis*) = a weasel or ferret. (*Agassiz.*)]

Zool.: A genus of Mustelidæ. Two species are known, *Helictis moschata*, from China, and *H. nepalensis*, from Nepaul.

* **hĕl'-ĭng,** *s.* [Mid. Eng. *hele* = to cover, to conceal.] That which covers; specif., the roofing of a building.

hĕ-lĭ-ō-, *pref.* [HELI-.]

hĕ-lĭ-ō-çĕn'-trĭc, hĕ-lĭ-ō-çĕn-trĭc-ąl, *a.* [Pref. *helio-*, and Eng. *centric* (q.v.).]

Astron.: Having the point of observation in the centre of the sun, as distinguished from geocentric in the centre of the earth. When we speak of the heliocentric longitudes and latitudes of objects, we suppose the spectator situated in the sun, and referring them by circles perpendicular to the plane of the ecliptic to the great circle marked out in the heavens by the infinite prolongation of that plane. The heliocentric latitude of the earth is always 0, and its heliocentric longitude always equal to the sun's geocentric longitude added to 180°. The heliocentric equinoxes and solstices are the same as the geocentric ones reversely named. The difference between the heliocentric and geocentric places of a planet is the same as its parallax (q.v.). (*Herschel: Astron.*, § 372, 373, 501.)

hē'-lĭ-ō-chrōme, *s.* [Gr. ἥλιος (*hēlios*) = the sun, and χρῶμα (*chrōma*) = colour.]

Photog.: The name given by Niépce de St. Victor to the products of his process for photographing in the natural colours; a photograph in colours.

hō-lĭ-ō-chrōm'-ĭc, *a.* [Eng. *heliochrom(e)*; *-ic.*] Of or pertaining to heliochromy.

hē-lĭ-ō-chro'-mō-type, *s.* [Eng. *heliochrome*; *o* connective; and Eng. *type.*]

Photog.: A sun-picture in the natural colours; long desired, and partially obtained, but always fugitive, so far.

hē-lĭ-ŏch'-rō-mỹ, *s.* [Eng. *heliochrom(e)*; *-y.*]

Photog.: The art or process of producing coloured photographs.

hē'-lĭ-ō-graph, *s.* [Gr. ἥλιος (*hēlios*) = the sun, and *γράφω* (*graphō*) = to write, to draw.]

1. An instrument constructed by De la Rue for obtaining photographs of the sun.

2. An apparatus invented by Mr. H. C. Mance for telegraphing by means of the sun's rays. It is composed of a circular mirror, varying in diameter for field or fixed operations. This mirror revolves on a horizontal axis, and is adjusted to the required angle of incidence with the sun by a telescopic rod, and the rays can be directed to any point with the utmost precision. The Morse system of dashes and dots is adopted, and the signals can be read in ordinary weather, without the aid of field-glasses, at a distance of fifty miles. (*Voyle.*)

3. A picture taken by heliography; a photograph.

hō-lĭ-ŏg'-raph-ēr, *s.* One who uses the heliograph; one who is conversant with the art of heliography.

hē-lĭ-ō-grăph'-ĭc, hē-lĭ-ō-grăph'-ĭ-cal, *a.* [Eng. *heliograph*; *-ic*; *-ical.*] Of or pertaining to heliography; taken by the process of heliography.

hē-lĭ-ŏg'-rą-phỹ, *s.* [Eng. *heliograph*; *-y.*] The process of taking pictures on a prepared surface by means of the sun and the camera obscura; photography.

* **hē-lĭ-ŏl'-ą-tĕr,** *s.* [Gr. ἥλιος (*hēlios*) = the sun, and λατρεύω (*latreuō*) = to worship.] One who worships the sun.

* **hē-lĭ-ŏl'-ą-trỹ,** *s.* [Gr. ἥλιος (*hēlios*) = the sun, and λατρεια (*latreia*) = worship.] Sun-worship (q.v.).

hē'-lĭ-ō-līte, *s.* [Pref. *helio-* (q.v.); and Gr. λίθος (*lithos*) = a stone.]

Min.: Sunstone, avanturine felspar, partly orthoclase, partly albite, or oligoclase. (*Dana.*)

hē-lĭ-ō-lĭ'-tēş, *s.* [HELIOLITE.]

Palæont.: A fossil Alcyonarian, family Helioporidæ. Several species are found in the Wenlock limestone in the Upper Silurian.

hē-lĭ-ŏm'-ĕ-tĕr, *s.* [Pref. *helio-* (q.v.), and Gr. *μέτρον* (*metron*) = a measure.]

1. An instrument for measuring the apparent magnitude of the sun. The object-glass of a telescope is made in halves, set in separate brass frames which slide laterally on each other, the motion being produced and measured by a screw. Each half makes its own image. These may be brought near, or made to separate by the movement of the screw. The heliometer is a form of micrometer.

2. An instrument for ascertaining the solar time in all latitudes, and for ascertaining the latitude when the apparatus is set at noon according to the date. Also for ascertaining the date and length of day, sunrise and sunset, other conditions being established. Also, the differences of time between two places, the position of the earth's axis in relation to the level at the point of observation, &c.

hē-lĭ-ŏph'-ĭ-la, *s.* [Pref. *helio-*, and Gr. *φιλέω* (*phileō*) = to love.]

Bot.: The typical genus of the tribe Diplecolobeæ. The species are from the Cape of Good Hope.

hē-lĭ-ō-phĭl'-ĭ-dæ, *s. pl.* [Mod. Lat. or Gr. *heliophil(a)*; Lat. fem. pl. adj. suff. *-idæ.*]

Bot.: A family of cruciferous plants, tribe Diplecolobeæ.

hē-lĭ-ō-pōr'-ą, *s* [Pref. *helio-*; and Gr. *πόρος* (*poros*) = a passage, a pore.]

Palæont.: The typical genus of the family Helioporidæ (q.v.). Found in the Silurian and in the Devonian rocks.

hō-lĭ-ō-pōr'-ĭ-dæ, *s.* [Mod. Lat. *heliopor(a)*; Lat. fem. pl. adj. suff. *-idæ.*]

Zool.: A family of Alcyonarian corals, founded by Moseley. The genera have a well-developed sclerodermic coralium, composed of tabulate tubes of two sides, the larger furnished with rudimentary aeptal laminæ. (*Nicholson.*)

hē-lĭ-ŏp-sĭd'-ĕ-æ, *s. pl.* [Mod. Lat. *heliopsis* (genit. *heliopsidis*); Lat. fem. pl. adj. suff. *-eæ.*]

Bot.: A sub-tribe of compositeæ, tribe Senicionideæ.

hē-lĭ-ŏp'-sĭs, *s.* [Pref. *heli-*, and Gr. *ὄψις* (*opsis*) = appearance.]

Bot.: The typical genus of the sub-tribe Heliopsideæ. The only known species is *Heliopsis brevis*, an American plant five or six feet high with yellow flowers.

hē-lĭ-ōr-nī'-næ, *s. pl.* [Mod. Lat. or Gr. *heliorn(is)*; Lat. fem. pl. adj. suff. *-inæ.*]

Ornith.: A sub-family of Colymbidæ (Divers), established by Mr. G. R. Gray for some birds akin to the Orebes, found in the warmer parts of America.

hē-lĭ-ōr'-nĭs, *s.* [Pref. *heli-* (q.v.), and Gr. ὄρνις (*ornis*) = a bird.]

Ornith.: Coot-grebe, Fin-foot, a genus of Colymbidæ, with a more developed tail and sharper claws than in Colymbus and Podiceps. Localities, Africa and South America.

hē'-lĭ-ō-scōpe, *s.* [Pref. *helio-* (q.v.), and Gr. σκοπέω (*skopeō*) = to look at.]

1. *Gen.:* An instrument for viewing the sun. Stained glass is a simple helioscope. If red it is unsuitable, for that colour transmits the rays of heat in sufficient intensity to injure the eye. Green, violet, and dull brown (smoke) are the colours most frequently employed for this purpose.

2. *Spec.:* A form of reflecting telescope for viewing the sun. It has the object mirror in the form of a double concave lens, with the anterior surface worked into a paraboloid of the proper focal length. (*Herschel: Astron.*, § 204, &c.)

hē-lĭ-ŏs-cŏp'-ĭc, *a.* [Eng. *helioscop(e)*; *-ic.*] Of or pertaining to a helioscope.

hē-lĭ-ō'-sĭs, *s.* [Gr. ἡλίωσις (*hēliōsis*) = exposing to the sun; ἡλιόομαι (*helioomai*) = to be sunstruck; ἡλίοω (*hēliōō*) = to warm in the sun; ἥλιος (*hēlios*) = the sun.]

Bot.: Spots produced upon leaves by concentration of the rays of the sun upon them by inequalities of the glass in conservatories or other causes.

hē'-lĭ-ō-stăt, *s.* [Pref. *helio-*, and Gr. *στατός* (*statos*) = placed, fixed; from ἵστημι (*histēmi*) = to cause to stand.]

1. A mirror provided with a clockwork motion, so adjusted as to make it follow the course of the sun, which, therefore, till the day departs, continues to be reflected from its face.

2. An instrument invented by Gauss, in 1821, by means of which the rays of the sun can be flashed to great distances. It consists of an adjustable mirror or reflector, worked in connection with a combination of telescopes, and is now used in all trigonometrical surveys. By its aid triangles, with sides over one hundred miles in length, can be measured. Drummond's heliostat, in use in this country, consists of an equatorial, revolving on its polar axis, so that the sun, when once accurately in the focus of the telescope, continues steadily fixed there.

hē-lĭ-ō-sphĕr'-ĭc-ąl, *a.* [Pref. *helio-*, and Eng. *spherical* (q.v.).] Round as the sun.

hē-lĭ-ō'-thĭ-dæ, *s. pl.* [Mod. Lat. *helioth(is)*; Lat. fem. pl. adj. suff. *-idæ.*]

Entom.: A family of Moths, group Noctuina. The antennæ are not pectinated, the thorax short, the abdomen smooth, the flight often diurnal; larva cylindrical, feeding exposed on flowers or leaves. Ten British species, including the Pease-blossom and the Underwings. (*Stainton.*)

hē-lĭ-ō'-thĭs, *s.* [Pref. *helio-*, and Gr. *ὠθέω* (*ōthеō*) = to thrust, to burst forth.]

Entom.: The typical genus of the family

Heliothidæ. All the species fly by day. *Heliothis marginata* is the Bordered Sallow, a whitish ochreous moth, bordered behind with purple.

hē-lĭ-ō-trō-pā'-çē-æ, *s. pl.* [Lat. *heliotrop(ium)*; Lat. fem. pl. adj. suff. *-aceæ.*]

Bot.: An order of plants generally reduced to a tribe of Ehretiaceæ, and called Heliotropeæ (q.v.).

hē-lĭ-ō-trōpe, *s.* [Gr. ἥλιος (*hēlios*) = the sun, and τρόπη (*tropē*) = a turning; τρέπω (*trepō*) = to turn.]

1. *Astron.:* An instrument for showing at a place when the sun arrives at his farthest point north or south of the equator as seen at that place.

2. *Optics:* A heliostat (q.v.).

3. *Photog.:* An instrument used to illuminate negatives in the solar-camera in making enlarged pictures.

4. *Bot.:* The genus Heliotropium (q.v.). The species are mostly tropical or sub-tropical; a few, however, reach Europe. The leaves of *Heliotropium europæum*, the common or European Heliotrope, were formerly used to cleanse ulcers and to allay inflammation. Some of the species are sweet-scented, and are cultivated in gardens, one, the Peruvian Heliotrope (*H. peruvianum*), having a peculiarly agreeable odour, is frequently called cherry-pie. This is the species to which the name heliotrope is popularly applied. [Heliotropium.]

5. *Min.:* A cryptocrystalline variety of quartz, generally deep green, with yellow or blood-red spots. [Bloodstone.]

¶ *Winter heliotrope:*

Bot.: Nardosmia fragrans.

hē-lĭ-ō-trō'-pĕ-æ, *s. pl.* [Lat. *heliotrop(ium)*; Lat. fem. pl. adj. suff. *-aceæ.*]

Bot.: A tribe of Ehretiaceæ, having the seeds without albumen.

hē-lĭ-ō-trŏp'-ĭc, hē-lĭ-ō-trŏp'-ĭc-al, *a.* [Lat. *heliotrop(ism)*; Eng., &c. suff. *-ic, -ical.*]

Bot.: Tending to turn to the sun; pertaining to or manifesting heliotropism (q.v.).

hē-lĭ-ŏt'-rō-pĭşm, *s.* [Pref. *helio-* (q.v.); Gr. τρόπος (*tropos*) = a turn; τροπόω (*tropoō*) = to make to turn; and Eng. suff. *-ism.*]

Bot.: Movement of leaves or flowers towards the sun, as the turning of plants in the window of a house towards the sunlight, or the tendency of the helianthus to follow the luminary with its great flowers.

hē-lĭ-ō-trō'-pĭ-ŭm, *s.* [Heliotrope.]

Bot.: Heliotrope, Turnsole, the typical genus of the tribe Heliotropeæ (q.v.). It consists of herbs or under-shrubs, with one-sided racemes of white or yellow flowers, with circinate vernation, followed by four nuts or drupes with thin pericarps. [Heliotrope.]

hē'-lĭ-ō tȳpe, *s.* [Gr. ἥλιος (*hēlios*) = the sun, and Eng. *type.*]

Photography:

1. A method of printing from a gelatine surface hardened with alum, in the same way as from a lithographic stone. It is based upon the fact that gelatine, impregnated with an alkaline bi-chromate, when exposed to light, loses its power of absorbing water. A warm solution of gelatine containing a sufficiency of bi-chromate of potash, is poured upon a waxed glass-plate, levelled, and allowed to dry. These operations must be performed in a room illuminated by a non-actinic light only. The film is then stripped from the glass, exposed to day-light under a reversed photographic negative, and then fastened to a metal plate. After washing away the superfluous chemicals, it is rolled with ordinary lithographic ink, which adheres to the gelatine more or less, according to the amount of change produced by the light, and the consequent absorption of the water by the film. It is then ready for printing in an ordinary lithographic press. [Lithography.]

2. A picture produced by such a process.

hē-lĭ-ō-tȳ-pŏg'-ra-phy, *s.* [Gr. ἥλιος (*hēlios*) = the sun, and Eng. *typography* (q.v.).] The process of producing heliotypes at an ordinary lithographic press.

hē-lĭ-ō-zō-a, *s. pl.* [Pref. *helio-* (q.v.), and Gr. ζῶα (*zoá*), pl. of ζῶον (*zoon*) = a living being, an animal.]

Zool.: A tribe or family of Radiolaria, possessing a contractile vesicle, but having no central capsule. The body is naked or siliceous. Mostly inhabitants of fresh water. Example, the Sun animalcule.

* **helise,** *s.* [Elysium.]

* **hĕl ĭ-sphĕr'-ĭc, * hĕl-ĭ-sphĕr'-ĭc-al,** *a.* [Lat. *helix* = a spiral line, and Eng. *spheric, spherical.*] (See extract.)

"The *helispherical* line is the rhomb line in navigation, and is so called because on the globe it winds round the globe spirally, and still comes nearer and nearer to it, but cannot terminate in it."—*Harris.*

hē'-lĭ-ŭm, *s.* [Gr. ἥλιος (*hēlios*) = the sun.]

Chem.: A hypothetical elementary substance discovered by the spectroscope in the solar prominences.

hē'-lix (*pl.* **hĕl'-ĭ-çēş),** *s.* [Lat., from Gr. ἕλιξ (*helix*); Fr. *hélice.*]

I. *Ord. Lang.:* A curve generated by winding a line around in a coil of gradually increasing radius, and maintaining the same plane, or by winding the line on a cone on which it ascends in winding. The flat watch-spring, and the fakes of rope in a tier are instances of the flat helix.

"Find the true inclination of the screw, together with the quantity of water which every *helix* does contain."—*Wilkins.*

II. *Technically:*

1. *Anat.:* A prominent and incurved margin surrounding the thinner and larger portion of the pinna in the ear.

2. *Arch.:* The small volute under the abacus of a Corinthian column. Of these there are in every perfect capital sixteen: two at each angle, and two meeting under the middle of each face of the abacus.

3. *Geom.:* A curve, the tangents to which make, with the horizontal plane, a constant angle. The edge of the path of a screw is a helix, as is also the path described by any point of the surface of the thread when moved in the nut.

4. *Zool.:* The typical genus of the molluscous family Helicidæ (q.v.). About 1,600 recent species are known, and 200 fossil, the latter from the Eocene onward. Recent species are found in all countries of the world. The type is *Helix pomatia*, the Roman snail. There are many sub-genera of Helix. [Snail.]

¶ Snails are abundant in all parts of the United States, dwelling under stones and logs in damp situations, and varying considerably in the forms of their shells, though very similar in habit as herbivorous, air-breathing mollusks. The family is characterized by an ample external shell, into which the animal can retract itself entirely, and by the possession of four tentacles, upon the summits of the longest of which the eyes are situated. The Slugs, or Limacidæ, have only a small, rudimentary shell, concealed within their mantle.

hĕll, * helle, *s.* [A.S. *hel, helle*; cogn. with Dut. *hel*; Icel. *hel*; Dan. *helvede*; Sw. *helvete* (from A.S. *helle-wite* = hell torment); Ger. *hölle*; Goth. *halja*; O. H. Ger. *hella*, from the same root as A.S. *helan*; Ger. *kehlen* = to hide.]

I. *Ordinary Language:*

1. In the same sense as II.

2. Wicked spirits, the infernal powers.

"In despite of the devils and *hell*, have through the very midst of you!"—*Shakesp.: 2 Henry VI.*, iv. 8.

3. The place to which those who are caught in some games are taken.

"The two that in mid-place, *hell* called, were,
Must strive with waiting foot and watching eye,
To catch of them." *Sidney.*

4. The name given by some workmen to a place into which refuse, as of cloth or broken type, is thrown.

"In Covent-garden did a taylor dwell,
Who might deserve a place in his own *hell*."
King: Art of Cookery.

* 5. A place under the Exchequer Chamber where the king's debtors were confined.

6. A gambling-house.

7. A place of extreme misery, pain, or suffering.

"The prisons were *hells* on earth, seminaries of every crime and of every disease."—*Macaulay: Hist. Eng.*, ch. iii.

8. Torment, torture.

"Within him *hell*
He brings, and round about him."
Milton: P. L., iv. 20.

II. *Religions:*

1. *Ethnic:* "Hell," as a place of punishment, is found, with more or less distinctness, in nearly all ethnic forms of religions, the precise nature of the punishment varying widely. Three definite stages in the concept of hell may be traced: (1) a vague notion of a future life, to be spent in misery, with little or no idea of moral retribution; (2) it ranks as a place of torment for those who have offended the gods, but is conceived as limited in duration; and (3) it becomes an important factor in the moral government of the universe, a place where evil deeds done in this life are rigorously punished. Tylor (*Prim. Cult.*, ii. 103) says that the idea of a fiery abyss is so seldom recognised among the lower races that the few cases in which it does occur lie open to a suspicion of not being purely native.

¶ For the classic conception of the place of woe, see Tartarus.

2. *Judaism & Christianity:*

(1) In the Old Testament used chiefly for Hades (q.v.), as in Psalm xviii. 5, cxvi. 3, cxxxix. 8, Prov. v. 5, Isa. xiv. 9; Hab. ii. 5. More rarely in the New Testament it is used in the same sense, as in Acts ii. 31 with reference to Psalm xvi. 10, and apparently in Rev. i. 18, vi. 8, xx. 13, 14, though the language is mostly figurative. In the Apostles' Creed the article "He descended into hell" means into Hades. This sense of the word is now obsolete, except in old formulæ or other archaic writings.

(2) The place of woe. This is the common New Testament sense of the word, and is the rendering of Gr. Γεέννα (*Geenna*) [Gehenna.] Of those cast into it Jesus says, "Where their worm dieth not, and their fire is not quenched" (Mark ix. 44, 46–48), the language being adapted from Isa. lxvi. 24. This fire is said to be everlasting fire, prepared for the devil and his angels (Matt. xxv. 41.).

hĕl'-lĕ-bōre, *s.* [Lat. *helleborus, helleborum*; Gr. ἑλλέβορος (*helleboros*), ἑλλέβορος (*elleboros*) = hellebore; various plants, all poisonous, but used as remedies in mental diseases, and

especially, it is believed, *Helleborus orientalis* [1. (2)]. The second element in Gr. ἑλλέβορος (*helleboros*) is probably βορά (*bora*) = food; the first is uncertain.]

1. *Botany:*

(1) The genus Helleborus (q.v.).

(2) The genus Veratrum, one of the Melanthaceæ.

2. *Phar.:* *Veratri viridis radix*, Green Hellebore root. The dried rhizome of *Veratrum viride*, growing in swampy districts of the United States. It has a peculiar acrid taste. It is used to control the vascular system in cases of rheumatic gout. It causes depression and slowness of the pulse.

¶ The Black Hellebore of the ancients was *Helleborus officinalis*, the modern one, *H. niger*. [Christmas-rose.] It is reputed to be a drastic purgative. In human medicine its employment is nearly obsolete, but the drug is still imported from Germany, and used as a cattle medicine. Stinking Hellebore is *H. fœtidus*; American White or Swamp Hellebore is *Veratrum viride*; False Hellebore, the genus Veratrum; White Hellebore, *V. album*; and Winter Hellebore, *Eranthus hyemalis*. [Helleborus.] White Hellebore is used by gardeners to destroy the gooseberry caterpillar and other insects.

hĕl-lĕ-bŏr'-ĕ-æ, *s. pl.* [Lat. *hellebor(us)*; fem. pl. adj. suff. *-eæ*.]

Bot.: A tribe of Ranunculaceæ. The calyx is imbricated in æstivation; the fruit consists of many-seeded follicles. Genera represented in Britain: Caltha, Trollius, Helleborus, Eranthis, Aquilegia, Delphinium, and Aconitum (q.v.).

hĕl'-lĕ-bŏr-īne, *s.* [Eng. *hellebor(e)*; *-ine*.]

1. *Bot.:* The orchidaceous genus Epipactis.

2. *Chem.:* An azotised body obtained from the root of *Helleborus hiemalis* by exhausting it with alcohol, diluting the extract with water, which precipitates a resin, and concentrating the filtered liquid. Helleborine forms colourless crystals, with a harsh bitter taste, soluble in water and alcohol, more so in ether.

* **hĕl'-lĕ-bŏr-īze,** *v.t.* [Eng. *hellebor(e)*; *-ise*.] To treat or dose with hellebore, as for madness.

* **hĕl'-lĕ-bŏr-ĭzm,** *s.* [Eng. *hellebor(e)*; *-ism*.] A medical preparation of hellebore.

"In vain should the physician attempt, with all his medicines and *helleborisms*, the cure of those that are sick with love."—*Ferrand: Love Melancholy* (1640), p. 169.

hĕl-lĕb'-ŏr-ŭs, *s.* [Hellebore.]

Bot.: The typical genus of the ranunculaceous tribe Helleboreæ (q.v.). Sepals five, large, petaloid, or imbricate, persistent; petals small, tubular, two-lipped; stamens numerous; follicles few or many, dehiscing above;

HELLEBORUS OFFICINALIS.
1. Plant in Flower. 2. Plant in Leaf. 3. Root.

seeds numerous. The American or Swamp Hellebore (*Veratrum viride*), known also as Indian Poke or Itch Weed, is frequent in damp situations from Canada to Carolina. *H. fœtidus*, Stinking Hellebore, and *H. viridis*, Green Hellebore, are natives of Europe. The roots and leaves of several species are drastic purgatives. The Hellebore of the ancients has by some been deemed *H. niger*; it is now considered to have been *H. officinalis*.

hĕl'-mĕt, *s.* [A dimin. from *helm* (1), s. (q.v.); Dut. *helmet*.]

1. *Arm.:* A piece of defensive armour for the head; a defensive covering for the head. It was originally made of leather, and afterwards strengthened by the addition of bronze and other metals, until finally it was constructed entirely of metal, lined with felt or wadding. In the Middle Ages helmets were frequently inlaid with gold, and provided with bars and movable flaps to cover the face in battle, and to be opened at other times. A full-barred helmet covered the whole of the

GREEK HELMET.

head, face, and neck. It had openings and slits in front to enable the wearer to breathe and see. The open helmet covered only the head, ears, and neck, leaving the face uncovered. The form of the helmet varied from the simple skull-cap to that surmounted with a lofty ridge and crest or plume. The crest was frequently made of horse-hair, and sometimes the helmet had two or even three crests. The Anglo-Saxon helmet was merely a conical cap, with a nasal piece, which afterwards became improved into a face-guard, visor, or beaver. The helmet is still worn as a protection to the head among soldiers: the military helmet, as now worn, does not cover or protect the face. Metal helmets are now only worn (1) by some European cavalry regiments; (2) by firemen to protect them from falling pieces of burning wood, &c., at fires. Police constables wear helmets of the same material as the ordinary infantry helmet. In tropical countries helmets are made of soft white felt, wrapped round with folds of linen, to protect the head of the wearer from the heat of the sun; (3) by divers: in this case it is made of thin sheet-copper, furnished with eye-holes, the glass of which is protected by brass wire. It comes well down over the breast and back, and is fastened by rivets to a waterproof canvas jacket. [Diving-dress.]

HELMET OF CHARLES THE BOLD.

2. *Bot.:* The same as Galea (q.v.).

3. *Chem.:* The top or upper part of a retort.

4. *Her.:* That part of a coat of arms which bears the crest. Of these there are four varieties used by English heralds:—(1) That for the sovereign and princes of the blood royal, which is of gold, full-faced, having the beaver divided into six projecting bars, and lined with crimson; (2) that for nobility, of steel with five bars of gold, and represented somewhat in profile; (3) that for baronets and knights, which is a full-faced steel helmet, without bars, and with the visor open; and (4) that of an esquire or gentleman, which is of steel, with the visor closed, and represented in profile.

helmet-beetles, *s. pl.*

Entom.: The family Cassididæ or Cassidiadæ (q.v.).

helmet-flower, *s.*

Bot.: (1) Scutellaria, (2) Aconitum, (3) Coryanthes. They are all named from the form of their irregular corolla.

helmet-shaped, *a.*

Bot.: The same as Galeate (q.v.).

helmet-shell, *s.*

Zool.: The genus Cassis (q.v.).

hĕl'-mĕt-ĕd, *a.* [Eng. *helmet; -ed.*] Furnished, or armed with, or wearing a helmet.

"Oh no knees, none, widow;
Unto the *helmeted* Bellona use them."
Shakesp. & Flet.: Two Noble Kinsmen, I.

* **hĕl-mĕt-tiĕr',** *s.* [Eng. *helmet; -ier.*] A soldier armed with a helmet.

Ichthy.: The name given by Kölliker, and adopted by Yarrell, with the addition of the epithet Lemniscati, for the ribbon-like fishes now called Leptocephalidæ (q.v.).

hĕl'-mĭnth, hĕl'-mĭnthe, *s.* [Gr. ἕλμινς (*helmins*), genit. ἕλμινθος (*helminthos*) = a worm, spec. a tape-worm or mawworm, from εἰλέω (*eilĕō*); Attic εἰλέω (*heileō*) = to roll up.]

1. *Zool.* (Of the form *helminth*): An intestinal or other worm.

2. *Min.* (Of both forms): A variety or subvariety of Prochlorite. It occurs in New Hampshire as a slender vermiform crystallization in quartz and felspar.

hĕl-mĭnth-, **hĕl-mĭn-thō-,** *pref.* [Helminth.] A worm, specially an intestinal worm.

hĕl-mĭnth'-ą-gŏgue, *s.* [Pref. *helminth-*, and Gr. ἀγωγός (*agogos*) = leading, guiding; ἄγω (*agō*) = to lead.]

Pharm.: A medicine to expel worms; an anthelmintic.

hĕl-mĭnth'-ĭ-ą (*pl.* **hĕl-mĭnth'-ĭ-æ**), *s.* [Pref. *helminth-*; Lat. fem. sing. or neut. pl. suff. *-ia.*]

1. *Bot.* (*Sing.*): A genus of Composites, tribe Cichoraceæ, sub-tribe Scorzonereæ. *Helminthia echioides*, the Ox-eye, is a British plant. [Ox-eye.] The leaves of *H. echioides* boiled and pickled are eaten in Greece.

2. *Zool.* (*Pl.*): Helminthiæ. A name given by Sir Richard Owen to the class Entozoa. He divides it into Sterelmintha and Cœlelmintha (q.v.). They are now placed in the class Scolecida (q.v.).

† **hĕl-mĭn-thī'-ą-sīs,** *s.* [From Gr. ἑλμινθιάω (*helminthiaō*) = to suffer from worms.]

Pathol.: A disease in which worms are found under the skin.

hĕl-mĭn'-thĭc, *a.* & *s.* [Pref. *helminth-*; Eng. &c., suff. *-ic.*]

A. *As adj.:* Of or belonging to intestinal worms; expelling worms.

B. *Pharm.:* A medicine for expelling worms, generally called an anthelmintic (q.v.).

hĕl-mĭnth'-īte, *s.* [Pref. *helminth-*; suff. *-ite* (*Palæont.*) (q.v.).]

Palæont.: The name applied by Mr. Salter to wormtracks in rocks of various ages, from Cambrian times till now. It does not include the worm-burrows, to which he gives the name Scolithus (q.v.).

hĕl-mĭnth'-ŏĭd, *a.* [Pref. ***helminth-***, and Gr. εἶδος (*eidos*) = form.]

Zool.: Worm-shaped, vermiform.

† **hĕl-mĭnth'-ō-līte,** *s.* [Pref. *helmintho-*, and Gr. λίθος (*lithos*) = stone.]

Palæont.: The same as Helminthite (q.v.).

hĕl-mĭnth-ō-lŏg'-ĭc, hĕl-mĭnth-ō-lŏg'-ĭc-ąl, *a.* [Eng. *helminthology(y)*, *-ic*, *-ical.*] Pertaining to or in any manner connected with helminthology (q.v.).

hĕl-mĭn-thŏl'-ō-gĭst, *s.* [Eng. *helminthology(y)*; *-ist.*] One skilled in or devoted to the study of helminthology (q.v.).

hĕl-mĭn-thŏl'-ō-gy, *s.* [Pref. *helmintho-*; and Gr. λόγος (*logos*) = a discourse.] That branch of zoology which treats of intestinal worms; a treatise on intestinal worms.

hĕl-mĭn-thō-stā'-chys, *s.* [Pref. *helmintho-*, and Gr. στάχυς (*stachus*) = an ear of corn.]

Bot.: A genus of ferns, order Ophioglossaceæ. In the Moluccas, *Helminthostachys dulcis* is regarded as slightly aperient. The young shoots are used as a potherb, like asparagus.

hĕlm'-lĕss (1), *a.* [Eng. *helm* (1); *-less.*] Without a helm or helmet.

hĕlm'-lĕss (2), *a.* [Eng. *helm* (2), *-less.*] Without a helm or rudder.

hĕlms'-mąn, *s.* [Eng. *helm's*, and *man.*] The man who steers the ship by means of the helm; a steersman.

"I leap on board; no *helmsman* steers."
Tennyson: Sir Galahad, 39.

Hĕlm-stad'-ĭ-ąn, *a.* [Eng. *Helmstad(t)*; *-ian.*] Of or belonging to Helmstadt in Central Germany.

Helmstadian controversy, *s.*

Ch. Hist.: The controversy which originated at Helmstadt. Called also the Syncretistic or Calixtine Controversy. (*Mosheim.*)

hĕlm'-wĭnd, *s.* [Eng. *helm* (1), and *wind.*] A local name given to a wind in mountainous parts of England, from the *helm*, or heavy dark cloud which hangs over the top of the mountains for some days before the storm.

hĕ-lŏç'-ĕr-ą, *s. pl.* [Gr. ἥλος (*hēlos*) = a nail, a stud, anything like a nail, a knot, and κέρας (*keras*) = a horn.]

Entom.: A tribe of beetles, having the antennæ terminated by a knob, of which the joints are sometimes pressed compactly together, sometimes so separated as to have a serrated appearance. The legs can fold into such a small compass as to allow the insect when alarmed to feign death. Both the larva and the perfect insects are found in cow-dung. The tribe is divided into two families, Histeridæ and Byrrhidæ (q.v.).

hĕl'-ō-dĕrm, *s.* [Heloderma.] The English name for *Heloderma suspectum.*

"I was present when the *heloderm* bit two guinea-pigs in the hind-leg."—*Proc. Zool. Soc.* (1882), p. 642.

hĕl-ō-dĕr'-ma, *s.* [Gr. ἥλος (*hēlos*) = a nail, and δέρμα (*derma*) = skin.]

Zool.: The typical genus of the family Helodermidæ (q.v.).

hĕl-ō-dĕr'-mĭ-dæ, *s. pl.* [Mod. Lat. or Gr. *heloderm(a)*; Lat. fem. pl. adj. suff. *-idæ.*]

Zool.: A family of lizards, having furrowed fangs. Only one species is known, *Heloderma horridum*, the Caltetepon of Mexico. It was called also, before its venomous nature was quite understood, *H. suspectum.* Matters have now proceeded beyond suspicion. The gentleman who procured the specimen presented to the Zoological Gardens by Sir John Lubbock was bitten while handling it, and the effects were of a very serious character. (*Proc. Zool. Soc.*, 1882, p. 632.)

hĕ-lō'-dēş, *s.* [Gr. ἕλος (*helos*) = a swamp.]

Pathol.: Marsh fever. The name is also applied to a kind of fever characterized by profuse perspiration.

hĕ-lō'-dŭs, *s.* [Gr. ἥλος (*hēlos*) = a nail, and ὀδούς (*odous*), genit. ὀδόντος (*odontos*) = a tooth.]

Palæont.: Teeth of fishes, apparently belonging to the Cestraphori, of which the Cestracion or Port Jackson Shark is a living representative. They occur in the Carboniferous strata.

hĕl-ŏ-hȳ'-ŭs, *s.* [Gr. ἕλος (*helos*) = a marsh, and ὗς (*hus*), genit. ὑός (*huos*), a swine, a pig.]

Palæont.: A genus of fossil hogs (Suidæ), from the Lower and Middle Eocene of North America.

hĕ-lō'-nĭ-ăs, *s.* [Gr. ἕλος (*helos*) = a marsh; the genus is named from the habitat of the plants.]

Bot.: A genus of Melanthaceæ, tribe Veratreæ. *Helonias dioica* is the Blazing Star and Devil's Bit of America. Its root is anthelmintic. A decoction of *H. bullata* is used in obstruction of the bowels.

hĕl-ŏ-phĕr'-ĭ-dæ, *s.* [Mod. Lat. *helophor(us)*; Lat. fem. pl. adj. suff. *-idæ.*]

Entom.: A family of beetles. The antennæ have nine joints, rather abruptly perfoliate-clavate; the club serrated or sub-solid; the tarsi filiform, not ciliated. They walk in or upon the water, rather than swim through it. They inhabit ponds and ditches, walking on the muddy margins or floating slowly on their backs, and occasionally ascending aquatic plants, whence they take flight. Larvæ carnivorous, perfect insect herbivorous. There are many European species.

hĕ-lŏph'-ōr-ŭs, ĕ-lŏph'-ōr-ŭs, *s.* [Gr. ἥλος (*hēlos*) = a nail, a stud (?); Agassiz derives it from ἕλος (*helos*) = a marsh, which is the common etym. given, and φορός (*phoros*) = bearing.]

Entom.: The typical genus of the family Helophoridæ. They have prominent eyes and an elongate body.

hĕ-lŏp'-ĭ-dæ, *s. pl.* [Mod. Lat. *helop(s)*; Lat. fem. pl. adj. suff. *-idæ.*]

Entom.: A family of beetles, section Heteromera, sub-section Stenelytra. It consists of insects with oval convex bodies, notched mandibles, generally filiform antennæ, with the third joint long. The larvæ, which have six legs, live in rotten wood.

hē'-lŏps, *s.* [A centaur killed in battle by Pirithous; Gr. ἥλος (*hēlos*) = a nail, a stud, and ὤψ (*ōps*) = the face.]

Entom.: The typical genus of the family Helopidæ (q.v.). *Helops caraboides* is brown with a bronze gloss in certain lights. It is common in England under the bark of trees near the root. *H. cœruleus*, also common, is

of a violet blue, and occurs in old pollard willows.

hĕl'-vīne, hĕl'-vĭn, hĕl'-vīte, *s.* [Named by Werner from Gr. ἧλιος (*helios*) = the sun, on account of the yellow colour of the mineral; suff. *-ine, -in, -ite* (*Min.*) (q.v.).]

Min.: An isometric tetrahedral translucent mineral, of a yellow, yellowish-brown, or green colour; its hardness, 6 to 6·5; its sp. gr. 3·1 to 3·3; compos.: silica, 33·13 to 35·27; glucina, 8·03 to 12·03; protoxide of manganese, 30·57 to 42·12; protoxide of iron, 4 to 8; sulphur, 0 to 5·05; &c. Occurs in Saxony and in Norway. (*Dana.*)

hĕl'-vīte, *s.* [Helvine.]

hĕl-wĭn'-ĝĭ-a, *s.* [Named from G. A. Helwingia, Prussian botanical writer, about A.D. 1666.]

Bot.: The typical or only known genus of the order Helwingiaceæ (q.v.).

hĕl-wĭn-ĝĭ-ā'-çē-æ, *s. pl.* [Mod. Lat. *helwingi(ia)*; Lat. fem. pl. adj. suff. *-aceæ.*]

Bot.: Helwingiads: an order of diclinous exogens, alliance Garryales. It consists of a solitary species—a shrub with alternate serrate leaves destitute of stipules; the flowers, which are fascicled on the midrib of the leaves, are unisexual; the calyx three to four-parted; stamens, three to four; the ovary crowned by an epigynous disc; the fruit a three or four-celled drupe, each cell one-seeded. The one species, *Helwingia rusciflora*, is from Japan, the mountaineers of which use the leaves as an esculent vegetable.

hĕl-wĭn'-ĝĭ-ădș, *s.pl.* [Mod.Lat. *helwingi(a)*; Eng., &c., pl. suff. *-ads.*]

Bot.: The name given by Lindley to the order Helwingiaceæ (q.v.).

ȷĕlx'-ĭne, *s.* [Gr. *ἑλξίνη* (*helxinē*) = a plant with woolly capsules (see def.); from Gr. *ἕλκω* (*helkō*) = to drag or draw.]

Bot.: A plant not identified with certainty. Liddell and Scott consider it to be a Parietaria or an Urceolaria, while Littré unhesitatingly affirms it to be *Carlina acaulis.*

hĕm, * **hemme,** *s.* [A.S. *hemm, hem*; cogn. with Fris. *hâmel* = a hem; Ger. *hamme* = a fence or hedge.]

I. *Ordinary Language:*

* **1.** An edge, border, or margin.

"Upon the very *hem* o' the sea."
Shakesp.: Timon of Athens, v. 4.

2. The edge or border of a garment, or piece of cloth, doubled and sewed to strengthen it, and prevent the ravelling of the weft threads.

"Rowlers must be made of even cloth, white and gentle, without *hem*, seam, or thread hanging by."—*Wiseman.*

II. *Arch.:* The spiral projecting part of the Ionic capital.

hĕm (1), *v.t.* [Cf. Ger. *hemmen* = to check, to hem, from *hamme* = a fence.]

I. *Literally:*

* **1.** To border, to edge.

"Hys habite garded or *hemmed* with hys brode phylacteries."—*Udal: Luke* vi.

2. To close or secure the border or edge of cloth by a hem; to form a hem to.

"My kerchief there I *hem.*"
Wordsworth: We are Seven.

II. *Fig.:* To inclose or shut in; to surround. (Followed by *in, about*, or *around.*)

"The flower of all your army, *hemmed about*
With thousand enemies now fainting stands."
P. Fletcher: Purple Island, xii.

hĕm (2), *v.i.* & *t.* [Hem, *interj.*]

A. *Intransitive:*

1. To cry hem; to give a short cough.

"The people nought but *hem*, and cough, and splatter."
Sir J. Harrington: Epigram, bk. ii., No. 25.

2. To hesitate, to hum and haw.

"Now play me Nestor; *hem* and stroke thy beard."
Shakesp.: Troilus & Cressida, i. 3.

* **B.** *Trans.:* To remove by hemming.

"These burrs are in my heart. *Hem* them away."—*Shakesp.: As You Like It*, i. 3.

hĕm, *interj.* [An imitative word, allied to *hum* (q.v.).] A voluntary short cough, uttered by way of warning, encouragement, calling attention, hesitation, or doubt. It is sometimes used as a noun.

"Cough, and cry *hem*, if anybody come."
Shakesp.: Othello, iv. 2.

* **hĕm,** *pron.* [Them.]

hēm-, hē-mą-, *pref.* [Hæma.]

Min.: A kind of agate spriukled with spots of red jasper.

hē-mą-chrōme, *s.* [Hæmachrome.]

hē-mą-drŏm'-ĕ-tĕr, *s.* [Pref. *hema-*; Gr. *δρομός* (*dromos*) = a running, and *μέτρον* (*metron*) = a measure.]

Surg.: An instrument for measuring the velocity of the blood in the arteries.

hē-mą-drŏm'-ĕ-trў, *s.* [Hemaorometer.]

Med.: The art of measuring the rate at which the blood runs in the arteries.

hē-mą-dўn-ą-mŏm'-ĕ-tĕr, *s.* [Hæmadynamometer.]

hē'-mąl, *a.* [Hæmal.]

hē-măn'-thŭs, *s.* [Hæmanthus.]

hē-mą-stăt'-ĭc, hē-mą-stăt'-ĭc-ąl, *a.* & *s.* [Pref. *hema-*, and Eng. *static* (q.v.).]

A. *As adjective:*

I. *Ord. Lang.:* Relating to the weight of the blood.

II. *Med.:* Possessing the quality of arresting hæmorrhage; atyptic.

B. *As substantive:*

I. *Sing.:* A remedy for arresting hæmorrhage.

2. *Pl.:* The doctrine of the motion of the blood in living bodies.

hē-mą-stăt'-ĭc-ąl, *a.* [Hemastatic.]

hē'-mąt-ēin, *s.* [Hæmatein.]

hē-mą-tĕm'-ĕ-sĭs, *s.* [Hæmatemesis.]

hē'-mą-thĕrm, *s.* [Pref. *hema-*, and Gr. *θερμός* (*thermos*) = warm.] The same as Hæmatotherma (q.v.).

hē'-mąt-ĭn, hē'-mąt-ĭne, *s.* [Hæmatin.]

hē'-mąt-ĭte, hæ'-mąt-ĭte, *s.* [Lat. *hæmatites* = bloodstone, hematite (def.); Gr. *αἱματίτης λίθος* (*haimatitēs lithos*) = blood-like stone; *αἷμα* (*haima*), genit. *αἵματος* (*haimatos*) = blood, and suff. *-ιτης* (*-ites.*).]

Min.: A rhombohedral mineral, crystallizing in rhombohedrous, scalenohedrous pyramids and prisms. Colour, dark steel gray or iron-black in mass, but in thin fragments blood red. Lustre rarely earthy, generally metallic, or occasionally splendent. Sp. gr., 4·2 to 5·3. It is a sesquioxide of iron composed of oxygen 30, and iron 70 = 100. There are four varieties: (1) Specular Hematite, with sub-varieties; Specular Hematite, properly so called, or Iron and Micaceous Hematite; (2) Compact, columnar, fibrous, or radiating Hematite, formerly called Red Hematite, to distinguish it from Brown Hematite, now called Limonite, which is arranged as a distinct mineral; (3) Red Ochreous Hematite, including Reddle and Red Chalk; (4) Argillaceous Hematite, or Clay Ironstone, which may be jaspery or lenticular. No. 1 is found chiefly in crystalline rocks; No. 4, which was originally formed in marshes like Limonite and Limoite, occurs in the coal formations, and in many other formations, hematite in some form or other being in rocks of nearly all ages. It is found abundantly in various parts of the United States, in Germany, &c. Great deposits of Red Hematite occur in Spain, near Bilboa. Brown Hematite is abundant in the United States, England, and many other places. It can be manufactured into excellent iron, both cast and malleable. Much of the plate iron and iron wire product is made of it. When ground to fine powder it is employed in polishing metal. (*Dana, Phillips, &c.*)

¶ Some hematite is placed under Turgite (q.v.).

¶ Some *Black hematite* is Psilomelane; some *Brown hematite*, Limonite.

hē-mąt-ĭt'-ĭc, *a.* [Eng., &c. *hematit(e)*; *-ic.*] Composed of, pertaining to, or resembling hematite (q.v.).

hē-mąt-ō-, *pref.* [Hæmato.]

hē-măt'-ō-çēle, *s.* [Pref. *hemato-*, and Gr. *κήλη* (*kēlē*) = a tumour; Fr. *hématocèle.*]

Surg.: A tumour containing blood. It may be extra-, intra-, or sub-peritoneal, pelvic, peri- or retro-uterine, or pudendal. In some of these large effusion of blood may be fatal.

hē-mąt-ŏl'-ō-ĝў, *s.* [Pref. *hemato-*, and Gr. *λόγος* (*logos*) = a discourse.]

Med.: That part of medicine which treats of the blood, with special reference to its varying characters in disease.

† **hē'-mąt-ōpe,** *s.* [Hæmatopus.]

Ornith.: The Oyster-catcher, *Hæmatopus ostralegus.*

hē-mąt-ō'-sĭn, *s.* [Hæmatin.]

hē-mąt-ō'-sĭs, *s.* [Hæmatosis.]

hē-mąt-ō-stā'-phĭs, *s.* [Hæmatostaphis.]

hē-mąt-ŏx'-ўl-ĭne, *s.* [Hæmatoxyline.]

hē-mąt-ŏx'-ўl-ŏn, *s.* [Hæmatoxylon.]

hē-mąt-ūr'-ĭ-ą, *s.* [Hæmaturia.]

hĕm-ĕ-lў'-trŏn (pl. **hĕm-ĕ-lў'-trą**), *s.* [Pref. *hemi-*, and Mod. Lat. *elytron* (pl. *elytra*) (q.v.).]

Entom.: (Generally plural). The wing-cases of the Hemiptera, the basal portion of which is chitinous or horny, while the apices are membranous.

hĕm-ĕr-ą-lō'-pĭ-ą, *s.* [Gr. *ἡμέρα* (*hēmera*) = a day; *ἀλαός* (*alaos*) = blind (?), and *ὄψις* (*opsis*) = seeing, eyesight. Mahn and Littré do not consider *ἀλαός* (*alaos*) to be an element in the word.]

Pathol.: A word about which much confusion has arisen. If the Greek *alaos* (blind) be really an element in the word, then the meaning is blind as to vision during the day. If it be not, the signification is just the opposite—viz., seeing (only) during the day, any blindness which exists being at night. The word hemeralopia has been used in both senses, the confusion having begun with Hippocrates or some early editor of his. If day-blindness is called hemeralopia, then night-blindness is nyctalopia, and *vice versa.* Both are forms of partial amaurosis, arising probably from imperfect nutrition of the retina, often noticed as an early symptom of scurvy.

Hē-mĕr-ŏ-băp'-tĭsts, *s. pl.* [Gr. *ἡμεροβαπτιστης* (*hēmerobaptistēs*), from *ἡμερα* (*hēmera*) = a day, and *βαπτιστής* (*baptistēs*) = one that dips or bathes.] [Baptist.]

Jewish sects: A Jewish sect, who regarded it as a religious duty to bathe daily.

hē-mĕr-ō'-bĭ-an, *a.* & *s.* [Mod. Lat. *hemerobi(us)*; Eng., &c. suff. *-an.*]

A. *As adj.:* Of or belonging to the genus Hemerobius, or the family Hemerobiidæ (q.v.).

B. *As subst.:* An insect of the genus Hemerobius, or the family Hemerobiidæ (q.v.).

hē-mĕr-ŏ-bī'-ĭ-dæ, *s. pl.* [Mod. Lat. *hemerobi(us)*; Lat. fem. pl. adj. suff. *-idæ.*]

Entom.: Aphis-lions, lace-winged flies; a family of neuropterous insects. The antennæ are thread-like; the palpi only four; the eyes have metallic brilliancy; the ocelli are generally wanting; the wings elegantly reticulated, the legs short, the tarsi pentamerous. The larvæ feed eagerly on aphides. The pupa is enveloped in a cocoon. The perfect insect flies chiefly in the evening. It lays eggs in little bunches on leaves, each egg being elevated on a foot-stalk. Stephens enumerates four genera as having British representatives.

hē-mĕr-ō'-bĭ-ŭs, *s.* [Gr. *ἡμερόβιον* (*hēmerobion*) = an insect living for a day.]

Entom.: The typical genus of the family Hemerobiidæ (q.v.). Stephens described thirty British species.

hē-mĕr-ō-căl'-lĭc-æ, hĕm-ĕr-ō-căl-lĭd'-ĕ-æ, *s. pl.* [Lat. *hemerocall(is)*; fem. pl. adj. suff. *-eæ, -ideæ.*]

Bot.: A tribe of Liliaceæ.

hē-mĕr-ō-căl-lĭd'-ĕ-æ, *s. pl.* [Hemerocallæ.]

hē-mĕr-ō-căl'-lĭs, *s.* [Gr. *ἡμεροκαλλές* (*hēmerocalles*), and *ἡμεροκαλλίς* (*hēmerocallis*), = a kind of yellow lily that blooms but for a day; *ἡμέρα* (*hēmera*) = a day, and *καλάς* (*kalos*) = beautiful.]

Bot.: The typical genus of the tribe Hemerocallidæ (q.v.). Mostly natives of the temperate parts of Asia and Eastern Europe; but *Hemerocallis flava* is wild in Germany and *H. fulva* in Italy. Several are cultivated in British gardens.

hĕm-ĭ-, *pref.* [Gr. *ἡμι-* (*hēmi-*), an abbreviation for *ἡμισυ* (*hēmisu*), neut. of *ἥμισυς* (*hēmisus*) = half.] Half; halved.

¶ Properly it should be limited to Greek compounds.

hĕm-ĭ-ąn-ăt'-rō-pąl, hĕm-ĭ-ąn-ăt'-rō-poŭs, *a.* [Pref. *hemi-*; Gr. *ἀνατρέπω* (*anatrepō*) = to turn up or over, and Eng., &c. suff. *-al, -ous.*] [Anatropous.]

Bot. (*Of an ovule*): Anatropal with half the raphe free.

hĕm'-ĭ-bŏs, *s.* [Pref. *hemi-*, and Lat. *bos* (q.v.).]

Palæont.: A genus of Bovidæ (oxen), from the Upper Miocene of India.

hĕm'-ĭ-earp, *s.* [Pref. *hemi-*, and Gr. καρπός (*karpos*) = fruit.]

Bot.: A fruit spontaneously dividing into halves. Example: a pea.

hĕm-ĭ-chăl'-çite, *s.* [Pref. *hemi-;* Gr. χαλκός (*chalkos*) = brass, copper, and suff. *-ite* (*Min.*).]

Min.: The same as EMPLECTITE (q.v.).

hĕm'-ĭ-chlæ'-na, *s.* [Pref. *hemi-*, and Gr. χλαῖνα (*chlaina*) = a cloak, a mantle.]

Bot.: The typical genus of the family Hemichlænidæ (q.v.).

hĕm-ĭ-chlæn'-ĭ-dæ, *s. pl.* [Mod. Lat. *hemichlæna;* Lat. fem. pl. adj. suff. *-idæ.*]

Bot.: A family of Cyperaceæ, tribe Fuireneæ.

hĕm-ĭ-chŏr'-ĕ-a, *s. pl.* [Pref. *hemi-*, and Lat. *chorea;* Gr. χορεία (*choreia*) = dancing.]

Pathol.: A form of chorea, or St. Vitus's dance, in which the movements are entirely confined to one side.

hĕm-ĭ-çĭ-dăr'-ĭ-dæ, *s. pl.* [Mod. Lat. or Gr. *hemicidar(is);* Lat. fem. pl. adj. suff. *-idæ.*]

Palæont.: A family of regular echinoids, type Hemicidaris (q.v.).

hĕm-ĭ-çĭd'-a-rĭs, *s.* [Pref. *hemi-*, and Mod. Lat. *cidaris* (q.v.).]

Palæont.: The typical genus of the family Hemicidaridæ (q.v.). The tubercules are developed only below, and not the entire length of the area. Range in time from the Upper Trias to the Lower Cretaceous strata.

***hĕm-ĭ-crā'-nĭ-a,** ***hĕm'-ĭ-crā-nў,** *s.* [Gr. ἡμικρανία (*hēmikrania*), from ἡμι (*hēmi*) = half, and κράνιον (*kranion*) = the skull.]

Pathol.: Headache affecting only one side of the brow and forehead. Generally caused by debility. From its often continuing only while the sun is above the horizon, it has been called sun-pain.

***hĕm-ĭ-crăn'-ĭe,** *a.* [Gr. ἡμικρανικός (*hēmikranikos*).] Of, resulting from, or pertaining to hemicrania; affecting only one part of the head at a time.

***hĕm'-ĭ-çў-ele,** *s.* [Gr. ἡμικύκλιος (*hēmikuklios*), from ἡμι (*hēmi*) = half, and κύκλος (*kuklos*) = a circle.]

1. A half-circle; a semicircle.

2. A semicircular arena, room, or division of room.

"In a *hemicycle* was seated Esychia, or Quiet."—*Ben Jonson: Part of the King's Entertainment, &c.*

hĕm-ĭ-çў'-clĭe, *a.* [Pref. *hemi-*, and Eng. *cyclic* (q.v.).]

Bot.: (See the compound).

hemicyclic-flowers, *s. pl.*

Bot.: Having the separate portions of the inflorescence arranged in spirals.

hĕm-ĭ-dăc'-tўl, hĕm-ĭ-dăc'-tўle, *a. & s.* [HEMIDACTYLUS.]

Zoology:

A. *As adj.:* Having an oval disc at the base of the toes; a term used of certain lizards.

B. *As subst.:* A lizard of the genus Hemidactylus (q.v.).

hĕm-ĭ-dăc'-tўl-ŭs, *s.* [Pref. *hemi-*, and Gr. δάκτυλος (*daktulos*) = a finger, a toe.]

Zool.: A genus of Geckotidæ (Gecko-lizards).

hĕm-ĭ-dĕs'-mŭs, *s.* [Pref. *hemi-*, and Gr. δεσμός (*desmos*) = a bond, a fetter; so named from the form of the filaments.]

Bot.: A genus of Asclepiadaceæ, tribe Periplocæ. The root of *Hemidesmus indicus* is employed in India as a substitute for sarsaparilla.

hemidesmi radix, *s.*

Phar.: Hemidesmus root, the root of *Hemidesmus Indicus,* Indian sarsaparilla; a native of India. It occurs in yellowish-brown long cylindrical pieces. The colour of the cortex is dark, marked by longitudinal divisions, and deep circular rings, the central part is ligneous. It is used instead of sarsaparilla, and has a fragrant odour, and an agreeable bitter taste.

hĕm-ĭ-dī-a-pĕn'-tē, *s.* [Pref. *hemi-*, and Eng. *diapente* (q.v.).]

Music: An imperfect fifth.

hĕm-ĭ-dĭt'-ōne, *s.* [Pref. *hemi-*, and Eng. *ditone* (q.v.).]

Music: The lesser or minor third.

hĕm'-ĭ-dōme, *s.* [Pref. *hemi-*, and Eng. *dome.*]

Crystal. & Min.: A dome parallel to the orthodiagonal, as distinguished from a clinodome, in which they are parallel to the clinodiagonal. (*Dana.*)

hĕm-ĭ-dўs-trō'-phĭ-a, *s.* [Pref. *hemi-*, and Gr. δύστροφος (*dustrophos*) = hard to rear; δύς (*dus*) = hard, difficult, and τροφή (*trophē*) = nourishment; τρέφω (*trephō*) = to nourish.]

Bot., &c.: Only partial nourishment, as in the case of trees nailed to a wall or whose roots are prevented from spreading sufficiently by the too close proximity of other roots.

† **hĕ-mĭg'-a-moŭs,** *a.* [Pref. *hemi-;* Gr. γάμος (*gamos*) = marriage, and Eng., &c. suff. *-ous.*]

Bot. (*Of grasses*): Having one of the two florets in the same spikelet neuter, the other one unisexual, whether male or female.

hĕm'-ĭ-glўph, *s.* [Gr. ἡμι (*hēmi*) = half, and γλύφη (*gluphē*) = a carving.]

Arch.: A half-channel at the edge of the triglyph tablet in the Doric entablature.

hĕm-ĭ-gўr'-ŭs (yr as ĭr), *s.* [Pref. *hemi-*, and Gr. γῦρος (*guros*) = a circle.]

Bot.: The name given by Desvaux to the form of fruit which is generally called a follicle (q.v.).

hĕm-ĭ-hē'-drăl, *a.* [Eng., &c. *hemihedr(on)* (q.v.); *-al.*]

Crystallography & Mineralogy:

1. Having only half the planes or facets which a symmetric crystal of the type to which it belongs would possess. If, for instance, a crystal be typically octahedral and, from half of its planes being deficient, is really only a tetrahedron, it is hemihedral to an octahedron.

2. The term is sometimes used less accurately of a crystal wanting some of its planes, though those deficient may not be exactly half the normal number.

¶ The phenomena of pyroelectricity are often seen in hemihedral crystals, being produced or aided by the form of the mineral.

hĕm'-ĭ-hē'-drăl-lў, *adv.* [Eng. *hemihedral; -ly.*] In a hemihedral manner.

hĕm-ĭ-hē'-drĭsm, *s.* [Eng., &c., *hemihedr(on); -ism.*]

Crystal. & Min.: The property or quality of crystallizing in hemihedral forms.

hĕm-ĭ-hē'-drŏn, *s.* [Pref. *hemi-*, and Gr. ἕδρα (*hedra*) = seat, base, foundation.]

Geom., Crystal. & Min.: A crystal or other solid with but half the proper number of planes. [HEMIHEDRAL.]

hĕm-ĭ-mĕr-ĭd'-ĕ-æ, *s. pl.* [Mod. Lat. *hemimer(is);* Lat. fem. pl. adj. suff. *-ideæ.*]

Bot.: A tribe of Scrophulariaceæ, sub-order Antirrhineæ.

hĕ-mĭm'-ĕr-ĭs, *s.* [Gr. ἡμιμερής (*hēmimerēs*) = half-divided; pref. *hemi-*, and μέρος (*meros*) = a part.]

Bot.: The typical genus of the tribe Hemimerideæ (q.v.).

hĕm-ĭ-mĕ-tăb'-ō-la, *s. pl.* [Pref. *hemi-*, and Gr. μεταβολή (*metabolē*) = change, changing; μεταβάλλω (*metaballō*) = to turn quickly or suddenly; μετά (*meta*) = denoting change, and βάλλω (*ballō*) = to throw.]

Entom.: A sub-class of insects having a half or incomplete metamorphosis. The larva differs from the perfect insect, chiefly in the absence of wings and in size. The pupa is usually active, or at least capable of movement. It is divided into three orders: Hemiptera or Rhynchota, Heteroptera, and Thysanoptera (q.v.).

hĕm-ĭ-mĕt-a-bŏl'-ĭc, *a.* [Mod. Lat. and Gr. *hemimetabol(ē);* Eng., &c. suff. *-ic.*]

Entom.: Of or belonging to insects undergoing only an incomplete metamorphosis.

hĕm-ĭ-morph'-ĭe, *a.* [Pref. *hemi-;* Gr. μορφή (*morphe*) = form, and Eng. &c. suff. *-ic.*]

Crystal. & Min.: Having the two ends with dissimilar planes.

hemimorphic-hemihedral, *a.*

Crystal. & Min.: Both hemihedral and hemimorphic. (*Dana: Min.,* 5th ed., p. 407.)

hĕm'-ĭ-morph'-īte, *s.* [Pref. *hemi-;* Gr. μορφή (*morphē*) form, and suff. *-ite* (*Min.*) (q.v.).]

Min.: The name given by Kennyott to Calamine. Dana rejects the name; it is, however, adopted in the *Brit. Mus. Catalogue*

***hē-mī'-na,** *s.* [Lat., from Gr. ἡμίνα (*hēmina*), from ἥμισυς (*hēmisus*) = half.]

1. *Rom. Antiq.:* An ancient Roman measure containing half a sextarius, or about half a pint English wine measure.

2. *Med.:* A measure containing about ten fluid ounces.

hĕm-ĭ-ŏe-ta-hē'-drăl, *a.* [Pref. *hemi-*, and Eng. *octahedral* (q.v.).]

Crystal. & Min.: Having half the number of planes which a genuine octahedron would possess: tetrahedral.

† **hĕm-ĭ-ĉ-lŏg'-a-moŭs,** *a.* [Pref. *hemi-;* Gr. ὅλος (*holos*) = whole, entire, and γάμος (*gamos*) = marriage.]

Bot.: Having a flower consisting of two florets, the one neuter and the other hermaphrodite. Used of grasses like Panicum.

hē-mī'-ō-nŭs, *s.* [Gr. ἡμίονος (*hēmionos*) = a half-ass, a mule; pref. *hemi-*, and Gr. ὄνος (*onos*) = an ass.]

Zool.: The Kiang or Dshikketee, *Asinus hemionus,* a wild ass found in Thibet. The fur is short, smooth, and of a bright red-bay, a dorsal streak, but no shoulder crossband; legs straw-coloured in summer, whitish in winter.

"Mr. Blyth has seen a specimen of the *hemionus* with a distinct shoulder stripe, though it properly has none."—*Darwin: Origin of Species* (6th ed.), p. 128.

hĕm-ĭ-ō'-pĭ-a, hĕm-ĭ-ŏps'-ĭ-a, *s.* [Pref. *hemi-*, and Gr. ὤψ (*ōps*) = the eye.]

Path.: Depraved vision, in which the person affected sees only half the object.

hĕm-ĭ-pīn'-āte, *s.* [Eng. *hemipin(ic); -ate* (*Chem.*).]

Chem.: A salt of hemipinic acid.

hĕm-ĭ-pīn'-ĭe, *a.* [Pref. *hemi-*, and Eng., &c. *pinic.*] (See the compound.)

hemipinic acid, *s.*

Chem.: $C_{10}H_{10}O_6$, or $C_6H_2(OCH_3)_2(COOH)_2$, dimethyl-phthalic acid. It is obtained along with meconin by fusing opianic acid with three times its weight of caustic potash. Hemipinic acid is purified by washing its ammonium salt with alcohol, dissolving it in HCl, and extracting it with ether. Heated to 180°, it is converted into the anhydride, which yields needles, melting at 166°. Hemipinic acid is dibasic, forming crystalline salts.

hĕm-ĭ-plĕg'-ĭ-a, hĕm'-ĭ-plĕg-ў, *s.* [Pref. *hemi-*, and Gr. πλήσσω, πλήττω (*plēssō, plēttō*) = to strike.] Paralysis of one side of the body. [PARALYSIS.]

hĕm-ĭ-plĕg'-ĭc, *a.* [Eng. *hemipleg(ia); -ic.*] Partially paralysed; affected with hemiplegia (q.v.).

hĕm'-ĭ-plĕx-ў, *s.* [HEMIPLEGIA.]

hĕm'-ĭ-pōde, *s.* [Pref. *hemi-*, and Gr. πούς (*pous*), genit. ποδός (*podos*) = a foot.]

Ornith.: A bird of the genus Hemipodius (q.v.).

hĕm-ĭ-pō'-dĭ-ŭs, *s.* [From Gr. ἡμιπόδιον (*hēmipodion*) = half a foot. The genus is so named because its species are totally destitute of the hind toe.]

Ornith.: A genus of Tetraonidæ, akin to Coturnix (Quail). The species are pugnacious, and in Java are set to fight for the amusement of spectators.

hĕm'-ĭ-prĭsm, *s.* [Pref. *hemi-*, and Eng. *prism* (q.v.).]

Crystallog. & Min.: A form in the monoclinic and triclinic systems of classification, which comprises but one face of a prism with its opposite. (*Dana.*)

hĕm-ĭ-prĭs-măt'-ĭc, *a.* [Pref. *hemi-*, and Eng. *prismatic* (q.v.).]

Crystallog. & Min.: Half prismatic.

hĕ-mĭp'-tĕr, *s.* [HEMIPTERAN.]

hĕ-mĭp'-tĕr-ą, *s. pl.* [Pref. *hemi-*, and Gr. πτερόν (*pteron*) = a wing.]

1. *Entomology:*

(1) An order of insects, sub-class Hemimetabola (q.v.). The trophi or masticatory organs consist of four laocet-shaped needles, which are the modified mandibles and maxillæ; these are included within a tubular sheath, which is made of the labium, elongated; eyes usually elongated; wings generally four, sometimes wanting; pupa generally active. It is divided into three sub-orders, Homoptera, Heteroptera, and Thysanoptera (q.v.).

(2) The term is used by Stephens and others for what is now the sub-order Heteroptera (q.v.).

2. *Palæont.:* Hemipterous insects have been found from the Cretaceous rocks onward.

hĕ-mĭp'-tĕr-ąl, *a.* [HEMIPTEROUS.]

hĕ-mĭp'-tĕr-ąn, † **hĕ-mĭp'-tĕr,** *s.* [HEMIPTERA.]

Entom.: An insect of the order Hemiptera (q.v.).

hĕ-mĭp'-tĕr-oŭs, † **hĕ-mĭp'-tĕr-ąl,** *a.* [Mod. Lat. or Gr. *hemipter(a)*; suff. *-ous*, *-al.*]

Entom.: Having wings, in more typical cases, chitinous at the base and membranous at the extremity; of or belonging to the Hemiptera (q.v.).

hĕm-ĭ-răm'-phŭs, *s.* [Pref. *hemi-*, and Gr. ῥαμφος (*rhamphos*) = the curved bill of a predatory bird.]

Ichthy.: Under Sword-fish, a genus of Esocidæ (Pikes), having the lower jaw so produced as to form a slender snout, whence their English name.

hĕm'-ĭ-sphĕre, *s.* [Fr., from Lat. *hemisphærium*, from Gr. ἡμισφαίριον (*hēmisphairion*), from ἡμι (*hēmi*) = half, and σφαῖρα (*sphaira*) = a ball, a sphere.]

I. The half of a sphere or globe, when divided by a plane passing or supposed to pass through its centre; half the terrestrial globe; half the surface of the heavens.

¶ The northern hemisphere is that half of the globe formed by the plane of the equator, and that portion of it containing the north pole cut off by this plane. The other half, containing the south pole, is called the southern hemisphere.

2. A map or projection of half the terrestrial or celestial spheres.

¶ (1) *Aqueous hemisphere:*

Geog.: One so selected as to contain as much as possible of the water of the globe. Its centre must be in the southern hemisphere.

(2) *Terrestrial hemisphere:*

Geog.: One so chosen that it contains as great an amount of land as possible. Its centre should be at Falmouth.

(3) *Hemispheres of the brain:*

Anat.: The upper spheroidal portions of the brain (q.v.); they are separated by the *falx cerebri*.

(4) *Hemispheres of Magdeburg:* [MAGDEBURG-HEMISPHERES].

* **hĕm-ĭ-sphĕr'-ĭc,** * **hĕm-ĭ-sphĕr'-ĭc-ąl,** * **hĕm-ĭ-sphær'-ĭc,** *a.* [Eng. *hemisphere*; *-ic*, *-ical.*] Pertaining to or of the nature of a hemisphere; resembling a hemisphere; half-round.

"All liquids run nearly in a spherical form, when hung on a small surface, as at the point of a pin, or into a *hemispherical* figure on a broad surface."—*Derham: Astro-Theology*, bk. vi., ch. i.

* **hĕm-ĭ-sphĕ-rŏĭd'-ąl,** *a.* [Eng. *hemisphere*; Gr. εἶδος (*eidos*) = appearance, shape; Eng. adj. suff. *-al.*] Having a figure or form resembling that of a hemisphere.

* **hĕm-ĭ-sphĕr'-ule,** *s.* [Pref. *hemi-*, and Eng. *spherule* (q.v.).] Half a spherule.

* **hĕm'-ĭ-stĭch,** *s.* [Lat. *hemistichium*, from Gr. ἡμιστιχιον (*hēmistichion*), from ἡμι- (*hēmi-*) = half, and στιχος (*stichos*) = a row.] Half a verse in poetry; an imperfect or incomplete verse.

"The pause is a rest that divides the verse into two parts, each of them called an *hemistich*."—*Goldsmith: Essay* 18.

* **hĕ-mĭs'-tĭch-ąl,** *a.* [Eng. *hemistich*; *-al.*] Pertaining to a hemistich; written in hemistichs; according to or by hemistichs.

"The reader will observe the constant return of the *hemistichal* point."—*Warton: Hist. English Poetry*, i. (Additions).

hĕm-ĭ-tĕr'-ĭ-ą, *s.* [Pref. *hemi-*, and Gr. τέρας (*teras*) = a wonder, a marvel; a monster.]

Bot.: A monstrosity of elementary organs or of appendages of the axis. (*Treas. of Bot.*)

hĕm'-ĭ-tōne, *s.* [Gr. ἡμιτόνιον (*hēmitonion*): pref. *hēmi-*, and Gr. τόνος (*tonos*) = a tone.] A semitone.

hĕ-mĭt'-rĭ-choŭs, *a.* [Pref. *hemi-*; Gr. θρίξ (*thrix*), genit. τριχός (*trichos*) = hair, and Eng. suff. *-ous.*]

Bot.: Half covered with hairs.

hĕ-mĭt'-rō-pąl, hĕ-mĭt'-rō-peŭs, *a.* [Pref. *hemi-*; Gr. τροπή (*tropē*) = to a turn, with a turning, and Eng. suff. *-al*, *-ous.*]

Botany, &c.:

1. *Gen.:* Turned half round; half inverted.

2. *Spec.* (*Of an ovule*): Having the raphe terminating about midway between the chalaza and the orifice. Akin to anatropal, but having the axis of the nucleus more curved.

hĕm'-ĭ-trōpe, *a. & s.* [Pref. *hemi-*, and Gr. τροπή (*tropē*) = a turning; τρέπω (*trepō*) = to turn.]

A. *As adjective:*

Crystal. & Min.: Half turned round. A term used of a crystal looking as if it were formed of two, the one half turned round upon the other.

B. *As substantive:*

Crystal. & Min.: A crystal of the form described under A.

hĕ-mĭt'-rō-poŭs, *a.* [HEMITROPAL.]

hĕ-mĭt'-rō-pў, *s.* [HEMITROPE.]

Crystal. & Min.: Crystallization producing crystals of the kind called hemitropal (q.v.).

hĕm'-lŏck, * **hem-lecke,** * **hem-lok,** * **ham-locke,** * **hame-loc,** *s. & a.* [A.S. *hemleác*, *hemlic*, *hemlyc*, *hymlice.*]

A. *As substantive:*

I. *Bot.:* The umbelliferous genus Conium (q.v.). Common hemlock is *Conium maculatum*; Water hemlock, *Cicuta virosa*, called also Cowbane. [CICUTA.] Used likewise of the foreign species, *C. maculata* and *Phellandrium aquaticum*. In the example the reference is apparently to the hemlock-spruce.

"When the mournful Wawonaissa,
Sorrowing sang among the *hemlocks*."
Longfellow: Song of Hiawatha, viii.

¶ Ground Hemlock is a kind of yew, *Taxus canadensis*; Lesser Hemlock is *Æthusa cynapum*, and Mountain Hemlock, *Levisticum officinale*.

2. *Pharm.:* [CONIUM].

B. *As adj.:* Of, belonging to, or in any way resembling the conium or cicuta [A].

hemlock-spruce, *s.*

Bot.: *Abies canadensis*. It is an elegant, drooping, low evergreen tree, valuable as

HEMLOCK-SPRUCE.

growing in the shade of other trees. It is common in the United States, as an ornamental tree. The substance from which spruce beer is made is an extract from its leaves.

hemlock-tree, *s.* The hemlock spruce (?).

"O *hemlock-tree!* how faithful are thy branches."
Longfellow: Hemlock-tree. (Trans.)

hĕmmed, *pa. par.* or *a.* [HEM, *v.*]

hĕm'-mĕl, *s.* [Etym. doubtful.]

1. A crowd or herd, as of cattle.

2. A shed or covering for cattle.

hĕm'-mĕr, *s.* [Eng. *hem*, v.; *-er.*] One who or that which hems. Specifically, an attachment to a sewing-machine for turning over the edge of a piece of fabric or a garment, in order that the flap may be stitched down. As the fabric is fed along, the edge is turned over in a curved path, and is then flattened by the presser-foot ready for stitching by the needle.

* **hĕm'-mĭng,** *s.* [Etym. doubtful.] A shoe or sandal made of raw hide.

hĕ-mŏp'-tў-sĭs, hĕ-mĕp'-tō-ē, *s.* [HÆMOPTYSIS.]

hĕm'-ŏr-rhage (age as ĭj), hĕm'-ŏr-rhā-jў, *s.* [HÆMORRHAGE.]

hĕm-ŏr-rhăj'-ĭc, *a.* [HÆMORRHAGIC.]

hĕm'-ŏr-rhŏĭd, *s.* [HÆMORRHOID.]

hĕm-ŏr-rhŏĭd'-ąl, *a.* [HÆMORRHOIDAL.]

hĕmp, *s.* [A.S. *henep*, *hænep*; Sw. *hampa*; Dan. *hamp*; Dut. *hennep*; Ger. *hanf*, all from Lat. *cannabis*; Gr. κάνναβις (*kannabis*), κάνναβος (*kannabos*); Sanse. *çana* = hemp.]

1. *Comm., &c.:* The name of various vegetable fibres used for manufacturing purposes.

"[She] gained,
By spinning *hemp*, a pittance for herself."
Wordsworth: Excursion, bk. i.

2. *Bot.:* *Cannabis sativa*, a native of the cooler parts of India, now introduced into Europe.

"The *hempe* groweth about Smolensko vpon the Polish border."—*Hackluyt: Voyages*, i. 364.

¶ *African hemp*, *Bowstring hemp*, is a kind of hemp made in Africa from the fibres of Senseviera; *Bastard hemp* is *Datisca Cannabina*; *Bengal hemp* is the fibre of *Crotolaria juncea*, called also *Bombay hemp*, *Madras*, or *Sunn hemp*; *Manilla hemp* is the fibre of *Musa textilis*.

3. *Pharm.:* *Cannabis indica*, Indian hemp. The dried flowering tops of the female plants of *Cannabis sativa*, cultivated in India. It is used to prepare *Extractum cannabis indicæ* and *Tinctura cannabis indicæ*, the extract and

CANNABIS INDICA.
1. Male Flower. 2. Female Flower.

the tincture. Indian hemp produces a peculiar kind of intoxication, attended with exhilaration of spirits and hallucinations of a pleasing kind; these are followed by narcotic effects, sleep, or stupor. It is used as an antispasmodic, and for its anodyne properties in cases of neuralgia, tetanus, &c.

4. *Figuratively:*

(1) A rope, a halter.

"A man in deepe despaire, with *hempe* in hand,
Went out in haste to ende his wretched dayes."
Turbervile: Of Two Desperate Men.

(2) Hanging; death by the halter.

hemp-agrimony, *s.*

Bot.: *Eupatorium cannabinum*. [EUPATORIUM.]

hemp-brake, *s.* A machine in which rotted and subsequently dried hemp-stalks are beaten to remove the bark and cellular pith from the fibre.

hemp-harvester, *s.*

Agric.: A reaping-machine for hemp.

hemp-nettle, *s.* [GALEOPSIS.]

hemp-palm, *s.*

Bot.: Chamærops excelsa, the Tall Chamærops. It is from Nepaul and China. Its fibres are used as a substitute for hemp, and hats and cloaks are made from its leaves.

hemp-seed, *s.* The seed of hemp; it is much used as food for cage-birds.

Hemp-seed calculus:

Path.: A name for some varieties of the mulberry-calculus (q.v.).

*** hĕmp'-en,** *a.* [Eng. *hemp; -en.*]

1. Made of hemp.

"For they shall ower ocean wide,
With *hempen* bridles, and horse of tree."
Scott: Thomas the Rhymer, ii.

2. Resembling hemp.

"The former of these are made of the bark of a pine-tree beat into a *hempen* state."—*Cook: Voyages,* vol. ix., bk. iv., ch. iii.

hĕmp'-lĭ̆, *s. & a.* [Eng. *hemp; -ie.*]

A. *As subst.:* A rogue; a gallows apple; one for whom hemp grows. Its most common use is in a jocular way. (*Scotch.*)

"She'e under lawfu' authority now; and full time, for she was a daft *hempie.*"—*Scott: Rob Roy,* ch. xxxiv.

B. *As adj.:* Roguish, wild, romping.

Hĕmp'-stĕad, *s. & a.* [For etym. see def.]

A. *As subst.:* Various parishes in England. The one geologically interesting is near Yarmouth, in the Isle of Wight.

B. *As adj.:* Of or belonging to Hempstead.

Hempstead-beds, *s. pl.*

Geol.: A series of beds, some marine, others freshwater, of Lower Miocene age. They occur at Hempstead, in the Isle of Wight, where they are 170 feet thick.

hĕmp'-wŏrts, *s. pl.* [Eng. *hemp,* and *worts.*]

Bot.: The name given by Lindley to the order Cannabinaceæ (q.v.).

*** hĕmp'-ȳ,** *a.* [Eng. *hemp; -y.*] Like or resembling hemp; of the nature of hemp.

"'Twixt the rind and the tree (called magnals) there is a cotton or *hempy* kind of moss, which they wear for their clothing."—*Howell,* bk. ii., let. 54.

*** hem-self, * hem-selve, * hem-selv-en,** *pron.* [Mid. Eng. *hem,* and *self.*] Themselves.

hĕm'-stĭtch, *s.* [Eng. *hem,* and *stitch.*] A kind of stitch in needlework, made by drawing out a few parallel threads and fastening the cross threads in successive small clusters.

*** hē'-mūse,** *s.* [Etym. doubtful.] A roe in its third year.

hĕn, *s.* [A.S. *henn, hen, hœn,* from *hana* = a cock; cogn. with Dut. *hen* (from *haan* = a cock); Icel. *hœna* (from *hani);* Dan. *høne* (from *hane);* Sw. *höna* (from *hane);* Gr. *henne* (from *hahn);* Goth. *hana* = a cock. *Hana* means literally a singer, from the same root as Lat. *cano* = to sing.]

1. *Farming, &c.:* The female of the domestic or barn-fowl (*Gallus domesticus*) has run like other domestic animals into many varieties. A good hen will lay 200 eggs in a year. Ten or twelve are as many as it can rear in one brood.

2. The female of other species of poultry.

3. The female of any bird whatever.

4. Money for drink. [Hen-drinking.]

¶ *Hen* is used largely in composition with the force of *female:* as, a *hen*-canary, a *hen*-sparrow, &c.

hen-and-chickens, *s.*

Bot.: (1) *Sempervivum soboliferum* a native of Germany; (2) *Bellis perennis* (Common Daisy), var. *Prolifera.*

hen-blindness, *s.* The same as nyctalopia or night-blindness.

hen-buckie, *s.* The large whelk, *Buccinum undatum,* much used as bait in fishing. (*Scotch.*)

hen-cavey, *s.* A hen-coop. (*Scotch.*)

hen-coop, *s.* A coop or inclosed framework in which fowls are kept.

hen-drinking, *s.* (See extract.)

"There is yet another [Yorkshire marriage-custom], viz., the *hen-drinking.* On the evening of the wedding day the young men of the village call upon the bridegroom for a hen—meaning money for refreshments . . . should the hen be refused, the inmates may expect some ugly trick to the house ere the festivities terminate."—*Notes & Queries,* Sept. 17, 1859, p. 239.

*** hen-driver,** *s.* A kind of hawk; a henharrier.

"The *hen-driver* I forbear to name."—*Walton.*

*** hen-egg,** *s.* A hen's egg.

hen-harrier, hen-harm, *s.*

Ornith.: Circus cyaneus, which receives its English name from "harrying" or harming hens or other poultry.

hen-hawk, *s.* A poetic name for the henharrier (?).

"Owl and eagle, crane and *hen-hawk.*"
Longfellow: Song of Hiawatha, xiv.

*** hen-hearted, * henne-hearted,** *a.* Having a heart like a hen; chicken-hearted; timid; cowardly.

*** henne,** *s.* [Hen.]

*** hĕn'-nĕr-ȳ,** *s.* [Eng. *hen; -ery.*] An enclosed place or run for fowls.

*** hennesforth,** *adv.* [Henceforth.]

hĕn'-ō-thĕ-ĭsm, *s.* [Gr. *εἷς* (*heis*), genit. *ἑνός* (*henos*) = one, and Eng. *theism* (q.v.).]

Comp. Relig.: The name introduced by Max Müller for a phase of religious belief when each divinity seems to stand alone, and to be adored and prayed to, to the exclusion of the rest.

"If we must have a general name for the earliest form of religion among the Vedic Indians, it can be neither monotheism, nor polytheism, but only *henotheism.*"—*Max Müller: Hibbert Lectures* (1878), p. 230.

hĕ-nŏ'-tĭ-cŏn, *s.* [Gr. *ἑνωτικός* (*henōtikos*) = serving to unite; *ἑνόω* (*henoō*) = to unite.]

Ch. Hist.: A formula of concord, offered by the Greek emperor Zeno, in A.D. 482, by advice of Acacius, Bishop of Constantinople, to reconcile the Eutychians to the church. It was annulled by Pope Justin I., in A.D. 518. [Eutychian, Monophysite.]

Hĕn-rĭç'-ĭ-an, *s.* [For etym., see def.]

Ecclesiol. & Ch. Hist.: A follower of Henry, an eremite monk, probably of Italian descent, who came from Lausanne in Switzerland to France. He declaimed against the vices of the clergy, who so persecuted him that he was driven from place to place, and finally died in prison in 1148.

hĕn'-roost, *s.* [Eng. *hen*, and *roost.*] A place where poultry roost at night.

"Bradshaw was to have privileges which were refused to a boy who had robbed a *henroost.*"—*Macaulay: Hist. Eng.*, ch. xviii.

hĕn'-foot, *s.* [Eng. *hen's*, and *foot.*]

Bot.: *Caucalis daucoides.*

hĕn-slō'-vĭ-a, *s.* [Named after Professor Henslow.] [Henslovian.]

Bot.: The typical genus of the order Henslowiaceæ (q.v.). It contains two or three trees from the hottest parts of India.

hĕn-slō-vĭ-ā'-çē-æ, *s. pl* [Mod. Lat. *hen.slow(ia)* (q.v.); Lat. fem. pl. adj. suff. *-aceæ.*]

Bot.: An order of perigynous exogens, doubtfully proposed by Lindley. The leaves are opposite, entire without stipules; the flowers unisexual. The calyx five-parted, lined with a woolly disc, its æstivation valvate. Stamens, five; ovary, superior, two-celled; fruit capsular. Only genus Henslovia, which Bentham and Hooker place under Lythraceæ. [Henslovia.]

hĕn-slō'-vĭ-an, *a.* [Partly Latinised from the name of Rev. J. S. Henslow, M.A., F.L.S., &c., Professor of Botany at Cambridge.] Of or belonging to Professor Henslow.

henslovian-membrane, *s.*

Bot.: The cuticle of a plant, of which Prof. Henslow was one of the discoverers.

***hĕnt,** *s.* [Hent, *v.*] A grasping; a seizure; apprehension.

"Up, sword, and know thou a more horrid *hent.*"
Shakesp: Hamlet, iii. 3.

***hĕnt,** *v.t.* [Hend.] To seize; to grasp; to take hold of.

"Encreasing his wrath with many a threat,
His harmefull hatchet he *hent* in hand."
Spenser: Shepheards Calender; Feb.

hĕnt'-ĭng, hĭnt'-ĭng, *s.* [Etym. doubtful.] A furrow with which a ploughman finishes his ridge.

hĕn'-wāre, *s.* [Eng. *hen*, and *ware.*]

Bot.: An algal, *Alaria esculenta.*

hĕn'-wood-īte, *s.* [Named after the late W. J. Henwood, of Penzance.]

Min.: Essentially a hydrated phosphate of alumina and copper, and thus related to turquoise. It occurs in globular masses of a turquoise-blue colour, having a crystalline exterior, on a siliceous limonite at the West Phœnix mine, Cornwall. Its hardness is about 4·5, and density 2·67. (*T. Davies, F.G.S.*)

***hĕnx'-man,** *s.* [Henchman.]

hē'-ōak, *s.* [Eng. *he* = male, and *oak.*]

Bot.: A name given in Australia to *Casuarina stricta.*

hĕp, ***hepe,** *s.* [A.S. *heop.*] [Hip, 2.] The fruit of the dog-rose; a hip.

hep-bramble, hep-briar, hep-tree, *s.*

Bot.: The wild dog-rose, *Rosa canina.*

***hē'-par,** *s.* [Gr., = the liver.]

Chem. & Phar.: Hepar sulphuris, *Potassa sulphurata.* A mixture of tersulphide of potassium with sulphate of potassium. Obtained by heating together sulphate and carbonate of potassium in a crucible. It forms a brown liver-coloured mass, soluble in water. It is used to prepare *Unguentum Potassæ Sulphuratæ*, ointment of sulphurated potash. It is used externally in the treatment of chronic akin diseases, also for chronic rheumatism. Sometimes called Liver of Sulphur.

hĕ-păt-, hĕ-pa-tē-, *pref.* [Gr. ἧπαρ (*hēpar*), genit. ἥπατος (*hēpatos*) = the liver.]

Nat. Science: Of, belonging, or in any way resembling the liver.

hĕ-păt-ăl'-ĭ-a, *s.* [Pref. *hepat-*, and Gr. ἄλγος (*algos*) = pain.]

Path.: Pain in the liver; neuralgia of the liver.

hĕ-păt'-ĭc, *** hĕ-păt'-ĭck,** *a.* [Lat. *hepaticus* = Gr. ἡπατικος (*hēpatikos*) = diseased in the liver.]

1. *Anat.:* Of or belonging to the liver. Thus there are hepatic cells and veins, and an hepatic artery, a duct, and a plexus.

2. *Path.:* Affecting or arising from the liver.

"His lordship's bilious and *hepatick* complaints seemed alone not equal to the expected mournful event."—*Johnson: Life of Littleton.*

¶ Of diseases affecting the liver there are hepatic abscess, cancer, colic, dropsy, hydatids, phlebitis, tubercle, tumours, vomiting, hepatitis (q.v.).

3. *Min.:* Resembling the liver, either in colour or form. (*Phillips.*)

hepatic aloes, *s. pl.*

1. *Bot.:* *Aloe vulgaris, purpurascens, socotrina*, and *arborescens.*

2. *Pharm.:* [Aloes].

hepatic cinnabar, *s.*

Min.: A variety of cinnabar (q.v.).

hepatic-diseases, *s. pl.*

Path.: Diseases of the liver, divided by Dr. Murchison into painless and painful. The chief are cirrhosis, abscess, and cancer. [Liver.]

hepatic-waters, *s. pl.*

Pharm.: Waters containing sulphuretted hydrogen in solution, as those of Harrogate.

hĕ-păt'-ĭ-ca, *s.* [Hepatic.]

Bot.: A genus of Ranunculaceæ, now reduced to a sub-genus of Anemone. *Hepatica triloba* is a garden flower, brought from continental Europe. It is an astringent.

hĕ-păt'-ĭ-çæ, *s. pl.* [Plur. of Lat. *hepatica* (q.v.).]

Bot.: Liverworts, a section of the alliance Muscales, containing orders which have no operculum, and, as a rule, possess elaters, while mosses possess an operculum and are always destitute of elaters. Lindley, who doubts whether this distinction is of more than ordinal value, divides Hepaticæ into four orders, Ricciaceæ, Marchantiaceæ, Jungermanniaceæ, and Equisetaceæ. The Rev. M. S. Berkeley excludes the fourth of these, and calls the others Ricciacei, Marchantiacei, and Jungermanniacei.

hĕ-păt'-ĭc-al, *a.* [Eng. *hepatic*; *-al.*] The same as Hepatic (q.v.).

hĕ-păt'-ĭ-coûs, *a.* [Lat. *hepaticus*; Gr. ἡπατικός (*hēpatikos*).]

Botany:

1. Liver-coloured.

2. Lobed like the liver. (*Paxton.*)

hē'-pa-tīte, *s.* [Pref. *hepat-*; *-ite* (*Min.*) (q.v.).]

Min.: A variety of barite or barytes.

hĕp-a-tī'-tĭs, *s.* [Gr. ἧπαρ (*hēpar*), genit. ἥπατος (*hēpatos*) = the liver, and suff. *-itis*, denoting inflammation; cf. also ἡπατῖτις (*hēpatītis*) = of or in the liver.]

Path.: Inflammation or congestion of the liver.

hĕ-păt-ĭ-zā'-tion, *s.* [Eng. *hepatiz(e)*; *-ation.*]

Anat. & Pathol.: A change of structure produced in the lungs, either natural after death, or in life by ecchymosis or inflammation, whereby their substance resembles that of liver. The term is also applied to the state of any texture which has been converted into a substance resembling liver. (*Mayne.*)

*** hē'-păt-īze,** *v.t.* [Gr. ἡπατίζω (*hepatizō*) = to be like the liver; ἧπαρ (*hēpar*), genit. ἥπατος (*hepatos*) = the liver.]

1. To convert into a substance resembling liver; to gorge with effused matter.

2. To impregnate with sulphuretted hydrogen.

hĕ-păt-ō-, *pref.* [Hepat.] Of or belonging to the liver.

hĕ-păt'-ō-çēle, *s.* [Pref. *hepato-*, and Gr. κήλη (*kēlē*) = a tumour.]

Surg.: Hernia of the liver.

hĕ-păt-ō-çȳst'-ĭc, *a.* [Pref. *hepato-*, and Eng. *cystic.*] Relating to the liver and the gall-bladder, or connecting the two together; there are hepatocystic ducts.

hĕ-păt-ō-găs'-trĭc, *a.* [Pref. *hepato-*, and Eng. *gastric.*] Relating to the liver and the stomach. [Omentum.]

hĕp-a-tŏg'-ra-phy, *s.* [Pref. *hepato-*, and Gr. γραφη (*graphē*) a writing, a description.] That branch of anatomy which describes the liver; a description of the liver.

hĕp-a-tŏ-lĭ-thī'-a-sĭs, *s.* [Pref. *hepato-*, and Gr. λιθίασις (*lithiasis*) = a morbid concretion.]

Pathol.: The formation of morbid concretions in the liver.

hĕp-a-tŏl'-ō-gy, *s.* [Pref. *hepato-*, and Gr. λόγος (*logos*) = a discourse.] A treatise on the liver.

† **hĕ-păt-ŏph'-ȳ-ma,** *s.* [Pref. *hepato-*, and Lat. *phyma*; Gr. φῦμα, φύμα (*phuma*) = an inflamed swelling on the body, a tumour, a boil.]

Path.: A suppurative swelling of the liver. [Hepatitis.]

† **hĕ-păt-ō-rrhœ'-a,** *s.* [Pref. *hepato-*, and Gr. ῥεω (*rheō*) = to flow.]

Path.: A morbid flow [*i.e.*, of bile] from the liver.

*** hĕp-a-tŏs'-cō-pȳ,** *s.* [Gr. ἡπατοσκοπία (*hēpatoskopia*), from ἡπατοσκοπέω (*hēpatoskopeō*) = to inspect the liver for soothsaying purposes.] Divination by inspection of the liver.

hĕp'-a-tŭs, *s.* [Gr. ἥπατος (*hepatos*) = a fish, so named apparently from its colour resembling that of liver.]

Zool.: The name given by Latreille to a genus of brachyurous crustaceans, placed by Milne Edwards under his tribe of Calappians. The species are found on the American coast.

*** hēpe,** *v.t.* [Heap, *v.*]

*** hēpe** (1) *s.* [Heap, *s.*]

*** hēpe** (2), *s.* [Hep.]

hĕ-pĭ-ăl'-ĭ-dæ, *s. pl.* [Mod. Lat. *hepial(us)* (q.v.); Lat. fem. pl. adj. suff. *-idæ.*]

Entom.: A family of moths, group Bombycina. The antennæ are short, moniliform, simple or with a single row of denticulations or cilia; wings deflexed, long, and narrow; thorax not crested; larva fleshy, naked, with six pectoral, eight abdominal, and two anal feet.

hĕ-pī'-a-lŭs, *s.* [Gr. ἡπίαλος (*hēpialos*) = a shivering fit, the nightmare; cf. also ἡπιάλης (*hēpialēs*) = the nightmare.]

Entom.: The typical genus of the family Hepialidæ (q.v.). *Hepialus humuli* is the Ghost Moth (q.v.); *H. hectus* is the Golden Swift; *H. Velleda*, the Beautiful Swift. [Swift, *s.*]

*** hĕp'-pĕn,** *a.* [A.S. (*ge*)*hæp* = fit.] Neat, fit, comfortable.

hĕp'-pĕr, *s.* [Etym. doubtful.] The parr or young of the salmon.

hĕps, *s. pl.* [Hep.]

hĕp-ta-căp'-su-lar, *a.* [Gr. ἑπτά (*hepta*) = seven, and Eng. *capsular.*] Having seven cavities or cells.

hĕp'-ta-chord, *s.* [Gr. ἑπτά (*hepta*) = seven, and χορδή (*chordē*) = a chord.]

Music:

1. A series of seven notes; a diatonic octave without the upper note.

2. An instrument with seven strings.

3. A composition sung to the sound of seven chords.

*** hĕp'-tade,** *s.* [Fr., from Lat. *heptas*; Gr. ἑπτάς (*heptas*), genit. ἑπταδος (*heptados*), from ἑπτά (*hepta*) = seven.] The sum or number of seven.

*** hĕp'-ta-glŏt,** *s.* [Gr. ἑπτά (*hepta*) = seven, and γλῶττα (*glōtta*) = a tongue.] A book in seven languages.

hĕp'-tą-gŏn, *s.* [Gr. *ἑπτά* (*hepta*) = seven, and *γωνια* (*gōnia*) = an angle.]

I. *Geom.:* A plane figure having seven sides or angles.

2. *Fort.:* A place having seven bastions for defence.

hĕp-tăg'-ō-nąl, *a.* [Eng. *heptagon; -al.*] Having seven angles or sides.

heptagonal-numbers, *s. pl.*

Arith.: A kind of polygonal numbers, formed as follows: Let 1, 6, 11, 16, 21, 26, &c., be arithmetical progression, then 1, 7, 18, 34, 55, 81, &c., will be the series of polygonal numbers, called heptagonal. The law of formation is to add each number in the lower line to the next one on the right in the upper line. The general formula for heptagonal numbers is

$$N = \frac{5n^2 - 3n}{2},$$

in which N denotes the heptagonal number in any place, and n the order of the place. It is a property of heptagonal numbers that if any one of them be multiplied by 40, and the product be increased by 9, the result will be a perfect square. For,

$$\frac{40(5n^2 - 3n)}{2} + 9 = (10n - 3)^2.$$

hĕp'-tą-ğўn'-ĭ-ą, *s. pl.* [Gr. *ἑπτά* (*hepta*) = seven, and *γυνή* (*gunē*) = a woman, a female animal, by botanists used for a pistil.]

Bot.: An order of plants in Linnæus's artificial system. It consists of those which have seven pistils.

hĕp-tą-ğўn'-ĭ-an, hĕp-tăğ'-ў-noŭs, *a.* [Eng., &c. *heptagyn(ia);* suff. *-ian, -ous.*]

Bot.: Having seven pistils.

hĕp-tăğ'-ў-noŭs, *a.* [HEPTAGYNIAN.]

hĕp-tą-hē'-drąl, *a.* [HEPTAHEDRON.] Having seven sides.

hĕp-tą-hē'-drŏn, * **hĕp-tą-ē'-drŏn,** *s.* [Gr. *ἑπτά* (*hepta*) = seven, and *ἕδρα* (*hedra*) = a seat, a base.] A solid figure having seven sides.

hĕp-tą-hĕx-ą-hē'-drąl, *a.* [Gr. *ἑπτά* (*hepta*) = seven, and Eng. *hexahedral* (q.v.).] Having seven ranges of faces, one above another, each range containing six faces.

hĕp-tą-hў'-drąte, *s.* [Gr. *ἑπτά* (*hepta*) = seven, and Eng. *hydrate* (q.v.).]

"The *heptahydrate* crystallizes out."—*Proc. Phys. Soc., London*, pt. ii., p. 67.

* **hĕp-tăm'-ĕr-ēde,** *s.* [Gr. *ἑπτά* (*hepta*) = seven, and *μερίς* (*meris*), genit. *μερίδος* (*meridos*) = a share, a part.] That which divides into seven parts.

* **hĕp-tăm'-ĕr-ŏn,** *s.* [Gr. *ἑπτά* (*hepta*) = seven, and *ἡμέρα* (*hēmera*) = a day.] A book containing the account or transactions of seven days.

hĕp-tăm'-ĕr-oŭs, *a.* [Gr. *ἑπτά* (*hepta*) = seven, and *μέρος* (*meros*) = a part, a share.]

Bot., &c.: Consisting of seven parts; in seven pieces or portions.

hĕp-tăn'-dĕr, *s.* [HEPTANDRIA.]

Bot.: A plant of the order heptandria (q.v.).

hĕp-tăn'-drĭ-ą, *s. pl.* [Gr. *ἑπτά* (*hepta*) = seven; *ἀνήρ* (*anēr*), genit. *ἀνδρός* (*andros*) = a man, and Lat. neut. pl. suff. *-ia.*]

Bot.: The seventh class of Linnæus's artificial classification of plants. It contains those with seven stamens. They are but few in number. The class contains four orders —viz., Monogynia, Digynia, Tetragynia, and Heptagynia (q.v.).

hĕp-tăn'-drĭ-an, *a.* [HEPTANDROUS.]

hĕp-tăn'-droŭs, hĕp-tăn'-drĭ-an, *a.* [Lat. *heptandr(ia);* *-ous, -ian.*]

Bot.: Having seven stamens, as the horse-chestnut.

hĕp'-tāne, *s.* [Gr. *ἑπτά* (*hepta*) = seven; suff. *-ane.*]

Chem.: C_7H_{16}. Septane, a name given to hydrocarbons of the paraffin series, containing seven carbon atoms. Nine isomeric hydrocarbons having this composition are possible, but four are at present known—

(1) Normal heptane, $CH_3(CH_2)_5CH_3$, is contained in petroleum and in the tar-oil from cannel coal. It, along with octane, forms the chief part of the commercial petroleum ether, or ligroin. It boils at 99°.

(2) Ethyl isopentyl, or ethyl amyl, $CH_3{\cdot}(CH_2)_3{\cdot}CH{\cdot}(CH_3)_2$, obtained by the action of sodium and a mixture of ethyl iodide and isopentyl iodide. It boils at 90°.

(3) Triethyl-methane,

$CH_3{\cdot}CH_2{\cdot}CH\begin{matrix}\diagup CH_2{\cdot}CH_3\\ \diagdown CH_2{\cdot}CH_3\end{matrix}$ is formed by the action of zinc ethyl on orthoformic ether.

(4) Dimethyl-diethyl-methane,

$H_3C\diagdown\!\!\diagup C\begin{matrix}\diagup CH_2{\cdot}CH_3\\ \diagdown CH_2{\cdot}CH_3\end{matrix}$ is formed by the action of zinc ethyl on acetone chloride, $CH_3{\cdot}CCl_2{\cdot}CH_3$. It boils at 96°.

hĕp-tăn'-gu-ląr, *a.* [Gr. *ἑπτά* (*hepta*) = seven, and Eng. *angular* (q.v.).] Having seven angles.

hĕp-tą-pĕt'-ą-loŭs, *a.* [Gr. *ἑπτά* (*hepta*) = seven; *πέταλον* (*petalon*) = a leaf, and Eng. adj. suff. *-ous.*]

Bot.: Having seven petals in the corolla.

* **hĕp-tăph'-ō-nў,** *s.* [Gr. *ἑπτά* (*hepta*) = seven, and *φωνή* (*phōnē*) = a sound.] The union of seven sounds.

hĕp-tăph'-ўl-loŭs (or **hĕp-tą-phўl'-loŭs),** *a.* [Gr. *ἑπτα* (*hepta*) = seven; *φυλλον* (*phullon*) = a leaf, and Eng. adj. suff. *-ous.*] Having seven leaves.

* **hĕp'-tarch,** *s.* [HEPTARCHY.] The same as HEPTARCHIST (q.v.).

* **hĕp-tărch'-ĭc,** *a.* [Eng. *heptarch(y); -ic.*] Of or pertaining to a heptarchy or a seventold government; constituting a heptarchy.

* **hĕp'-tăr-chĭst,** *s.* [Eng. *heptarch(y); -ist.*] A governor of one division of a heptarchy.

hĕp'-tar-chў, *s.* [Gr. *ἑπτά* (*hepta*) = seven, and *ἀρχή* (*archē*) = rule, sovereignty, a kingdom.] A government by seven persons; a country, a district under seven rulers. Specif., the seven Anglo-Saxon kingdoms of Kent, Sussex, Wessex, Essex, Mercia, Northumbria, and East Anglia, which are commonly represented in English histories to have existed concurrently with and independently of each other. This, however, is not the fact, and the term therefore is a misnomer.

hĕp-tą-spĕr'-moŭs, *a.* [Gr. *ἑπτά* (*hepta*) = seven, and *σπέρμα* (*sperma*) = a seed.]

Bot.: Having seven seeds.

hĕp'-tą-teŭch, *s.* [Gr. *ἑπτά* (*hepta*) = seven, and *τεῦχος* (*teuchos*) = a book.] The first seven books of the Old Testament.

hĕp'-tēne, *s.* [Gr. *ἑπτά* (*hepta*) = seven; suff. *-ene.*]

Chem.: C_7H_{14}. Heptylene: a name given to hydrocarbons of the olefine series, containing seven carbon atoms. A hydrocarbon having this formula occurs in the light coal-tar oils obtained by the distillation of cannel coal. Also obtained by treating heptyl aldehyde with PCl_5, and, gently heating the resulting heptylene chloride with sodium, it boils at 99°.

hĕp'-tine, *s.* [Gr. *ἑπτά* (*hepta*) = seven; suff. *-ine.*]

Chem.: C_7H_{12}. A hydrocarbon of the acetylene series, obtained by the action of sodium and monochlor-heptylene, $C_7H_{13}Cl$. It boils at 100°.

hĕp-tō'-ĭc, *a.* [Gr. *ἑπτά* (*hepta*) = seven; o connective, and suff. *-ic.*] (See compound.)

heptoic-acids, *s. pl.*

Chem.: $C_7H_{14}O_2$, or $C_6H_{13}{\cdot}CO{\cdot}OH$. Acids belonging to the fatty series, having seven carbon atoms. Seventeen acids are possible; the only important one is the normal heptoic acid, or œnanthylic acid. It is obtained by the oxidation of œnanthol, or normal heptyl alcohol. It can also be obtained by boiling normal hexyl cyanide with caustic potash; also by the oxidation of castor oil with nitric acid. It is a transparent colourless oil, having an unpleasant smell. It boils at 223°. Heated with baryta it yields hexane C_6H_{14}. It forms crystalline salts. Its ethylic ether boils at 180°.

heptoic-aldehyde, *s.*

Chem.: $C_7H_{14}O$, or $C_6H_{13}{\cdot}CO{\cdot}H$. Œnanthylic aldehyde, or œnanthol, is obtained by the dry distillation of castor oil. It is a stinking liquid, boiling at 155°.

hĕp'-tўl, *s.* [Gr. *ἑπτά* (*hepta*) = seven; *-yl* = Gr. *υλη* (*hulē*) = matter.]

Chem.: C_7H_{15}. A monatomic fatty radical, containing seven carbon atoms.

heptyl-alcohols, *s.pl.*

Chem.: $C_7H_{15}{\cdot}OH$. Alcohols belonging to the fatty series, containing seven carbon atoms. Thirty-eight of these alcohols are theoretically possible, and thirteen are known. The normal heptyl alcohol, $CH_3(CH_2)_5{\cdot}CH_2OH$, is obtained by the action of nascent hydrogen, from sodium amalgam and water, on heptyl aldehyde (œnanthol), or by converting normal heptane into the chloride, and acting on this by silver acetate, and distilling the resulting acetate with caustic potash. It is a colourless oily liquid, boiling at 177°. For the preparation of the other alcohols consult *Watts: Dict. Chem.*, vol. viii.

heptyl-chloride, *s.*

Chem.: $C_7H_{15}Cl$. A colourless liquid, which burns with a smoky green flame. Obtained by the action of phosphorus pentachloride on heptylic alcohol.

hĕp'-tўl-ēne, *s.* [Eng. *heptyl; -ene.*] [HEPTYL.]

hĕp'-wŏrt, *s.* [Eng. *hep,* and *wort.*] The wild dog-rose, *Rosa canina.*

hĕr (1), * **herc** (1), * **hir,** * **hire,** * **hur,** * **hure,** *pron.* [A.S. *hire,* gen. & dat. of *heô* = she, *-re* being the usual A.S. fem. inflection in the gen. & dat. of adjectives of the strong declension.] Used as three different cases of the personal pronoun *she*:—

(1) As the possessive case = belonging to a certain female spoken of. When thus used it is sometimes called an adjective. [HERS.]

"Priscilla, aroused by his step on the threshold, Rose as he entered and gave him *her* hand, in signal of welcome." *Longfellow: Miles Standish,* iii

(2) As the dative of the pronoun = to this or that female: as, Give *her* the book.

(3) As the objective case.

"With merry note *her* lowd salutes the mounting larke." *Spenser: F. Q.,* I. xi. 51.

* **her** (2) **here** (2), *pron.* [A.S. *hira, heora.*] Their, theirs.

A stand where you may make the fairest shoot."
Shakesp.: Love's Labour's Lost, iv. 1.

2. By this, from this, hence.

"And *hereby* we do know that we know him, if we keep his commandments."—1 *John* ii. 3.

*** hĕ-rĕd-ip'-ĕ-tȳ,** *s.* [Lat. *heredipeta* = a fortune-hunter: *hereditum* = an hereditary estate, and *peto* = to seek.] Legacy-hunting, fortune-hunting. (*Milman.*)

*** hĕ-rĕd-ĭt-a-bĭl'-ĭ-tȳ,** *s.* [Eng. *hereditable; -ity.*] The quality or state of being hereditable.

*** hĕ-rĕd'-ĭt-a-ble,** *a.* [Lat. *heredito* = to inherit: *heres* (genit. *heredis*) = an heir; Eng. *-able.*]

1. That may or can be inherited; inheritable.

"Adam being neither a monarch, nor his imaginary monarchy *hereditable*."—*Locke.*

2. Capable of inheritiog.

hĕ-rĕd'-ĭt-a-blȳ, *adv.* [Eng. *hereditab(le); -ly.*] In a hereditable manner; by way of inheritance.

hĕr-ĕ-dĭt'-a-ment, *s.* [Lat. *heredito* = to inherit.] (See extract.)

"*Hereditaments*, then, to use the largest expression, are of two kinds, corporeal and incorporeal. (1) *Corporeal hereditaments* consist wholly of substantial and permanent objects, all which may be comprehended under the general denomination of land only. (2) An *incorporeal hereditament* is a right issuing out of a thing corporate, whether real or personal, or concerning, or annexed to, or exercisable within, the same. It is not the thing corporate itself, which may consist in lands, houses, jewels, or the like; but something collateral thereto, as a rent issuing out of those lands or houses, or an office relating to those jewels. *Incorporeal hereditaments* are principally advowsons, tithes, commons, ways, offices, dignities, franchises, corodies or pensions, annuities, and rents."—*Blackstone: Commentary*, bk. ii., ch. 2.

hĕ-rĕd'-ĭt-ar-ĭ-lȳ, *adv.* [Eng. *hereditary; -ly.*] By way of inheritance.

1. Descending or passing by inheritance; descendible from an ancestor to an heir; possessed or claimed by right of inheritance; inherited, inheritable.

"The Bishops, true to their doctrines, supported the principle of *hereditary* right."—*Macaulay: Hist. Eng.*, ch. ii.

2. That is or may be transmitted from a parent to a child; thus pride, courage, a disease, &c., may be said to be hereditary.

"*Hereditary* eloquence, proper to all mankind."—*Daniel: Defence of Rhyme.*

hĕ-rĕd'-ĭt-ȳ, *s.* [Lat. *hereditas*, from *heres* (genit. *heredis*) = an heir.]

Biol.: The tendency which there is in each animal or plant, in all essential characters, to resemble its parents, so as to be of the same species, and even variety, as they are, though minute differences are certain to arise. In some cases these differences themselves tend to be reproduced in successive generations: thus Mr. E. B. Poulton showed that "the strength of heredity" was such in cats with an abnormal number of toes, that between 1879 and 1883 the peculiarity had been traced through eight successive generations (*Nature*, Nov. 1, 1883; *Brit. Assoc. Rep.*, 1883, p. 543.). In other cases the movement is in a contrary direction, producing a reversion to ancestral types. [Reversion, Atavism.]

"Some of the best illustrations of functional *heredity* are furnished by the mental characteristics of the human race."—*Herbert Spencer: Principles of Biology*, § 82.

Hĕr'-ĕ-fŏrdş, *s. pl.* [From the county where they are reared.] A breed of cattle having a dark red body with a white face and breast, and sometimes a line of white along the back. They have a thicker skin than the shorthorn, and long curly soft hair; the head is like that of a Devon [Devon] but larger, the muzzle coarser, and the throat more fleshy. The neck is thick and short, the horns have a yellow tinge and are wider at the base, and bend upwards. Herefords are better behind the shoulder than shorthorns, the breast is hardly so wide, the ribs are not so well sprung but the depth is greater, the thighs and flanks and the interval between the hip and rump are well furnished, and handle firm. Herefords are good grazing and working animals. They are very hardy, and excellent for the butcher, but are not useful as dairy animals.

*** here-gild,** *s.* [Hereyeld.]

hēre-ĭn', *adv.* [Eng. *here,* and *in.*] In this; here.

"*Herein* is love, not that we loved God, but that he loved us."—1 *John* iv. 10.

hēre-ĭn-af'-tĕr, *adv.* [Eng. *herein,* and *after.*] In this [writing, book, document, &c.] after; applied to something to be explained, named, or described, at a future time.

hēre-ĭn'-tō, *adv.* [Eng. *here,* and *into.*] Into this.

"Our first entrance *hereinto* cannot better be made than with consideration of the nature of law in general."—*Hooker: Eccles. Polity.*

*** hĕr'-ĕ-mĭt,** *s.* [Hermit.]

*** hĕr-ĕ-mĭt'-ĭc-al, * her-e-met-i-call,** *a.* [Lat. *heremiticus, eremiticus*, from *heremita, eremita* = a hermit (q.v.).] Of or pertaining to a hermit; suited for a hermit; solitary, secluded.

"The *hermeticall* profession was onelie allowed of in Britaine, vntill the coming of Augustine the monke."—*Holinshed: Desc. of Britaine*, bk. i., ch. ix.

*** her-en,** *a.* [Mid. Eng. *here* = hair; *-en.*] Made of hair.

hēre-ŏf', *adv.* [Eng. *here,* and *of.*] Of this, from this, hence.

"*Hereof* comes it that prince Harry is valiant."
Shakesp.: 2 *Henry IV.*, iv. 3.

hēre-ŏn', *adv.* [Eng. *here,* and *on.*] On or upon this.

"If we should strictly insist *hereon*, the possibility might fall into question."—*Browne: Vulgar Errours.*

*** hēre-ŏût',** *adv.* [Eng. *here,* and *out.*] Out of this place, from here, hence.

*** hĕ-rē'-sĭ-arch, * hĕ-rē'-sĭ-are,** *s.* [Gr. αἱρεσιαρχος (*hairesiarchos*), from αἱρεσις (*hairesis*) = choice . . . heresy; ἀρχω (*archō*) = to rule or lead; Fr. *hérésiarque.*] A leader of a sect of heretics; a prominent or leading heretic.

"I have seen . . . amongst the reputed *heresiarcs*, that medallion of John Huss."—*Evelyn: Memoirs*, Aug. 12, 1689.

*** hĕ-rē'-sĭ-ar-chȳ,** *s.* [Eng. *heresiarch; -y.*] A prominent or chief heresy.

"The book itself [the Koran] consists of *heresiarches* against our blessed Saviour."—*Sir T. Herbert: Travels*, p. 323.

*** hĕr-ĕ-sĭ-ŏg'-ra-phĕr,** *s.* [Eng. *heresiograph(y); -er.*] One who writes or discourses on heresies.

*** hĕr-ĕ-sĭ-ŏg'-ra-phȳ,** *s.* [Gr. αἱρεσις (*hairesis*) = choice . . . heresy, and γραφω (*graphō*) = to write or describe.] A treatise or discourse on heresy or heretics.

hĕr-ĕ-sĭ-ŏl'-ŏ-ğĭst, *s.* [Eng. *heresiology; -ist.*] One who devotes himself to the study of the history of heresy; an ecclesiastical historian who deals specially with heresy and heresies. Heresiologists are usually divided into three classes:—(1) Those who had to oppose the originators and supporters of heresies; (2) Those who dealt with the subject as an incident in ecclesiastical history; and (3) Those who undertook the history of any particular sect, or of all which came within their knowledge. (*Blunt: Dict. of Sects* (1874), p. 184.)

hĕr-ĕ-sĭ-ŏl'-ŏ-ğȳ, *s.* [Gr. αἱρεσις (*hairesis*), genit. αἱρεσεως (*haireseōs*) = heresy, and λόγος (*logos*) = a discourse.] The comprehensive history of heresy. [Heresiologist.]

"All three classes of these writers must be consulted for obtaining a complete acquaintance with *heresiology*."—*Blunt: Dict. of Sects* (1874), p. 184.

hĕr'-ĕ-sȳ, * her-e-sye, * cr-e-sie, *s.* [Fr. *hérésie;* Prov. *heregia, eretgia;* Sp. *heregia;* Port. *heresia, heregia;* Ital. *eresia;* Lat. *hæresis;* Gr. αἱρεσις (*hairesis*) = (1) a taking, a choosing, choice, (2) the thing chosen; later, a philosophical principle or set of principles. Sense 1 is from αἱρέω (*hairĕō*) = to take, 2 is from αἱρέομαι (*haireomai*) = to take for oneself.]

1. *Scrip.:* The English word "heresy" does not occur in the Old Testament; in the New it is found four times, and "heretic" once. In none of these has it the classic sense of choice or philosophical tenets or sects. In 1 Cor. xi. 15 it seems to mean parties, without implying that any of these held erroneous theological views. The R. V. places "heresies" in the text and "factions" in the margin. In Gal. v. 20 it appears to have the same meaning, for it is coupled with "hatred, variance, emulations, strife, seditions" (A. V.), "emnities, strife, jealousies, wraths, factions, divisions" (R. V.). The R. V. puts "heresies" in the text and "parties" in the margin. In Acts xxiv. 4 it means difference in methods of worship. In 2 Peter ii. 1 it is unequivocally error in doctrine, and it is on this last passage alone that the modern ecclesiastical use of the word has been founded. In Acts v. 17, xv. 5, xxiv. 5, xxvi. 5, xxviii. 22, αἱρεσις (*hairesis*) is translated "sect."

"There shall be false teachers among you, who privily shall bring in damnable *heresies*, even denying the Lord who bought them, and shall bring upon themselves swift destruction."—2 *Peter* ii. 1.

2. *Ecclesiol., Ch. & Civil Hist:* The sense here is religious error, departure from what is held to be true doctrine. Heresy has always existed in the Church. For the efforts to extirpate it, see Heretic

3. *Roman Theol.:* A voluntary state of error and obstinate continuance therein on the part of a Christian touching a truth or truths revealed by God, and proposed by the Church to the world. This is formal heresy, and this alone, whether merely mental or manifested exteriorly, incurs a spiritual penalty. The heresy is material when the error is persisted in and defended in good faith and through invincible ignorance (q.v.). Objective heresy is the erroneous opinion itself, whether held in good faith or not.

hĕr'-ĕ-tĭc, * hĕr'-ĕ-tĭck, * er-e-tik, * her-e-tik, *s. & a.* [Fr. & O. Fr. *hérétique;* Prov. *heretge;* Sp. *herege;* Port. *heretico;* Ital. *eretico;* Lat. *hæreticus* = pertaining to heretical religions doctrine (*Tertullian*); Gr. αἱρετικός (*hairetikos*) = (1) able to choose, (2) heretical (N. T.).] [Heresy.]

A. *As substantive:*

I. *Ordinary Language:*

I. To the same sense as II.

2. *Fig.:* One who differs from others on a political, a scientific, or any other question. In this sense it is often used by the individual himself humorously.

II. *Technically:*

I. *Ecclesiol., Ch. & Civil Hist., &c.:* One who adopts, and probably propagates, religious views which the Church to which he belongs, or the Christian Church in general,

deems erroneous, and imperilling the eternal salvation of any one holding them. Certain causes have in every age and country produced heresy, and will for ever continue to do so. Some minds are compelled by their constitution to think independently on religious and other subjects, and in consequence tend to adopt new views; they receive ill-treatment, which confirms them, excites sympathy in others, and in some cases leads the sympathisers to adopt the same tenets. Heresies began in the Apostolic age. There were, for instance, Hymenæus and Philetus, who said that the resurrection was already passed (2 Tim. ii. 17), and apparently the Nicolaitanes, though they are censured for hateful deeds rather than doctrines (Rev. ii. 6). In Mosheim's *Church History* there is a chapter under each century headed "History of Sects and Heresies," and in no case is the chapter left blank. In treating of opinions held by heretics, it should be remembered that the statements of the accusers are *ex parte*, and that there are not materials for an impartial judgment, unless some book or document penned by the other side is obtainable. The Scripture direction for dealing ecclesiastically with heresies is given in Titus iii. 10: "A man that is an heretick after the first and second admonition reject." When the Church gained an influence over the civil power, it induced the latter to superadd civil to the ecclesiastical penalties for heresy. Those who differed from the opinions of the imperial house received many kinds of ill-usage, but it was not till A.D. 382 that a law of Theodosius I., directed against the Manichæans, authorised capital punishment for heresy. This law led to the execution at Treves, in A.D. 385, of Priscillian, Bishop of Avila; he is believed to have been the first person put to death by a Christian government for heresy. Many disapproved of the cruelty, but ultimately the bad precedent was followed. The oppression of the "heretics" made many of them side with the Mohammedans during the conflict of the latter with the orthodox Christians. [II. 2.]

2. *English Law:* In mediæval times it was supposed that the proper method of dealing with a heretic was to burn him alive, and accordingly there was a writ "De hæretico comburendo" (About burning a heretic), regarding which Blackstone says that it "is thought by some to be as ancient as the common law itself." The conviction of heresy by the common law was, however, by the archbishop in a provincial synod, and the delinquent was handed over to the civil power. If the writ "De hæretico comburendo" was issued, it was by the special direction of the king in council, with whom also the power rested of refusing to put the writ in force. During that part of the Reformation struggle in England in which the government was Roman Catholic, a heretic specially meant a Protestant; but by 25 Henry VIII. c. 14 departure from the tenets of the Church of Rome was declared not to be heresy; 1 Eliz. c. 1 in name swept away the penal statutes against heretics, leaving them to be dealt with by ecclesiastical courts; but it was not till 1676 that 29 Chas. II., c. 9, § 1. actually removed the writ from the statute-book.

B. *As adj.:* Heretical.

"Eschewe thou a man *eretike* aftir oon and the secounde correccioun."—*Wycliffe: Titus* iv.

¶ The *heretic* is considered as such with regard to the Catholic Church or the whole body of Christians, holding the same fundamental principles; but the *schismatic* and *sectarian* are considered as such with regard to particular established bodies of Christians. *Dissenters* are not necessarily either *schismatics* or *sectarians*, for British Roman Catholics and the Presbyterians of Scotland are all *dissenters*. It is equally clear that all *schismatics* and *sectarians* are not *dissenters*, because every established community of Christians, all over the world, have had individuals or smaller bodies of individuals setting themselves up against them: the term *nonconformist* is a more special term, including only such as do not *conform* to some established or national religion. (*Crabb: Eng. Synon.*)

hĕ-rĕt'-ĭc-al, *a.* [Eng. *heretic*; *-al.*] Containing or of the nature of heresy; contrary to established or received doctrines, opinions, or principles of religious belief.

hĕr'-ĭ-ŏt, * **hăr'-ĭ-ŏt,** *s.* [A corrupt. of A.S. *hereġeatu* = military apparel: *here* = an army, and *geatu*, *geatue* = apparel, adornment. The *heregeatu* consisted of military habiliments or equipments, which, after the death of the vassal, escheated to the sovereign or lord, to whom they were delivered by the heir. (*Thorpe: Ancient Laws*, bk. ii., Glossary.) In later times horses and cows, and many other things, were paid as *heriots* to the lord of the manor. (*Skeat.*)]

Law: A fine, such as the best beast, payable to the lord of the fee upon the decease of the tenant. It is always a personal chattel, and is no charge upon the lands, but merely upon the goods and chattels. *Heriots* will in course of time cease to be exigible, one of the statutes for the enfranchisement of copyholds having enabled either lord or tenant to compel the extinguishment of this ancient feudal burden. *Heriots* were originally, as the word means, arms, horses, and habiliments of war. (See etym.)

"*Heriots* are of two sorts: *heriot*-service and *heriot*-custom. The former amount to little more than a mere rent: the latter depend merely upon immemorial usage, and are a customary tribute of goods and chattels, payable to the lord of the fee on the decease of the owner of the land."—*Blackstone: Comment.*, bk. ii., ch. 24.

* **hĕr'-ĭ-ŏt-a-blc,** *a.* [Eng. *heriot*; *-able.*] Subject or liable to the payment of heriots.

"The tenants are chiefly customary and *heriotable*."—*Burnet. Hist. Cumberland*, i. 174.

hĕr'-ĭs-sŏn, *s.* [Fr.; O. Fr. *heriçon*, *eriçon* = a hedgehog, from Low Lat. *ericionem*, acc. of *ericio*, from Lat. *ericius* = a hedgehog.]

"The *heritage*, which she did clame."
Spenser: F. Q., V. i. 3.

2. *Scots Law:* Heritable estate; realty.

3. *Scripture:*

(1) *Old Test.:* Heb. נָחֲלָה (*nahalah*), from נָחַל (*nahal*) = to possess; the taking of anything capable of being possessed; a possession. Used of a field or fields (Jer. xii. 15), of the whole land of Canaan looked on as the special possession of Jehovah (Deut. iv. 20, ix. 26, 29; Ps. xxviii. 9), or the Israelites as His peculiar people (Joel iii. 2); also a gift bestowed by Him (Ps. cxxvii. 3). [Inheritance.]

"O Lord, save thy people, and bless thine *heritage*."—*Common Prayer: Te Deum.*

(2) *New Test.:* Gr. κλῆροι (*klēroi*), literally = those assigned by lot. The flock placed under one's pastoral charge.

"Neither as being lords over God's *heritage*, but being ensamples to the flock."—1 *Peter* v. 3.

¶ The word "God's" of the A. V. is not in the original, and is consequently omitted in the R. V.

hĕr'-ĭ-tŏr, * **her-y-ter,** *s.* [Fr. *héritier* = an heir, from Low Lat. *heritator*, for *hereditator*, from *heredito* = to inherit.]

Hĕr-mā'-ĭc, hĕr-mā'-ĭc-al, *a.* [Gr. Ἑρμαικός (*Hermaikos*), from Ἑρμῆς (*Hermēs*).] Of, pertaining, or relating to Hermes or Mercury.

hĕr-măn'-nĕ-æ, hĕr-măn'-nĭ-ĕ-æ, *s.* [Mod. Lat. *hermann(ia)*; Lat. fem. pl. adj. suff. *-eæ.*]

Bot.: A tribe of Byttneriaceæ; if that order be reduced to Byttneræ, and made a tribe of Sterculiaceæ, then Hermanneæ will become a sub-tribe. All the species are from South Africa.

hĕr-măn'-nĭ-a, *s.* [Named after Paul Hermann, of Leyden.]

Bot.: The typical genus of the tribe Hermanneæ (q.v.).

hĕr-man-nīte, *s.* [Named after Hermann, one of those who analysed it; Ger. *hermannit.*]

Min.: The same as the Cummingtonite of Rammelsberg. (*Brit. Mus. Cat.*)

* **hĕr-măph-rō-dē'-ĭ-tȳ,** *s.* [Eng. *hermaphrodite; -ity.*] The state of being hermaphrodite; hermaphrodism.

"Some do believe *hemaphrodeity*
That both do act and suffer."
Ben Jonson: Alchymist, ii. 1.

hĕr-măph'-rō-dĭsm, *s.* [Eng. *hermaphrod(ite); -ism.*] The state of being hermaphrodite; the union of the two sexes in the same individual.

hĕr-măph'-rō-dīte, *s.* & *a.* [From *Hermaphroditus*, Gr. Ἑρμαφρόδιτος (*Hermaphroditos*) = the son of Hermes and Aphrodite. It is said that his body and that of the nymph Salmacis became one.]

A. *As substantive:*

1. *Zool.:* An animal having combined in itself the characteristics of the two sexes, and capable of propagating its kind without the intervention of any other individual of the same species. Occasionally human beings are born combining some characteristics of the two sexes, but every one of these is essentially male or female. Some of the inferior animals, though fewer than was once supposed, really combine the characters of the two opposite sexes to such an extent as to be able to propagate their kind. But as Sprengel, Knight, and Kolrenter suspected, and Darwin proved, in the case of all hermaphrodites, two individuals either occasionally or habitually concur in the reproduction of their kind.

2. *Bot.:* Possessing both stamens and pistils within the same floral envelope; bisexual. This is the rule rather than the exception among plants.

"A vast majority of plants are *hermaphrodites*."—*Darwin: Origin of Species* (6th ed.), p. 76.

B. *As adj.:* Possessing to a greater or lesser extent the characteristics of both sexes combined in a single individual. Used both of animals and plants.

"But still there are *hermaphrodite* animals which habitually pair."—*Darwin: Origin of Species* (6th ed.), p. 76

hermaphrodite-brig, *s.* [Baio, ¶.]

* **hĕr-măph'-rō-dīte,** *v.t.* [Hermaphrodite, *s.*] To unite, as two things of opposite sexes.

"Divinity and art were so united
As if in him both were *hermaphrodited*."
Browne: Death of Mr. Josias Shute.

hĕr-măph-rō-dĭt'-ĭc, hĕr-măph-rō-dĭt'-ĭc-al, *a.* [Eng. *hermaphrodit(e); -ic, -ical.*] Pertaining to, or of the nature of a hermaphrodite; partaking of both sexes.

"Nero's chariot was drawne by four *hermaphroditical* mares."—*Browne: Vulgar Errours*, bk. iii., ch. xvii.

* **hĕr-măph-rō-dĭt'-ĭc-al-lȳ,** *adv.* [Eng. *hermaphroditical; -ly.*] In a hermaphroditic manner; after the manner of hermaphrodites.

"Be not monstrous in iniquity; nor *hermaphroditically* vitious."—*Browne: Christian Morals*, pt. i., § 31.

hĕr-măph'-rŏd-ĭt-ĭsm, *s.* [Eng. *hermaphrodit(e); -ism.*] The same as Hermaphrodism (q.v.).

Biol.: The state of being hermaphrodite. [Hemmaphrodism.]

¶ *Dimidiate hermaphroditism:* Half or imperfect hermaphroditism. It exists in the lobster, and occurs also in insects. Ochsenheimer cites many instances, in fourteen of which the right side was male and the left female, while in some others it was the reverse. (*Owen: Invertebrata*, lect. xv., xviii.)

hĕr-mĕl'-la, *s.* [Etym. doubtful; probably a dimin.; cf. Fr. *hermelle.*]

Zool.: The typical genus of the family Hermellidæ (q.v.).

hĕr-mĕl'-lĭ-dæ, *s. pl.* [Mod. Lat. *hermell(a)* (q.v.); Lat. fem. pl. adj. suff. *-idæ.*]

Zool.: A family of Annelids, order Tubicola. They form tribes which often do injury to the oyster beds in which some of them live. The family is often merged in Serpulidæ.

hĕr-mĕ-neŭt'-ĭc, hĕr-mĕ-neŭt'-ĭc-al, *a.* [Gr. ἑρμηνευτικός (*hermēneutikos*) = skilled in interpreting; ἑρμηνευτής (*hermēneutēs*) = an interpreter; ἑρμηνεύω (*hermēneuō*) = to interpret, prob. from Ἑρμῆς (*Hermēs*) = Mercury.] Interpreting; explaining; explanatory: as, *hermeneutic* theology.

hĕr-mĕ-neŭt'-ĭc-al-lȳ, *adv.* [Eng. *hermeneutical; -ly.*] In a hermeneutic manner; according to the recognised principles of interpretation.

hĕr-mĕ-neŭt'-ĭcs, *s.* [Hermeneutic, *a.*] The art or science of the interpretation of the words and phrases of an author; exegesis; especially applied to the interpretation of Scripture.

* **hĕr-mĕ-neŭt'-ĭst,** *s.* [Gr. ἑρμηνευτής (*hermēneutēs*).] One skilled in hermeneutics; an interpreter.

Hĕr'-mēs (pl. **Hĕr'-mæ, Hĕr'-maī**), *s.* [Gr.]

1. *Gr. Myth.:* The name given by the Greeks to the god known by the Romans as Mercury (q.v.).

HERMES.

2. *Gr. Antiq. (Pl.):* Statues of Hermes or Mercury, which were set up by the inhabitants of Athens at the doors of their houses, and sometimes also in the peristyle. They consisted of a bust, affixed to a quadrangular stone pillar, diminishing towards the base. They were also set up to mark the boundaries of lands, at the junctions of roads, at the corners of streets, and in other prominent places, and even as posts for ornamental railing to a garden. The hermes was the result of the first attempt at the artistic development of the blocks of stone and wood, by which, in the earliest period of idol-worship, all the divinities were represented, simply by adding to them a head, in the features of which the characteristics of the god were supposed to be expressed. Sometimes the head was double, triple, or even fourfold.

hĕr-mēs'-ĭ-an-ĭsm, *s.* [For etym. see def.]

Ch. Hist.: The method of religious inquiry taught by George Hermes, born near Munster April 22, 1775; in 1819 he became Professor of Theology at Rome, where he died May 26, 1831. Hermes combined with the Roman Catholicism to which he was sincerely attached a strong tendency towards philosophy. He was of opinion that reason must first be exercised in establishing a Divine revelation and the claims of the Church of Rome infallibly to interpret its teaching. Reason then itself required an implicit acceptance of all the doctrines of the Church. These views he published, in 1819, in an *Introduction to Christian-Catholic Theology.* His old students and other admirers, who were numerous, adopted his method, with the result that they tended to move, not towards, but away from the Church, in consequence of which the Pope, on Sept. 26, 1835, issued a brief against Hermes' work, which was held to be of pantheistic tendency. A vehement controversy on the subject sprung up in Germany, the Prussian Government, offended by the way the brief was carried out, coming into collision with the Court of Rome.

hĕr'-mēs-īte, *s.* [Eng., &c. *hermes* (q.v.); *-ite* (*Min.*) (q.v.).]

Min.: A variety of Tetrahedrite (q.v.).

hĕr-mĕt'-ĭc, hĕr-mĕt'-ĭc-al, * **her-met-iquc,** *a.* [Fr. *hermétique*, from *Hermes* (*Trismegistus*) = Hermes (the Thrice-greatest), a name given by the Neo-Platonists and others to the Egyptian god Thoth, the supposed inventor of chemistry, alchemy, &c.] (See *Notes & Queries*, Jan. 8, 1881, p. 30.)

1. Of or belonging to Hermes [Etym.].

2. Of or belonging to alchemy or chemistry, which were not at the outset distinct from each other.

3. Of or belonging to the hermetic philosophy or the system of medicine founded on it.

"The holy writings of the Egyptians, called after him *Hermetic* writings, were ascribed to him."—*Notes & Queries*, Jan. 8, 1881, p. 30.

4. Fitting so closely as to be air-tight.

hermetic-books, *s. pl.*

1. Egyptian books; treatises on astrology. (*Bryant.*)

2. Books treating of universal principles, of the nature and order of celestial beings, of medicine, &c. (*Enfield.*)

¶ Most of the hermetic books were not penned till the Christian era.

hĕr-mĕt'-ĭc-al, *a.* [Hermetic.]

hermetical-medicine, *s.* An obsolete system of medicine which looked for its remedies, not to nature, but to the philosophy attributed to the mystic Hermes Trismegistus. Astrology is used to discover the origin and termination of diseases, and among remedies which largely figure are an alkali and an acid.

hermetical-philosophy, *s.* A philosophy which attempted to account for all physical phenomena by the operation of the three chemical agents—salts, sulphur, and mercury.

hĕr-mĕt'-ĭc-al-lȳ, *adv.* [Eng. *hermetical; -ly.*] In a hermetical manner; chemically; by means of fusion; closely; accurately; so as to exclude the passage of air. (*Boyle: Works*, i. 21.)

* **hĕr-mĕt'-ĭcs,** *s.* [Hermetic.] Alchemy or chemistry.

hĕr-mĭn'-ĭ-a, *s.* [Gr. Ἑρμῆς (*Hermēs*) = the Greek god corresponding to the Latin Mercury.]

Entom.: The typical genus of the family Herminidæ (q.v.).

hĕr-mĭn'-ĭ-dæ, *s. pl.* [Mod. Lat. *hermin(ia)*; Lat. fem. pl. adj. suff. *-idæ.*]

Entom.: A family of moths, group Geometrina. The antennæ of the male are ciliated or pubescent, rarely simple; palpi rather long, ascending; the anterior legs without tufts of hair; wings broad and slight; larva with fourteen legs, feeding exposed. Some of the species are called Snout Moths. (*Stainton.*)

hĕr-mĭn'-ĭ-ŭm, *s.* [Gr. ἑρμίς (*hermis*), or ἑρμὶν (*hermin*) = a prop, a support, specially a bedpost; ἕρμα (*herma*) = a prop, a support.]

Bot.: Musk-orchis, a genus of orchids, tribe Ophreæ, family Gymnadeniidæ. The Greek Musk-orchis, *Herminium Monarchis*, is a plant of musky odour, with two lanceolate radical leaves, and a slender, rather lax, spike of small green flowers, growing wild on chalky pastures in the east and south-east of England. Abroad it is found in continental Europe Siberia, and the Himalayas.

Hĕr-mī-ŏ-nē, *s.* [Gr.]

1. *Gr. Myth.:* A daughter of Menelaus and Helen, and the wife of Orestes.

2. *Astron.:* An asteroid, the 121st found. It was discovered by Watson on May 12, 1872.

hĕr'-mĭt, * **her-mite,** * **her-e-mite,** * **her-e-myte,** * **er-e-mite,** * **er-e-myte,** *s.* [Fr. *hermite*, from Low Lat. *heremita, eremita*, from Gr. ἐρημίτης (*eremitēs*) = a dweller in a desert; ἐρημία (*erēmia*) = a desert; ἐρῆμος (*erēmos*) = deserted, desolate; Ital. *eremita*; Sp. *eremitano.*]

1. A person who retires from society to live in solitary contemplation and devotion; an anchoret, a recluse; one who lives or passes a recluse and solitary life in religious meditation and devotion. [Eremites.]

"The most perfect *hermits* are supposed to have passed many days without food, many nights without sleep, and many years without speaking."—*Gibbon: Decline & Fall*, ch. xxxvii.

* 2. A beadsman; one who is bound to pray for another.

"We rest your *hermits*." *Shakesp.: Macbeth*, i. 6.

¶ *Little hermit, Little hermit-bird:*

Ornith.: Phaethornis eremita, a small species of humming-bird.

hermit-birds, *s. pl.*

Ornithology:

1. The name given by Swainson and others to Monassa, a genus of Halcyonidæ, having short wings and long broad tails. They often rise up perpendicularly in the air, make a swoop, and return to their former station. Habitat, Brazil.

2. The genus Phaëthornis, placed by Mr. Gould under the Trochilidæ. They build their nests at the extremity of leaves.

hermit-crab, *s.*

1 *Sing.: Pagurus Bernhardus*, or any similar species; called also the Soldier Crab.

2. *Plur.:* Paguridæ, a family of Anomoura, meaning Irregular-tailed Crustaceans. The name hermit-crabs is given because each individual of the family, having but a soft abdomen, constituting a fleshy mass vulnerable to the last degree, seeks out an abandoned univalve shell of suitable size, which may be at

1. The cell or habitation of a hermit; a solitary or secluded place in which a recluse passes his life in religious meditation and devotion; any solitary or secluded habitation.

"The stern old regicide, however, refused to quit his *hermitage*."—*Macaulay: Hist. Eng.*, ch. v.

2. A kind of French wine, of two kinds, red and white, so named from a little hill near Tain, Department of Drôme, where it is produced.

* **hĕr'-mĭt-ar-ў,** *s.* [Low Lat. *hermitorium, eremitorium*, from Lat. *heremita, eremita* = a hermit; Sp. & Ital. *eremitorio.*] A cell for a hermit attached to an abbey.

"Chappels, monasteries, *hermitaries*, nunneries, and other religious houses were used so in the time of old king Henry."—*Howell*, bk. ii., let. 77.

* **hĕr'-mĭt-ĕss,** *s.* [Eng. *hermit; -ess.*] A female hermit.

"Yea she doth smile, and she doth weep
Like a youthful *hermitess*."
Coleridge: Christabel, pt. 1. (Conclus.)

hĕr-mĭt'-ĭc-al, *a.* [Fr. *érémitique*, from *ermite.*] Pertaining to or suited for a hermit; pertaining to a solitary or retired life; like a hermit.

"You describe so well your *hermitical* state of life."—*Pope*, Let. xi. *To E. Blount.*

hĕr-mō-dăc'-tўl, hĕr-mō-dăc'-tўl-ŭs, *s.* [Gr. Ἑρμῆς (*Hermēs*) (q.v.), and δάκτυλος (*daktulos*) = finger; the finger of Hermes or Mercury. So named because the bulbs have the form of fingers. Fr. *hermodacte hermodattle*; Ger. *hermodattel.*]

1. *Pharm.* (*Of the form* hermodactyl): An unidentified bulbous root brought from Turkey, and formerly used as a cathartic.

2. *Bot.* (*Of the form* hermodactylus): A genus of Iridaceæ, allied to Iris itself. *Hermodactylus tuberosa* is the Snake's-head Iris.

Hĕr-mō-ġē'-nĭ-ans, *s. pl.* [See def.]

Ecclesiol. & Ch. Hist.: An obscure, semi-Christian sect, followers of Hermogenes, who lived towards the end of the second century. Having tendencies to the gnosticism which then flourished, he believed matter to be the root of all evil, yet that from it was formed everything in the world, the human soul not excepted.

hĕrn (1), *s.* [HERON.]

* **hèrn** (2), * **herne,** *s.* [O. Dut. *herne, hirne*; Icel. *hiarni.*] [HARNS.] The brain, the skull.

* **hern-pan,** * **herne-panne,** *s.* [HARNPAN.]

hĕr-năn'-dĭ-a, *s.* [Named after Francisco Hernandez, M.D., a Spanish botanist.]

Bot.: The typical genus of the tribe Hernandieæ. It consists of three or four trees with apetalous flowers, from the East and West Indies. The bark, seed, and young leaves of *Hernandia sonora* are slightly purgative. The wood of *H. guianensis* takes fire so easily that it has been used for amadou.

hĕr-năn-dĭ-ā'-çē-æ, *s. pl.* [Mod. Lat. *hernandi(a)* (q.v.); Lat. fem. pl. adj. suff. *-aceæ.*]

Bot.: An order of exogens proposed by Blume for the two genera Hernandia and Inocarpus. Lindley and others reduce the order to a tribe of Thymelaceæ. [HERNANDIEÆ.]

hĕr-năn'-dĭ-ĕ-æ, *s. pl.* [Mod. Lat. *hernandi(a)*; Lat. fem. pl. adj. suff. *-eæ.*]

Bot.: A tribe of plants doubtfully placed under Thymelaceæ. [HERNANDIACEÆ.]

hĕrn'-ant, *a.* [HERNANDIA.] Of or pertaining to the genus Hernandia (q.v.).

"In som *hurne* of the loude."
Robert of Gloucester, p. 178.

* **hĕrne** (2), *s.* [HERNE (2).]

* **herne-pan,** *s.* [HARNPAN.]

hĕr'-nĭ-a, *s.* [Lat. = a rupture, from Gr. ἔρυος (*herrios*) = a sprout.]

Pathol.: The protrusion of some portion of the intestinal canal, or, in a more general sense, of any organ or part of an organ, from its natural place. It may arise from overexertion, from a blow, &c. There are many varieties of hernia, as, the diaphragmatic, the enterovaginal, the mesenteric, the mesocolic, omental, perineal, the femoral, &c; the most common of all is the unguinal, occurring in the groin. It may be direct or internal and oblique or external. When a hernia cannot be reduced, and, above all, when it becomes strangulated, it is apt to terminate in gangrene and death.

hĕr'-nĭ-al, *a.* [Eng. *herni(a); -al.*] Of or pertaining to hernia.

hĕr-nĭ-ār'-ĭ-a, *s.* [Mod. Lat. *herniarius* = of, belonging to, or good for hernia. So called because the plant was supposed to be of use in hernia.]

Bot.: Rupture-wort (Paronychieæ); a genus of Illecebraceæ or Knotworts. It has the sepals four to five, the petals four, five, or none; the stamens three to five, the fruit an indehiscent utricle. *Herniaria glabra* (Glabrous Rupture-wort) is found in the south of England, though rarely. *H. hirsuta*, Hairy Rupture-wort, is a casual plant in Warwickshire.

hĕr-nĭ-ŏt'-ō-mў, *s.* [Eng. *hernia*, and Gr. τομή (*tomē*) = a cutting, τέμνω (*temnō*) = to cut.]

Surg.: An operation for strangulated hernia; celotomy.

* **hĕrn'-shâw,** * **herne-shawe,** * **herne-saw,** * **hearne-sew,** * **her-on-sew,** *s.* [Etym. doubtful.] A young heron (q.v.).

"As when a cast of Faulcons make their flight
At a *Hernesaw*, that lyes aloft on wing."
Spenser: F. Q., VI. vii. 9.

hĕr'-ō, * **hĕr'-ŏs** (*pl.* **hĕr'-ōęs),** *s.* [O. Fr. *heroe*, from Lat. *heroem*, acc. of *heros* = a hero, from Gr. ἥρως (*hērōs*); cogn. with Lat. *vir* = a man; A.S. *wer*; Sans. *vîra* = a hero; Fr. *héros*; Ital. *eroe*: Sp. *heroe.*]

1. *In Ancient Mythol.:* A kind of demigod, the offspring of a divine and a human being. The heroes were mortal, but after death were admitted among the gods.

2. A person of distinguished or extraordinary valour, daring, or enterprise.

"How *heroes* rise, how patriots set."
Prior: Ode to the King (1695).

*3. A person highly distinguished in any pursuit or occupation; as, *A hero* in learning.

4. The principal character in a novel, play, poem, &c.; the character which has the principal share in the development of the story or plot.

"I want a *hero*: an uncommon want
When every year and month sends forth a new one."
Byron: Don Juan, i. 1.

hero-children, *s.pl.*

Anthrop. & Comp. Relig.: Tylor's name for those children, remarkable in mythology, whom Cox, following Grimm, calls Fatal Children. Legend relates that they were exposed, suckled by wild beasts, brought up by herdsmen, and, when they came to man's estate, became national heroes. In many cases they unconsciously fulfilled the warnings of some oracle by destroying their parents. Sometimes, as with Remus and Romulus, one parent is supposed to have been divine; or, the birth to have been attended with portents, as in the case of Cyrus. Many instances occur in Aryan mythology and folklore, and even the savage Yuracares, of Brazil, have a divine hero who was suckled by a jaguar. (*Tylor: Primitive Culture*, i. 282.)

* **hero-errant,** *s.* A wandering hero; a knight-errant.

hero-worship, *s.*

1. *Ord. Lang.:* Excessive honour or respect paid to any great man.

"What I call *Hero-worship* and the Heroic in human affairs."—*Carlyle: Heroes & Hero-worship*, lect. i.

2. *Compar. Relig.:* Anthropomorphic worship of a Nature force, or the deification of a hero. Carlyle (*Heroes*, lect. i.) instances Odin as an exemplification of the former case; Greek and Roman mythology are full of instances of the latter. Gladstone (*Juventus Mundi*, ch. viii.) says that "the deification of heroes in the age of Homer was rare, and merely titular." In Virgil's time it had developed into a cult, as is proved by his apostrophe to Augustus, "Et votis jam nunc assuesce vocari" (*Georg.* i. 42.)

"*Hero-worship* weaves a spell around people when they approach anything Christian."—*M. D. Conway: Lessons for the Day*, i. 4.

Hĕr'-ō, *s.* [See compound.]

Hero's-fountain, *s.* [FOUNTAIN ¶ (3).]

Hĕr-ō'-dĭ-ans, *s.pl.* [Gr. Ἡρωδιανοί (*Herōdianoi*). See def.]

Jewish History: A short-lived party, who, for some reason or other, rallied round Herod the Tetrarch. As Herod had too little force of character to inspire enthusiasm, it was evidently his position which gained him followers. Now that Judæa had a Roman governor, Herod of Galilee was the leading representative of Jewish nationality menaced by Rome. Similarly, the Pharisees were the defenders of the national faith against the influx of classic ethnicism. These united to entangle and destroy Jesus. (*Matt.* xxii. 15, 16; *Mark* iii. 6, xii. 13.)

* **hĕr'-ō-ĕss,** *s.* [Eng. *hero; -ess.*] A female hero; a heroine.

"All the *heroesses* in Pluto's house."
Chapman: Homer; Odyssey xi.

hĕ-rō'-ĭc, * **hĕ-rō-ĭck,** * **he-ro-icke,** *a. & s.* [Fr. *héroïque*; from Lat. *heroicus*; Gr. ἡρωικός (*hērōikos*), from ἥρως (*hērōs*) = a hero; Sp. *heroico*; Ital. *eroico.*]

A. *As substantive:*

1. Pertaining to or becoming a hero; characteristic of a hero.

"The *heroic* death of his father."—*Macaulay: Hist. Eng.*, ch. ii.

2. Having the character, qualities, or attributes of a hero; bold, brave, intrepid.

"Cuok—lamented, and with tears as just
As ever mingled with *heroic* dust."
Cowper: Charity, 24.

3. Producing heroes.

"Being but the fourth of that *heroick* line."
Shakesp.: 1 Henry VI., ii. 5.

4. Relating to or describing the deeds of heroes.

"All things became
Slaves to my holy and *heroic* verse."
Shelley: Revolt of Islam, ii. 30.

5. Used in heroic poetry; as, *heroic* verse, an *heroic* foot, &c.

B. *As substantive:*

1. An heroic verse.

"Tom Otway came next, Tom Shadwell's dear Zany,
And swears for *heroics*, he writes best of any."
Rochester: Trial for the Bays.

* **2.** A hero.

¶ *To go into heroics:* To use high-flown or bombastic language.

heroic-age, *s.*

Gr. Myth.: The age in which heroes or demi-gods were supposed to have lived; it immediately preceded the historic age.

heroic-treatment, *s.* The application of remedies of a violent character.

heroic-verse, *s.* In English, German, and Italian poetry the iambic of ten syllables; in French, the iambic of twelve syllables; and in Latin and Greek poetry the hexameter. [IAMBIC, HEXAMETER.]

* **hĕ-rō-ĭc,** *v.t.* [HEROIC, *a.* & *s.*] To celebrate in heroic verse. (*Nashe: Lenten Stuffe.*)

hĕ-rō-ĭc-al, *a.* [Eng. *heroic*; *-al.*] The same as HEROIC (q.v.).

hĕ-rō-ĭc-al-lў, *adv.* [Eng. *heroical*; *-ly.*] In an heroic manner; like a hero.

hĕr'-ō-shĭp, *s.* [Eng. *hero*; *-ship.*] The character, position, or state of a hero.

"His three years of *heroship* expired."
Cowper: Task, iv. 644.

* **hĕr'-pē,** *s.* [Gr. ἅρπη (*harpē*).] The falcated sword of Perseus; a harlequin's wooden sword.

hĕr'-pēs, *s.* [Gr. ἕρπης (*herpēs*), from ἕρπω (*herpō*) = to creep.]

Path.: A skin affection, composed of vesicles grouped on an inflamed surface, as in the lip (*herpes labialis*) in pneumonia, or as shingles (*herpes zoster*), where they form a belt round half the body, never meeting, notwithstanding the old superstition that such meeting is fatal; painful and affecting the nerves and general health. Nervine tonics internally, and cooling unguents or lotions are the necessary treatment. Duration, from sixteen to twenty days.

hĕr-pĕs'-tēs, *s.* [Gr. ἑρπετής (*herpetēs*) = a creeping thing.]

Zool.: Ichneumon, a genus of small carnivorous mammals, family Viverridæ. They have short feet, with five half palmated toes, a long body and tail. *Herpestes Ichneumon* is the Egyptian Ichneumon (q.v.). [MUNGOOS.]

hĕr-pĕs'-tĭs, *s.* [HERPESTES.]

Bot.: A genus of Scrophulariaceæ, sub-tribe Eugratioleæ. *Herpestis amara*, an Indian herb, is very bitter.

hĕr-pĕt'-ĭc, *a.* [Gr. ἕρπης (*herpēs*), genit. ἕρπητος (*herpētos*) = herpes (q.v.); *-ic.*] Resembling or partaking of the nature of herpes in particular, or cutaneous eruptions generally.

hĕr-pĕt-ō-lŏġ'-ĭc, hĕr-pĕt-ō-lŏġ'-ĭc-al, *a.* [Eng. *herpetolog(y)*; *-ic*, *-ical.*] Pertaining to or connected with herpetology (q.v.).

hĕr-pĕt-ŏl'-ō-ġĭst, *s.* [Eng. *herpetolog(y)*; *-ist.*] One skilled in, or devoted to, the study of herpetology.

hĕr-pĕt-ŏl'-ō-ġў, *s.* [Gr. ἑρπετόν (*herpeton*) = a reptile, a creeping thing, and λόγος (*logos*) = a discourse.] The department of natural science which treats of reptiles.

hĕr'-pĕt-ŏn, *s.* [Gr. ἑρπετόν (*herpeton*) = a creeping thing, a reptile, from ἕρπω (*herpō*) = to creep.]

Zool.: A genus of reptiles having two soft prominences covered with scales at the end of the muzzle. Akin to Eryx. Merrem calls it Rhinopirus.

hĕr-pĕt-ŏt'-ō-mĭst, *s.* [Eng. *herpetotom(y)*; *-ist.*]

Anat. & Zool.: One who for purposes of study or research anatomises reptiles.

hĕr-pĕt-ŏt'-ō-mў, *s.* [Gr. ἑρπετόν (*herpeton*) = a creeping thing, and τομή (*tomē*) = a cutting.]

Anat. & Zool: The anatomy of reptiles, a department of zootomy.

hĕrr, *s.* [Ger.] A title of respect given to gentlemen of position in Germany, and equivalent to the English Mr.

hŏr-rĕr'-ĭte, *s.* [From Herrera, who analysed it.]

Min.: A cupreous Smithsonite, an apple-green variety of Smithsonite.

hĕr'-rĭng, * her-ing, *s.* & *a.* [A.S. *hæring*, *hering*; Dut. *haring* (N.H.); Ger. *häring*; M. H. Ger. *hering*; O. H. Ger. *herinch*, *harinc*, in the opinion of Webster and Mahn from O. H. Ger. *heri*; Goth. *harjis* = an army, in allusion to the shoals in which herrings appear; Fr. *hareng*; Prov. & Sp. *arenc*; Port. *arenque*; Ital. *aringa.*]

A. *As substantive:*

Ichthy., Ord. Lang., Comm., &c.: A well-known fish, *Clupea harengus.* The head is one-fifth its total length; there are small teeth in both jaws; the suboperculum is rounded; the ventral fins begin under the middle of the dorsal; the anal has sixteen rays. Upper parts blue or green, lower ones silvery-white. Length, ten or twelve inches. Food, the eggs of fishes, small crabs, and worms. Formerly it was supposed that the herrings migrated in two great shoals every summer from the northern Seas to the coasts of Britain and France, returning in winter to seek an asylum under the polar ice, but now it is known that the herring lives all the year round in the deep waters of the ocean, visiting the shallower water, though not always the same portions, in August and September, and continuing to October and November, by which time they have spawned. In 1884, Dr. James Cossar Ewart, Professor of Natural History at Edinburgh, discovered and examined their spawn. The herring is of immense economic value. Those taken in the north of France are better than those caught further south. The southern limit of the species seems to be about 45° N. lat. It does not seem to have been known to the Greeks and Romans. Nearly 70,000 eggs have been found in a single female, and the species continues to swarm though caught in countless numbers by men, besides being preyed upon by whales, seals, sharks, predatory birds, &c. Dr. Günther considers the Whitebait (*Clupea alba*) as the young of the herring, but this opinion is by no means universal. The Herring of the rivers of the Eastern United States, the Alewife (*Alosa tyrannus*) is not a true Herring, but belongs to the same genus as the shad. It ascends the rivers from Chesapeake Bay northward to spawn, and is taken in great numbers. It is considered in this country much superior to the European Herring. Large quantities are salted and exported to the West Indies. The true Herring also occurs on the American side of the Atlantic, and in the seas to the north of Asia.

B. *As adj.:* Of or belonging to the fish described under A, or its near allies.

¶ *King of the Herrings:* [CHIMÆRA].

herring-buss, *s.* A boat of ten to fifteen tons used in the herring fishery.

"The tonnage bounty upon the *herring-buss* fishery has been at thirty shillings per ton."—*Smith: Wealth of Nations*, bk. iv., ch. v.

herring-curer, *s.* One whose business or profession it is to salt, dry, and prepare herrings for the market.

herring-fishery, *s.*

1. The act or practice of fishing for herrings. The English, it is said, commenced it about the eighth century, the Dutch following about 1164. The art of pickling or salting herrings is ascribed to a certain Beukels or Beukelson of Biervliet, near Sluys, who died in 1397; a tomb was erected in his honour by Charles V. In 1357 the "Statute of Herrings" brought the English fishery under Government control. The artificial propagation of the Herring is now an established governmental undertaking. It was first successfully performed in 1862, in Scotland. It has since been carried out by the United States Fish Commission, the German Fishery Commission, &c.

2. A place or locality where herrings are fished for.

herring-gull, *s.*

Ornith.: Larus argentatus, sometimes called the Silvery Gull. It is a common British species.

herring-pond, *s.* The ocean. (*Slang.*)

¶ *To be sent across the herring-pond:* To be transported.

herring-silver, *s.* A composition in money for the custom of supplying herrings to a religious house. (*Wharton.*)

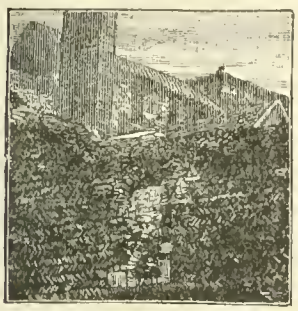
hĕr'-rĭng-bōne, *s.* & *a.* [Eng. *herring*, and *bone.*]

A. *As substantive:*

I *Ord. Lang.:* The bons of a herring.

II. *Technically:*

1. *Masonry:* Rows of stone or paving-blocks



HERRINGBONE MASONRY AT COLCHESTER CASTLE.

sloping in different directions in alternate rows.

2. *Build.:* Strutting-pieces between joists, laid diagonally from the top of one to the bottom of another, to prevent lateral deflection.

3. *Sewing:* A cross-stitch in which the threads are laid diagonally in rows.

B. *As adj.:* Pertaining to or resembling the spine of a herring; hence applied to courses of stone, stitches, &c., laid angularly, so that those in each course are laid obliquely to the right and left alternately.

"In their texture may be traced the patterns of *herringbone*, chevron, and saltire work."—*Wilson: Pre-historic Annals of Scotland*, i. 429.

herringbone-stitch, *s.*

Sewing: The same as HERRINGBONE, A. II. 3.

herringbone-work, *s.*

Mason.: The same as HERRINGBONE, A. II. 1.

hĕr'-rĭng-bōne, *v.t.* [HERRINGBONE, *s.*] To sew or stitch with herringbone-stitch.

hĕrrn'-hût-ĕr, *s.* [Named from Herrnhut, in Saxony.]

Ecclesiol. & Ch. Hist.: [MORAVIANS].

hĕr'-rў, *v.t.* [HARRY.] To plunder; to rob; to harry. (*Burns: Hee Balou.*)

hĕr-rў-ment, *s.* [Eng. *herry; -ment.*] The act of plundering; devastation; pillage.

"The *herryment* and ruin of the country."
Burns: Brigs of Ayr.

hĕrs, *poss. pro.* [HER, *pro.*] Of or belonging to her; the form of the pronoun used when the object referred to has preceded; it is a double genitive, and cannot be joined to a noun.

*** hĕr'-sal,** *s.* [REHEARSAL.]

Hĕr'-sçhel, *s.* [Sir Wm. Herschel, the discoverer.] [HERSCHELIAN.]

Astron.: The planet called also Georgium Sidus, and Uranus (q.v.).

Hĕr-sçhĕl'-ĭ-an, *a.* [For etym. see def.]

Opt cs & Astron.: Of or belonging to the family of Herschel, and specially to Sir Wm. Herschel, astronomer to George III., born Nov. 15, 1738, died August 23, 1822.

Herschelian-rays, *s. pl.*

Optics, &c.: Non-luminous rays outside the red of the solar spectrum. They were first discovered by Sir W. Herschel.

Herschelian-telescope, *s.*

Optic. Instr.: A telescope constructed by Sir William Herschel, in 1789, or any one of a similar type. The mirror was so inclined that the image of a star was formed on the side of the telescope near the eye-piece, hence it was sometimes called the front-view telescope. The rays undergo only a single reflection, and there is therefore but little loss of light. The magnifying power is the quotient when the powerful focal distance of the mirror is divided by the focal distance of the eye-piece. The instrument constructed by Herschel was forty feet long, with a mirror of fifty inches diameter. It was the most magnificent telescope which had ever been made, and was not exceeded till that of Earl Rosse was constructed. [TELESCOPE.]

Hĕr'-sçhel-īte, *s.* [Named after Sir John Herschel.]

Min.: An orthorhombic, colourless, or white translucent mineral of somewhat vitreous lustre, optically biaxial. Hardness, 5·5; sp. gr. 2·06. Comp.: Silica, 46·46 to 47·46; alumina, 19·21 to 20·90; lime, 0·38 to 4·75; soda, 5·27 to 9·35; potassa, 2·88 to 4·39, and water, 17·65 to 17·86. Found at Aci Real in Sicily.

hĕrse, hĕarso, *s.* [HEARSE.]

I. *Ordinary Language:*

***1.** A framework whereon lighted candles were fixed, and which was used as a temporary canopy over the coffins of distinguished persons during the funeral ceremonies.

"For the faire damzell from the holy *herse*,
Her loue-sicke heart to other thoughts did steale."
Spenser: F. Q., III. ii. 48.

2. A temporary monument raised over a grave; a framework over an effigy on a tomb.

3. A carriage in which corpses are drawn to the grave.

4. (Ses extract.)

"*Herse* is the solemne obsequie at funeralles."
Spenser: Shepheards Calender; Nov.

II. *Technically:*

1. *Fort.:* A kind of gate or portcullis, with iron bars like a harrow, set in with iron pikes,

HERSE.

placed above gates, and lowered to impede the advance of an enemy. (*Voyle.*)

2. *Skin-dressing:* A rectangular frame for stretching a skin, which is to remove its wrinkles and hold it while being scraped. Skins for parchment are thus stretched for fleshing, scraping, and grinding.

*** hĕrse,** *v.t.* [HEARSE, *v.*]

hĕrse, *a.* [HOARSE.]

hĕr-sĕlf', * hĭr-sclf, *pron.* [Eng. *her*, and *self.*] The reflexive form of feminine pronoun of the third person singular; also used in emphasis.

hĕr'se-lўke, *a.* [HEARSELIKE.]

*** hĕr'-ship,** *s.* [A.S. *herian* = to plunder; *-ship.*]

1. Plunder, pillage, destruction.

"It grieved him (he said) to see sic *hership* and waste and depredation."—*Scott: Rob Roy*, ch. xxvi.

2. The crime or offence of driving or carrying off cattle by force; cattle-lifting.

3. The cattle so driven or carried off.

hĕrs'-īl-lŏn, *s.* [Fr.]

Fort.: A beam, frame, or plank set with spikes to stop a breach or way; a herse, a cheval-de-frise (q.v.).

hĕrst'-păn, *s.* [Etym. doubtful.] A frying-pan.

*** hert** (1), *s.* [HEART.]

*** hert** (2), *s.* [HART.]

*** herte,** *v.t.* [HURT, *v.*]

*** herte** (1), *s.* [HURT, *s.*]

*** herte** (2), *s.* [HEART.]

*** herte-les,** *a.* [HEARTLESS.]

Hĕr'-tha, *s.* [See def.]

1. *Religions:* The goddess of Earth, worshipped by the ancient Germans. According to Tacitus (*Germania*, 40), she was adored chiefly among the Suevi, her sanctuary being in a grove on an island in the sea. Sometimes she issues from her island, takes her seat in her chariot drawn by cows, and goes out through the world, with the effect of making peace everywhere prevail.

2. *Astron.:* An asteroid, the 135th found. It was discovered by Peters, Feb. 18, 1874.

*** hert-ly,** *a.* [Mid. Eng. *hert* = heart; *-ly.*] Hearty.

*** hĕr'-ў,** *v.t.* [A.S. *herian.*] To praise, to worship, to honour, to glorify.

"*Hery* with hymns thy lasses gloue."
Spenser: Shepheards Calender; Feb.

*** her-y-goud,** *s.* [Etym. doubtful.] A cloak.

*** hĕr'-ў-ĭng,** *s.* [HERY.] Praise, worship, honour.

Hē-sĭ-ŏd'-ĭc, *a.* [See def.] Contained in, resembling, or connected with the poems of Hesiod, said to have been born at Ascra, at the foot of Mount Helicon. Liddell and Scott put the date of Hesiod about 100 years later than that of Homer.

"In the *Hesiodic* Theogony, Hyperiôn becomes his father."—*Cox: Aryan Mythology* (ed. 1882), p. 284.

*** hĕş'-ĭ-tạn-çў,** *s.* [Lat. *hæsitantia*, from *hæsitans*, pr. par. of *hæsito* = to stick fast.] Hesitation, uncertainty, doubt, vacillation, indecision.

"The Spirit of God, which takes away all doubtings and *hesitancies*, and fills us with a full assurance."—*Hopkins: Sermon* 13.

*** hĕş'-ĭ-tạnt,** *a.* [Lat. *hæsitans*, pr. par. of *hæsito* = to stick fast.] Hesitating, dubious, in doubt; not ready in speech or action.

*** hĕş'-ĭ-tạnt-lў,** *adv.* [Eng. *hesitant: -ly.*] In a hesitating manner; with hesitation or doubt.

"My being wont to speak rather doubtfully or *hesitantly*."—*Boyle: Works*, i. (To the Reader.)

hĕş'-ĭ-tāte, *v.i.* [Lat. *hæsitatus*, pa. par. of *hæsito* = to stick fast, from *hæsum*, sup. of *hæreo* = to stick; Fr. *hésiter.*]

1. To stop or pause in action; to be doubtful or undecided as to fact, principle, or determination; to be in suspense or uncertainty; not to be ready or prompt in word or action.

2. To stammer, to stutter, to be slow or to falter in speaking.

¶ (1) With regard to the cause, a *hesitation* results from the state of the mind, and an interruption in the train of thoughts; to *falter* arises from a perturbed state of feeling. The slightest difficulty in uttering words constitutes a *hesitation;* a pause or the repetition of a word may be termed *hesitating:* but to *falter* supposes a failure in the voice as well as the lips when they refuse to do their office. (*Crabb: Eng. Synon.*)

(2) For the difference between to *hesitate* and to *demur*, see DEMUR.

hĕş'-ĭ-tāt-ĭng, *pr. par., a., & s.* [HESITATE.]

A. & B. *As pr. par. & particip. adj.:* (See the verb).

C. *As subst.:* Hesitation, doubt, uncertainty.

hĕş'-ĭ-tāt-ĭng-lў, *adv.* [Eng. *hesitatingly; -ly.*] In a hesitating, doubtful, or uncertain manner.

hĕş-ĭ-tā'-tion, *s.* [Fr., from Lat. *hæsitatio*, from *hæsitatus*, pa. par. of *hæsito* = to stick fast; Sp. *hesitacion.*]

1. Doubt; uncertainty of opinion or decision; a state of suspense or indecision as to fact, principles, or determination.

"To banish *hesitation*, and proclaim
His happiness her dear, her only aim."
Cowper: Hope, 63.

2. A stammering, stuttering, or faltering in speech.

"Many clergymen write in so diminutive a manner, with such frequent blots and interlineations, that they are hardly able to go on without perpetual *hesitations*."—*Swift.*

*** hĕş'-ĭ-tā-tĭve,** *a.* [Eng. *hesitat(e); -tive.*] Inclined to or showing hesitation, doubt, or indecision.

*** hĕş'-ĭ-tā-tŏr-ў,** *a.* [Eng. *hesitat(e); -ory.*] Vacillating. (*North: Examen*, p. 596.)

hĕsp, *s.* [HASP.]

Hĕs'-pĕr, *s.* [Lat. *hesperus*; Gr. ἑσπερος.] The evening star.

hĕs-pĕr-ĕt'-ĭc, *a.* [Eng., &c. *hesperet(in)*; *-ic.*] See the compound.

hesperetic-acid, *s.*

Chem.: $C_{10}H_{10}O_4$. Obtained by the action of alkalis on hesperidin. It melts at 225°. Fused with caustic potash, it is decomposed into acetic and protocatechuic acids, hydrogen being liberated.

hĕs-pĕr'-ĕ-tĭn, *s.* [Eng., &c. *hesperi(din)*; *-etin.*]

Chem.: $C_6H_3O_2{\cdot}C_{10}H_9O_3$. It is obtained along with glucose by the action of dilute acids on hesperidin. It is recrystallized from ether; the crystals are white, and melt at 223°. Hesperetin is really insoluble in alcohol. Heated to 100° with caustic potash, it yields hesperetic acid and phloro-glucin.

Hĕs-pĕr'-ĭ-a, *s.* [Lat.; Gr. Ἑσπερία (*Hesperia*) = the Western land (Italy or Spain).]

I. *Astron.:* An asteroid, the 69th found; discovered by Sciaparelli, April 29, 1861, when the astronomer Luther first saw Leto.

2. *Entom.:* The typical genus of the family Hesperidæ (q.v.). The species fly with extreme rapidity.

* **hĕs-pĕr'-ĭ-an,** *a.* & *s.* [Lat. *hesperius*, from *hesperus* = the evening star; Gr. ἑσπερος (*hesperos*); Lat. *vesper* = the evening.]

A. *As adj.:* Situated at or in the west; western.

"Those *Hesperian* gardens famed of old."
Milton: P. L., iii. 568.

B. *As subst.:* An inhabitant or native of a western country.

hĕs-pĕr'-ĭ-dæ, hĕs-pĕr-ĭ'-ĭ-dæ, *s. pl.* [Lat. *hesper(ia)*; fem. pl. adj. suff. *-idæ.*]

Entom.: A family of Rhopalocera (Butterflies). The antennæ, which are widely separated, are long and abruptly hooked; the body is robust; the six legs of uniform size. The flight is short and jerking, whence they are popularly called Skippers. Larva like that of the cabbage butterfly, but with a much larger head. It rolls leaves into cylindrical sheaths; the chrysalis is enclosed in a transparent cocoon. Seven species are British. A common one in England is *Pamphila Sylvanus*, or the Large Skipper. [SKIPPER.]

hĕs-pĕr-ĭd'-ĕ-æ, *s. pl.* [Lat. *hesper(is)* (q.v.); fem. pl. adj. suff. *-ideæ.*]

Bot.: An order in Linnæus's *Natural System of Botany*. He included under it the genera Citrus, Styrax, and Garcinia.

hĕs-pĕr'-ĭ-dēne, *s.* [Mod. Lat. *hesperid(æe)*; *-ene.*]

Chem.: $C_{10}H_{16}$. A terpene contained in the volatile oil of orange peel. It boils at 178°. Heated with phosphorus pentasulphide, it yields cymene.

* **Hĕs-pĕr'-ĭ-dēs,** *s.* [Gr.]

Greek Mythology:

1. The daughters of Night or the granddaughters of Hesperus, the brother of Atlas, three or seven in number, possessors of the fabulous garden of golden fruit watched over by an enchanted dragon at the western extremity of the earth. It was one of the labours of Hercules to procure some of these golden apples.

2. The garden watched over by the Hesperides.

"Is not love a Hercules,
Still climbing trees in the *Hesperides*?"
Shakesp.: Love's Labour's Lost, iv. 3.

hĕs-pĕr'-ĭ-dĭn, hĕs-pĕr'-ĭ-dīne, *s.* [Mod. Lat. *hesperid(æe)*; *-in*, *-ine* (*Chem.*) (q.v.).]

Chem.: $C_{22}H_{26}O_{12}$. A glucoside extracted from dry, unripe bitter oranges. They are exhausted with water, and the residue is treated with a mixture of equal parts of alcohol and water, containing one per cent. of caustic potash; on adding HCl, impure hesperidin separates out. It crystallizes from water, alcohol, or dilute acids in white, microscopic needles. It is insoluble in ether; it is soluble in dilute potash, and the solution becomes orange yellow on standing; when this solution is evaporated to dryness, and the residue treated with dilute sulphuric acid, it turns red, then violet. Fused with caustic potash, hesperidin yields protocatechuic acid.

hĕs-pĕr-ĭd'-ĭ-ŭm, *s.* [Dimin. form of Lat. *hesperis*; Gr. ἑσπερίς (*hesperis*), genit. ἑσπερίδος (*hesperidos*) = the evening; pl. = the Hesperides, to the golden fruit in whose garden the orange is here compared.]

Bot.: A many-celled, few-seeded superior indehiscent fruit, covered by a spongy separable rind, formed by the thickening of the mesocarp; the endocarp, which is membranous, forming several loculaments, easily separable from each other, and containing a mass of pulp in which the seeds are imbedded. Example, the orange. Lindley places the Hesperidium under his class Syncarpi.

hĕs-pĕr-ī'-ĭ-dæ, *s. pl.* [HESPERIDÆ.]

hĕs'-pĕr-ĭs, *s.* [Lat. *hesperis*; Gr. ἑσπερίς (*hesperis*) = as adj., western; as subst., the night-scented gillyflower.]

Bot.: Dame's-violet, a genus of cruciferous plants, family Sisymbridæ. *Hesperis matronalis*, a plant with white or lilac flowers, odorous in the evening, is an escape in Britain. It is wild in continental Europe and the temperate parts of Asia.

hĕs-pĕr-or'-nĭs, *s.* [Gr. ἑσπερίς (*hesperis*) = western, and ὄρνις (*ornis*) = a bird.]

Ornith.: A fossil bird, the typical one of the order Odontolcæ, sub-class Odontornithes. *Hesperornis regalis* has been described by Prof. Marsh from the Cretaceous rocks of North America. It resembles a diver, Colymbus, but has teeth in its jaw, and only rudimentary wings.

Hĕs'-pĕr-ŭs, *s.* [LUCIFER.]

hĕs'-sĕn-bĕrg-īte, *s.* [Named after F. Hessenberg, a crystallographer at Frankfort-on-the Maine; Ger. *hessenbergit.*]

Min.: A monoclinic transparent colourless or bluish mineral of adamantine lustre, found imbedded in crystals of hematite at Mount Fibia, west of the hospice of St. Gotha. (*Dana.*)

* **Hĕs'-sēnes,** *s. pl.* [ESSENES.]

Hĕs'-sĭ-an, *a.* & *s.* [Eng. *Hess(e)*; *-ian.*]

A. *As adj.:* Of or belonging to Hesse in Germany.

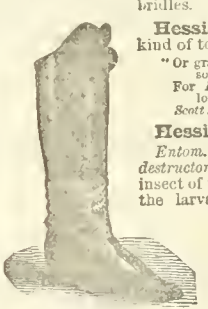
B. *As substantive:*

1. A native of Hesse.

2. A Hessian-boot.

Hessian-bit, *s.*

Saddlery: A peculiar kind of jointed bit for bridles.



HESSIAN-BOOT.

Hessian-boot, *s.* A kind of top-boot.

"Or grant the hour be all too soon
For *Hessian-boot* and pantaloon."
Scott: Bridal of Triermain, ii.

Hessian-fly, *s.*

Entom., &c.: *Cecidomyia destructor*, a small dipterous insect of the family Tipulidæ, the larva of which attacks corn crops in the United States. In 1788 a panic arose in this country regarding the danger of bringing over the fly, but it proved to be as needless as the more recent one about the Colorado beetle. (*Kirby & Spence*, &c.)

hĕss'-īte, *s.* [Named from Hess, who described it.]

Min.: An orthorhombic gray sectile mineral of metallic lustre. Hardness, 2 to 3·5; sp. gr., 8·3 to 8·6. Compos.: tellurium, 37·2; silver, 62·8 = 100. Found in the Altai Mountains in a talcose rock, also in Transylvania and Hungary. (*Dana.*)

hĕst, * **heste,** *s.* [A.S. *hæs* = a command, from *hâtan* = to command; Icel. *heit* = a vow, *heita* = to call, to promise; O. H. Ger. *heiz* (Ger. *geheiss*) = a command, from O. H. Ger. *heizan* (Ger. *heissen*) = to command; Goth. *haitan* = to command.] A command, an injunction, a precept.

"You in many a danger trne,
At Duncan's *hest* your blades that drew."
Scott: Lady of the Lake, iii. 13.

* **hĕs'-tĕr, hĕs'-tĕrn,** * **hĕs-tĕr'-nal,** *a.* [Lat. *hesternus*, from *herl* = yesterday.] Pertaining to yesterday.

"If a chronicler should misreport exploytes that were enterprised but *hestern* day."—*Holinshed.*

Hĕs'-tĭ-a, *s.* [Gr.]

1. *Greek Myth.:* The Greek equivalent of the Latin Vesta (q.v.).

2. *Astron.:* An asteroid, the forty-sixth found. It was discovered by Pogson, August 16, 1857.

* **hē'-sў-chăst,** *s.* [Gr. ἡσυχαστής (*hēsuchastēs*) = one who leads a retired life, a hermit; ἥσυχος (*hēsuchos*) = quiet, calm; ἡσυχάζω (*hēsuchazō*) = to be quiet, still, or calm.]

Church History, &c.:

1. *Gen.:* A quietist (q.v.).

2. *Spec.:* A fraternity of quietist monks, who had a monastery at Mount Athos. Their case was brought before two councils held at Constantinople in 1314 and 1351, at both of which they triumphed. Called also Omphalopsuchoi (Navel-souls), Massalians, and Euchites.

hĕt, *a.* [HOT.] (*Scotch.*)

* **hĕt (1),** * **hette (1),** *pret. of v.* [HEAT, *v.*]

* **hĕt (2),** * **hete,** * **hette (2),** *pret. of v.* [A.S. *hâtan.*] Was named. [HIGHT.]

* **hĕt'-ar-ĭşm,** * **hĕt'-air-ĭsm,** *s.* [Gr. ἑταίρα (*hetaira*) = a female companion, and ἑταιρίζω (*hetairizō*) = to be a companion.] The doctrine or theory that in primitive stages of society all the women in a tribe are held in common. [MARRIAGE, PROMISCUITY.]

"Facts of this kind are thought by several writers to imply that the primitive condition was one of unqualified *hetairism*."—*Spenser: Principles of Sociology*, § 295.

* **hĕt-ar-ĭst'-ĭc,** *a.* [HETARISM.] Of or pertaining to hetarism.

hĕtch'-ĕl, *s.* [HATCHEL.]

* **hēte (1),** *v.t.* [HEAT, *v.*]

* **hēte (2),** *v.t.* [HET (2).]

hĕt-ĕr-, *pref.* [HETERO-.]

hĕt-ĕr-ăc'-mў, *s.* [Pref. *heter-*, and Gr. ἀκμή (*akmē*) = a point, an edge.]

Bot.: A collective term applied by Mr. Britten to the phenomena of protandry and protogyny (q.v.). The development in a plant of the male before the female organs, or *vice versa*. (*Suppl. to Treas. of Bot.*)

hĕt-ĕr-ă-dĕn'-ĭc, *a.* [Pref. *heter-*; Gr. ἀδήν (*adēn*) = a gland, and Eng. suff. *-ic.*]

Anat.: A term used to describe an accidental tissue of a glandular structure, occurring in parts devoid of glands.

* **hĕt'-ĕr-arch-ў,** * **ĕt'-ĕr-arch-ў,** *s.* [Pref. *heter-*, and Gr. ἀρχή (*archē*) = rule, government.] The rule or government of an alien.

"Next to anarchy is *eterarchy*."—*Bishop Hall: Sermon; Christ & Cæsar.*

hĕt-ĕr-ō-, *pref.* [Gr. ἕτερος (*heteros*) = another, the other of two.] A prefix denoting difference, and opposed to resemblance.

hĕt-ĕr-ō-brăn-chĭ-ā'-tą, *s.* [Pref. *hetero-*; and Lat. *branchiæ* = Gr. βράγχια (*brangchia*) = gills.]

Zool.: De Blainville's name for the fourth order of his Acephalophora. He divides it into the two families of Ascidians and Salpians.

hĕt-ĕr-ō-căr'-poŭs, *a.* [Pref. *hetero-*; Gr. καρπός (*karpos*) = fruit; Eng., &c. suff. *-ous.*]

Bot.: Having fruit of two or more forms.

hĕt-ĕr-ō-çĕph'-ăl-ŏŭs, *a.* [Pref. *hetero-*, and Eng. *cephalous* (q.v.).]

Bot.: Having on the same individual plant capitula or heads wholly of male and others wholly of female flowers. The term was first used by De Candolle.

hĕt-ĕr-ō-çĕr'-ĕ-ą, *s. pl.* [Pref. *hetero-*, and Gr. κέρας (*keras*) = a horn.]

Zool.: A division or sub-order of Lepidoptera, having the antennæ variously shaped. It includes both the Hawk-moths and the Moths proper.

hĕt-ĕr-ō-çĕr'-çal, *a.* [Pref. *hetero-*; Gr. κέρκος (*kerkos*) = tail, and Eng., &c. suff. *-al.*]

Palæont. & Ichthy.: A term introduced by Agassiz to describe fishes having the two lobes of the tails unequal in size. The spinal column is prolonged through the upper lobe,

but the lower one is the larger. This pattern of tail, an antique one, was universal through nearly the whole palæozoic period, the modern or homocercal tail not appearing till the Magnesian Limestone of the Middle Permian. [HOMOCERCAL.] But the older type did not then become extinct; it has lingered on till now, existing in the sturgeon, &c.

hĕt'-ĕr-ō-çĕr-çy, *s.* [Pref. *hetero-*, and Gr. *κέρκος* (*kerkos*) = tail.]

Ichthy. & Palæont.: Inequality in the lobes of the tail. It is opposed to homocercy (q.v.).

hĕt-ĕr-ō-çĕr'-ĭ-dæ, *s. pl.* [Mod. Lat. *heterocer(us)*; Lat. fem. pl. adj. suff. *-idæ.*]

Entom.: A family of tetramerous beetles. The antennæ are short, and have eleven joints, the two basal ones large, the remainder forming an obsoletely serrated mass, the head elongated, inserted up to the eyes in the thorax, body depressed. Only the typical genus British. They inhabit the muddy banks of rivers or the sands of the ocean, in which they burrow by means of their fossorial legs.

hĕt-ĕr-ŏç'-ĕr-ŭs, *s.* [Pref. *hetero-*, and Gr. *κέρος* (*keras*) = a horn.]

Entom.: The typical genus of the family Heterocerida. At least four species are British.

hĕt-ĕr-ō-chrō'-moŭs, *a.* [Pref. *hetero-*, and Gr. *χρῶμα* (*chrōma*) = colour.]

Bot. (*Of composite plants*): Having the florets of the ray different from those of the disc.

hĕt'-ĕr-ō-clīne, *s.* [Pref. *hetero-*, and Gr. *κλίνη* (*klinē*) = a bed.]

Min.: A variety of Braunite. It is found at St. Marcel in Piedmont. Called also Marcelline (q.v.).

* **hĕt'-ĕr-ō-clĭt-al,** *a.* [Eng. *heteroclit(e)*; *-al.*] The same as HETEROCLITIC (q.v.).

hĕt'-ĕr-ō-clīte, *s.* & *a.* [Lat. *heteroclitus*, from Gr. *ἑτερόκλιτος* (*heteroklitos*) = otherwise (that is irregularly), inflected: *ἕτερος* (*heteros*) = different, other, and *κλίνω* (*klinō*) = to bend, to inflect.]

A. *As substantive:*

1. *Lit. & Gram.:* A word which deviates from the regular or ordinary forms of inflection in declension or conjugation; a word which is irregularly or anomalously inflected.

* **II.** *Figuratively:*

1. A person or thing deviating from the ordinary or common rule or forms.

"There are strange *heteroclites* in religion now-a-days."—*Howell*, bk. iv., let. 35.

2. Anything incomplete, or imperfect in any way.

"Indexes for the most part are *heteroclites*, I mean, either redundant in what is needless, or defective in what is needful."—*Fuller: Worthies; Norfolk.*

* **B.** *As adjective:*

1. *Lit. & Gram.:* Deviating from the regular or ordinary form of inflection; irregularly inflected.

"The *heteroclite* nouns of the Latin should not be touched in the first learning of the rudiments of the tongue."—*Watts.*

2. *Fig.:* Deviating from the ordinary rule or way; anomalous.

"One of those *heteroclite* animals who finds his place anywhere."—*Walpole. Anecdotes of Painting*, vol. ii., ch. iii.

* **hĕt-ĕr-ō-clĭt'-ĭc,** * **hĕt-ĕr-ō-clĭt'-ĭc-al,** *a.* [Eng. *heteroclit(e)*; *-ic*, *-ical.*] Deviating from the ordinary or common rule; anomalous.

"Sins *heteroclitical*, and such as want either name or precedent."—*Browne: Vulgar Errours* bk. viii., ch. xix.

* **hĕt-ĕr-ŏc'-lĭt-oŭs,** *a.* [Lat. *heteroclitus.*] The same as HETEROCLITIC (q.v.).

hĕt-ĕr-ō-cō'-mą, *s.* [Pref. *hetero-*, and Gr. *κόμη* (*komē*) = hair.]

Bot.: The typical genus of the sub-tribe Heterocomeæ (q.v.).

hĕt-ĕr-ō-cō'-mē-æ, *s. pl.* [Mod. Lat. *heterocom(a)*; Lat. fem. pl. adj. suff. *-eæ.*]

Bot.: A sub-tribe of composites. Tribe Vernoniaceæ.

hĕt-ĕr-ō-dăc'-tĭl, hĕt-ĕr-ō-dăc'-tўle, *a.* [Pref. *hetero-*, and Gr. *δάκτυλος* (*daktulos*) = a finger.]

Zool.: Having the toes different in number or in form on the fore and hind legs.

hĕt'-ĕr-ō-dōn, *s.* [Pref. *hetero-*, and Gr. *ὀδούς* (*odous*), genit. *ὀδόντος* (*odontos*) = a tooth.]

Zool.: A genus of colubrine snakes, found in America. When irritated they raise the head in a threatening manner, dilating the back of it and the neck, but are harmless.

hĕt'-ĕr-ō-dŏnts, *s. pl.* [HETERODON.]

Zool.: The same as DIPHYODONTS (q.v.).

hĕt'-ĕr-ō-dŏx, *a.* & *s.* [Gr. *ἕτερος* (*heteros*) = different, other, and *δόξα* (*doxa*) = an opinion.]

A. *As adjective:*

1. Contrary to received or established doctrines, principles, or standards; not orthodox; heretical.

"Partiality may be observed in some to vulgar, in others to *heterodox* tenets."—*Locke.*

2. Holding opinions or doctrines contrary to those received or established; not orthodox in opinions.

"If he was *heterodox* in doctrine, those stern judges would not fail to detect and to depose him."—*Macaulay: Hist. Eng.*, ch. xvi.

* **B.** *As subst.:* A peculiar opinion or doctrine; a doctrine at variance with that generally received or established.

"It was reasoned whether that last *heterodox* should be retained."—*Hales: Remains; Balcanqual's Lett. from Synod of Dort.*

* **hĕt'-ĕr-ō-dŏx-lў,** *adv.* [Eng. *heterodox*; *-ly.*] In a heterodox manner.

* **hĕt'-ĕr-ō-dŏx-nĕss,** *s.* [Eng. *heterodox*; *-ness.*] The quality or state of being heterodox; heterodoxy.

hĕt'-ĕr-ō-dŏx-y, * **het-er-o-dox-ie,** *s.* [Eng. *heterodox*; *-y.*] An opinion or doctrine opposed to or at variance with those established or generally received; an opinion or doctrine which is not orthodox.

"Another *heterodoxy* of his, concerning the resurrection."—*Cudworth: Intellectual System*, p. 33.

hĕt-ĕr-ŏd'-rō-moŭs, *a.* [Pref. *hetero-*, and Gr. *δρόμος* (*dromos*) = a running, a course.]

Bot.: A term applied when the spirals in the development of the stem and branches turn in opposite directions, as in the *Liquidambar Styraciflua.*

hĕt'-ĕr-œ-çĭsm, *s.* [Pref. *hetero-*, and Gr. *οἰκισμός* (*oikismos*) = peopling, colonization; *οἶκος* (*oikos*) = a house.]

Bot.: Different stages of development in species. Used specially of fungals. (*Rossiter.*)

hĕt-ĕr-ŏg'-ą-moŭs, *a.* [Pref. *hetero-*; Gr. *γάμος* (*gamos*) = marriage, and Eng. suff. *-ous.*]

Bot.: Having in a capitulum or head the florets of the ray either neuter or female, while those of the disc are male.

hĕt-ĕr-ŏg'-ą-mў, *s.* [HETEROGAMOUS.]

Bot.: The fertilization of a stigma by pollen derived from some other flower.

"These circuitous methods of fertilization may be called *heterogamy* or crooked fertilization."—*R. Brown: Botany* (1874), p. 418.

hĕt-ĕr-ō-găn-glĭ'-ā-ta, *s. pl.* [Pref. *hetero-*, and neut. pl. of Mod. Lat. *gangliatus* = having ganglia; Gr. *γάγγλιον* (*gongglion*) = a tumour near a tendon.]

Zool.: A name proposed by Prof. Owen for the sub-kingdom Mollusca, from their having the nervous system heteroganglate (q.v.). (*Owen: Invert. Animals* (1843), p. 13.)

hĕt-ĕr-ō-găn'-glĭ-āte, *a.* [HETEROGANGLIATA.]

Zool.: Having the nervous system composed of scattered and unsymmetrical ganglia. Example, the Mollusca. (*Owen: Invert. Animals* (1843), p. 268.)

* **hĕt'-ĕr-ō-gēne,** *a.* [Gr. *ἕτερος* (*heteros*) = other, different, and *γένος* (*genos*) = kind, kin.] The same as HETEROGENEOUS (q.v.).

"An old French hood
And other pieces *hetrogene* enough."
Ben Jonson: New Inn, ii. 1.

* **hĕt'-ĕr-ō-gēn'-ĕ-al,** *a.* [Eng. *heterogene* (q.v.); *-al.* The same as HETEROGENEOUS (q.v.).

"As much in *heterogeneal* parts as homogeneal."—*Digby: Of Bodies*, ch. xiv.

* **hĕt-ĕr-ō-gēn'-ĕ-al-nĕss,** *s.* [Eng. *heterogeneal*; *-ness.*] The quality or state of being heterogeneal; heterogeneity.

* **hĕt-ĕr-ō-ğĕ-nē'-ĭt-y,** *s.* [Eng. *heterogen(e)*; *-ity.*]

1. The quality or state of being heterogeneous; opposition, contrariety, or dissimilitude of nature or qualities.

"A *heterogeneity* of the component parts."—*Boyle: Works*, iii. 218.

2. An opposite, contrary, or dissimilar part.

"The same wood, distilled into a retort, does yield far other *heterogeneities*."—*Boyle.*

hĕt-ĕr-ō-ğĕ'-nĕ-oŭs, *a.* [Gr. *ἑτερογενής* (*heterogenēs*) = of another kind; pref. *hetero-*, and *γένος* (*genos*) = race.]

I. *Ord. Lang.:* Differing in kind; mixed; various.

"To select from the vast and *heterogeneous* mass such papers as immediately bear on his own researches."—*J. S. Brewer: English Studies*, p. 12.

II. *Technically:*

1. *Bot.:* Having more than one nature or substance. (*Harvey.*)

2. *Math.:* A polynomial is heterogeneous when all its terms have not the same number of literal factors: thus, $a^2 + 2bc^3 - y$ is a heterogeneous expression.

hĕ-tĕr-ō-ğĕ'-nĕ-oŭs-lў, *adv.* [Eng. *heterogeneous*; *-ly.*] In a heterogeneous manner.

"The rooms are very *heterogeneously* filled."—*Johnson: Journey to the Western Islands.*

hĕ-tĕr-ō-ğĕ'-nĕ-oŭs-nĕss, *s.* [Eng. *heterogeneous*; *-ness.*] The quality or state of being heterogeneous; heterogeneity.

"Dissimilitude of style, and *heterogeneousness* of sentiments may sufficiently show that a work does not really belong to the reputed author."—*Johnson: General Observations on Shakespeare's Plays.*

hĕ-tĕr-ō-ğĕn'-ĕ-sĭs, hĕt-ĕr-ŏğ'-ĕn-ў, *s.* [Gr. *ἕτερος* (*heteros*) = one of two, and *γένεσις* (*genesis*) = origin, birth, generation.]

† 1. What was formerly called spontaneous generation, now termed abiogenesis (q.v.).

2. Herbert Spencer's name for what Owen calls metagenesis (q.v.). [ALTERNATION OF GENERATIONS.]

3. Professor Huxley would confine the use of the term heterogenesis to that kind of generation in which the offspring is altogether and permanently unlike the parent. Professor Milne Edwards has therefore called this latter xenogenesis (q.v.). (*Brit. Assoc. Rep.* (1870), p. lxxvii.)

hĕt-ĕr-ō-ğĕ-nĕt'-ĭc, *a.* [Pref. *hetero-*, and Eng. *genetic* (q.v.).]

Biol.: Of or pertaining to heterogenesis; heterogeneous.

hĕ-tĕr-ŏğ'-ĕn-ĭst, *s.* [Eng. *heterogen* (*esis*); *-ist.*] A believer in, or defender of, Heterogenesis (q.v.).

hĕ-tĕr-ŏğ'-ĕn-ў, *s.* [HETEROGENESIS.]

hĕt-ĕr-ō-grăph'-ĭc, *a.* [Eng. *heterograph(y)*; *-ic.*] Of or pertaining to heterography (q.v.).

hĕt-ĕr-ŏğ'-rą-phў, *s.* [Gr. *ἕτερος* (*heteros*) = other, different, and *γράφω* (*graphō*) = to write.] A method of spelling in which the same letters have different powers in different words, as *g* in *go* and *gin.*

hĕt-ĕr-ŏğ'-ўn-ą, *s. pl.* [Pref. *hetero-*, and Gr. *γυνή* (*gunē*) = a woman.]

Entom.: A subtribe of Hymenoptera in which the neuters and females are wingless. The antennæ are bent, the tongue small, rounded, and vaulted, or spoonlike. It contains the Formicidæ (Ants).

hĕt-ĕr-ōĭd'-ĕ-oŭs, *a.* [Pref. *hetero-*, and Gr. *εἶδος* (*eidos*) = form.]

Bot.: Diversified in form. (*Treas. of Bot.*)

hĕt-ĕr-ŏl'-ō-ğoŭs, *a.* [Gr. *ἕτερος* (*heteros*) = other, different, and *λόγος* (*logos*) = proportion.] Consisting of different elements, or of the same elements combined in different proportions; different; the opposite to homologous (q.v.).

hĕt-ĕr-ŏm'-ĕr-ą, *s. pl.* [Pref. *hetero-*, and Gr. *μηρός* (*mēros*) = the upper part of the thigh.]

Entom.: A section of Coleoptera (Beetles), having five articulations in the first four tarsi, and four in the other two. Mr. Westwood divided them into the Trachelia, possessing a distinct neck, and the Atrachelia, in which the head is enclosed in the thorax as far forward as the eyes. Latreille, who founded this section, divided it into the subsections Melasoma, Taxicornes, Stenelytra, and Trachelides (q.v.).

hĕt-ĕr-ŏm'-ĕr-ăn, *s.* [HETEROMERA.]

Entom.: A beetle belonging to the section heteromera (q.v.).

hĕt-ĕr-ŏm'-ĕr-īte, *s.* [Pref. *hetero-*, Gr. *μέρος* (*meros*) = a part, and suff. *-ite* (*Min.*) (q.v.).]

Min.: A variety of Vesuvianite, occurring in small green prisms in the Ural Mountains.

hĕt-ĕr-ŏm'-ĕr-oŭs (1), *a.* [Mod. Lat. *heteromer(a)*; Eng. suff. *-ous.*]

Entom.: Of or belonging to the Heteromera (q.v.).

hĕt-ĕr-ŏm'-ĕr-oŭs (2), *a.* [Pref. *hetero-*, and Gr. *μερος* (*meros*) = a part.]

1. *Bot.:* For def. see compound.

2. *Chem.:* Differing completely in chemical composition.

heteromerous lichens, *s. pl.*

Bot.: Lichens in which the same filaments so ramify as to constitute two distinct layers of tissue, a comparatively thin, usually transparent, but close outer layer or cortex, and an inner, loose, hyphal layer called the medulla, enclosed by the former. Called also stratified lichens. (*Thomé.*)

hĕt-ĕr-ō-morph'-ĭc, hĕt-ĕr-ō-morph'-oŭs, *a.* [Pref. *hetero-*; Gr. *μορφή* (*morphē*) = form, and Eng. suff. *-ic*, *-ous.*]

1. *Science:* Having two or more different forms; of an irregular or unusual form.

2. *Bot.:* Presenting the phenomena of heteromorphism (q.v.).

3. *Entom.:* A term used of the larvæ of those insects (really the whole of the class) which differ more or less from the imago. (*Owen*).

hĕt-ĕr-ō-morph'-ĭsm, hĕt-ĕr-ō-morph'-y, *s.* [Pref. *hetero-*; Gr. *μορφή* (*morphē*) = form, and Eng., &c. suff. *-ism.*]

1. *Bot.:* A term used of different forms of plants which differ from each other only in the relative length of their stamens and pistils. Thus there are dimorphic and trimorphic forms of Primula. [DIMORPHISM.]

2. *Crystallog.:* Crystallization in different forms, though in the several cases there is an equal number of atoms similarly arranged.

hĕt'-ĕr-ō-morph-īte, *s.* [Pref. *hetero-*; Gr. *μορφή* (*morphē*) = form, and Eng., &c. suff. *-ite* (*Min.*) (q.v.).]

Min.: The same as JAMESONITE (q.v.).

hĕt-ĕr-ō-morph'-oŭs, *a.* [HETEROMORPHIC.]

hĕt-ĕr-ō-morph'-y, *s.* [HETEROMORPHISM.]

hĕt'-ĕr-ō-mys, *s.* [Pref. *hetero-*, and Gr. *μῦς* (*mus*) = a mouse.]

Zool.: A genus of rodents, proposed by Desmarest. It is of the family Saccomyina or Saccomyidæ. Only one species is known, *Heteromys anomalus*, the spiny-pouched rat of Trinidad.

hĕt-ĕr-ō-nē'-mĕ-æ, hĕt-ĕr-ō-nē'-mĕ-ą, *s. pl.* [Pref. *hetero-*, and Gr. *νῆμα* (*nēma*) = that which is spun, yarn, thread. So named from their more complicated germination as compared with that of the thallogens.]

Bot.: A name given by Fries to the higher cryptogamic plants, now classed as acrogens in distinction from thallogens.

hĕt-ĕr-ō-nē'-mĕ-oŭs, *a.* [Mod. Lat. *heteroneme(æ)*; Eng. suff. *-ous.*]

Bot.: Of or belonging to the Heteronemeæ. Used by Bartling specially of mosses.

hĕt-ĕr-ōn'-ȳ-moŭs, *a.* [Gr. *ἕτερος* (*heteros*) = other, different; *ὄνομα* (*onoma*) = a name, and Eng. adj. suff. *-ous.*] Having a different name.

hĕt-ĕr-ō-oŭ'-sĭ-an, *a.* & *s.* [Gr. *ἕτερος* (*heteros*) = other, different, and *οὐσια* (*ousia*) = essence.]

Theology & Church History:

A. *As adj.:* Having a different nature or essence.

B. *As subst.* (*Pl.*): An Arian sect, which held that the Son was of a different essence from the Father. [AETIANS.]

hĕt-ĕr-ō-oŭ'-sĭ-oŭs, *a.* [HETEROOUSIAN.] The same as HETEROOUSIAN, *a.*

hĕt-ĕr-ō-păp'-pō-æ, *s. pl.* [Mod. Lat. *heteropapp(us)*; Lat. fem. pl. adj. suff. *-æ.*]

Bot.: A sub-tribe of composites, tribe Asteroideæ.

hĕt-ĕr-ō-păp'-pŭs, *s.* [Pref. *hetero-*, and Gr. *παππος* (*pappos*) = down.]

Bot.: The typical genus of the sub-tribe Heteropappeæ.

hĕt-ĕr-ō-păth'-ĭc, *a.* [Gr. *heteropath(y)*; *-ic.*] The same as ALLOPATHIC (q.v.).

hĕ-tĕr-ŏp'-ą-thȳ, *s.* [Gr. *ἑτεροπαθεια* (*heteropatheia*) = suffering in another place; counter-irritation.] The opposite of homœopathy; allopathy (q.v.).

hĕt-ĕr-ŏph'-ą-gĭ, *s. pl.* [Pref. *hetero-*, and Gr. *φαγειν* (*phagein*) = to eat.]

Ornith.: A name applied to a section or subclass of birds of which the young, which leave the egg blind, without feathers, and so helpless that they require to be fed and tended by their parents for some time.

† **hĕt'-ĕr-ō-phȳl,** *s.* [HETEROPHYLLI.]

Zool.: One of the Heterophylli (q.v.).

hĕt-ĕr-ŏph'-ȳl-lī, *s. pl.* [Pref. *hetero-*, and Gr. *φύλλον* (*phullon*) = a leaf.]

Zool.: A subsection of Ammonites, one of those with the band round and convex.

hĕt-ĕr-ŏph'-ȳl-loŭs (or **hĕt-ĕr-ō-phȳl'-loŭs**), *a.* [Eng. *heterophyll(y)*; *-ous.*]

Bot.: Having leaves of different form on the same plant.

hĕt-ĕr-ŏph'-ȳl-lŭs, *s.* [HETEROPHYLL.]

hĕt-ĕr-ŏph'-ȳl-lȳ, *s.* [Pref. *hetero-*, and Gr. *φύλλον* (*phullon*) = a leaf.]

Bot.: Variation in the external form of leaves.

hĕt'-ĕr-ō-pŏd, *s.* [HETEROPODA.]

Zool.: One of the Heteropoda (q.v.).

hĕt-ĕr-ŏp'-ō-dą, *s. pl.* [Pref. *hetero-*, and Gr. *ποδά* (*poda*), pl. of *πούς* (*pous*), genit. *ποδός* (*podos*) = a foot.]

1. *Zool.:* A group of branchial gasteropoda, in which the propodium is turned into a laterally compressed fin, while the epipodia are absent—*i.e.*, in which the foot is so modified as to form a swimming organ. (*Huxley*, &c.) The Heteropoda are the same as Nucleobranchiata (q.v.) of De Blainville, and S. O. Woodward prefers the latter name. They are delicate and transparent animals, some only with shells. They swim at the surface of the sea instead of creeping at the bottom. Families Firolidæ and Atlantidæ.

2. *Paleont.:* The heteropoda came into being not later than the Lower Silurian.

hĕt-ĕr-ŏp'-ō-doŭs, *a.* [Mod. Lat. *heteropod(a)*; Eng. suff. *-ous.*]

Zool.: Of or belonging to the Heteropoda (q.v.).

hĕt-ĕr-ŏp'-tĕr, *s.* [HETEROPTERA.]

Entom.: One of the heteroptera (q.v.).

hĕt-ĕr-ŏp'-tĕr-ą, *s. pl.* [Pref. *hetero-*, and Gr. *πτερα*, pl. of *πτερόν* (*pteron*) = a wing.]

Entom.: A sub-order of Hemiptera, or Rhyncota. The anterior wings constitute hemelytra, being chitonous towards the base, and membranous towards the apex. The rostrum springs from the front of the head; the inner margins of the wing are straight or depressed; the antennæ moderate in size, with the joints few and large. Stephens makes them an order. Tribes or groups two—Hydrocorizæ (Water-bugs), and Geocorizæ (Land-bugs).

* **hĕt-ĕr-ŏp'-tĭcs,** *s. pl.* [Gr. *ἕτερος* (*heteros*) = other, different, and Eng. *optics* (q.v.).] False optics.

hĕt-ĕr-ō-rhī'-zal, *a.* [Pref. *hetero-*; Gr. *ῥίζα* (*rhiza*) = a root, and Eng., &c. suff. *-al.*]

Bot. (*Of roots*): Having the root and the stem markedly different, as in ferns, equisetaceæ, and, to a certain extent, in lycopodiaceæ.

* **hĕt-ĕr-ŏsc'-ĭ-an** (**sc** as **sh**), *a.* & *s.* [Lat. *heteroscii*, s. pl. = heteroscians, Gr. *ἑτερόσκιος* (*heteroskios*), adj., from pref. *hetero-*, and Gr. *σκιά* (*skia*) = a shadow.]

A. *As adjective:*

Astron. & Geog.: Of or belonging to two parts of the earth's surface, so situated with regard to each other that the shadows of two persons, the one in the one place and the other in the other, will fall in different directions.

B. *As substantive:*

Astron. & Geog.: Persons living in such parts of the earth as to make their shadows fall different ways. They must obviously exist, some in the northern, and others in the southern hemisphere.

hĕt-ĕr-ō'-sĭs, *s.* [Gr. *ἕτερος* (*heteros*) = an other, different.]

Rhet.: A figure of speech by which one form of an inflectional part of speech, as of a noun, verb, or pronoun, is used for another.

hĕt'-ĕr-ō-sīte, *s.* [Gr. *ἕτερος* (*heteros*) = other, different; suff. *-ite* (*Min.*) (q.v.).]

Min.: A variety of Triphylite. (*Dana.*) The *British Museum Catalogue* makes it a distinct species.

hĕt-ĕr-ŏs'-pōr-oŭs, *a.* [Pref. *hetero-*; Gr. *σπόρος* (*sporos*) = a seed, . . . a spore, and Eng. suff. *-ous.*]

Bot.: Having spores of different series. (See the compound.)

heterosporous vascular cryptogams, *s. pl.*

Bot.: A series of vascular cryptogama which produce two kinds of spores, macrospores, or larger, and microspores, or smaller spores. They are Filices (Ferns), Equisetaceæ, Ophioglossaceæ, Rhizocarpeæ, and Lycopodiaceæ. (*Thomé.*)

† **hĕt'-ĕr-ō-strō-phē,** *s.* [Pref. *hetero-*, and Gr. *στροφή* (*strophē*) = a turning.]

Zool.: The reversal of the direction in which the spire of a shell turns. [SINISTRAL.]

hĕt'-ĕr-ō-stȳled, *a.* [Pref. *hetero-*, and Eng. *styled.*] [STYLE (*Bot.*).]

Bot.: Exhibiting the phenomenon of heterostylism (q.v.). (*Darwin.*)

hĕt-ĕr-ō-stȳl'-ĭsm, *s.* [Pref. *hetero-*; Gr. *στῦλος* (*stulos*) = a pillar, (Mod. Bot.) a style, and Eng., &c. suff. *-ism.*]

Bot.: A term used when different flowers of the same species have stamens and styles (here used for pistils) of different lengths. Examples, *Linum perenne* and *Pulmonaria officinalis*, plants of which there are two forms, the long styled and the short styled. [DIMORPHISM.]

hĕt'-ĕr-ō-tăx-ȳ, *s.* [Pref. *hetero-*, and Gr. *ταξις* (*taxis*) = arrangement.]

Bot.: Deviation of organs from their ordinary arrangement or position.

hĕt-ĕr-ō-thą-lăm'-ĕ-æ, *s. pl.* [Mod. Lat. *heterothalam(us)*; Lat. fem. pl. adj. suff. *-æ.*]

Bot.: A sub-tribe of composites, tribe Asteroideæ.

hĕt-ĕr-ō-thăl'-ą-mŭs, *s.* [Pref. *hetero-*, and Gr. *θάλαμος* (*thalamos*) = an inner chamber.]

Bot.: The typical genus of the sub-tribe Heterothalameæ.

hĕt-ĕr-ō-thē'-cą, *s.* [Pref. *hetero-*, and Lat. *theca* = Gr. *θήκη* (*thēkē*) = a hull, a covering, an envelope.]

Bot.: The typical genus of the sub-tribe Heterotheceæ (q.v.).

hĕt-ĕr-ō-thē'-çē-æ, *s. pl.* [Mod. Lat. *heterothec(a)*; Lat. fem. pl. adj. suff. *-æ.*]

Bot.: A sub-tribe of composites, tribe Asteroideæ.

hĕt-ĕr-ŏt'-ō-moŭs, *a.* [Pref. *hetero-*; Gr. *τομή* (*tomē*) = a cutting, and Eng. suff. *-ous.*]

Min.: Having a different cleavage from that normal to the species.

hĕt-ĕr-ŏt'-rō-pal, hĕt-ĕr-ŏt'-rō-poŭs, *a.* [Pref. *hetero-*, and Gr. *τροπή* (*tropē*) = a turn, a turning.]

Bot. (*Of an embryo*): Lying parallel with the hilum, having the radicle pointing neither to the apex nor to the base of the seed, but lying across it.

* **hĕt-ĕr-ōu'-sĭ-an,** *a.* & *s.* [HETEROOUSIAN.]

* **hĕt-ĕr-ōu'-sĭ-oŭs,** *a.* [HETEROOUSIOUS.]

* **hē'-ṭhen-ĕsse,** *s.* [HEATHENNESS.]

***heth-ing,** *s.* [A.S.] Shame, mockery, contempt.

"Now are we driven til *hething* and til scorne."
Chaucer: C. T., 4,108.

nĕt'-man, *s.* [Pol.; cf. Ger. *hauptman* = headman.] The title of the head or General of the Cossacks. It was abolished amongst the Cossacks of the Ukraine by Catherine of Russia, but still survives among the Cossacks of the Don. The title of Chief Hetman is now held by the heir-apparent to the throne of Russia.

"The Ukraine's *Hetman*, calm and bold."
Byron: Mazeppa, iii.

heuch'-ĕr-a (eu as **ōĭ),** *s.* [Named after John Henry de Heucher, Professor of Medicine at Wittenberg, and a botanical author.]

Bot.: A genus of Saxifragaceæ. *Heuchera americana* is the alum-root of America; it is powerfully astringent.

heŭgh (*gh* guttural), *s.* [Etym. doubtful; probably connected with *high.*]

1. A precipice; a steep, perpendicular rock.

"From the top of a *heugh* or broken bank [he] enjoyed the scene."—*Scott: Guy Mannering*, ch. xxvi.

2. A coal-mine; a pit.

heŭk (1), *s.* [Hook, *s.*]

***heŭk** (2), *s.* [Wel. *hug* = a coat.] An outer garment or mantle worn by women in the fourteenth century, and afterwards adopted by men. (*Fairholt.*)

HEUK.

heŭ'-lan-dīte, *s.* [Named after H. Heuland, an English mineralogist.]

Min.: A monoclinic, transparent or translucent brittle mineral, of pearly lustre, and white, red, gray, or brown colour; its hardness, 3·5 to 4; sp. gr. 2·2. Compos.: silica, 58·20 to 59·64; alumina, 15·14 to 17·92; lime, 5·88 to 7·65; soda, 0 to 1·16; potassa, 0 to 2·35; water, 14·33 to 17·48. Occurs chiefly in amygdaloid, though occasionally on gneiss, &c. Found in Scotland, in the Isle of Skye; in the Kilpatrick Hills, and at Campsie; in India in the Vindhya Hills; in Nova Scotia, &c. (*Dana.*)

heurt, *s.* [Hurt.]

***hēve,** *v.t.* & *i.* [Heave.]

hē'-vē-a, *s.* [From *hevé*, the native name of these trees in the northern parts of South America.]

Bot.: A genus of Euphorbiaceæ, tribe Crotoneæ. It is sometimes made a synonym of Siphonia. The species furnish the Para Rubber, the best kind of caoutchouc.

***hev-ed,** *s.* [Head.]

***heven,** *s.* [Heaven.]

hew (ew as **ū), *hewe, *hew-en,** *v.t.* [A.S. *hēawan*; cogn. with Dut. *houwen*; Dan. *hugge*; Sw. *hugga*; Icel. *höggva*; Ger. *hauen*; O. H. Ger. *houwan*; Russ. *kovate*; Lat. *cudo* = to strike, to pound.]

I. *Literally:*

1. To cut by blows with an edged instrument; to cut or fell with an axe.

"Well coude he *hewen* wood and water bere."
Chaucer: C. T., 1,424.

2. To form or shape with an axe or similar instrument.

"Solomon tolde out foure score thousand men to *hewe* stones in the mountains."—*Geneva Bible* (1561), *2 Chron.* ii. 2.

3. To form or shape by labour or continued effort.

"This river . . . has a long valley that seems *hewn* out on purpose to give its waters a passage."—*Addison: Italy.*

4. To cut in pieces; to hack; to chop

"Him in a hundred parts Astolpho *hewn*."
Hoole: Orlando Furioso, xv.

***II.** *Figuratively:*

1. To cut down; to destroy.

"*Hew'd* down, with an unsuspected sword,
Fame, peace, and hope—and all the better life.
Byron: On Hearing Lady Byron Was Ill.

2. To cut by force of arms; to force.

"Look around while I securely go,
And *hew* a passage through the sleeping foe."
Dryden: Virgil: Æneid ix. 433.

3. To form by labour.

"Nor is it so proper to *hew* out religious reformations by the sword."—*King Charles: Eikon Basilike.*

***hew (ew** as **ū)** (1), *s.* [Hew, *v.*] Destruction by hewing or cutting down; a hacking.

"Of whom he makes such hauocke and such *hew*."
Spenser: F. Q., VI. viii. 49.

hew-hole, *s.* A popular name for the Green Woodpecker, *Picus viridis.*

***hew (ew** as **ū)** (2), *s.* [Hue.]

1. Hue; colour.

2. Shape, appearance.

"Whose semblance she did carrie under feigned *hew*."
Spenser: F. Q., I. i. 46.

hew'-ĕr (ew as **ū),** *s.* [Eng. *hew*, v.; *-er.*] One who hews.

"And Joshua made them that day *hewers* of wood and drawers of water for the congregation, and for the altar of the Lord."—*Joshua* ix. 27.

hewn (ew as **ū),** *pa. par.* or *a.* [Hew, *v.*]

hĕx-ą-căp'-sŭ-lăr, *a.* [Gr. ἕξ (*hex*) = six, and Eng. *capsular* (q.v.).]

Bot.: Having six capsules.

hĕx'-ą-chord, *s.* [Gr. ἕξ (*hex*) = six, and χόρδη (*chordē*) = a chord.]

Mus.: An interval of four tones and a semitone; a scale of six notes.

hĕx-ą-cŏ-rŏl'-la, *s.* [Gr. ἕξ (*hex*) = six, and Lat., &c. *corolla* (q.v.). So named because in most cases the septa are arranged in six systems.]

Zool.: A name for the *Zoantharia Sclerodermata* (q.v.), containing the reef-bearing and other corals.

hĕx-ăc-tĭ-nĕl'-la, *s.* [Gr. ἕξ (*hex*) = six, and dimin. of Gr. ἀκτίς (*aktis*), genit. ἀκτίνος (*aktinos*) = a ray.]

Zool.: The typical genus of the family Hexactinellidæ (q.v.).

hĕx-ăc-tĭ-nĕl'-lĭd, *a.* & *s.* [Hexactinella.]

A. *As adj.:* Having six rigid spicules; of or belonging to the Hexactinellidæ, or any species of the family.

"At the present day we find an abundance of *hexactinellid* sponges."—*Nicholson: Palæont.*, i. 147.

B. *As subst.:* A sponge of the family Hexactinellidæ (q.v.).

"In the Cretaceous deposits, and especially in the Chalk itself, the *Hexactinellids* are very largely and abundantly represented."—*Nicholson: Palæont.*, i. 146.

hĕx-ăc-tĭ-nĕl'-lĭ-dæ, *s. pl.* [Mod. Lat. *hexactinell(a)*; Lat. fem. pl. adj. suff. *-idæ.*]

1. *Zool.:* A family of siliceous sponges in which the skeleton is composed of six rayed spicules, generally large and, as a rule, becoming ultimately soldered together. The rays of the spicules are nearly always at right angles to each other. The species are found at great depths in the ocean.

2. *Palæont.:* The family began as early as the Silurian times. They abound in the Upper Jurassic and in the Cretaceous rocks, but are rarer in other formations. Where hexactinellid fossils are found, they probably indicate that the stratum enclosing them was deposited in the depths of the ocean [1].

hĕx-a-dăc'-tŷl-oŭs, *a.* [Gr. ἑξαδάκτυλος (*hexadaktulos*), from ἕξ (*hex*) = six, and δακτυλος (*daktulos*) = a finger, a toe.] Having six fingers or toes.

hĕx'-ăde, *s.* [Gr. ἑξάς (*hexas*), genit. ἑξάδος (*hexados*), from ἕξ (*hex*) = six.] A series of six numbers.

hĕx'-ădș, *s. pl.* [Gr. ἕξ (*hex*) = six; pl. suff. *-ads* (*Chem.*).]

Chem.: Hexatomic elements equivalent to six atoms of hydrogen.

hĕx'-ą-gŏn, *s.* [Lat. *hexagonum*, from Gr. ἑξάγωνος (*hexagōnos*) = six-cornered, from ἕξ (*hex*) = six, and γωνία (*gōnia*) = an angle, a corner, from γόνυ (*gonu*) = a knee; Fr. *hexagone.*]

Geom.: A figure having six sides or angles; a regular hexagon is one in which all the sides and angles are equal.

"Bees make their cells regular *hexagons*."—*Reid: On the Active Powers*, ess. iii., ch. ii.

hĕx-ăg'-ŏn-ăl, *a.* [Eng. *hexagon*; *-al.*] Of the form of a hexagon; having six sides or angles.

"With what prodigious geometrical subtility do these little animals work their deep *hexagonal* cells."—*Derham: Physico-Theology*, bk. iv., ch. xiii.

hexagonal-system, *s.*

Crystall. & Min.: One of the six great systems of crystallization. It agrees with the tetragonal system in having only the lateral axes equal, but differs in having three equal lateral axes instead of two. The vertical is at right angles to the lateral one. The symmetry of the crystals is by sixes and twelves. The cleavage of biotite, apatite, tourmaline, calc spar, nepheline, and, when it can be effected, quartz, is on the hexagonal system. (*Dana & Rutley.*)

hĕx-ăg'-ŏn-ăl-lў, *adv.* [Eng. *hexagonol*; *-ly.*] In the form of a hexagon; like a hexagon.

hĕx-ą-gŏn-ĭ-ĕn'-chў-mą, *s.* [Gr. ἑξάγωνος (*hexagōnos*) = six-cornered, and ἔνχυμα (*enchuma*) = an infusion; χεῦμα (*cheuma*) = tissue.]

Bot.: The name given to cellular tissue which exhibits hexagonal forms or sections.

hĕx-ăg'-ŏn-ў, *s.* [Eng. *hexagon*; *-y.*] A figure of six sides; a hexagon.

"I read in St. Ambrose of *hexagonies*, or sexangular cellars of bees."—*Bramhall: Against Hobbes.*

† hĕx'-ą-gўn, *s.* [Hexagynia.]

Bot.: One of the Hexagynia.

hĕx-ą-gўn'-ĭ-ą, *s.* [Gr. ἕξ (*hex*) = six, and γυνή (*gunē*) = . . . that which is feminine, a pistil.]

Bot.: In Linnæus's artificial classification, plants having six styles. He made this character of ordinal value.

hĕx-ą-gўn'-ĭ-ąn, hĕx-ăg'-ўn-oŭs, *a.* [Eng., &c. *hexagyn*; *-ian, -ous.*]

Bot.: Having six styles.

hĕx-ą-hē'-drąl, *a.* [Gr. ἕξ (*hex*) = six, and ἕδρα (*hedra*) = a seat, a base.] Of the figure or form of a hexahedron; cubic.

hĕx-ą-hē'-drŏn, *s.* [Hexahedral.] A regular solid body having six sides; a cube.

hĕx-ą-hĕm'-ĕr-ŏn, *s.* [Gr. ἕξ (*hex*) = six, and ἡμέρα (*hēmera*) = a day.]

1. A term of six days.

2. A history of the six days' work of creation, as given in the book of Genesis.

hĕx-ą-lĕ-pĭd'-ĕ-oŭs, *a.* [Gr. ἕξ (*hex*) = six; λεπίς (*lepis*), genit. λεπίδος (*lepidos*) = a scale, and Eng. suff. *-ous.*]

Bot.: Having six scales.

hĕx-ăm'-ĕr-ąl, hĕx-ăm'-ĕr-oŭs, *a.* [Gr. ἕξ (*hex*) = six; μέρος (*meros*) = a part, and Eng. suff. *-al, -ous.*]

Zool., Palæont., &c.: Consisting of six parts.

"An *hexameral* arrangement of the septa can be usually more or less clearly demonstrated."—*Nicholson: Palæont.*, i. 182.

hĕx-ăm'-ĕ-tĕr, *s.* & *a.* [Lat. *hexameter*, *hexametrus*, from Gr. ἑξάμετρος (*hexametros*) = (a) of six metres or feet, (s.) an hexameter, from ἕξ (*hex*) = six, and μέτρον (*metron*) = a metre or measure.]

A. *As subst.:* The heroic verse of the Greeks and Romans. As its name implies, it consists of six feet, properly dactyls, the last of which is shortened by one syllable, and so becomes a trochee (— ∪), or, as the final syllable is long by position, a spondee (— —). The following examples show the correct form of the hexameter in Greek and Latin:—

αὐτὶς ἔπειτα πέδονδε κυλίνδετο λᾶας ἀναιδὴς.
Homer: Odyssey xi. 598.

Quădrŭpĕdāntĕ pŭtrĕm sŏnĭtū quătĭt ūngŭlă cāmpūm. *Virgil: Æneid* viii. 596.

It was not usual, however, to observe this form strictly, and the first four feet were indifferently dactyls or spondees, the former being used to produce the idea of rapid, the latter of slow and laborious movement.

Īllĭ ĭn|tĕr sē|sē māgnā vī brāchĭă tōllūnt.
Virgil: Georgic iv. 174.

The fifth foot should always be a dactyl; sometimes, though rarely, it is replaced by a spondee, in which case the fourth foot must be a dactyl. Such a verse is called a spondaic

hexameter. Very rarely indeed do we find such a line as

Aūt lēvēs ŏcrĕās lēntō dūcūnt ārgēntō.
Virgil: Æneid vii. 634.

In English hexameters, accent takes the place of quantity.

B. *As adj.:* Having six metrical feet.

"Songs or ditties to be sung unto stringed instruments were composed in old time of *hexameter* verses."—*T. Holland: Plutarch*, p. 1,018.

hĕx-ăm'-ĕ-trăl, *a.* [Eng. *hexameter; -al.*] The same as HEXAMETRIC (q.v.).

hĕx-ą-mĕt'-rĭc, hĕx-ą-mĕt'-rĭc-ăl, *a.* [Eng. *hexameter; -ic; -al.*] Consisting of or containing six metrical feet.

hĕx-ăm'-ĕ-trĭst, *s.* [Eng. *hexameter; -ist.*] One who writes in hexameters; one who composes hexameter verses.

† hĕx-ăn'-dĕr, *s.* [HEXANDRIA.]

Bot.: One of the class Hexandria (q.v.).

hĕx-ăn'-drĭ-ą, *s.* [Gr. ἕξ (*hex*) = six, and ἀνήρ (*anēr*), genit. ἀνδρός (*andros*) = . . . that which is male; (Mod. Bot.) = a stamen.]

Bot.: The sixth class of Linnæus's artificial system. It contains plants having six stamens. He divided it into four orders: Monogynia, Digynia, Trigynia, and Polygynia.

hĕx-ăn'-drĭ-ăn, hĕx-ăn'-droŭs, *a.* [Mod. Lat. *hexandri(a)*; Eng. suff. *-ian, -ous.*]

Bot.: Having six stamens.

hĕx-ăn'-droŭs, *a.* [HEXANDRIAN.]

hĕx'-ane, *s.* [Gr. ἕξ (*hex*) = six; suff *-ane* (*Chem.*) (q.v.).]

Chem.: C_6H_{14}. Five isomeric hydrocarbons can exist. (1) Normal hexane. Dipropyl, $CH_3{\cdot}CH_2{\cdot}CH_2{\cdot}CH_2{\cdot}CH_2\,CH_3$. It occurs in the light oils obtained by the distillation of cannel coal, also in petroleum. It can be obtained by the action of sodium and normal propyl iodide, C_3H_7I, or by the action of zinc and hydrochloric acid on secondary hexyl iodide (from mannite), and by distilling suberic acid with baryta, $C_8H_{14}O_4 + 2BaO = 2BaCO_3 + C_6H_{14}$. It boils at 71°. (2) Propyl dimethyl methane, or propyl isopropyl, ethyl isobutyl, $CH_3{\cdot}CH_2{\cdot}CH_2{\cdot}CH{<}^{CH_3}_{CH_3}$. Obtained by the action of sodium on a mixture of ethyl iodide and isobutyl iodide. It boils at 62°. (3) Diisopropyl, $^{CH_3}_{CH_3}{>}CH{\cdot}CH{<}^{CH_3}_{CH_3}$. Obtained by the action of sodium on isopropyl iodide. It boils at 58°. (4) Trimethyl ethyl methane, $^{CH_3}_{CH_3}{>}C{<}^{CH_2CH_3}_{CH_3}$. Obtained by the action of zinc methyl on tertiary butyl iodide. It boils at 45°. (5) Methyl diethyl methane, $CH_3CH{<}^{CH_2{\cdot}CH_3}_{CH_2{\cdot}CH_3}$. Not yet obtained.

hĕx-ăn'-gu-lăr, *a.* [Gr. ἕξ (*hex*) = six, and Eng. *angular* (q.v.).] Having six angles or corners.

"The base was *hexangular*."—*Pennant: Tour*, p. 217.

hĕx-ą-part'-īte, *a.* [Gr. ἕξ (*hex*) = six, and Lat. *partitus* = divided; *partior* = to divide.]

Arch.: A term applied to a vault divided by its arching into six parts.

hĕx-ą-pĕt'-ą-lōĭd, *a.* [Gr. ἕξ (*hex*) = six; πέταλον (*petalon*) = a petal, and εἶδος (*eidos*) = form,]

Bot.: Having six coloured parts like petals. (*Cooke.*)

hĕx-ą-pĕt'-ą-loŭs, *a.* [Gr. ἕξ (*hex*) = six; πέταλον (*petalon*) = a petal, and Eng. suff. *-ous.*]

Bot.: Having six petals.

hĕx-ăph'-ŷl-loŭs, hĕx-ą-phŷl'-loŭs, *a.* [Pref. *hex-*; Gr. φύλλον (*phullon*) = a leaf, and Eng. suff. *-ous.*]

Bot.: Having six leaves.

hĕx'-ą-plą, *s.* [Gr. ἑξαπλοῦς (*hexaplous*), ἑξαπλόος (*hexaploos*) = six-fold: ἕξ (*hex*) = six, and πλέκω (*plekō*) = a fold.] An edition of the Scriptures having six versions in parallel columns. Used specially of Origen's Hexapla. Though nominally having but six columns, in places there were nine—viz. (1) The Hebrew text in the Hebrew characters, (2) the same text in Greek characters, (3) Aquila's version, (4) That of Symmachus, (5) The Septuagint, (6) the version of Theodotion, (7), (8), and (9), three other Greek versions of unknown authorship. Origen had also a tetrapla (q.v.).

hĕx'-ą-plăr, *a.* [HEXAPLA.] Containing six columns; sextuple.

hĕx'-ą-pōd, † **hĕx'-ą-pōde,** *a.* & *s.* [Gr. ἕξ (*hex*) = six, and πούς (*pous*), ποδός (*podos*) = a foot.]

A. *As adj.:* Having six legs. (Used of insects.)

B. *As subst.:* A typical insect. If the Myriapoda are excluded from the insect class, then all the latter are hexapods.

"I take those to have been the *hexapods*, from which the greater sort of beetles come."—*Ray: On the Creation*, pt. ii.

hĕx-ą-prŏt'-ô-dŏn, *s.* [Gr. ἕξ (*hex*) = six; πρῶτος (*protos*) = first, and ὀδούς (*odous*), genit. ὀδόντος (*odontos*) = a tooth.]

Paleont.: A subgenus of Hippopotamus, or a genus of Hippopotamidæ, from the Upper Miocene of the Siwalik Hills in India. It is the earliest known form of the family, and differs from the typical species of hippopotamus by having six lower incisors in place of four.

hĕx-ăp'-tĕr-ŏŭs, *a.* [Gr. ἕξ (*hex*) = six, and Eng. *apterous* (q.v.).]

Bot.: Having six wing-like expansions.

hĕx-ą-pŷ-rēn'-ŏŭs, *a.* [Gr. ἕξ (*hex*) = six; πυρήν (*purēn*), genit. πυρῆνος (*purēnos*) = the stone of a fruit, and Eng. suff. *-ous.*]

Bot.: Having six stones.

hĕx'-ą-stĭch, * **hĕx'-a-stĭe,** *s.* [Gr. ἑξάστιχος (*hexastichos*), from ἕξ (*hex*) = six, and στίχος (*stichos*) = a row, a line.] A poem consisting of six lines or verses.

"That famous *hexastic* which Sannazzaro made of this great city."—*Howell: Letters*, bk. i., let. 36, § 1.

hĕx'-ą-stўl-ăr, *a.* [Eng. *hexastyl(e); -ar.*]

Arch.: Having six columns in front.

hĕx'-ą-stўle, *s.* [Gr. ἑξάστυλος (*hexastulos*), from ἕξ (*hex*) = six, and στύλος (*stulos*) = a pillar, a column.]

Arch.: A portico or temple having six columns in front.

hĕx-ą-thў-rĭd'-ĭ-ŭm, *s.* [Gr. ἕξ (*hex*) = six, and Latinized dimin. from Gr. ἄθυρος (*athuros*) = without doors, open, unchecked.]

Zool.: A genus of Scolecida, order Trematoda. *Hexathyridium venarum*, called also *Polystoma sanguicola*, has been found in the venous blood.

hĕx-ą-tŏm'-ĭe, *a.* [Gr. ἕξ (*hex*) = six, and Eng. *atomic.*] Coosisting of six atoms.

hexatomic-alcohol, *s.*

Chem.: An alcohol derived from a hydrocarbon by the replacement of six atoms of hydrogen respectively by the monad radical (OH) hydroxyl, as mannite, $C_6H_8(OH)_6$.

hĕx'-ēne, *s.* [Gr. ἕξ (*hex*) = six; suff. *-ene* (*Chem.*) (q.v.).]

Chem.: C_6H_{12}, hexylene. Hydrocarbons of the olefine series, containing six carbon atoms. Hydrocarbons having this formula can be obtained by the action of alcoholic potash on hexyl chloride. Also by action of alcoholic potash on dimethyl-isopropyl carbimyl iodide. It boils at 73°. (*Watts: Dict. Chem.*)

hĕx-ĭ-cŏl'-ô-ġў, *s.* [Gr. ἕξις (*hexis*) = a state or habit of body, and λογος (*logos*) = a discourse.] (See extract.)

"Every animal and plant . . . has certain definite relations to space and time. . . . But every living creature has also relations with other living creatures, which may tend to destroy it or indirectly to aid it, and the various physical forces and conditions exercise their several influences upon it. The study of all these complex relations to time, space, physical forces, other organisms, and to surrounding conditions generally, constitutes the science of *hexicology*."—*St. George Mivart: The Cat*, ch. i., § 12.

hĕx'-īne, *s.* [Gr. ἕξ (*hex*) = six; suff. *-ine* (*Chem.*) (q.v.).]

Chem.: Two hydrocarbons are known, having the formula, C_6H_{10}. (1) Hexoylene, $CH_3 - (CH_2)_2C{\equiv}CH$. By the abstraction of HBr from monobromhexene, it boils at 78°. (2) Diethyl, $H_2C{=}CH{\cdot}CH_2 - CH_2{\cdot}CH = CH_2$. Obtained by the action of sodium or silver on ethyl iodide. It is a volatile liquid, boiling at 59°.

* **hĕx-ŏc-tą-hē'-drŏn,** *s.* [Gr. ἕξ (*hex*) = six, and Eng. *octahedron* (q.v.).] A polyhedron contained under forty-eight equal triangular faces.

hĕx-ō'-ĭc, *a.* [Gr. ἕξ (*hex*) = six, o connective, and suff. *-ic* (*Chem.*) (q.v.).]

Chem.: $C_5H_{11}{\cdot}CO{\cdot}OH$. Fatty acids of the acetic series, containing six carbon atoms. Eight of these acids are possible. (1) The normal hexoic acid is caproic acid (q.v.). It boils at 205°. (2) Isocaproic acid, isopentylformic acid, $CH(CH_3)_2{\cdot}CH_2{\cdot}CH_2{\cdot}COOH$, is prepared by the action of caustic potash on isopentyl (amyl) cyanide. It boils at 199°. (3) Methyl-isopropyl acetic acid, $^{CH_3}_{CH(CH_3)_2}{>}CH{\cdot}CO{\cdot}OH$, an oily liquid. (4) Diethyl acetic acid, $^{C_2H_5}_{C_2H_5}{>}CH{\cdot}COOH$. Obtained by the action of sodium and ethyl iodide on methyl acetate. (5) Dimethyl-ethyl acetic acid, $^{CH_3}_{CH_3}{>}C{-}COOH$. Obtained from tertiary butyl cyanide. It boils at 187°.

* **hēxt, * hecst, * hekst, * hexte,** *a.* [A.S. *hehst*, from *heah* = high; cf. *next*, from *nigh.*] [HIGH.] Highest.

"And *hexte* men of mony londes aboute hym vaste drou." *Robert of Gloucester*, p. 80.

hĕx'-ŷl, *s.* [Gr. ἕξ (*hex*) = six, and ὕλη (*hulē*) = matter.]

Chem.: A name given to a monad hydrocarbon of the fatty series, containing six atoms of carbon (C_6H_{13}).

hexyl-alcohols, *s. pl.*

Chem.: Monatomic alcohols having the formula C_6H_{13} (OH). Seventeen alcohols can exist, eight primary, six secondary, and three tertiary. Normal hexyl-alcohol, $(CH_3{\cdot}(CH_2)_4{\cdot}CH_2{\cdot}OH$. It is obtained from the essential oil of *Heracleum giganteum*, where it exists as hexyl-butyrate, along with octyl-acetate; the oil is saponified by alcoholic potash, and then fractionally distilled. The hexyl-alcohol boils at 157°. By oxidation it yields caproic acid. A secondary alcohol, methyl butyl carbinol, $HO{\cdot}HC{<}^{C_4H_9}_{CH_3}$ is obtained by the action of silver-oxide and secondary hexyl-iodide. It boils at 137°. By oxidation it yields acetic, carbonic, and normal butyric acids. For the preparation and properties of the other alcohols, conault *Watts: Dict. Chem.*

hexyl-iodide, *s.*

Chem.: $C_6H_{13}I$, a secondary hexyl-iodide, is obtained by treating mannite with strong hydriodic acid. $C_6H_{14}O_6 + 11HI = 5I_2 + 6H_2O + C_6H_{13}I$. It boils at 167°.

hĕx'-ŷ-lēne, *s.* [Eng., &c. *hexyl; -ene* (*Chem.*) (q.v.).] [HEXENE.]

hey, *interj.* [Onomatopoetic; cf. Ger. *hei*; Dut. *hei.*] An exclamation of joy, surprise, or mutual exhortation.

* **hey,** *s.* [HAY (2).]

hey'-dāy, * **hey'-dā,** *interj.* [Ger. *heida* = ho! hallo; Dut. *hei daar* = ho there!] An exclamation of cheerfulness or sometimes of wonder.

"*Hey-da!* what Hans Flutterkin is this?"—*Ben Jonson: Masque of Augurs.*

* **hey'-dāy,** *s.* [For *high-day*; from Mid. Eng. *hey* = high, and *day.*] A frolicsome wildness.

"The *heyday* in the blood is tame, it's humble."
Shakesp.: Hamlet, iii. 4.

* **hey'-dĕ-guĭes,** * **hey'-dĕ-guўes,** *s.* [Prob. from *heyday*, s., and *guise.*] A kind of frolicsome dance.

"Lightfoote Nymphs can chase the lingring night,
With *heydegues*, and trimly trodden traces."
Spenser: Shepheards Calender: June.

* **hī-ā'-tion,** *s.* [Lat. *hio* = to gape.] The act of gaping.

"The continued *hiation* or holding open its mouth."
—*Browne: Vulgar Errours*, bk. iii., ch. xxi.

hī-ā'-tŭs, *s.* [Lat. = a gap, a chasm.]

I. *Ordinary Language:*

1. *Lit.:* A gap; an aperture; a gaping breach.

"Those *hiatuses* are at the bottom of the sea."—*Woodward.*

2. *Fig.:* A gap or space from which something is wanting; a lacuna in a manuscript where one or more words are wanting.

"I shall endeavour to fill this *hiatus* by producing an almost entire chronologic series of paintings."—*Walpole: Anecdotes of Painting*, vol. i., ch. iii.

II. *Technically:*

1. *Anat.:* An opening, a foramen; as *hiatus aorticus* = the foramen of the aorta.

2. *Gram. & Pros.:* The coming together of two vowels in successive syllables or words.

***hī-bĕrn'-ą-cle, *hȳ-bĕrn'-ą-cle, hī-bĕr-năc'-ų-lŭm, *hȳ-bĕr-năc'-ų-lŭm,** *s.* [Lat. *hibernacula* = winter quarters, from *hibernus* = pertaining to winter.]

I. *Ord. Lang.:* Anything which serves as a shelter, protection, or retreat in winter; winter quarters.

II. *Technically:*

1. *Bot.:* A poetical name for a bud or bulb sheltering the future plant.

2. *Zool.* (*Chiefly of the form* hibernaculum): The winter quarters of an animal.

***hī-bĕrn'-ąl, *hȳ-bĕrn'-ąl,** *a.* [Lat. *hibernalis* = pertaining to winter; *hiems* = winter.] Pertaining or relating to winter.

"Conjoined with the sun in its *hibernal* conversion." —*Browne: Vulgar Errours*, bk. iv., ch. xiii.

hī-bĕrn'-āte, *v. i.* [Lat. *hibernatum*, sup. of *hiberno* = to winter; *hibernus* = pertaining to winter.] To pass the season of winter in close, protected, or secluded quarters, as birds and beasts; to winter.

hī-bĕr-nā'-tion, *hȳ-bĕr-nā'-tion, *s.* [HIBERNATE.]

I. *Ord. Lang.:* The act or state of hibernating.

"Plants that were to pass their *hybernation* in the green-house."—*Evelyn: Kalendarium Hortense; A New Conservatory.*

2. *Zool. & Entom.:* Many animals hybernate. In the case of insects it is naturally but erroneously assumed that they pass the winter only in a chrysalis state. Some species of Lepidoptera do so in the egg, others in the caterpillar, others in the chrysalis state. (*E. Newman: British Butterflies.*)

Hī-bĕrn'-ĭ-an, *a. & s.* [Lat. *Hibernia, Iverna, Inverna*, from Gr. Ἰέρνη (*Iernē*), from Irish *Eire* = Ireland, Erin.] [AYRAN.]

A. *As adj.:* Of or pertaining to Hibernia or Ireland; Irish.

B. *As subst.:* A native or inhabitant of Ireland.

hī-bĕrn'-ĭ-an-ĭşm, *s.* [Eng. *hibernian; -ism.*] A phrase, idiom, or mode of speech peculiar to the Irish.

hī-bĕrn-ĭ-çī-ā'-tion, hī-bĕrn-ĭ-çĭ-zā'-tion, *s.* [Eng. *hibernicis(e); -ation.*] The act of using the language or idioms of the Irish language.

hī-bĕrn'-ĭ-çīse, hī-bĕrn'-ĭ-çīze, *v. t.* [Lat. *Hiberni(a)* = Ireland; *c* connective; Eng. suff. *-ise, -ize.*] To render into the idiom or language of the Irish.

hī-bĕrn'-ĭ-çĭşm, *s.* [Lat. *Hiberni(a)* = Ireland; *c* connective; Eng. suff. *-ism.*] A phrase or mode of speech peculiar to the Irish; hibernianism.

***hī-bĕrn-ĭ-zā'-tion, *hȳ-bĕrn-ĭ-zā'-tion,** *s.* [Eng. *hiberniz(e); -ation.*] The act or habit of hibernating; hibernation.

***hī'-bĕrn-īze, *hȳ'-bĕrn-īze,** *v. i.* [Lat. *hiberu(us)* = pertaining to winter; Eng. suff. *-ize.*] To hibernate (q.v.).

Hī-bĕrn-ō-, *pref.* [Lat. *Hibernia* = Ireland.] Pertaining to or connected with Ireland.

Hiberno-Celt, *s.* An Irish Celt.

Hiberno-Celtic, *a. & s.*

A. *As adj.:* Pertaining to the Irish Celts.

B. *As subst.:* The branch of the Celtic language spoken by the Irish; the Irish language.

hĭ-bĭs'-çĕ-æ, *s. pl.* [Lat. *hibisc(us)*; fem. pl. adj. suff. *-ea.*]

Bot.: A tribe of Malvaceæ.

hĭ-bĭs'-cŭs, *s.* [Lat. *hibiscus, hibiscum, ibiscum*; Gr. ἰβίσκος (*ibiskos*), probably = the wild mallow, the marsh mallow.]

Bot.: The typical genus of the malvaceous tribe Hibisceæ (q.v.). The involucel is of several leaves, calyx with five divisions, petals five, stamens forming a sheath which encloses the five-branched style. Fruit five-celled, many-seeded. They are plants with large showy flowers, found chiefly, though not exclusively, in tropical countries. In the West Indies *Hibiscus arboreus* furnishes tenacious fibres, which are made into whips. Those of *H. cannabinus* constitute the *sun* of India, used as a substitute for hemp. *H. syriacus*

HIBISCUS ARTICULATUS.

and *H. Rosa Sinensis* are ornamental; the astringent plants of the latter are used by the Chinese to blacken their eyebrows and the leather of their shoes. *H. Sabdariffa* and *H. suratensis* are somewhat acid. *H. esculentus* [GOMBO] is used in the West Indies, and *H. longifolius* (Ram turai), in the East for thickening soup. More than 100 species of the genus are known.

hĭ'-brĭd, *a. & s.* [HYBRID.]

hĭc, *adv.* [Lat. = here.]

hic-jacet. [Lat. = here lies.] Commonly the first two words on a tombstone, and so used as a noun in the sense of tombstone, grave.

"By the cold *hic-jacets* of the dead."
Tennyson: Vivien, 603.

***hĭc'-ci-ŭs dŏc'-ti-ŭs (ci, ti as shi),** *s.* [Said to be a corruption of Lat. *hic est doctus* = this (*or* here) is the learned man.] A cant word for a juggler; one who plays fast and loose

"And *hiccius doctius* played in all."
Butler: Hudibras, pt. iii., c. iii.

hĭc'-coŭgh (gh as p), hĭc'-cŭp, *hich-cock, *hick-ock, *hick-cock, *hick-et, *hic-quet, *hick-up, *s.* [Generally supposed to be a formation from *cough*, but more probably *hic, hick*, or *hik* is imitative of the spasmodic sound or jerk, and *-cough, -cup*, &c., are corruptions of the dimin. suffixes *-et* or *-ock*. Cf. Fr. *hoquet* = a hiccough; Dut. *hik* = hiccough, *hikken* = to hiccough; Dan. *hikke*, s. & v.; Sw. *hicka*, s. & v.; Welsh *ig* = a hiccough; *igio* = to sob; Bret. *hik* = a hiccough.]

Pathol.: A series of sudden, rapid, and brief inspirations, followed by expiration accompanied by noise. It is generally caused by irritation of the stomach, but is produced chiefly by the respiratory muscles. In children it sometimes follows a violent fit of crying or sobbing. It also accompanies certain fevers. There is an hysteric hiccough and a hiccough of death.

"And so it is also of good signality, according to that of Hippocrates, that sneezing cureth the *hicket*." —*Browne: Vulgar Errours*, bk. iv., ch. ix.

hĭc'-coŭgh (gh as p), hĭc'-cŭp, *hick-up, *v. i.* [HICCOUGH, *s.*] To have a hiccough.

"When I'm in a fit, to *hickup*."
Butler: Hudibras, pt. ii., c. i.

Hĭck, *s.* [Prop. name.]

Hick's mandril, *s.* An arbor for turning rings; at the centre of the arbor there is a cone, round which, at equal distances, wedges are fitted into dovetailed grooves, and are expanded to the bore of the ring by a nut acting on a screw at the end of the cone.

hĭck'-ĕr-ў pĭck-ĕr-ў, *s.* [See def.] A corruption of Hiera picra (q.v.).

"The leddy cured me with some *hickery pickery*."—*Scott: Old Mortality*, ch. viii.

hĭck'-hâll, *s.* [HICKWALL.]

hĭck'-jŏint, *s.* [Etym. of first element doubtful; Eng. *joint.*]

Mason.: A species of pointing in which mortar is inserted between the courses and joints of a wall, and made truly level or smooth with the surface.

hĭck'-or-ў, *s.* [Bartlett notes the resemblance in sound and sense to Gr. ἡ καρυα (*he carua*) = the walnut, but adds that *hickory* is of American aboriginal derivation.]

Bot. & Comm.: The several species Carya, a genus of Juglandaceæ. *Carya alba* is the Shell-bark, Scaly-bark, or Shag-bark Hickory, from the tendency of the bark to peel off in long loose strips. Its wood is noted for its elasticity and toughness. It is a large tree, sometimes eighty or ninety feet high, by two in diameter, growing in the United States from South Carolina to New Hampshire. The leaves, which are about twenty inches long, are pinnate, leaflets five serrate. The nuts, which are whitish, are sub-globular, pointed at each end. Other species of the genus are the Mocker-nut, White-heart, or Common Hickory (*C. tomentosa*), the wood of which is excellent for mechanical purposes, or for burning, the Bitter-nut or Swamp Hickory (*C. amara*), the Pig-nut Hickory, or Hog-nut or Broom Hickory (*C. porcina*), the Nutmeg Hickory (*C. myristiciformis*), &c. The Hickory of New South Wales is *Eucalyptus Stuartiana* and *E. resinifera.*

hickory-broom, *s.* A broom made from the flexible wood of the hickory. The handle, originally thick, is shaved down; the long, thin shavings, still attached at one end of the stick, are bent over and bound into a besom head.

hickory-shirt, *s.* A shirt made of checked cotton stuff.

***hĭck'-scorn-ĕr,** *s.* [Etym. of first element doubtful; Eng. *scorner.*] A scoffer at sacred things.

"Such *hickscorners* will be merry at their drunken banquets."—*Pilkington: Exposition on Nehemiah* ii.

***hĭck-ŭp,** *s. & v.* [HICCOUGH.]

hĭck'-wâll, †hĭck'-wāy, *hygh-whele, *high-awe, *s.* [Etym. doubtful.]

hī-ĕl'-mite, *s.* [Sw. *hjelmit.*]

Min.: A black mineral of metallic lustre and granular fracture; hardness, 5; sp. gr. 5·82. Compos.: tantalic acid, 62·42; oxide of tin, 0·56; protoxide of uranium, 4·87; protoxide of iron, 8·06; protoxide of manganese, 3·32. Yttria = 5·19; lime, 4·26; and water, 3·26, &c. It is a stanno-tantalate of iron, uranium, and yttria, occuring in pegmatite near Fahlun, in Sweden.

*** hī'-ĕm-al,** *a.* [HYEMAL.]

Hī-ĕr-ā'-çĭ-ans, Hī'-ĕr-a-çĭtes, *s. pl.* [For etym., see def.]

Ecclesiol. & Ch. Hist.: The followers of Hierax, Bishop of Leontopolis, a book-copier, who flourished towards the close of the third century. He believed that Jesus promulgated a law much more strict than that of Moses. Those Christians, therefore, who aspired after the highest attainments, were enjoined to abstain from marriage, flesh, wine, &c. He also allegorised Scripture, denied the resurrection of the body, and excluded those who died infants from the kingdom of heaven. (*Mosheim: Ch. Hist.*, cent. iii., pt. ii., ch. v., § 11.)

hī-ĕr-ā'-çĭ-ĕ-æ, *s. pl.* [Lat. *hieraci(um)* (q.v.); fem. pl. adj. suff. *-eæ.*]

hī'-ĕr-ō-glўph, *v.t.* [HIEROGLYPH, *s.*] To represent by or in hieroglyphics.

hī-ĕr-ō-glўph'-ĭc, *a. & s.* [Lat. *hieroglyphicus*, from Gr. *ἱερογλυφικός* (*hieroglyphikos*), from *ἱερός* (*hieros*) = sacred, and *γλύφω* (*gluphō*) = to carve, to write.]

A. *As adjective:*

I. *Literally:*

1. A term applied to the most ancient language of Egypt, being that employed in the monumental inscriptions of that country.

"It will be necessary to trace up *hieroglyphic* writing to its original."—*Warburton: Divine Legation*, bk. iv., § 4.

2. Written in or covered with hieroglyphs; conveying, or intended to convey, a meaning by hieroglyphs or emblematically.

II. *Figuratively:*

1. Written in characters difficult to decipher.

"*Hieroglyphicke* letters."—*P. Holland: Ammianus*, p. 214.

2. Mysterious; conveying, or intended to convey, a meaning in mysterious or obscure terms or emblems.

B. *As substantive:*

1. *Sing.:* A hieroglyph; hieroglyphic writing.

"The groups of symbols begin with a large *hieroglyphic* on the left-hand corner."—*Wilson: Prehistoric Man*, ii. 65.

2. *Pl.* (*Hieroglyphs, hieroglyphics*): Representations of animals, plants, and other more or less material bodies, sculptured on Egyptian temples, obelisks, sarcophagi, &c., and designed for ideographic or other writings. All attempts to read hieroglyphics had for centuries been given up, when, in August, 1799, the French found among the ruins of Fort St. Julien, near the Rosetta branch of the Nile, a stone, which has since been called the Rosetta Stone. It was afterwards taken from a French vessel by William R. Hamilton, and is now in the British Museum. It contains an inscription regarding the coronation of Ptolemy V. (Epiphanes), and is believed to have been sculptured about 195 B.C. The inscription is first in hieroglyphics, next in the hieratic character of Egypt, and in Greek, which afforded a key to the hieroglyphics, but one very difficult to apply. Silvestre de Sacy in 1801, Akerblad in 1802, the younger Champollion in 1814, 1821, 1836, 1841, with Dr. T. Young, most successful of any, in 1819, and Rossellini in 1825, 1826, &c., all made advances towards solving the enigma, so that Dr. Birch, of the Biblical Archæological Society, and other Egyptologists are now continually translating hieroglyphics from the monuments. Hieroglyphics are of two kinds: some are ideographs (q.v.), others stand for syllables or for letters. They are not confined to Egypt, they exist in the adjacent lands, and in Mexico. Professor Sayce shows that there were some hieroglyphics in the Hamathite inscriptions which were probably of Hittite origin (*Trans. Bib. Arch. Soc.*, v., 26, 27). The Mexican hieroglyphics emanated from the ancient Aztecs. Hieroglyphs are a shorter kind of picture writing, which it is thought was the earliest form of all. Hieroglyphics were ultimately modified into alphabetic writing. Thus the Rev. W. Houghton believed in the hieroglyphic or picture origin of the Assyrian Syllabary (*Ibid.*, vi. (1878), p. 452–483, 692), and Endlicher has shown that the "ancient pictures" of the Chinese gave rise to the cursive forms now in use. (*Tylor: Anthropology*, ch. vii.)

High-church, *s.* & *a.*

A. *As subst.:* The High-church party (q.v.).

B. *As adj.:* Entertaining high notions regarding the prerogatives of the church.

¶ *High-church party:*

Ecclesiol. & Ch. Hist.: One of the three great parties in the English Church. They regard the Episcopal form of government as so essential to a true church that, as a rule, they do not feel free to recognize, as sister churches, those Christian denominations which are under other forms of government. If they look for ecclesiastical alliance outside the Established Church, it is towards churches under the rule of bishops that they turn, and especially towards the Roman Church. In the seventeenth century Laud was the most distinguished advocate of what would now be called High-church principles, but the designation did not come into use till the time of the controversy commenced by Dr. Sacheverell in 1709. To the present century High-churchism has developed first into Tractarianism and then into Ritualism. Believing the Church to have received the right of autonomy from its Divine Head, it disputes the right of the Civil Courts to try ecclesiastical cases. It has been introduced into the United States, where it has made some progress.

"They curse the foremost, we the *hindmost*."
Corbet: Iter Boreale.

Hĭn-doŏ', Hĭn-dŭ', *s. & a.* [Hind. *Hinduwi*, *Hindi*, from *Hind* = India.]

A. *As substantive:*

1. *Gen.:* A native of India, not of Parsee, Mussulman, or Christian descent.

2. *Spec.:* Beames defines a Hindoo as an Aryan still adhering to the Brahmanical faith. (*Comp. Gram. Aryan Lang. of India* (ed. 1872), Introd., p. 39.)

B. *As adj.:* Of or belonging to one or other of the persons described under A.

Hĭn-doŏ'-ĭșm, Hĭn-dŭ'-ĭșm, *s.* [Eng. *Hindoo*, *Hindu*; suff. *-ism*.]

Religions: The system of belief held by the ordinary Hindoos, as distinguished from that of the Indian aborigines and the Mussulman and Christian invaders. [Brahmanism, Caste.] The several Hindoo gods will be found described in their proper places, and, where practicable, efforts will be made to trace their origin. Hindooism not being a homogeneous system of belief, but a conglomerate, in large measure derived from prior faiths.

Hĭn-doo-sta'-neē, Hĭn-dŭ-sta'-nĭ, *a. & s.* [Pers., &c., from Pers. *Hindusthan* = the country of the Hindoos, from *Hindu* = the people so named, and *sthan* = place.]

A. *As adjective:*

Phil., &c.: Of or belonging to Hindoostan. Originally this was India north of the Nerbudda, or the Vindhya Mountains adjacent to it, the table-land south of these being termed the Deccan (Sansc., Dakshan) (South). Now on English lips it means India.

B. *As substantive:*

1. A native of Hindoostan proper. [A.]

2. *Phil.:* A language which apparently arose from the efforts made by the Hindoos and their Muhammadan conquerors to understand each other. It approaches Hindi or Hindee (q.v.), but has a large admixture of Persian and Arabic words foreign to India. Hindoostanee will carry one all over India, but is really the vernacular of the Muhammadans only, and not of the Hindoos properly so called. It is sometimes called Urdu or Oordoo (q.v.).

¶ When people speak of the Indian language they mean Hindoostanee, but the designation is erroneous. There are at least twelve leading Indian languages.

* **Hĭn-doo-stă'-neē,** * **hĭn-doo-sta'-nў,** *s.* [Hindoostanee.]

hĭn-drançe, hĭn'-dẽr-ançe, * **hin-der-aunce,** *s.* [Eng. *hinder*; *-ance*.]

1. The act of hindering, impeding, or obstructing.

2. That which hinders, impedes, or obstructs; an impediment; an obstacle; an obstruction.

"What various *hindrances* we meet."
Cowper: Olney Hymns, xxix.

HIPPOCAMPUS BREVIROSTRIS.

eggs are hatched and the young are reared for a time within a marsupial sac. *Hippocampus brevirostris*, the short-nosed species, and others, are found in the Atlantic.

2. *Anat.:* See the compounds.

hippocampus-major, *s.*

Anat.: A large white eminence extending the whole length of the cornu in the cerebrum. It becomes enlarged towards its anterior and lower extremity, and is indented or notched on its edge, so as to resemble the paw of an animal, on which account it has been termed pes hippocampi. Named also Cornu Ammonis.

hippocampus-minor, *s.*

Anat.: A curved and pointed longitudinal eminence on the inner side of the posterior cornu, projecting backwards into the posterior lobe of the cerebrum. Its existence became known to the general public through a controversy whether or not the hippocampus minor was peculiar to man, or whether it existed also in the anthropoid apes. Prof. (now Sir Richard) Owen took the first view and Prof. Huxley the second.

hĭp-pō-căs-tā'-nĕ-æ, *s. pl.* [Mod. Lat. *hippocastan(um)* (q.v.); Lat. fem. pl. adj. suff. *-eæ*.]

Bot.: A tribe of Sapindaceæ. The leaves are opposite, the ovules two in each cell, the one ascending, the other suspended. Embryo curved with great fleshy consolidated cotyledons. (*Lindley.*)

hĭp-pō-căs'-tą-nŭm, *s.* [Pref. *hippo-*, and Lat. *castanea*; Gr. κάστανος (*kastanos*) = a chestnut tree.

Bot.: A synonym of Æsculus (q.v.). [Horse-chestnut.]

hĭp-pō-çĕn'-tâur, *s.* [Gr. ἱπποκένταυρος (*hippokentauros*), from ἵππος (*hippos*) = a horse, and κένταυρος (*kentauros*) = a centaur.]

Myth.: A fabulous monster, half man and half horse.

"In Thessalie there was borne an *Hippocentaur*—i.e., halfe a man, and halfe a horse."—*P. Holland: Plinie*, bk. vii., ch. iii.

*** hĭp'-ō-crăs, * hyp-o-cras, * yp-o-cras,** *s.* [Fr., from Lat. (*vinum*) *Hippocraticum* = (the wine) of Hippocrates.] A cordial made of wine and spices, supposed to be mingled according to the receipt of Hippocrates.

"And plaine water hath he preferred before the swete *hipocras* of the riche men."—*Udal.: Luke* vii.

hĭp-pō-crăt'-ĕ-ą, *s.* [Named after Hippocrates, regarded as one of the fathers of botany.]

Bot.: The typical genus of the family Hippocrateaceæ (q.v.). It consists of more than thirty climbing shrubs from the hotter latitudes. The nuts of *Hippocratea comosa*, a native of the West Indies, are oily and sweet.

hĭp-pō-crăt-ĕ-ā'-çĕ-æ, *s. pl.* [Mod. Lat. *hippocrate(a)*; Lat. fem. pl. adj. suff. *-ceæ*.]

Bot.: Hippocrateads; an order of perigynous exogens, alliance Rhamnales. It consists of arborescent or climbing, generally smooth, shrubs, with opposite somewhat coriaceous leaves, the stipules small and deciduous. Flowers in axillary racemes small,

inconspicuous; petals five, stamens three, forming a cup; ovary three-celled; style one, stigmas, one to three; fruit, either of three samaroid carpels or horned, cells one to three, seeds definite. Found chiefly in South America; a few are in Africa, the others in the East Indies. Known genera six, species about eighty-six.

hĭp-pō-crăt'-ĕ-ădș, *s. pl.* [Mod. Lat. *hippocrate(a)*; Eng., &c. suff. *-ads.*]

Bot.: The name given by Lindley to the order Hippocrateaceæ (q.v.).

Hĭp-pŏc'-ra-tēș, *s.* [See def.] The most celebrated physician of antiquity, born in Cos, one of the Cyclades, B.C. 360. He delivered Athens from a pestilence in the beginning of the Peloponnesian War. The number of his works is very great.

Hippocrates' sleeve, *s.* A strainer-bag made by folding a square of flannel diagonally, and sewing it along the meeting edge; or by uniting the opposite angles of a square piece of cloth.

hĭp-pō-crăt'-ĭc, *a.* [Lat. *Hippocraticus.*] Of or pertaining to Hippocrates; described by Hippocrates.

hippocratic-face, *s.*

Path.: A face altered when death is approaching. It was well described by Hippocrates in his *Prognostica.*

Hĭp-pŏc'-ra-tĭsm, *s.* [Eng. *Hippocrat(es); -ism.*] The teaching or system of medicine taught by Hippocrates.

Hĭp'-pō-crēne, *s.* [Gr., from ἵππου κρήνη (*hippou krēnē*) = the fountain of the horse.] A celebrated fountain on Mount Helicon in Bœotia, sacred to the Muses. It was fabled to have burst from the ground when struck by the feet of Pegasus, and to possess the power of poetic inspiration. [HELICON.]

"Nor maddening draughts of *Hippocrene.*"
Longfellow: Goblet of Life.

hĭp-pō-crĕp'-ĭ-an, *s.* [Mod. Lat. *hippocrep(is); -ian.*]

Zool. (*Pl.*): A term applied to a section of Polyzoa having the lophophore crescentiform, or horseshoe shaped. (*Nicholson.*) The same as Phylactolæmata (q.v.).

hĭp-pō-crĕp'-ĭ-form, *a.* [Mod. Lat. *hippocrepi(s),* and Lat. *forma* = shape, appearance.]

Bot.: Shaped like a horseshoe.

hĭp-pō-crē'-pĭș, *s.* [Gr. ἵππος (*hippos*) = a horse, and κρηπίς (*krēpis*) = a shoe.]

Bot.: Horseshoe vetch; a genus of papilionaceous plants, having the legumes compressed, sub-membranous, composed of many joints. Known species twelve. *Hippocrepis comosa* is a much-branched and woody plant, six inches high, having unequally pinnate leaves, and pale yellow flowers like those of the Birdsfoot trefoil. It occurs in the chalky districts of England; in Scotland only near Ayr.

***hĭp'-pō-dāme,** *s.* [A contraction or corruption of *hippopotamus* (q.v.).] A hippopotamus.

"Which foure great *hippodames* did draw in temewise tide." *Spenser: F. Q.,* III. xi. 40.

hĭp'-pō-drōme (1), *s.* [Gr. ἱππόδρομος (*hippodromos*) = a racecourse for horses and chariots: ἵππος (*hippos*) = a horse, and δρόμος (*dromos*) = a course, a running.] Originally a circus or course on which horses and chariot-races were run; now frequently applied to a circus.

"I have planted an *hippodrome*; it is a circular plantation, consisting of five walks."—*Swift: Works,* xiv.

***hĭp'-pō-drōme** (2), *s.* [Properly *hypodrome,* from Gr. ὑποδρομή (*hupodromē*) = an asylum: ὑπό (*hupo*) = under, and δρόμος = a course, a running.] An enclosed portico.

"At one end of the inclosed portico, and, indeed, taken off from it, is a chamber that looks upon the *hippodrome*, the vineyards, and the mountains . . . an apartment connects the *hippodrome* with the house."—*Melmoth: Pliny,* bk. v., lett. 6.

hĭp-pō-glŏs'-sŭs, *s.* [Gr. ἱππογλωσσος (*hippoglōssos*) = with horse's tongue, pref. *hippo-,* and Gr. γλῶσσα (*glōssa*) = the tongue.]

Ichthy.: A genus of Pleuronectidæ. The body is long, the two eyes on the right side, the jaws and pharynx armed with strong teeth. *Hippoglossus vulgaris* is the Halibut or Holibut (q.v.).

hĭp'-pō-grĭff, *s.* [Fr. *hippogriffe,* from Gr. ἵππος (*hippos*) = a horse, and γρῦψ (*grups*) = a griffon.] A fabulous creature, half horse and half griffon; a winged horse.

"He caught him up, and without wing
Of *hippogriff*, bore through the air sublime."
Milton: P. L., iv. 542.

hĭp'-pō-lĭth, *s.* [Gr. ἵππος (*hippos*) = a horse, and λίθος (*lithos*) = a stone.] A stone or chalky concretion found in the intestines or stomach of a horse.

hĭp-pŏl'-ў-tē, *s.* [Gr. ἱππόλυτος (*hippolutos*) = letting horses loose: pref. *hippo-,* and Gr. λυτός (*lutos*) = that may be loosed; λυω (*luō*) = to loose.]

Zool.: A genus of crustaceans, family Palemonidæ: they resemble the typical genus, but their abdomen cannot be straightened. They are small crabs, of which about five are British.

hĭp-pŏm'-ą-nē, *s.* [Gr. ἱππομανές (*hippomanes*) = as adj. (of mares), mad after the horse; thence, lecherous; as subst. (1) an aphrodisiac plant of the spurge kind; (2) (see def.)]

1. *Folklore:* A substance supposed to possess aphrodisiac qualities, obtained from a mare or a recently dropped foal; it was used in preparing love-potions. (See *Dryden: Virgil; Æneid* iv. 745–746, and *Georgic* iii. 442–47.)

2. *Bot.:* The typical genus of the euphorbiaceous tribe Hippomancæ. *Hippomane Mancinella* is the Manchineel (q.v.).

hĭp-pō-mā'-nĕ-æ, *s. pl.* [Mod. Lat. *hippoman(e)* (q.v.); and Lat. fem. pl. adj. suff. *-eæ.*]

Bot.: A tribe of Euphorbiaceæ. The ovule solitary; the flowers in spikes, apetalous; the bracts one or many-flowered.

hĭp'-pō-nўx, *s.* [Gr. ἵππος (*hippos*) = a horse, and ὄνυξ (*onux*) = a claw.]

Zool. & Palæont.: A genus of gasteropodous molluscs, family Calyptreidæ. About thirteen recent species are known from the warmer regions, and ten fossil, the latter from the Chalk until now. No recent British species, but two fossil.

hĭp-pō-pa-thŏl'-ō-ġў, *s.* [Gr. ἵππος (*hippos*) = a horse, and Eng. *pathology* (q.v.).] The pathology of the horse; veterinary medicine.

hĭp-pŏph'-ą-ē, *s.* [Gr. ἱππόφαές (*hippophaes*) = a plant, *Euphorbia spinosa* (*Liddell & Scott*).]

Bot.: Sallow-thorn, a genus of Elæagnaceæ. Flowers, diœcious, the barren ones collected into a small catkin, each scale bearing a flower, the perianth single of two deep roundish valves; fertile flowers solitary, the perianth single, tubular, cloven at the top. *Hippophea rhamnoides* is the Common Sallow-thorn or Black-thorn found on sand hills and cliffs upon the east and south-east of England, rarer, and scarcely wild, in Scotland. The Tartars make a jelly and the Bohemian fishermen a fish-sauce of the berries.

hĭp-pŏph'-ą-ġĭ, *s. pl.* [Gr. ἵππος (*hippos*) = a horse, and φαγεῖν (*phageîn*) = to eat.] Eaters of horse-flesh; specif. applied to certain nomadic tribes of Scythia and the north of the Caspian Sea, who fed on horse-flesh.

hĭp-pŏph'-ą-ġĭst, *s.* [Eng. *hippophag(y); -ist.*] One who eats or feeds on horse-flesh.

hĭp-pŏph-ą-gŏŭs, *a.* [HIPPOPHAGI.] Eating or feeding on horse-flesh.

hĭp-pŏph'-ą-ġў, *s.* [Gr. ἵππος (*hippos*) = a horse, and φαγειν (*phagein*) = to eat.] The act or practice of eating or feeding on horse-flesh.

hĭp-pō-pō-dĭ-ŭm, *s.* [Pref. *hippo-,* and Gr. ποῦς (*pous*), genit. ποδός (*podos*) = a foot.]

Zool.: A subgenus of Myoconcha (?) It contains one species, *Hippopodium ponderosum,* looking like a ponderous cyprinardia or cardia. Characteristic of the English lias. (*S. P. Woodward.*)

hĭp-pō-pŏ-tăm'-ĭ-dæ, *s. pl.* [Lat. *hippopotam(us)*; fem. pl. adj. suff. *-idæ.*]

I. *Zool.:* A family of mammals, order Ungulata, section Artiodactyla, subsection Omnivora. Genera Hippopotamus and Chæropsis, if indeed the latter is more than a subgenus.

2. *Palæont.:* [HIPPOPOTAMUS].

hĭp-pō-pŏt'-ą-mŭs, *hĭp-pō-pŏt'-ą-mў, *s.* [Lat., from Gr. ἱποπόταμος (*hippopotamos*) = the river horse of the Nile; ἵππος (*hippos*) = a horse, and ποτάμιος (*potamios*) = of or belonging to a river; ποταμός (*potamos*) = a river. The faint resemblance to a horse is either in the aspect of the head suddenly projected above the water or, according to M. F. Cuvier, in the voice.]

I. *Ord. Lang.:* The River horse, *Hippopotamus amphibius* (II.). It inhabits the great rivers and lakes of Africa. Anciently it was found in the lower part of the Nile; now it does not occur there. It is at home in the water, diving beneath it when danger arises, but at intervals raising its head above the surface to breathe. It feeds chiefly on the roots and bark of water trees and plants. It lands during the night to look for pasture, and is destructive to crops. Its tusks furnish the best ivory: its flesh is eaten.

II. *Technically:*

1. *Zool.:* The typical and only admitted genus of the family Hippopotamidæ. Muzzle short, blunt; incisors $\frac{2-2}{1-1}$, canines very large $\frac{0-0}{1-1}$, molars $\frac{7-7}{7-7}$ or $\frac{6-6}{6-6}$ $\frac{2-2}{1-1}$. Upper canines short, the lower developed into tusks, eyes and ears small; body heavy, massive; hide thick, toes four on each foot.

2. *Palæont.:* No fossil hippopotamus has been found in America. As far as is known, the genera came in with the subgeneric form of Hexaprotodon (q.v.), found in the Upper Miocene of India. Then followed the Tetraprotodon (q.v.), to which the living and various fossil forms belong. *Hippopotamus major* is enumerated by Prof. Boyd Dawkins among the Upper Pliocene mammalia of Italy and the Mid Pleistocene mammalia of Britain. It is called by him a survival from the early Pleistocene. Remains of it have been found at Ilford and Grays Thurrock, in Essex, showing that it was formerly an inhabitant of the Thames. As the molluscs contemporaneous with *H. major* in England were nearly the same as those now existing, the temperature cannot have been very different from that of our own time. The hippopotamus is closely allied to the common species. It is now found only where the water never freezes but is of nearly uniform temperature throughout the year. Prof. Boyd Dawkins states that *H. amphibius* was widely diffused in Upper Pliocene times through the forests of France and Italy, and it is found as a survival from the Pliocene in the Early Pleistocene of Britain. The remains of this animal occur here also in the Late Pleistocene, both in river strata and ossiferous caverns.

hĭp'-pō-pŭs, *s.* [Gr. ἵππος (*hippos*) = a horse, and ποῦς (*pous*) = a foot.]

Zool.: A subgenus of Tridacna (Clam-shell). *Hippopus maculatus* is the Bear's-paw clam. It has close valves, each with two hinge teeth, and a small byssus. Found on the reefs in the coral sea. (*S. P. Woodward.*)

hĭp-pŏs-tĕ-ŏl'-ō-ġў, *s.* [Gr. ἵππος (*hippos*) = a horse, and Eng. *osteology* (q.v.).] The branch of science dealing with the osteology of the horse.

***hĭp-pō-tâu'-rŭs** (*pl.* **hĭp-pō-tâu'-rī**), *s.* [Gr. ιπποs (*hippos*) = a horse; and ταυρος = a bull.] A hippopotamus (q.v.).

"Cocodrilles be abundaunte there and horses of the floode, called *hippotauri.*"—*Higden: Polychronicon,* bk. i., ch. xvi.

hĭp-pō-thĕr'-ĭ-ŭm, *s.* [Gr. ἵππος (*hippos*) = a horse, and θηρίον (*thērion*) = a wild beast.]

Palæont.: A genus of Equidæ found by Prof. Kaup at Eppelsheim in Miocene strata.

hĭp-pō-thō'-ē, *s.* [Gr. ἱππόθοος (*hippothoos*) = swift-riding; pref. *hippo-,* and Gr. θοός (*thoos*) = quick, nimble.]

Zool. & Palæont.: The typical genus of the family Hippothoidæ. From the Silurian times till now. There are three British species: *Hippothoe catenularia, H. divaricata,* and *H. sica.* They are found encrusting shells, &c., in deep water.]

hĭp-pō-thō'-ĭ-dæ, *s. pl.* [Mod. Lat. *hippotho(e)*; Lat. fem. pl. adj. suff. *-idæ.*]

Zool. & Palæont.: A family of Cheilostomatous Polyzoa. Polyzoary creeping, and attached to foreign bodies; cells, pyriform, distant, and arranged in linear series.

† **hĭp-pŏt'-ō-mў,** *s.* [Pref. *hippo-*, and Gr. τομή (*tomē*) = a cutting.]

Anat.: The anatomy of horses, a branch of Zootomy.

hĭp'-pu-rāte, *s.* [Eng. &c., *hippur(ic)*; *-ate* (*Chem.*) (q.v.).]

Chem.: A salt of hippuric acid. Hippurates fused with potash or lime give off ammonia, and yield benzene by distillation.

hĭp-pūr'-ĭc, *a.* [Gr. ἵππος (*hippos*) = a horse, and Eng. *uric* (q.v.).] Contained in the urine of horses.

hippuric-acid, *s.*

Chem.: $C_9H_9NO_3$, or $\begin{matrix} CH_2{\cdot}NH{\cdot}CO{\cdot}C_6H_5. \\ | \\ CO{\cdot}OH. \end{matrix}$

Benzamido-acetic acid. Hippuric acid occurs in the urine of horses and other graminivora; the quantity depends upon the food—animals fed with oat straw give off the most. When benzoic acid is eaten, it appears in the urine in the form of hippuric acid. The acid can be obtained by evaporating the fresh urine to a thick syrup, and extracting with alcohol, filtering, and then distilling off the alcohol: the residue, when cold, is treated with hydrochloric acid; the colour can be removed by dissolving the acid in dilute soda and adding to the boiling liquid a small quantity of permanganate of potassium, filtering off the oxide, and then precipitating the acid by HCl. The pure acid crystallizes in prisms easily soluble in boiling water and in alcohol; less soluble in ether. It melts over 130°, turning brown. By the action of $K_2Mn_2O_8$ and caustic soda solution it is decomposed, giving off its nitrogen as ammonia. An aqueous solution of hippuric acid, boiled with PbO_2, yields benzamide $C_6H_5{\cdot}CO{\cdot}NH_2$ and CO_2. Hippuric acid can be prepared synthetically by heating benzoyl chloride $C_6H_5{\cdot}CO{\cdot}Cl$ with glycocoll $CH_2{\cdot}NH_2{\cdot}CO{\cdot}OH$ to 120°, zinc oxide being added to neutralize the HCl given out; also by heating to 150° equivalents of benzamide and monochloracetic acid.

hĭp-pu-rĭd'-ĕ-æ, *s. pl.* [Lat. *hippuris*, genit. *hippurid(is)*, fem. pl. adj. suff. *-eæ*.] [Hippuris.]

Bot.: The name given by Link to the botanical order called by Lindley and others Haloragеæ (Hippurids).

hĭp'-pu-rĭds, *s. pl.* [Hippuridеæ.]

Bot. The name given by Lindley to the order Haloragaceæ (q.v.).

hĭp-pūr'-ĭs, *s.* [Lat., from Gr. ἵππουρις (*hippouris*), genit. ἱππούριδος (*hippouridos*) = the horse-tail (*C. Equisetum arvense* or *pratense*): pref. *hippo-*, and Gr. οὐρά (*oura*) = a tail. This is not the modern genus.]

Bot.: Mare's tail, a genus of Haloragaceæ, tribe Haloragеæ (q.v.). The perianth is single, superior, forming a very indistinct rim to the germen; stamen one; style one; fruit one-celled, one-seeded. Known species one or two. *Hippuris vulgaris*, Common Mare's tail, a plant with linear leaves in whorls of six, eight, or ten, is not uncommon in ditches and stagnant waters. The flowers are minute, and often without stamens.

hĭp'-pu-rīte, *a. & a.* [Hippurites.]

A. *As subst.:* A mollusc of the genus Hippurites, or more rarely of the family Hippuritidæ. (*S. P. Woodward: Mollusca* (3rd ed.), pp. 32, 33.)

B. *As adj.:* Of or belonging to the Hippurites or the Hippuritidæ [A].

hippurite-limestone, *s.*

Geol. & Palæont.: Limestone of Lower Cretaceous age, characterized by the abundance of fossil hippurites, especially *Hippurites organisans* and its casts. It occurs in the south of France, in Spain, Sicily, and Greece. (*Lyell.*)

hĭp-pu-rī'-tēs, *s.* [Gr. ἵππουρος (*hippouros*) = horse-tailed, and suff. *-ites* (*Palæont.*).] [Hippuris.]

Palæont.: The typical genus of the family Hippuritidæ (q.v.). The shell is very inequivalve, inversely conical or elongated and cylindrical, the fixed valve striate or smooth, with three parallel furrows on the cardinal side, the pallial line continuous. Thirty species are known, all from the Chalk of continental Europe, Algeria, and Egypt. Typical species, *Hippurites bioculatus* and *H. cornu-vaccinum*. (*Woodward.*)

hĭp-pu-rĭt'-ĭ-dæ, *s. pl.* [Mod. Lat. *hippurit(es)*; Lat. fem. pl. adj. suff. *-idæ*.]

Palæont.: A family of molluscs, class Conchifera, section Siphonida. Shell thick, inequivalve, attached by the right umbo; structure and sculpturing of the two valves dissimilar; the ligament internal; hinge teeth one or two adductor impressions, two large; the pallial line simple submarginal. Found in the Cretaceous rocks of Europe. Known genera, Hippurites, Radiolites, &c.

hĭp'-pŭs, *s.* [Gr. ἵππος (*hippos*) = a horse.]

Path.: A morbid trembling and twinkling of the eyes.

* **hĭp'-shŏt,** *a.* [Eng. *hip*, and *shot*.]

1. *Lit.:* Having the hip dislocated or sprained.

"'Why do you go nodding and wagging so like a fool, as if you were *hipshot?*' says the goose to the gosling." —*L'Estrange.*

* 2. *Fig.:* Lame, awkward.

hĭp'-wŏrt, *s.* [Eng. *hip*, and *wort*.]

Bot.: *Cotyledon Umbilicus.*

* **hir,** *pro.* [Her, He.]

1. Her.

2. Their.

hĭr'-æ-a, *s.* [Named after J. N. de la Hire, a French botanist who died in 1727.]

Bot.: A genus of Malpighiaceæ, tribe Hireæ. The species are pretty climbers with white or yellow flowers, growing in the East and West Indies.

hĭr'-çĭne, *a.* [Hircinous.] Goatish, hence, strong smelling.

"A *hircine* man or two."—*C. Reade: Cloister & Hearth*, ch. xxiv.

hĭr'-çĭn-oŭs, *a.* [Lat. *hircinus* = pertaining to a goat; *hircus* = a goat.]

Bot.: Smelling like a goat.

hĭr'-çīte, hĭr'-çīne, *s.* [Lat. *hircus* = a goat, and suff. *-ine* (*Min.*). From the strong animal odour which the globule remaining after it has been burnt emits.]

Min.: An amorphous, brown, semi-translucent or opaque mineral. Sp. gr. 1·1. In boiling water it becomes soft, in cold alcohol it is slightly dissolved, and in boiling alcohol it is half so, imparting a golden colour to the solution. (*Dana.*)

hĭr'-cu-lŭs, *s.* [Lat., = a little goat, dimin. of *hircus* (q.v.).]

Bot.: A section of Saxifraga containing one British species, *Saxifraga Hirculus*. (*Sir Joseph Hooker.*)

hĭr'-cŭs, *s.* [Lat. = a he-goat.]

1. *Zool.:* The specific name of the goat (*Capra hircus*).

2. *Astron.:* A fixed star, the same as Capella (q.v.).

hĭr'-dĭē-gĭr-dĭē, *s.* [Hurdy-gurdy.]

hĭr'-dĭē-gĭr-dĭē, *adv.* In confusion or derangement.

hīre, *v.t.* [A.S. *hȳrian*, from *hȳr* = hire (q.v.).]

1. To procure anything from another person at a certain price or consideration for temporary use; to engage.

"The Czar of Muscovy . . . *hired* my house at Say's Court."—*Evelyn: Memoirs*, Jan., 1698.

2. To engage in service for a stipulated price, payment, or wages; to contract for the services of for a period.

"Servants who are *hired* by the month or by the year."—*Smith: Wealth of Nations*, bk. i., ch. viii.

3. To let for hire; to lease; to grant the use or services of for a stipulated price or consideration; now only with *out*.

"A man planntide a vyneyerd . . . and *hiride* it to tilleris."—*Wycliffe: Mark* xii. 1.

¶ Frequently used reflexively.

"They have *hired themselves* out for bread."—1 *Sam.* ii. 5.

* 4. To bribe. (*Dryden: Virgil; Æneid* ii. 42.)

hīre, * here, * huire, * hure, * huyre, * hyre, *s.* [A.S. *hyr*; cogn. with Dut. *huur*; Sw. *hyra*; Dan. *hyre*; Ger. *heuer*.]

1. The price, reward, recompense, or equivalent paid, or contracted to be paid, for the temporary service or use of persons or things.

"Thei asken hure *huyre* er thei hit have deservede." *P. Plowman*, ii. 91.

2. Reward or payment for illegal or dishonest services; a bribe.

"Friends, attendants, armies bought with *hire*." *Beattie: Minstrel*, bk. ii.

* **hīre,** *pro.* [Her.]

hīred, * hir-id, * hyred, *pa. par.* or **a.** [Hire, *v.*]

*** hīre'-lĕss,** *a.* [Eng. *hire*; *-less*.] Without hire or reward; freely, gratuitously.

"This famed philosopher is Nature's scribe,
And *hireless* gives the Intelligence to Art."
Davenant: Gondibert, bk. i., c. 6.

hīre'-lĭng, * hyre-lyngo, *s.* & *a.* [A.S. *hyreling*, from *hȳr* = hire.]

A. *As substantive:*

1. One who serves for hire or wages; a hired servant or assistant.

"*Hirelings* whom want and idleness had induced to enlist."—*Macaulay: Hist. Eng.*, ch. i.

* 2. A prostitute.

"No *hireling* she, no prostitute to praise."
Pope: Ep. i. 36.

B. *As adj.:* Serving for hire or wages; mercenary; ready or willing to give one's services for hire.

"Beautiful Florence at a word laid low . . .
Conquered and pardoned by a *hireling* Moor."
R. Browning: Luria, iv.

hīre'-man, *s.* [Eng. *hire*, and *man*.]

1. One who serves for hire or wages; a hired servant. (*Scotch.*)

2. A subject. (*Wharton.*)

* **hĭr'-ĕn,** *s.* [A corrupt. of Gr. *Irene*, the heroine in Peele's *The Turkish Mahomet & the Fair Hiren*.] A prostitute, a strumpet.

"Have we not *Hiren* here?"—*Shakesp.: 2 Henry IV.*, ii. 4.

hīr'-ĕr, *s.* [Eng. *hir(e)*; *-er*.]

1. One who hires or engages the services of a person or thing temporarily for hire; one who employs persons for wages.

"*Hiring* and borrowing are also contracts by which a qualified property may be transferred to the *hirer* or borrower."—*Blackstone: Comment.*, bk. ii., ch. 30.

2. One who lets out things, especially horses, for hire.

*** hire-self, * hire-selve,** *pro.* [Eng. *hire* = her, and *self*.] Herself.

hĭr'-ple, *v.i.* [Etym. doubtful; perhaps related to *cripple* (q.v.).] To walk lamely; to halt; to limp.

"They'll gie me quarters at Monkbarns readily enough, and I'll e'en *hirple* awa there wi' the mear." —*Scott: Antiquary*, ch. xv.

*** hirs,** *poss. pro.* [Their.]

hīrse, *s.* [Etym. doubtful.] A kind of millet.

hĭr'-sęl, *s.* [Herd.]

1. A flock of sheep.

"She'll maybe get a Liddesdale joe that wants something to help to buy the *hirsel*."—*Scott: Guy Mannering*, ch. xxxviii.

2. A crowd; a throng; a multitude.

hĭr'-sęl, hĭr'-sle, *v.i.* [Imitative.] To creep along a rough surface with a rustling noise; to move or creep sideways while lying or sitting down.

"Sae he sat himsell doun and *hirselled* doun into the gleu."—*Scott: Guy Mannering*, ch. xlv.

hĭrst, *s.* [Hurst.]

1. A wood; a grove.

2. A sandbank near a river; a shallow.

hĭr-sūte', *a.* [Lat. *hirsutus*; allied to *horreo* = to bristle.]

I. *Ordinary Language:*

1. *Lit.:* Rough; rugged; hairy; shaggy; set or covered with bristles.

"There are bulbous, fibrous, and *hirsute* roots; the *hirsute* is a middle sort, between the bulbous and fibrous."—*Bacon: Nat. Hist.*, § 616.

* 2. *Fig.:* Rough; coarse; rude; boorish; unmannerly.

"He looked elderly, was cynical and *hirsute* in his behaviour."—*Life of A. Wood*, p. 109.

II. *Bot.:* The same as hispid or setose, but with the hairs longer.

hĭr-sūte'-nĕss, *s.* [Eng. *hirsute*; *-ness.*] The quality or state of being hirsute; roughness; hairiness; shagginess.

"Black colour argues naturall melancholy; so doth leanesse, *hirsut-nesse*, broad veines, much haire on the browes."—*Burton Anatomy of Melancholy*, p. 69.

hĭr-tĕl'-la, *s.* [Dimin. of *hirtus* = hairy.]

Bot.: A genus of Chrysobalanaceæ. The siliceous bark of *Hirtella silicea*, a tree growing in Trinidad, is said to be used by the Indians in making pottery.

hĭ-rû-dĭn'-ē-a, *s. pl.* [From Lat. *hirudo*, genit. *hirudin(is)* = a leech; neut. pl. adj. suff. *-ea.*]

Zool.: An order of Annelids having a locomotive or adhesive sucker, either posteriorly or at both ends. The sexes are not generally distinct, and the young undergo no metamorphosis. It contains the Leeches. Called also Suctoria (q.v.).

hĭ-rû-dĭn'-ĭ-dæ, *s. pl.* [Lat. *hirudo*, genit. *hirudin(is)*; fem. pl. adj. suff. *-idæ.*]

Zool.: The typical family of the order Hirudinea (q.v.). [Leech.]

hĭ-rû'-dō, *s.* [Lat.]

Zool.: The typical genus of the family Hirudinidæ and the order Hirudinea. *Hirudo medicinalis* is the Common Leech. [Leech.]

* **hĭ-rŭn' dĭne,** *a.* & *s.* [Lat. *hirundo* (genit. *hirundinis*) = a swallow.]

A. *As adj.:* Like a swallow; swallow-like.

"Activity almost super-*hirundene*."—*Carlyle: Sartor Resartus*, bk. ii., ch. ii.

B. *As subst.:* A swallow.

hĭ-rŭn-dĭn'-ĭ-dæ, *s. pl.* [Lat. *hirundo*, genit. *hirundin(is)*; fem. pl. adj. suff. *-idæ.*]

Ornith.: A family of Fissirostres. The plumage is compact and glossy, the bill very small and triangular. It contains the swallows and martins [Hirundo], and formerly included the genus Cypselus (Swift), which now forms the type of a new family Cypselidæ (q.v.).

hĭ-rŭn-dĭ-nī'-næ, *s. pl.* [Lat. *hirundo*, genit. *hirundin(is)*; fem. pl. adj. suff. *-inæ.*]

Ornith.: A sub-family of Hirundinidæ, containing the swallows and martins as distinguished from the swifts. Those who form the swifts into the family Cypselidæ abolish also the sub-family Hirundininæ.

hĭ-rŭn'-dō, *s.* [Lat. = a swallow.]

Ornith.: The typical genus of the family Hirundinidæ (q.v.). The bill is flattened its whole length, the margins not inflected, the rictus smooth, the feet insessorial; the lateral toes equal, the middle one longer than the tarsus. It contains the swallows and martins, of which *Hirundo purpurea*, the purple martin, is a native of the United States. *H. rustica*, the proper swallow; *H. urbica*, the martio; and *H. riparia*, the sand-martin, or dark-martin, and others, are natives of Europe. [Martin, Swallow.]

hĭs, *pro.* or *a.* [The poss. of *he* (q.v.).] Of or belonging to him. It may be used with or without the noun to which it refers: as, These are *his* books, or these are *his*. *His* was formerly neuter as well as masculine.

"Who can impress the forest, bid the tree
Unfix *his* earth-bound root?"
Shakesp.: Macbeth, iv.

¶ From a mistaken idea as to the origin of *'s* or *es* as the sign of the genitival inflection, *his* was also used as a sign of the possessive: thus in the Prayer Book we have "for Jesus Christ *his* sake," &c.

hĭs-ĭn-gĕr-īte, *s.* [Named from W. Hisinger, a Swedish mineralogist.]

Min.: An amorphous compact mineral, black or brownish-black, without cleavage; its lustre greasy; its hardness 3; its sp. gr. 3·045. Compos.: silica, 33·07 to 40·97; alumina, 0 to 1·38; sesquioxide of iron, 26·04 to 40·28; protoxide of iron, 0 to 17·59; magnesia, 0 to 15·6; water, 15·12 to 22·83, &c. Found near Helsingfors, in Finland, &c. Varieties: Hisingerite, Degeröite, and Scotiolite (q.v.). (*Dana.*)

* **hĭsk,** * **hĭske,** *v.i.* [Etym. doubtful.] To open the mouth wide.

hĭs'-lŏp-īte, *s.* [Named in 1859 by Prof. Haughton, of Dublin, after Rev. Stephen Hislop, of Nagpore, who, with Rev. Robt. Hunter, sent it and other minerals, fossils, &c., to the Geological Society in 1854. (*Phil. Mag.*, IV. xvii. 16, 1859.)]

Min.: A grass-green variety of Calcite, coloured by about fourteen per cent. of glauconite. From Nagpore in Central India.

hĭsn, *pro.* [A vulgarism for *his* (q.v.).]

hĭs-pa, *s.* [Lat. *hispidus* = shaggy, hairy, bristly (?).] The typical genus of the family Hispidæ (q.v.). It is surrounded by formidable spines.

* **Hĭs-păn'-ĭ-çĭşm,** *s.* [Lat. *Hispanicus* = pertaining to Hispania, or Spain.] A Spanish idiom or phrase; a phrase or mode of speech peculiar to the Spanish language.

hĭs'-pĭd, *a.* [Lat. *hispidus.*]

* 1. *Ord. Lang.:* Rough; hairy; bristly; shaggy.

"John of the wilderness? the hairy child?
The *hispid* Thesbite? or what satyr wild?"
More: Verses, Pref. to Hull's Poems (1646).

2. *Bot.* (*Of leaves, &c.*): Having hairs thinly scattered and moderately stiff. The same as Setose (q.v.).

hĭs'-pĭ-dæ, *s. pl.* [Mod. Lat. *hisp(a)*; Lat. fem. pl. adj. suff. *-idæ.*]

Entom.: A family of tetramerous beetles, closely akin to the Cassididæ. They are depressed insects with short legs, and porrected moniliform antennæ. The larvæ feed between the membranes of leaves upon their parenchyma. Found both in the Old and in the New World.

* **hĭs-pĭd'-ĭ-tў,** *s.* [Eng. *hispid*; *-ity.*] The quality or state of being hispid; roughness; hairiness.

"The *hispidity* or hairiness of his skin."—*More: On Godliness*, bk. iii., ch. vi., § 5.

* **hĭs-pĭd'-ų-loŭs,** *a.* [A dimin. from *hispid* (q.v.).]

Bot.: Having short, stiff, or bristly hairs.

hĭss, * **hysse,** * **hyss,** *v.i.* & *t.* [A.S. *hysian*; cogn. with O. Dut. *hisschen*; cf. Dut. *sissen*, Ger. *zischen.* All of these words are formed from the sound.]

A. *Intransitive:*

1. To make a sound like that of the letter *s* by forcing out the breath between the tongue and the upper teeth.

"Swaltering tongs did lick their *hissing* mouthes."
Surrey: Virgile; Æneis ii

2. To make a sibilant sound; vocally as do geese and serpents, or by rapid motion through the air, like an arrow, a jet of steam, &c.

"His forceful spear, which, *hissing* as it flew,
Pierced through the yielding planks."
Dryden: Virgil, Æneid ii. 65.

3. To express disapprobation by hissing.

"It is the undoubted right of any visitor to a theatre to *hiss*."—*Pall Mall Gazette*, April 16, 1884.

B. *Transitive:*

1. To utter with a hissing sound: as, He *hissed* the words out.

2. To condemn by hissing; to express disapprobation of.

"He therefore wrote the opera of Rosamond, which, when exhibited on the stage, was either *hissed* or neglected."—*Johnson Life of Addison.*

* 3. To procure hisses, disgrace, or ridicule for.

"So disgraced a part, whose issue
Will *hiss* me."
Shakesp.: Winter's Tale, i. 2.

hĭss, *s.* [Hiss, *v.*]

1. A sound made by forcing the breath out between the tongue and upper teeth, as in pronouncing the letter *s*. It is generally used as an expression of derision, disapprobation, or censure.

"A clamour made up of yells of hatred, of *hisses* of contempt, and of shouts of triumphant and half insulting welcome."—*Macaulay: Hist. Eng.*, ch. xvii.

2. A similar sound such as that made by a serpent, water falling on a hot substance, steam passing through a narrow opening, &c.

"The *hiss* of rustling wings." *Milton: P. L.*, i. 768.

hĭss'-ĭng, *pr. par.*, *a.*, & *s.* [Hiss, *v.*]

A. & **B.** *As pr. par. & particip. adj.:* (See the verb).

C. *As substantive:*

1. The act of emitting a hiss or hisses; a hiss.

"I heard a *hissing*: there are serpents here!"
Goldsmith: Prol. to Zobeide.

2. An expression of derision, disapprobation, or censure.

* 3. That which is hissed at, censured, or ridiculed.

"And I will make this citie desolate and an *hissing*."—*Bible* (1583): *Jer.* xix. 8.

hĭss'-ĭng-lў, *adv.* [Eng. *hissing*; *-ly.*] In a hissing manner; with a hiss.

hĭst, *pa. par.* or *a.*, & *interj.* [The same as *hushed* or *whist* (q.v.).]

* **A.** *As pa. par. or a.:* Hushed, silenced. (*Milton: Il Penseroso*, 55.)

B. *As interj.:* A word enjoining silence.

hĭs'-tĕr, *s.* [The Etruscan form whence the Lat. *histria* = a stage-player, an actor, was derived.]

Entom.: The typical genus of the family Histeridæ (q.v.). The form is quadrate and almost cubical. The posterior tibiæ have two rows of spines. Stephens enumerated thirty-two British species; Sharp reduces them to fifteen.

hĭs-tĕr'-ĭ-dæ, *s. pl.* [Mod. Lat. *hister* (q.v.); Lat. fem. pl. adj. suff. *-idæ.*]

Entom.: A family of beetles, tribe Pentamera, sub-tribe Helocera, or Clavicornes. The four hinder feet are more separated from each other at their insertion than the anterior two; the feet are contractile, and the external side of the legs denticulated or spinous. The antennæ are bent, and generally end in a knob. Body square or parallelopiped. They inhabit dead animals, dung, putrid fungi, &c., and feign death when caught. They can fly. Five genera are British. They have a wide distribution, both in the Old and the New World.

hĭst'-ĭĕ, *a.* [Etym. doubtful.] Dry, chapped, barren.

"The *histie* stibble field."
Burns: To a Mountain Daisy.

hĭs-tĭ-ŏl'-ō-ğў, *s.* [Histology.]

hĭs-tō-, *pref.* [Gr. ἱστος (*histos*) = a web or tissue.] Connected with or relating to the organic tissues.

hĭs-tō-chĕm'-ĭs-trў, *s.* [Pref. *histo-*, and Eng. *chemistry.*] (See extract.)

"The special application of the facts of physiological and zoochemistry to the tissues composing our frame constitutes what is called *histochemistry*."—*Frey: Histology of Man* (ed. Barker), p. 6.

hĭs-tō-ğĕn'-ĕ-sĭs, *s.* [Pref. *histo-*, and Eog. *genesis.*]

Phys.: The science of the origin of tissues. Histogenesis, which has of late years received much attention, really dates from Schumann's proof that the cell is the starting-point of all animal structures. He also indicated the mode of origin of the various tissues from the cell. (*Frey: Histology* (ed. Barker), p. 4.)

hĭs-tō-ğĕ-nĕt'-ĭc, *a.* [Pref. *histo-*, and Eng. *genetic.*] Relating or pertaining to histogenesis (q.v.).

hĭs-tō-ğĕn'-ĭc, *a.* [Eng. *histogen(y)*; *-ic.*] Tissue-forming; contributing to the formation of tissue. (*Frey: Histology* (ed. Barker), p. 11.)

hĭs-tŏğ'-ĕn-ў, *s.* [Pref. *histo-*, and Gr. γεννάω (*gennaō*) = to produce.]

Phys.: The formation and development of the organic textures.

hĭs-tŏğ'-rą-phў, *s.* [Pref. *histo-*, and Gr. γραφή (*graphē*) = a description.] A description or treatise on organic tissues.

hĭs'-tŏĭd, *a.* [Gr. ἱστος (*histos*) = tissue, and εἰδος (*eidos*) = form.] A term applied to tumours whose contents closely resemble the normal texture of the body. (*Dunglison.*)

hĭs-tō-lŏğ'-ĭc, hĭs-tō-lŏğ'-ĭc-ăl, *a.* [Eng. *histology(y)*; *-ic*, *-ical.*] Relating to histology sometimes applied to the natural transformations that occur in the tissues of the embryo.

hĭs-tō-lŏğ'-ĭc-ăl-lў, *adv.* [Eng. *histological*; *-ly.*] In a histologic manner; with reference to histology.

hĭs-tŏl'-ō-ğĭst, *s.* [Eng. *histolog(y)*; *-ist.* One who is skilled in or devoted to the study of histology.

hĭs-tŏl'-ō-ğў, *s.* [Pref. *histo-*, and Gr. λόγος (*logos*) = a discourse.]

Phys. & Anat.: That branch of anatomy called by Quain textural, which examines and treats of the minute structure of the com

ponent tissues of the body. Frey divides histology into three sections: (1) General Histology, which considers the tissues of which the human and animal body generally is composed; (2) Histology (proper), in which the various tissues, in their anatomical relations and composition, are considered; and (3) Topographical Histology, dealing with the more minute structure of the organs and systems of the body. This branch of anatomy is, according to Barker, the translator of Frey's excellent work on the subject, "essentially the product of German industry."

hĭs-tŏl'-ў-sĭs, *s.* [Pref. *histo-*, and Gr. λύσις (*lusis*) = a dissolution, a parting.]

Path.: The decay and dissolution of the organic tissues and of the blood. It includes the various forms of retrograde metamorphosis and degeneration.

hĭs-tŏn'-ō-mў, *s.* [Pref. *histo-*, and Gr. νόμος (*nomos*) = a law.] The history of the laws which govern the formation and arrangement of organic tissues.

***hĭs-tŏr'-ĭ-ăl,** ***hĭs-tŏr'-ĭ-ăll,** *a.* [Eng. *history*; *-al.*] Of or pertaining to history; historical.

"The *historiall* partes of the Bible, be ryght necessary for to be redde."—*Sir T. Elyot: The Governour*, bk. i., ch. xi.

hĭs-tŏr'-ĭ-ăn, ***his-tor-i-en,** *s.* [Fr. *historien*, from *histoire* = history.]

1. One who writes or compiles history; an historiographer.

"*Historians* do borrow of poets."—*Raleigh: Hist. of the World*, bk. ii., ch. xxi., § 6.

2. One who is learned or versed in history.

***hĭs-tŏr'-ĭ-an-ĕss,** *s.* [Eng. *historian*; *-ess.*] A female writer of history.

hĭs-tŏr'-ĭc, ***hĭs-tŏr'-ĭck, hĭs-tŏr'-ĭc-ăl,** ***his-tor-ic-all,** ***hys-tor-ic-al,** *a.* [Lat. *historicus*, from *historia* = history; Fr. *historique.*] Perraining to or connected with history; of the nature of or containing history; suited for history.

"Living in *historic* pages."

historic-sense, historical-sense, *s.* The faculty of readily grasping and understanding historical facts in all their bearings, and of vividly picturing them in the mind with due regard to all their accessories.

hĭs-tŏr'-ĭ-căl-lў, *adv.* [Eng. *historical*; *-ly.*] In an historical manner; according to the facts of history; in manner of a history.

"He setteth down *historically*, the kind and manner of this plague."—*Usher: Annals* (an. 3574).

***hĭs-tō-rĭ'-cian,** *s.* [Eng. *histor(y)*; *-ician.*] An historian.

"John de Hexam and Richard de Hexham [were] two notable *historicians*."—*Holinshed: Richard I.* (an. 1199).

***hĭs-tō-rĭç'-ĭ-tў,** *s.* [Eng. *historic*; *-ity.*] The quality of being historical.

***hĭs-tŏr'-ĭ-çīze,** *v.t.* [Eng. *historic*; *-ize.*] To record or relate in manner of a history; to chronicle.

***hĭs'-tŏr-ĭĕd,** *a.* [Eng. *history*; *-ed.*] Recorded or related in history.

***hĭs-tŏr'-ĭ-ĕr,** *s.* [Eng. *history*; *-er.*] An historian.

***hĭs tŏr-ĭ-ĕtte',** *s.* [Fr.] A short history or account; a tale.

***hĭs-tŏr'-ĭ-fў,** ***his-tor-i-fie,** *v.t.* [Eng. *history*; *-fy.*] To relate or record in or as history. (*Brewer: Lingua*, ii. 1.)

hĭs-tŏr-ĭ-ŏg'-ra-pher, ***hĭs-tŏr'-ĭ-ō-grăph,** *s.* [Gr. ἱστοριογράφος (*historiographos*), from ἱστορία (*historia*) = history, and γράφω (*graphō*) = to write; Fr. *historiographe.*] A writer of history; an historian. The title is given as a mark of honour in European courts to some learned historians.

"The duties which belonged to him as *historiographer* of France."—*Macaulay: Hist. Eng.*, ch. xix.

***hĭs-tŏr-ĭ-ō-grăph'-ĭc, hĭs-tŏr-ĭ-ō-grăph'-ĭc-ăl,** *a.* [Gr. ἱστοριογραφικός (*historiographikos*).] Of or pertaining to historiography.

***hĭs-tŏr-ĭ-ŏg'-raph-ў,** *s.* [Gr. ἱστοριογραφέω (*historiographeō*) = to write history: ἱστορία (*historia*) = history, and γράφω (*graphō*) = to write.] The art or occupation of an historian.

***hĭs-tŏr-ĭ-ŏl'-ō-gў,** *s.* [Gr. ἱστορία (*historia*) = history, and λόγος (*logos*) = a discourse.] A discourse on history; the knowledge of history.

***hĭs'-tŏr-īze,** *v.t.* [Eng. *histor(y)*; *-ize.*] To relate or record as history; to chronicle.

"Under which is *historized* the whole Ovidian Metamorphosis."—*Evelyn: Memoirs; Tivoli.*

hĭs'-tŏr-ў, *s.* [Lat. *historia* = a narrative of past events; history; Gr. ἱστορία (*historia*) = a learning or knowing by inquiry, inquiry, the knowledge so obtained, information; ἵστωρ (*istōr*), ἵστωρ (*histōr*) = knowing, learned; ἵστω (*istō*), 3rd sing. imper. of οἶδα (*oida*) = know.

1. The record of the most important bygone events in human history chronologically arranged, with an inquiry into their causes, and the lessons which they afford with regard to human conduct; "philosophy teaching by example." This field of investigation is more limited than that of the Greek ἱστορία (*historia*), which was used for research on any subject [Etym.], and somewhat more extensive than the Roman *historia*, which would now be called annals. Accounts of the same event are distorted according to the prejudices or interest of the person by whom they are related. Historians in such cases must attempt with cold impartiality to ascertain and record the actual truth. Every nation has great gaps in its early history, which verbal tradition and written poetry have had no scruple in filling up with almost purely mythic narratives; the historian must attempt to discriminate truth from fable. The "eyes of history" are geography and chronology. The locality of an event should be recorded, and the date at which it occurred. If a wrong date be introduced the chain of causation in historic events is destroyed at that point; for every event is in that respect the consequent of those which preceded it, and the antecedent of those which followed. History is often divided into sacred and profane. The former is that obtained from the Bible; the lesson which it was designed to teach is what has been called "God in History." Profane, by which is meant not unholy, but secular, history, specially records the rise and growth of the several Gentile nations. A history may be of an institution, as, Church History (q.v.), the History of the Royal Society; an invention or art gradually perfected, as, the History of Shipbuilding, the History of Painting; or of thought, as, the History of Philosophy. Branches of history now named separately are Archæology and Biography (q.v.).

2. A narrative; a verbal relation of important occurrences.

3. A book treating of the history of any country, people, science, or art.

"Two sides of my library are filled with *histories*."—*Lytton: Godolphin*, ch. xii.

history-painting, *s.* [Historic-painting.]

history-piece, *s.* A painting or drawing representing historical events or actions.

"His works resemble a large *history-piece*, where even the less important figures have some convenient place."—*Pope.*

***hĭs'-tŏr-ў,** *v.t.* [History, *s.*] To relate or record, to chronicle. (*Shakesp.*: *2 Henry IV.*, iv. 1.)

***hĭs'-trĭ-ŏn,** *s.* [Lat. *histrionem*, acc. of *histrio* = a buffoon.] A stage-player, an actor.

Hist., Phil., &c.: The system of philosophy contained in or to be deduced from the writings of Thomas Hobbes (1588-1679), one of the most celebrated of the English Deists of the seventeenth century. Among his friends and contemporaries were Ben Jonson, Bacon, Lord Herbert of Cherbury, Gassendi, and Galileo. He was a voluminous writer: his chief works are his *Elements of Philosophy*, the *Treatise on Human Nature*, and *Leviathan*, or *The Matter and Form of a Commonwealth, Ecclesiastical and Civil.* His philosophy was materialist. On page 5 of the *Elements*, he says: "Subjectum philosophiæ, sive materia circa quam versatur, est corpus omne cujus generatio aliqua conceipi potest;" and similar expressions abound. He was the precursor of modern Sensationalism (q.v.). "There is no conception in a man's mind, which hath not at first totally or by parts been begotten upon the organs of sense." (*Leviathan*, ch. i.) In politics he was a strenuous upholder of absolute monarchy in its extremest form, going so far as to make the sovereign the supreme arbiter in faith and morals.

"*Hobbism* soon became an almost essential part of the character of the fine gentleman."—*Macaulay: Hist. Eng.*, ch. ii.

3. *Zool.: Sus scrofa.* It has two large teeth or tusks in the upper, and two in the lower jaw. The body is covered with bristles. When wild it is of a dark brindled hue, with soft short hairs beneath its bristles. In domestication, the ears become long, sharp-pointed, and pendent. The hog when wild feeds on beech-mast, chestnuts, acorns, crabs, haws, sloes, hips, grass, roots, &c. When he can obtain miry ground to wallow in, he regales himself with frogs, ferns, the roots of rushes, &c. In domestication he will eat almost anything in the least digestible—an uncleanly but valuable scavenger. The flesh of the hog when fresh is called pork, when cured, ham or bacon. The ordinary lard is used for culinary purposes, the fat of the bowels for greasing axles. The bristles are made into brushes, pencils, &c.; the skin into leather. The dung is only less valuable as manure than that of the sheep. There are many breeds of hogs, as the Chinese, the Suffolk, the Berkshire, the Shropshire, the Northampton, the Neapolitan, &c. The point aimed at, is to make the animal quickly increase in flesh without increasing in bone. They are very largely kept in the United States, where maize forms an admirable food, and from which great quantities of pork products are exported. Their period of gestation is about four months; they begin to breed at the age of eighteen months to two years, do so twice in a year, and bring forth from five to ten, or more, at a time. The hog is wild in Continental Europe, many parts of Asia, and in North Africa. [Sus.]

hōled, *pa. par.* or *a.* [Hole, *v.*]

holed-stones, *s. pl.*

Anthrop.: The name given to a peculiar kind of prehistoric stone monument, presumably sepulchral, occurring in Devonshire and Cornwall, in Ireland, Wales, Scotland, France, Cyprus, and India. The size of the hole varies considerably—some being no larger than a half-crown, others affording a passage for the human body. Their purpose is unknown. Fergusson (*Rude Stone Monuments*, p. 255) speaks of the peculiarly binding nature of an oath sworn by persons joining hands through a holed-stone at Stenois; in Scotland libations are poured through holed-stones in honour of Browny, the supposed guardian of bees; local superstition ascribes a curative property to the Men-an-tol, near Penzance, and people still creep through it in the hope of being cured of rheumatism. Miss A. W. Buckland suggests that this stone may have been connected with sun-worship.

"I never heard of libations being poured through these Cornish *holed-stones*."—*Miss A. W. Buckland*, in *Journ. Anthrop. Instit.*, ix. 153.

* **hole-full,** *a.* [Mid. Eng. *hole* = whole, and Eng. *full*.] Wholesome.

Hō'-lĭ, Hō'-leē, Hoô'-lĭ, *s.* [Mahratta, &c. *Holi* = (1) the festival so called (see def.), (2) the pile of wood then burnt.]

Religious Feasts: The great Hindoo spring festival, commencing on the full moon of the month Phalgun, and lasting for five days. It is meant to commemorate the gambols to which the god Krishna was addicted during his youth. The great amusement of the natives, who crowd the streets during the festival, is to throw red powder, made of lac and flour with rose-water, at each other. The tongue is allowed greater license than at other times, and much obscenity in word and action takes place, especially among such wild tribes as the Bheels around the village of Ahar. The Holi constitutes the Saturnalia of the Hindoos. Sir Joseph Hooker considered the amusements more childish than those of the Carnival. One of the Holi practices is to make what would be called in Europe April fools.

"Some slovenly Natch girls were dancing before us, kicking up clouds of dust, and singing, or rather bawling through their noses the usual indelicate hymns in honour of the *Hooli* festival."—*Hooker: Himalayan Journals*, i. 339.

hŏl-lō', *s.* [HOLLA.]

hŏl'-lōw, * **hol-ow,** * **hol-owe,** * **hol-lowe,** * **holgh,** * **hol-ough,** * **hol-u,** * **holw,** * **holwe,** *a., s., & adv.* [A.S. *holh* (a. & s.), *holg.*]

A. *As adjective:*

I. *Literally.*

1. Containing a cavity or empty space, natural or artificial; having a void space within; not solid, excavated.

"The son of Japhet, of immortal fame,
Brought the bright sparks clandestine from above
Closed in a *hollow* cane." *Cooke: Hesiod*, 847.

2. Sunken, concave.

"With *hollow* eye, and wrinkled brow."
Shakesp.: Merchant of Venice, iv. 1.

II. *Figuratively:*

hōl'-mite, hōlm'-ĕs-īte, *s.* [Named after Dr. Holmes, of Montreal.]

Min.: The same as SEVBERITE (q.v.).

hŏl'-mĭ-ŭm, *s.* [Etym. doubtful.]

Chem.: An element said to exist along with

erbium ; it is supposed to have an atomic weight of about 162. It belongs to the earth metals.

hŏl-ō-, *pref.* [Gr. ὅλος (*holos*).] Whole, entire.

hŏl-ō-blas'-tĭc, *a.* [Pref. *holo-*, and Gr. βλαστός (*blastos*) = a sprout, a shoot; offspring.]

Biol.: Having the whole yolk-mass, or its greater part, directly formative or germinal. (Used of the mammalian ovum.) (*Quain.*)

hŏl-ō-câust, *s.* [Lat. *holocaustum*, from Gr. ὁλόκαυστον (*holokauston*), neut. of ὁλόκαυστος ὁλόκαυτος (*holokaustos, holokautos*), from ὅλος (*holos*) = whole, entire, and καίω (*kaiō*), fut. καύσω (*kausō*) = to burn.] A sacrifice, the whole of which was consumed by fire, nothing being retained; such sacrifices were practised by the Jews. The word is now sometimes applied to a general sacrifice of life or slaughter.

"Not by sacrifices, or *holocaustes*, but by simple and plaine worde."—*Udal: Matthew* ix.

hŏl-ō-çĕph'-ą-lī, *s. pl.* [Pref. *holo-*, and Gr. κεφαλή (*kephalē*) = the head.]

Ichthy.: An order of fishes founded by Siebold, and adopted by Sir Richard Owen, in whose classification it is the tenth order. They have the endoskeleton cartilaginous, the exoskeleton as placoid granules; most of the fins with a strong spine for the first ray; the ventrals abdominal; the gills laminated, attached by their margins, a single external gill aperture; no swim bladder; the intestine with a spiral valve. He includes under it the families Chimæroidei and Edaphodontidæ. (*Owen: Compar. Anat.: Fishes* (1846), p. 50.)

¶ It is now made a sub-order of Elasmosbranchii.

hŏl-ō-crўp'-tĭc, *a.* [Pref. *holo-*, and Eng. *cryptic* (q.v.).] Concealing wholly or entirely; specifically applied to a cipher capable of being read only by those who have the key.

hŏl-ō-crўs'-tăl-lĭne, *a.* Pref. *holo-*, and Eng. *crystalline.*]

Min., Petrol., &c.: Wholly crystalline.

"Which are not of a glassy texture, but for the most part *holocrystalline*."—*Dr. Bunsujiro Koto: Proc. Geol. Soc.* (1883-4), No. 453, p. 83.

hŏl'-ō-graph, *s.* & *a.* [Pref. *holo-*, and Gr. γράφω (*graphō*) = to write.]

B. *As adj.:* A term applied to a writing or document wholly in the handwriting of the person from whom it proceeds; holographic.

hŏl'-ō-grăph-ĭc, hŏl-ō-grăph'-ĭc-ąl, *a.* [Eng. *holograph*; *-ic.*] The same as HOLOGRAPH, *a.* (q.v.).

hŏl-ō-grăph'-ĭc-ąl, *a.* [HOLOGRAPHIC.]

hŏl-ō-hē'-drąl, *a.* [Pref. *holo-*, and Gr. ἕδρα (*hedra*) = seat, bottom, foundation, base.]

Crystallog. & Min.: Having all the corresponding parts of a crystal similarly replaced.

hŏl-ō-mĕ-tăb'-ō-lą, *s.* [Pref. *holo-* (q.v.), and Gr. μεταβολή (*metabolē*) = change.]

Entom.: A sub-class of insects, consisting of those which undergo a complete metamorphosis, the larva, pupa, and perfect insect being all unlike each other; the larva is vermiform and the pupa quiescent. It contains the orders Aphaniptera, Diptera, Lepidoptera, Hymenoptera, Strepsiptera, and Coleoptera (q.v.).

hŏl-ō-mĕt-ą-bŏl'-ĭc, *a.* [Mod. Lat. *holometabol(a)* (q.v.); Eng., &c. suff. *-ic.*]

Entom.: Of or belonging to insects which undergo a complete metamorphosis.

hŏl-ŏm'-ĕ-tĕr, *s.* [Pref. *holo-*, and Gr. μετρον (*metron*) = a measure.] An instrument for taking all sorts of measurements; a pantometer.

hŏl-ō-phăn'-ĕr-oŭs, *a.* [Pref. *holo-*, and Gr. φανερός (*phaneros*) = visible; Fr. *holophanère.* (*Larousse.*)] A term applied to the metamorphoses of insects when they are complete.

hŏl-ō-phō'-tąl, *a.* [Pref. *holo-*, and Gr. φῶς (*phōs*), genit. φωτός (*phōtos*) = light.]

Optics: A name applied to such forms of lighting-apparatus for lighthouses as utilize the whole of the available light, by subjecting it all to the collective action of the instrument.

hŏl-ō-phrăs'-tĭc, *a.* [Pref. *holo-*, and Gr. φραστικός (*phrastikos*) = expressive, eloquent.]

Philol.: A term applied to characters expressing a whole word.

"A *holophrastic* or word-sentence alphabet."—*Wilson: Prehistoric Man*, ii. 67.

hŏ-lŏp'-ĭ-dæ, *s. pl.* [Mod. Lat. *holop(us)*; Lat. fem. pl. adj. suff. *-idæ.*]

Zool. & Palæont.: A family of Crinoidea. The species are permanently fixed, but have no stem.

hŏ-lŏp-tўch'-ĭ-dæ, hŏ-lŏp-tўch'-ĭ-ĭ-dæ, *s. pl.* [Mod. Lat. *holoptych(ius)*; Lat. fem. pl. adj. suff. *-idæ.*]

Palæont.: In Sir Richard Owen's classification a family of ganoidean fishes, sub-order Lepidoganoidei. Dr. Traquair places it as a family under the Crossopterygidæ, defining it as having two dorsal fins; the ventrals subacutely lobate; the scales thick, sculptured. Genera, Holoptychius, Glyptolepis, Dendrodus (?), Cricodus (?).

hŏ-lŏp-tўch'-ĭ-ŭs, *s.* [Pref. *holo-*, and Gr. πτύχιος (*ptuchios*) = folded, doubled up; πτύξ (*ptux*), πτυχός (*ptuchos*) = a fold.]

Palæont.: A genus of fossil fishes, the typical one of the family Holoptychiidæ (q.v.). The scales, which are very large, are deeply corrugated, and the bones of the head sculptured and granulated; the teeth are large, conical, and of great density. Found in the Upper Old Red Sandstone of Dura Den, &c., in Scotland. A fine specimen of *Holoptychius nobilissimus*, called after the Rev. Jas. Noble, was presented by him to the British Museum.

hŏl'-ō-pŭs, *s.* [Pref. *holo-* (q.v.), and Gr. πούς (*pous*) = foot.]

Zool.: The typical genus of the family Holipidæ (q.v.). The basals of the first, if not also the second, radials are fused together.

hŏl-ō-sĕ-rĭç'-ĕ-oŭs, *a.* [Pref. *holo-*, and Lat. *sericeus* = silken.]

Bot.: Silky; so completely covered with minute hairs that it feels soft.

hŏl-ŏs'-tĕ-ĭ, hŏl-ŏs'-tĕ-ą, *s. pl.* [Pref. *holo-*, and Gr. ὀστέον (*osteon*) = a bone.] [HOLOSTEUM.]

Ichthy.: A sub-order of ganoid fishes, established by Prof. Müller for those ganoids which have a completely bony skeleton. Its divisions are into two groups or tribes, Cyclifera, comprising the families Amiidæ, Cœlacanthidæ, and Holoptychiidæ; and Rhombifera, with the families Polypteridæ, Dipteridæ, Acanthodidæ, Pycnodontidæ, Lepidosteiidæ, Lepidotidæ, Palæoniscidæ, and Dapediidæ.

hŏl-ŏs'-tĕ-ŭm, *s.* [Cf. Lat. *holosteon*; Gr. ὁλόστεον (*holosteon*) = a whitish plantain, *Plantago holostea.* The name *holosteon* = all bone; pref. *hol-*, and ὀστέον (*osteon*) = a bone. This is not the modern genus Holosteum, the species of which are nowhere bony.

Bot.: A genus of Caryophyllaceæ, tribe Alsineæ. Sepals five, petals five, toothed or notched; stamens three to five, rarely ten. Styles three; capsule sub-cylindrical, one-celled, many-seeded, opening at the extremity with six teeth. Known species three. One, *Holosteum umbellatum* (Umbelliferous Jagged Chickweed), occurs wild in the east of England, &c., but is rare.

hŏl-ō-stŏm'-ą-ta, *s. pl.* [Pref. *holo-*, and Gr. στόματα (*stomata*), pl. of στόμα (*stoma*) = the mouth.]

Zool.: Sea-snails; gasteropodous molluscs, the shells of which have the margin of the aperture entire, and generally covered with a horny or shelly, usually spiral operculum. The animal has a short retractile muzzle, and gills pectinated or plume-like. They are generally vegetable feeders. It contains the families:

Naticidæ, Pyramidellidæ, Carthiadæ, Melaniadæ, Turritellidæ, Littorinidæ, Paludinidæ, Neritidæ, Turbinidæ, Haliotidæ, Fissurellidæ, Calyptræidæ, Patellidæ, Dentaliadæ, and Chitonidæ.

hŏl-ō-stŏm'-ą-toŭs, *a.* [Mod. Lat. or Gr. *holostomat(a)*; Eng. suff. *-ous.*]

Zool.: Having the aperture of the mouth entire. Used of gasteropodous molluscs.

† **hŏl'-ō-stōmc,** *s.* [Pref. *holo-*, and Gr. στόμα (*stoma*) = mouth.]

Zool.: A mollusc of the sub-order Holostomata (q.v.).

hŏl'-ō-thrĭx, *s.* [Pref. *holo-*, and Gr. θρίξ (*thrix*) = hair.]

Bot.: The typical genus of the family Holotrichidæ (q.v.).

† **hŏl'-ō-thūre,** *s.* [HOLOTHURIA.]

Zool.: An animal of the genus Holothuria; the family Holothuridæ, or the order Holothuroidea (q.v.).

hŏl-ō-thūr'-ĭ-ą, *s.* [Lat. *holothuria* (*Pliny*) = a water polype, Cuvier thought an Alcyonum, Gr. ὁλοθούριον (*holothourion*) (*Aristotle*) = a kind of zoophyte.]

Zool.: The typical genus of the family Holothuridæ, and the order Holothuroidea.

HOLOTHURIA ELEGANS.

¶ *Holothuria Argus* or *edulis*, Trepang, is collected on the north-east coast of Australia and elsewhere, and exported to China, where it is regarded as a great delicacy. [TREPANG.]

hŏl-ō-thūr'-ĭ-ąn, *a.* & *s.* [HOLOTHURIA.]

A. *As adj.:* Of or belonging to the animals of the genus Holothuria.

B. *As subst.:* An animal of the genus Holothuria. (*Nicholson: Zool.* (3rd ed.), p. 207.)

hŏl-ō-thūr'-ĭ-dæ, hŏl-ō-thūr'-ĭ-ą-dæ, *s. pl.* [Lat. *holothuri(a)*; fem. pl. adj. suff. *-idæ.*]

Zool.: The typical family of Holothuridea, sub-order Pneumonophora.

hŏl-ō-thūr-ĭd'-ē-ī, hŏl-ō-thūr-o͞ī'-dē-ą, *s. pl.* [Lat. *holothuria*, and Gr. εἶδος (*eidos*) = form.]

I. *Zool.:* Sea Slugs. An order of Echinodermata. The body is vermiform, the ambulacral tubes extend from the mouth to the apex, but there are no regular ambulacral and inter-ambulacral plates. The genital organs have a single aperture towards the anterior part of the body. The larvæ are vermiform, or have no skeleton. (*Huxley.*) The species are called Sea-cucumbers, Trepangs, and Bêches-de-mer. The order is divided into two sub-orders, Apneumona, with no respiratory tree, and Pneumonophora, with a respiratory tree. The Holothuroidea are found in most seas; their metropolis is in the Pacific Ocean.

2. *Palæont.:* The harder parts of the Holothuroidea have been found as early as the Carboniferous period.

hŏl-ō-thūr'-o͞ĭd, *a.* & *s.* [HOLOTHUROIDEI.]

A. *As adj.:* Of or belonging to the order Holothuridea.

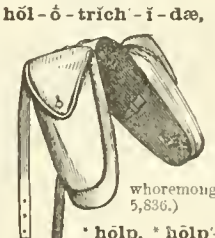
B. *As subst.:* An animal of that order.

"Or it may be wanting, as in the Asteroids and *Holothuroids*."—*Nicholson: Zool.* (ed. 5), p. 182.

hŏl-ō-thūr-o͞ī'-dē-ą, *s. pl.* [HOLOTHURIDEA.]

hŏl-ō-trĭch'-ĭ-dæ, *s. pl.* [Mod. Lat. *holothrix* (genit. *holotrichis*); Lat. fem. pl. adj. suff. *-idæ.*]

Bot.: A family of orchids, tribe Ophryeæ.



HOLSTER.

holour, *s.* [O. Fr. *houlier.*] A whoremonger. (*Chaucer: C. T.*, 5,836.)

"By God's *holy* mother." *Shakesp.: Richard III.*, i. 3.

3. Consecrated or set apart for some sacred use or service; sacred, hallowed, reverend.

¶ *Holy* conveys the most comprehensive idea; *pious* and *devout* designate most fervour of mind. *Piety* lies in the heart, and may appear externally; but *devotion* does not properly exist except in an external observance: a man *piously* resigns himself to the will of God in the midst of his afflictions; he prays *devoutly* in the bosom of his family. *Divine* . . . signifies either belonging to the Deity or being like the Deity; but from the looseness of its application it has lost in some respects the dignity of its meaning. What is *holy* and *sacred* is in its very nature *divine*; but the *divine* is not always either *holy* or *sacred*. (*Crabb: Eng. Synon.*)

* **holy-ale,** *s.* A rural festival; a holiday. [Ale.]

Holy-alliance, *s.*

Hist.: An alliance formed at Paris on Sept. 26, 1815, between the Emperors of Russia and Austria and the King of Prussia. On Dec. 25, 1816, the Emperor of Russia, who was believed to be the real author of the alliance, publicly made known its character. These sovereigns undertook in future to act on the principles of the Gospel, and to support each other's authority. Other sovereigns were invited to join the alliance. The King of England declined the invitation, for this, among other reasons, that the constitution of his country did not permit him personally to sign such a document. Ultimately it became apparent that the object of the alliance was to support absolutism against popular aspirations for constitutional government, and when in 1821 the allied sovereigns invited the co-operation of other countries in putting down revolution at Naples, Lord Castlereagh sent an unfavourable reply. Byron (*Don Juan*, xiv. 83) sneers at the "Holy Three," and to Moore's *Fables for the Holy Alliance* were prefixed Dryden's lines (*Virgil: Georg.* iv. 162, 163)—

"Clip the wings
Of these high-flying arbitrary kings."

The Holy Alliance subsequently interfered in the Spanish Revolution, and then disappeared from history.

"Apprehensions at all resembling those which, in our age, induced the *Holy Alliance* to interfere in the internal troubles of Naples and Spain."—*Macaulay: Hist. Eng.*, ch. ii.

holy-coat, *s.*

Ch. Hist., Relics, &c.: A coat, alleged to be the seamless vestment worn by Jesus at his trial, and for which, after his crucifixion, the soldiers cast lots (John xix. 23, 24). Several exist, the custodians of each claiming that it is the genuine one. The exhibition of one of them at Treves, in 1844, and the actual worship of the coat by some of the pilgrims who resorted thither in multitudes, led to a small secession from the Roman Church, headed by two priests, Ronge and Czerski. The tendencies of Ronge were towards rationalism, those of Czerski towards evangelical Protestantism. Neither rose to much power.

holy-cross, *s.*

I. *Ch. Hist., Relics, &c.*: What is alleged to be the actual cross on which Christ suffered. Rufinus, Socrates, Sozomen, Theodoretus, &c., relate the discovery (about A.D. 326) by Helena, mother of Constantine, of three crosses, with the inscription in Greek, Hebrew, and Latin. The question which of the three was the cross of Jesus was satisfactorily settled when, on the suggestion of Macarius, bishop of Jerusalem, trial was made which could work miracles, and it was found that only one had this power. Eusebius, who was well acquainted with the parties concerned, seems never to have heard of these alleged discoveries.

II. *Religious Orders or Societies*:

*1. An order of Augustinian canons, suppressed in the seventeenth century.

2. A religious order established in 1834 in France. The members devote themselves to education and works of mercy, the brothers teaching boys trades, agriculture, &c., the sisters educating girls and visiting the sick.

3. A society consisting of clerical members of the ritualistic school of the English Church. It was founded in 1855.

Holy-cross day: [*Holy-rood day*].

* **holy-cruel,** *a.* Cruel by being too virtuous. (*Shakesp.: All's Well*, iv. 2.)

holy-cyamus, *s.*

Bot.: The Nebumlium, a water-lily, the Pythagorean-bean.

Holy Family, *s.* The Infant Saviour, the Virgin Mary, Joseph, Elizabeth, Anna, and John the Baptist. A picture in which all or most of the subordinate personages are introduced is called a "holy family."

holy-father, *s.* The English rendering of *Sancte Pater*, a title used in addressing the Pope.

holy-fire, *s.*

1. The fire kindled on Holy-Saturday. [Holy-week.]

2. That at Jerusalem is maintained by the Greek and Armenian priests to be miraculous. At the time of its expected appearance, the Church of the Holy Sepulchre is crowded, and the eagerness to light torches and candles when the sacred fire first appears is so great that it requires great energy on the part of the Mohammedan police to keep a semblance of order, and even then people are at times trampled to death. The liberality of the devotees is much excited by the alleged miraculous enkindling of the holy fire.

holy-flower, *s.*

Bot.: *Peristeria alata.*

Holy Ghost, Holy Spirit, *s.*

1. *Theol.*: Literal renderings of the Greek Πνεῦμα Ἅγιον (*Pneuma Hagion*), but ghost is from Anglo-Saxon *gást* = the breath; a spirit, a ghost, and spirit from Latin *spiritus* = a gentle breath of air; a spirit, a soul. He is regarded as the third Person of the Trinity, and He is named with the other two Divine Personages in the baptismal formula (Matt. xxxviii., 19), and the apostolic or other benediction (2 Cor. xiii. 14). He is identical with the Comforter (q.v.) or Paraclete (q.v.) (John xiv. 26). Whether he "proceeds" from the Father alone, or from the Father and Son, is a question which has divided the Eastern and Western Churches. [Greek Church, Procession.] On the day of Pentecost the apostles and others, "were all filled with the Holy Ghost, and began to speak with tongues as the Spirit gave them utterance" (Acts ii. 4).

2. *Bot.* (*Of the form* holy-ghost): *Angelica sylvestris.*

holy-grail, *s.* [Grail.]

holy-grass, *s.* [Hierochloe.]

holy-herb, *s.*

Bot.: *Verbena officinalis.*

Holy-land, *s.* A name applied to Palestine, because there Jesus was born, lived, and was crucified, and there Christianity was first preached. The Chinese Buddhists call India the holy-land, because it was the birthplace of Sakya-Muni. [Holy-places.]

holy-league, *s.*

Hist.: A league, founded in 1576, to prevent Henry of Navarre, who at the time was a Protestant, from ascending the French throne. At his becoming a Roman Catholic, in 1593, the league was dissolved and he became king under the title of Henry IV. The name was also given to a combination formed in 1508 by Pope Julius II. with Louis XII. of France, Maximilian of Germany, Ferdinand III. of Spain, and some Italian princes, against Venice.

* **holy-office,** *s.* The Inquisition (q.v.).

* **Holy of Holies,** *s.*

Judaism: The inner or most sacred apartment, first of the Tabernacle, then of the Temple, into which none was permitted to enter but the high priest, and he only once a year, and then "not without blood." It was separated from the Holy Place or Outer Chamber by a veil. [Sanctum, Veil.]

holy-one, *s.* Any being or person specially holy.

¶ *The Holy One, Holy One of Israel*:

Scrip.: Jehovah. The appellation is common in Isaiah (q.v.).

holy-orders, *s. pl.* [Orders.]

holy-places, *s.pl.* The sites in Palestine connected with the ministry and death of Christ, especially those traditionally located within the Church of the Holy Sepulchre. The Greek and the Latin Churches both claim the custody of these sacred spots, the Russians supporting the pretensions of the former, the French those of the latter. A dispute about these holy places led, in 1853, to the Russo-Turkish war, followed, in 1854, by the Crimean war.

Holy Roman Empire, *s.*

Hist.: The name given to that German empire which began under Otho I., A.D. 962.

holy-rood, *s.* A cross or crucifix; especially one placed on the rood-beam in churches over the entrance to the chancel. [Rood.]

Holy-rood day: A festival kept on Sept. 14, in commemoration of the exaltation of the Saviour's Cross. Also called holy cross day.

holy-rope, *s.*

Bot.: *Eupatorium cannabinum.*

Holy Saturday, *s.* In the Roman Church, the vigil of Easter. [Holy-week.]

* **holy-seat,** *s.* The Popedom.

"The reserving of the first fruits of all vacant benefices to the *holy-seat*."—*Clarendon: Religion & Policy*, ch. v.

holy-sce, *s.* [See.]

holy-sepulchre, *s.*

1. The sepulchre in which the body of Jesus was laid between his death and his resurrection.

2. The traditional or other site of that grave.

3. The Byzantine Church built at Jerusalem on what is by some believed to be the site of the sepulchre.

¶ *Order of the Holy Sepulchre*:

Hist. & Her.: An order founded by Godfrey of Bouillon, the commanding chief, revived by Pope Alexander VI., in 1426, and reorganised in 1847 and 1868.

holy-stone, *s.* A kind of soft sandstone used with sand for scrubbing or cleaning the decks of vessels.

¶ Smyth (*Sailor's Word-Book*) suggests that holy-stone was "so called from being originally used for Sunday cleaning, or obtained by plundering churchyards of their tombstones, or because the seamen have to go on their knees to use it."

holy-stone, *v.t.* To scour or scrub with holy-stone.

holy-synod, *s.*

Eccles. & Ch. Hist.: A council established at St. Petersburg to act for the Emperor of Russia in ecclesiastical affairs, he being the earthly head of the Greek Church in Russia. The first president was Stephen Javorski, in the seventeenth century. (*Mosheim.*)

holy-thistle, *s.*

Bot.: *Carduus marianus*, called also *Silbyum marianum*, &c.

Holy Thursday, *s.* In the English Church, Ascension Day (q.v.); in the Roman Church the Thursday in Holy-week, Maundy-Thursday (q.v.). Its title to saactity is that on that day what the Roman and Greek Churches

consider the Sacrifice, and the English Church and Dissenters the Sacrament of the Eucharist, was instituted.

holy-water, *s.*

Ch. Hist., Ritual, &c.: In Numbers (viii. 7) we read of the preparation of a "water of purifying," and (xix. 9) of a "water of separation," which is "a purification for sin." The custom passed with appropriate ceremonies into the early Christian Church. Water is blessed, or made "holy-water," by any cleric in priest's orders. The service may be consulted in the *Rituale Romanum*, or in English in Rock's *Hierurgia* (ch. xiii.). In the Roman Church it is usual to sprinkle the altar and the people with holy-water immediately before the high-mass on Sundays, "to remind them that they ought to appear before God with a pure heart, to awaken penitential feelings, and to wash them from venial sins." (*Goschler.*) In the Greek Church this observance is confined to the first Sunday of the month. Holy-water is also employed whenever anything is solemnly blessed. Stoups of it are placed at the entrance of all churches; into them the people dip their fingers, signing themselves with the cross with the right hand, touching first the forehead, then the centre of the breast, then the left and right shoulders, saying, "In the name of the Father, and of the Son, and of the Holy Ghost." Catholics keep it in their houses, and use it on retiring to rest, on getting up, before undertaking a journey, or in time of temptation. [LUSTRATION.]

"Clean washed in *holy-water* from the count
Of things terrestrial."
E. B. Barrett: Aurora Leigh, vii.

* *Holy-water clerk:* The person by whom the holy-water is carried; a name given to a poor scholar, to whom this duty was assigned.

Holy-water fount: The vessel containing the holy-water, also called the holy-water stock, stoup, stone, or vat.

"Here stands the *holy-water stoup!*"
Longfellow: The Golden Legend, ii.

Holy-water sprinkler:

1. A brush or bundle of twigs, &c., used for sprinkling the holy-water over the congregation. An aspergillum (q.v.).

* 2. An offensive weapon used in the middle ages, called also a morning star (q.v.).

holy-week, *s.*

Ch. Hist., Ritual, &c.: The week from Palm Sunday to Holy Saturday, or Easter-even, inclusive. In the English Church, each day has a proper epistle and gospel, and the psalms on Good Friday are also proper. Of late the observance of holy-week has become general; in many churches passion-music (q.v.) is chanted and, especially among the Ritualists, the services on Good Friday have direct reference to the solemn events which that day commemorates. In the Roman Church the whole of the functions are peculiarly solemn and impressive; those of Holy Thursday are marked by pomp and splendour. On Palm Sunday the Passion according to St. Matthew is chanted, and palm-branches (or sprigs of willow in their stead) are blessed and distributed to the people (John xii. 12–15). Tenebræ are chanted on Wednesday, Holy Thursday, and Good Friday; on Holy Thursday at high-mass two Hosts are consecrated, the oils and chrisms are blessed, the Host for Friday's mass is carried processionally to the reposoir, whilst the "Pange Lingua" is sung, and, in cathedral churches and religious houses, the Washing of the Feet (John xiii. 4–17) follows. On Good Friday the altar and sanctuary are stripped of their ornaments, the Passion according to St. John is chanted, the crucifix is unveiled and kissed by the clergy, kneeling, whilst the Improperia or Reproaches are sung, the consecrated species is brought from the reposoir, and the celebrant says the Mass of the Præsanctified (q.v.); on Holy Saturday there is the blessing of the fire, the paschal candle, and the baptismal font.

holy-wells, *s.pl.*

Compar. Relig.: In very many forms of faith water plays an important part, and is invested with miraculous powers. In the Old Testament we have the cleansing of Naaman in the Jordan (2 Kings v.); in the New, the man "blind from his birth," who "washed and came seeing" (John ix.), and the "troubling of the water" (John v.). Horace (*Od.*, iii. 13) and Ovid (*Fast.*, v. 300) speak of sacrifices to holy-wells, and Juvenal (vi. 533) mentions the oracular fountain of Jupiter Ammon. When Paganism was yielding to a purer faith, laws were passed forbidding the old adoration at fountains; but Tylor says (*Prim. Cult.*, ii. 195), "with a varnish of Christianity, and sometimes the substitution of a saint's name, water-worship has held its own to our day." St. Winifred's Well, at Holywell, Flintshire, has still many votaries; Ireland and Scotland can show their holy-wells in scores of parishes, and in the latter country some bush adjacent, bedecked with rags, testifies to the survival, in a mutilated form, of the rite of sacrifice. Bishop Hall (*Invisible World*, bk. ii., § 8) bears witness to a cure wrought upon a cripple by the waters of St. Madern's Well, and the virtues of the "water which sprang forth under the hands of Bernadette at the command of the Virgin Mary" (*Lasserre: Notre Dame de Lourdes*, liv. iii., § vii.) are boldly asserted by that Parisian journalist, who claims to be one subject among many of its miraculous efficacy.

"Cornish-folk still drop into the old *holy-wells* offerings of pins, nails, and rags, expecting from their waters cure for diseases, and omens from their bubbles."—*Tylor: Primitive Culture*, ii. 195.

holy-writ, *s.* The Holy Scriptures.

"Scieoce severe, or word of *Holy Writ*."
Wordsworth: Excursion, bk. vii.

* **hō'-lỹ,** *v.t.* [HOLY, *a.*] To canonize. (*Massinger: Virgin Martyr*, ii. 2.)

* **hŏl'-ỹ-dāy,** *s.* & *a.* [HOLIDAY.]

hŏm'-age (age as **ĭj),** *s.* [O. Fr.; Fr. *hommage*, from Low Lat. *homaticum*, *hominium*, from Lat. *homo* (genit. *hominis*) = a man.]

1. The service paid and fealty professed to a sovereign or superior lord; the acknowledgment made by a vassal to his lord on being invested with a fee; fealty.

"The vassal or tenant upon investiture did usually *homage* to his lord; openly and humbly kneeling, being unglrt, uncovered, and holding up his hands both together between those of the lord, who sate before him; and there professing, that 'he did become his man, from that day forth, of life and limb and earthly honour:' and then he received a kiss from his lord. Which ceremony was denominated homagium, or manhood, by the feudists, from the stated form of words, devenio vester homo."—*Blackstone: Comment.*, bk. ii., ch. 4.

2. Obeisance; respect paid by external action; deference; respectful regard; court.

"Paying ignominious *homage* to all who possessed influence in the courts."—*Macaulay: Hist. Eng.*, ch. ii.

3. Reverential attitude towards the Divine Being; reverence; devoutness.

"For sothly he ne should have than in all his bi corage to sinne, but yeve his herte and body to the service of Jesu Crist, and thereof do him *homage*."—*Chaucer: The Persones Tale.*

¶ *Homage* is paid or done to superior endowments; *court* is paid to the contingent, not the real, superiority of the individual. . . . The Romans did *homage* to the talent of Virgil, by always rising when he entered the theatre; men do *homage* to the wisdom of another, when they do not venture to contradict his assertions or call his opinions in question.

homage-ancestral, *s.* Homage which has been rendered for particular lands by the same tenant and his ancestors to the same lord and his ancestors from time immemorial.

homage-jury, *s.* A jury in a court-baron, consisting of tenants that do homage, who are to inquire and make presentments of the death of tenants, surrenders, admittances, and the like. (*Wharton.*)

Home-office, *s.* The office in which the affairs of the Home-department are transacted.

Home Rule, *s.*

Hist. & Polit.: The government of a country by means of an authority which has its seat within the country itself, the members of the government being elected by and from its inhabitants. As generally used, the expression indicates local self-government, as distinguished from national independence; a country being said to be in the enjoyment of Home Rule when it manages for itself concerns which are peculiarly its own, while being still subject to the jurisdiction of an Imperial Government. The term is used specifically in connection with Irish politics. For some years previously to 1885 a Home Rule party, composed of a section of the Irish representatives, had existed in the House of Commons, and at the General Election in that year, fought under the new Reform Acts, it was largely reinforced, its number in 1887 being 86, or about five-sixths of the Irish representation. In deference to this expression of Irish feeling, Mr. Gladstone, as the head of an Administration which had been formed with special view to this question, brought forward a Bill for establishing in Dublin a Parliament, with an Executive Government, for dealing with all affairs specially Irish. The measure was accepted by Mr. Parnell on behalf of the Home Rulers as a reasonable fulfilment of Irish demands, but it excited a great deal of opposition, not only from the Conservatives, but also from an important section of the Liberal party, and was defeated by a large majority, together with a Bill for buying out the Irish landlords. Mr. Gladstone then (1886) appealed to the country, and the result being unfavourable, resigned, and was succeeded by the Marquis of Salisbury When Mr. Gladstone again became Prime Minister, he introduced another Home Rule Bill, which passed the House of Commons, but was defeated in the House of Lords. In 1894 Mr. Gladstone resigned.

Home-rulcr, *s.*

hōme'-līke, *a.* [Eng. *home*; *-like*.] Resembling or like home; homely.

* **hōme'-lĭ-lў,** *adv.* [Eng. *homely*; *-ly*.] In a homely manner; rudely, inelegantly, plainly, without affectation.

hōme'-lĭ-nĕss, *s.* [Eng. *homely*; *-ness*.] The quality or state of being homely; plainness; freedom from affectation; simplicity; absence of polish or refinement.

* **hōme'-lĭng,** *s. & a.* [Eng. *home*; suff. *-ling*.]

A. *As subst.:* A native; one born in the country.

B. *As adj.:* Native.

hōme'-lў, *a. & adv.* [Eng. *home*; *-ly*; Ger. *heimlich*.]

A. *As adjective:*

1. Living at home with one.

"And the enemyes of a man ben thei that ben *homely* with him."—*Wycliffe: Matthew* x. 36.

2. Familiar with one, whether living at home with him or not.

"With all these men I was right *homely*, and conversed with them long and oft."—*Foxe: Book of Martyrs; Exam. of W. Thorpe.*

3. Of plain features; plain, not beautiful, not handsome. (It is not so strong as ugly.)

"It is for *homely* features to keep home."
Milton: Comus, 748.

4. Plain, as intended for home use; not fine or elegant.

5. Without affectation; plain, simple, unvarnished.

"That *homely* prudence the want of which has often been fatal to men of brighter genius and of purer virtue."—*Macaulay: Hist. Eng.*, ch. xiii.

* **B.** *As adv.:* Plainly, simply, rudely, without affectation.

"There he was welcomed of that honest syre,
And of his aged beldame *homely* well."
Spenser: F. Q., VI. ix. 17.

hōme'-lўn, *s.* [Eng. *home*; second element doubtful.]

Ichthy.: Raia miraletus, the home sand ray, or spotted ray, a British fish.

homelyn-ray, *s.*

Ichthy.: The same as HOMELYN (q.v.).

hōmo'-mādc, *a.* [Eng. *home*, and *made*.] Made at home or in one's own country; not manufactured abroad.

hō-mĕ-ŏp'-ą-thў, *s.* [HOMŒOPATHY.]

¶ For this word and others derived therefrom, see under HOMŒOPATHY.

hō'-mĕr (1), † **chō'-mĕr,** *s.* [Heb. חֹמֶר (*chhomer*) = a tide, a wave of the sea; cement, dirt, filth, mire; a mound, a heap; the measure mentioned in the definition.]

Metrol.: A Hebrew dry measure containing ten baths or ephahs (Ezek. xlv. 14). It is mentioned also in Lev. xxvii. 16; Isa. v. 10, and Hos. iii. 2. Estimates of its capacity founded on Josephus make it 86·696 gallons; founded on statements by the Rabbins, 44·286.

¶ The homer or chomer must not be confounded with the omer or ghomer (Heb. עֹמֶר (*ghomer*) = (1) a sheaf of corn, (2) a measure) mentioned in the Bible only in Exod. xvi. 16, 18, 33, 36, which was the tenth part of an ephah, and therefore only the hundredth part of the homer.

hō'-mĕr (2), *s.* [HOEMOTHEA.]

Hō-mĕr (3), *s.* [The Greek epic poet.] (For def. see etym.)

Homer's moly, *s.*

Bot.: Allium magicum.

hōm'-ĕr (4), *s.* [Eng. *hom(e)*; *-er*.]

1. A pigeon trained to fly home from distant places.

2. A home-run. (*Baseball Slang.*)

Hō-mĕr'-ĭc, * **Hō-mĕr'-ĭc-ąl,** *a.* [Lat. *Homericus*, from Gr. Ὁμηρικός (*Homērikos*), from Ὅμηρος (*Homēros*) = Homer.] Of or pertaining to Homer, or to the poems that bear his name; resembling the poetry or verse of Homer.

Hō-mĕr'-ŏl'-ō-ğў, *s.* [Eng. *Homer*, the great Greek poet, and Gr. λόγος (*logos*) = a discourse.] A discourse regarding Homer; a study of the personality and date of Homer, and the origin and character of his poems.

"Mr. Gladstone, in treating of Homer, or, to use his own word, of *Homerology*."—*Times*, March 3, 1876.

hōme'-sĭck-nĕss, *s.* [Eng. *home*, and *sickness*.]

Mental Path.: A vehement desire to return home, which sometimes affects exiles, especially the Swiss and other natives of mountainous countries. If the mental disease be trifled with, it affects the physical health, and sometimes terminates fatally. [NOSTALGIA.]

* **home-sock-en,** *s.* [HAMESUCKEN.]

* **hōme'-spēak-ĭng,** *a.* [Eng. *home*, and *speaking*.] Direct, plain, forcible; speaking to the point.

hōme'-spŭn, *a. & s.* [Eng. *home*, and *spun*.]

A. *As adjective:*

1. *Lit.:* Spun or wrought at home; homemade; of domestic manufacture.

"Instead of *homespun* coifs were seen
Good pinners."
Swift: Baucis & Philemon.

2. *Fig.:* Plain, homely, unaffected, rude.

B. *As substantive:*

1. *Lit.:* Cloth spun or made at home.

"Making . . . the modest apparel of *homespun*."
Longfellow: Miles Standish, iii.

* 2. *Fig.:* A coarse, homely, simple, or unpolished person.

"What hempen *homespuns* have we swaggering here?"
Shakesp.: Midsummer Night's Dream, iii. 1.

hōme'-stâll, *s.* [Eng. *home*, and *stall.*] A homestead (q.v.).

"[Thy] *homestall* thatched with leaves."
Cowper. Task, i. 64.

hōme'-stĕad, *s.* [Eng. *home*, and *stead.*]

1. A native seat or place.

2. A person's dwelling-house, with the ground and buildings immediately adjoining.

"The smouldering *homestead*."
Tennyson: Princess, v. 122.

hōme'-ward, hōme'-wards, *adv.* & *a.* [A.S. *hámweard.*]

A. *As adv.:* In the direction of home; towards home; towards one's native country.

B. *As adj.:* Being in the direction of or towards home; directed or turned towards home.

"At evening to his *homeward* walk."
Wordsworth: Ruth.

homeward-bound, *a.* Bound or destined for home or one's native country; especially applied to ships returning home from a foreign country, or to persons coming home by sea.

hŏm-ĭch'-līne, *s.* [Gr. ὁμιχλη (*homichlē*) = a mist, a fog; suff. *-ine*; Ger. *homichlin.*]

Min.: A variety of Barnhardite (q.v.).

hŏm'-ĭ-çĭd-al, *a.* [Eng. *homicid(e)*; *-al.*]

1. Of or pertaining to a homicide; murderous, deadly, bloody.

"The troop forth issuing from the dark recess,
With *homicidal* rage, the king oppress."
Pope: Homer; Odyssey iv. 718.

2. Inclined to homicide: as, *homicidal* mania (q.v.).

homicidal-mania, *s.*

Path.: A species of moral insanity in which there is an irresistible tendency to take the life of one or more human beings. Called also androphonomania.

hŏm'-ĭ-çīde, *s.* [Fr., from Lat. *homicidium*, from *homo* = a man, and *cædo* = to kill; Sp. *homecida*; Ital. *omicida*; also Lat. *homicida* = a murderer, a homicide. Puttenham, in 1589, classed this word among those then quite recently introduced into English. Another writer, a little earlier, ranks it among "inkhorn terms, smelling too much of the Latin." (*Trench: English Past & Present*, p. 37.)]

I. *Ordinary Language:*

1. The act of killing a human being.

* 2. Destruction.

"The *homicide* of names is less than lives."
Dryden. (*Todd.*)

3. One who kills another; a manslayer.

"Every man's conscience is a thousand swords,
To fight against that bloody *homicide*."
Shakesp.: Richard III., v. 2.

II. *Law:* (See extract).

"*Homicide* is of three kinds; justifiable, excusable, and felonious. . . . 1. Justifiable *homicide* is of divers kinds: (1) Such as is owing to some unavoidable necessity, without any will, intention, or desire, and without any inadvertence or negligence in the party killing, and therefore without any shadow of blame. (2) *Homicides* committed for the advancement of public justice are: (*a*) Where an officer, in the execution of his office, kills a person that assaults and resists him. (*b*) If an officer, or any private person, attempts to take a man charged with felony, and is resisted, and, in the endeavour to take him, kills him. (*c*) In case of a riot or rebellious assembly, as has already been explained. (*d*) Where the prisoners in a gaol, or going to a gaol, assault the gaoler or officer, and he in his defence kills any of them, it is justifiable for the sake of preventing an escape. . . . (3) Such *homicide* as is committed for the prevention of any forcible and atrocious crime is justifiable by the law of nature. . . . 2. Excusable *homicide* is of two sorts; either *per infortunium*, by misadventure or *se defendendo*, upon a principle of self-preservation. *Homicide per infortunium* or misadventure, is where a man doing a lawful act, without any intention of hurt, unfortunately kills another. . . . 3. Felonious *homicide* is an act of a very different nature from the former, being the killing of a human creature, of any age or sex, without justification or excuse. This may be done either by killing one's self or another man."—*Blackstone: Comment.*, bk. iv., ch. 14.

* **hŏm'-ĭ-form,** *a.* [Lat. *homo* = a man, and *forma* = form, shape.] Having the form of a man; in human shape.

hŏm-ĭ-lĕt'-ĭc, *a.* & *s.* [Gr. ὁμιλητικός (*homilētikos*), from ὁμιλία (*homilia*) = a homily (q.v.).]

A. *As adjective:*

1. Pertaining to familiar intercourse; conversational, companionable, familiar.

2. Pertaining or relating to homiletics; hortatory.

B. *As subst.:* [Homiletics].

homiletic-theology, *s.* The same as Homiletics (q.v.).

hŏm-ĭ-lĕt'-ĭc-al, *a.* [Eng. *homiletic*; *-al.*] The same as Homiletic (q.v.).

"These are commonly called *homiletical* vertues."—*Wilkins: On Real Character*, pt. ii., ch. viii.

hŏm-ĭ-lĕt'-ĭcs, *s.* [Homiletic.] The art of preaching, so far as this is an art; sacred eloquence; the method of addressing an audience on the highest subjects which, with the Divine blessing, is most likely to affect the consciences, the hearts, and the intellect of the hearers.

* **hŏm-ĭl-ĭ-ăr'-ĭ-ŭm,** *s.* [Low Lat., from Lat. *homilia* = a homily.] A collection of homiliea.

¶ Used specially of a book of homiliea issued in the eighth century by or under the auspices of Charlemagne. (*Mosheim*, &c.)

hŏm'-ĭ-lĭst, *hŏm'-ĕ-lĭst, *s.* [Eng. *homil(y)*; *-ist.*] The writer or composer of homilies; a preacher.

"To this good *homelist* I have been ever a(n)hborn."
—*Beaum. & Flet.: Scornful Lady*, iv.

hŏm'-ĭ-lў, *s.* [Lat. *homilia*, from Gr. ὁμιλία (*homilia*) = living together, instruction, meeting, assembly, a homily, a sermon.]

Ord. Lang., Rhetoric, &c.:

1. *At first: Homilia* (homily), and *logos* (discourse), were used interchangeably; then the former term, as Photius says, was limited to a familiar conversation between the preacher and the congregation, who questioned each other.

2. *In modern times:* The term has often been used for a discourse read from a book, as distinguished from a discourse of one's own composition. Two Books of Homilies, to be read in churches when no sermon was prepared, were published in England by authority in 1547 and 1562. The first is attributed mainly to Cranmer and the latter to Jewell.

"*Homilies* were a third kind of readings usual in former times; a most commendable institution, as well then to supply the casual, as now the necessary defect of sermons."—*Hooker.*

3. *Now:* Often used for a simple discourse of the preacher's own composition on some practical subject.

4. *Fig.:* A tedious exhortation by any one, a father for instance, on some moral point.

"As I have heard my father
Deal out in his long *homilies*."
Byron: Cain, ii. 2.

hŏm'-ĭ-nēs, *s. pl.* [Homo.]

hōm'-ĭng, *a.* [Eng. *hom(e)*; *-ing.*] Coming or returning home; specifically applied to such birds as the carrier-pigeon, which have the faculty of returning home from great distances to the place where they are reared or kept.

hŏm-ĭn'-ĭ-dæ, *s. pl.* [Lat. *homo*, genit. *homin(is)*; fem. pl. adj. suff. *-idæ.*] [Homo.]

Zool., &c.: A family sometimes constituted for the reception of Homo or man. Now more generally called by Prof. Huxley and others Anthropidæ (q.v.).

hŏm'-ĭ-nў, *s.* [West Indian *auhûminea* = parched corn.] Maize hulled and coarsely ground, used as food when mixed with water and boiled or baked.

* **hom-li-ness,** *s.* [Homeliness.]

* **hom-ly,** *a.* [Homely.]

* **hŏm'-mŏc,** *s.* [Hummock.]

* **hŏm'-mŏ-nў,** *s.* [Hominy.]

hō'-mō (pl. **hŏm'-ĭ-nēs**), *s.* [Lat. = a human being, including a man, woman, or child.]

Anthropol., Zool., &c.: Linnæus's name for the crowning genus of the class Mammalia. He makes it include two species, *Homo sapiens*, or man, and *H. Troglodytes*, or the chimpanzee. Cuvier limited his order Bimana to man. Prof. Huxley also excludes the chimpanzee and other apes from the family Anthropidæ of the order Primates, and relegates them to the Simiadæ. [Anthropidæ.]

hŏ-mŏ-, hŏm-ŏ, *pref.* [Gr. ὁμός (*homos*) = same.] A prefix used to signify sameness, similarity, or likeness; the opposite to hetero- (q.v.).

hŏm-ô-car'-poŭs, *a.* [Pref. *homo-*, and Gr. καρπός (*karpos*) = fruit.]

Bot.: Having all the fruits of a flower-head exactly alike. (*Treas. of Bot.*)

hŏm-ô-çĕn'-trĭc, *a.* [Pref. *homo-*, and Gr. κεντρον (*kentron*) = a centre.] Having the same centre; concentric.

hŏm-ô-çĕr'-cal, *a.* [Pref. *homo-*, and Gr. κέρκος (*kerkos*) = tail.]

Ichthyology & Palæontology:

1. *Of a tail:* Equally lobed; having equal lobes.

2. *Of a fish:* Having an equally-lobed tail.

homocercal-tail, *s.*

Ichthy. & Palæont.: The name given by Agassiz to the caudal fin or tail of a fish when the tail, if not single, is equally divided. It is first known in the Magnesian limestone, which is of Middle Permian age, becoming more common with each new formation, till now nearly, though not quite, all the 9,000 known species of fish have homocercal tails.

hŏm-ŏch'-rō-moŭs, *a.* [Pref. *homo-*; Gr. χρωμα (*chrōma*) = colour, and Eng. suff. *-ous.*]

Bot.: Having all the flowers on a capitulum of the same colour.

hŏm-ŏd'-rō-moŭs, hŏ-mŏd'-rō-mal, *a.* [Gr. ὁμόδρομος (*homodromōs*), from ὁμός (*homos*) = same, and δρόμος (*dromos*) = a course, a running.]

I. *Bot.:* A term used when the generating spiral of a flower turns in the same direction as that of the central stem. Example, the Bird-cherry, *Prunus Padus.*

* 2. *Mech.:* Applied to levers of the second and third kinds, in which the power and weight are on the same side of the fulcrum, and so move in the same direction. [Lever.]

hō-mœ-ô-, *pref.* [Latinised form of Gr. ὅμοιος (*homoios*), and ὁμοῖος (*homoios*) = like, resembling.] Like, resembling.

* **hō-mœ-ô-mĕr'-ĭ-a,** *s.* [Gr. ὁμοιομέρεια (*homoiomereia*), from ὅμοιος (*homoios*) = like, and μερις (*meris*) = a share, a portion.] Likeness or identity of parts; homogeneity in elements.

"The doctrine of *homœomeria*, or the similarity of the parts of a body to the whole."—*Encyc. Brit.* (ed. 9th), iii. 35.

hō-mœ-ô-mĕr'-ĭ-æ, *s. pl.* [Homœomeria.] (See extract.)

"Anaxagoras of Clazomenæ, born about B.C. 500, reduced all origin and decay to a process of mingling and unmingling, but assumed as ultimate elements an unlimited number of primitive qualitatively determinate substances, called by him seeds of things, by Aristotle elements consisting of homogeneous parts, and by later writers (employing a term formed from Aristotelian phraseology), *homœomeriæ*."—*Ueberweg: Hist. Philos.*, i. 63.

hō-mœ-ô-mĕr'-ĭ-an-ĭsm, *s.* [Eng., &c. *homœomeria*; *n* connective, and suff. *-ism.*] The Anaxagorean system of philosophy. [Homœomeriæ.]

"Atomism is *homœomerianism* stripped of phenomenal qualities."—*Lewes: Hist. Philosophy*, i. 102.

* **hō-mœ-ô-mĕr'-ĭc, * hō-mœ-ô-mĕr'-ĭc-al,** *a.* [Homœomeria.] Pertaining to or having sameness of parts or elements; supporting or receiving the doctrine of the homogeneity of elements.

hō-mœ-ŏm'-ĕr-ў, *s.* [Homœomeria.] The same as Homœomerianism (q.v.).

"Next, let's examine with a curious eye
Anaxagoras's philosophy,
By copious Greece termed *homœomery*."
Creech: Lucretius, i. 843.

* **hō-mœ-ŏm'-ĕ-trў,** *s.* [Gr. ὁμοῖος (*homoios*) = like, and μέτρον (*metron*) = a measure.] The same as Homœomeria (q.v.).

hō-mœ-ô-morph'-ĭsm, *s.* [Homœomorphous.] The same as Isomorphism (q.v.).

hō-mœ-ô-morph'-oŭs, *a.* [Gr. ὁμοιόμορφος (*homoiomorphos*) = of like form: ὁμοῖος (*homoios*) = like, and μορφή (*morphē*) = form.] The same as Isomorphous (q.v.).

† **hō'-mœ-ô-păth,** *s.* [Fr. *homéopathe.*] The same as Homœopathist (q.v.).

hō-mœ-ō-păth'-ĭc, hō-mœ-ō-păth'-ĭe-ạl, *a.* [Eng., &c. *homœopath(ie)*; *-ic, -ical.*]

1. *Lit.:* Of or belonging to homœopathy: as, *homœopathic* medicines.

2. *Fig.:* In infinitesimally small doses; on a very small scale: as, a *homœopathic* measure of reform.

hō-mœ-ō-păth'-ĭc-ạl-lў, *adv.* [Eng. *homœopathical*; *-ly.*] In a homœopathic manner; according to the rules or principles of homœopathy.

hō-mœ-ŏp'-ạ-thĭst, *s.* [Eng. *homœopath(y)*; *-ist.*] One who practises or believes in homœopathy; a homœopath.

hō-mœ-ŏp'-ạ-thў, *s.* [Gr. ὅμοιος (*homoios*) = like, similar, and πάθη (*pathē*) = a passive state, suffering, or πάθος (*pathos*) = suffering.]

Med.: The system of medicine which aims at curing diseases by administering medicines which produce symptoms similar to those which they are designed to remove. The Latin dictum on the subject is "Similia similibus curantur." Its founder was Samuel Hahnemann (1755–1843), born at Meissen in Upper Saxony. In 1790, while investigating the operation of Peruvian bark in intermittent fevers, he found that a dose of the bark which he took produced in himself phenomena like those of the fever it was designed to combat. Pursuing his experiments, he believed he had discovered a general law that like was cured by like, and in 1810 published his *Organon of the Healing Art*, in which he explained his system, calling it for the first time homœopathy. Thus to rub the affected part with snow is beneficial in frostbite, so are heated spirits of wine or oil of turpentine in burns. He appealed also to the effects of vaccination in preventing or mitigating small-pox. This, however, is not curing like by like, though there is a certain analogy between the two cases. Hahnemann and his followers have attempted experimentally to ascertain what therapeutic agent to prescribe in each case. Experience has shown them that the doses should be exceedingly minute. The great majority of medical men reject the system, though it has many advocates here and abroad. Homœopathy is opposed to Heteropathy or Allopathy (q.v.).

hŏm-œ-ō-sâu'-rĭ-ạ, *s. pl.* [[Pref. *homœo-*, and Gr. σαῦρος (*sauros*), σαύρα (*saura*) = a lizard.]

Zool.: A genus of fossil Saurians, resembling lizards; two species occur in the Solenhofen schist. (*Larousse.*)

hŏm-œ-ō-sō'-lĕn, *s.* [Pref. *homœo-*, and Lat. *solen*, Gr. σωλήν (*sōlēn*) = a channel, a gutter, a pipe.]

Palæont.: A genus of Polyzoa, family Tubuliporidæ. *Homœosolen ramulosus* is from the Upper Chalk of Lewes, in Sussex. (*Morris.*)

hŏm-œ-ō-zō'-ĭc, hŏm-ōĭ-ō-zō'-ĭc, *a.* [Pref. *homœo-*, and Gr. ζῷον (*zōon*) = a living being, an animal.]

Phys. Geog. & Biol.: A term applied to zones or belts upon the earth's surface containing similar forms of life. They are not identical with zones of latitude, but depend partly on the present climate of the regions, partly on the former geological distribution of land and sea.

¶ Prof. Edward Forbes constructed a map representing the homœozoic belts of marine life.

hŏm'-ŏg'-ạ-mŏŭs, *a.* [Gr. ὁμόγαμος (*homogamos*) = married together: pref. *homo-*, Gr. γάμος (*gamos*), and Eng. suff. *-ous.*]

Botany:

1. Having all the flowers of a capitulum hermaphrodite. (*Lindley.*)

2. Having the stamens and pistils ripe at the same time. This occurs in most cases in hermaphrodite flowers. [1.]

hŏm ŏg'-ạ-mў, hŏm-ō-gā'-mĭ-ạ, *s.* [Homogamous.]

Botany:

1. The name given by Sprengel and others to a composite plant having the flowers of the capitule all hermaphrodite.

2. A term used when both stamens and pistils in an hermaphrodite flower were "formed exactly at the same period"—*i.e.*, came to maturity together. The same as Synacmy.

hŏm-ō găn'-glĭ-ā'-ta, *s. pl.* [Pref. *homo-*, and Mod. Lat. *ganglia*; Gr. γάγγλιον (*ganglion*) = a tumour under the skin.] [Ganglion.]

Zool.: A name given by Professor Owen to the class Articulata, from the symmetrical disposition of its nervous centres. The body presents a correspondingly symmetrical form. (*Owen: Compar. Anat. Invertebrata* (1843), pp. 13, 14.)

hŏm-ō-găn'-glĭ-āte, *a.* [Homoganglata.]

Zool.: Having a ganglionic nervous system, in which the ganglia are symmetrically arranged; of or belonging to the Homoganglata. (*Owen*, &c.)

"We find in fact at the lowest step of the great *homoganglliate* series of the Animal Kingdom, an extensive group of vermiform animals."—*Owen: Invertebrata*, p. 130.

* **hŏm'-ō-gēne,** *a.* [Fr. *homogène*, from Gr. ομογενής (*homogenēs*).] The same as Homogeneous (q.v.).

"Know you the sapor pontick? sapor styptick?
Or, what is *homogene* or heterogene?"
Ben Jonson: Alchymist, ii. 5.

* **hŏm-ō-gĕn'-ĕ-ạl,** *a.* [Eng. *homogen(e)*; *-al.*] Homogeneous.

"Forth steps the spruce philosopher, and tells
Of *homogeneal* and discordant springs
And principles." *Cowper: Task*, ii. 190.

hŏm-ō-gĕn'-ĕ-ạl-nĕss, *s.* [Eng. *homogeneal*; *-ness.*] The quality or state of being homogeneous; homogeneity.

hŏm-ō-gĕ-nē'-ĭ-tў, *s.* [Eng. *homogene*; *-ity.*] The quality or state of being homogeneous; sameness or uniformity of parts or elements.

"I say, that it cannot but be a very strong presumption, that Nature intends an utter *homogeneity* of matter before she fall upon her work of efformation; she so constantly bringing it to as perfect *homogeneity* as we can possibly discern with our senses."—*More: Antidote against Atheism*, App. ch. 11, s. 8.

hŏm-ō-gĕn'-ĕ-oŭs, *a.* [Gr. ὁμογενής (*homogenēs*) = of the same kind; ὁμός (*homos*) = same, and γένος (*genos*) = kind.]

I. *Ord. Lang.:* Consisting or composed of the same or similar parts or elements; of the same kind or nature; uniform in structure or elements.

"It was against the first principles of Nature, and false, that a heap or accumulation should be, and not be of *homogeneous* things."—*State Trials; Earl of Strafford* (an. 1640).

II. *Technically:*

1. *Nat. Science:* Of the same kind; having a uniform nature, principle, or composition; having a uniform substance or structure. (*Loudon, Harvey*, &c.)

2. *Alg.:* A polynomial is said to be homogeneous when each term contains the same number of literal factors; thus, $ax^2 + bxy + c^3$ is a homogeneous expression.

homogeneous-light, *s.*

Optics: Light purer than an ordinary luminous body can furnish. To obtain a pure yellow, common salt should be placed in the flame of a Bunsen's burner. To produce a pure red, ordinary light must be transmitted through glass coloured with suboxide of copper. For a pure blue, ordinary light should be transmitted through a glass trough with parallel sides. Called also monochromatic light.

¶ *Homogeneous vitreous rocks:*

Petrol.: Vitreous rocks which are apparently homogeneous. The microscope, however, shows that they enclose microliths. (*Rutley.*)

hŏm-ō-gĕn'-ĕ-oŭs-nĕss, *s.* [Eng. *homogeneous*; *-ness.*] The quality or state of being homogeneous; homogeneity.

"The *homogeneousness* of the population drew even the foreign element of the Church into harmony with the established institutions."—*Gardiner & Mullinger: Introd. to English Hist.*, ch. ii.

hŏm-ō-gĕn'-ĕ-sĭs, *s.* [Pref. *homo-*, and Eng. *genesis* (q.v.).]

Biol.: The ordinary method of biogenesis, that is, of the production of living matter from that which is itself living matter of the same kind. By homogenesis "the living parent gives rise to offspring which passes through the same cycle of changes as itself; like gives rise to like." (*Huxley: Pres. Add. Brit. Assoc.*, 1870, p. lxxvii.) It is opposed to Xenogenesis (q.v.).

hŏm-ō-gĕn-ĕt'-ĭc, *a.* [Eng., &c., *homogen(esis)*; *-etic.*] Of or belonging to, or connected with homogenesis (q.v.).

hŏm'-ō-gĕnș, *s. pl.* [Pref. *homo-*, and Gr. γεννάω (*gennaō*) = to produce.]

Botany:

1. A name given by Lindley, in 1839, to Exogens.

2. A name given by Lindley to such exogens as have only one zone of wood, however old, instead of annual zones. Examples, the Nepenthaceæ, &c.

* **hŏm'-ŏg'-ĕn-ў,** *s.* [Gr. ὁμογένεια (*homogeneia*), from ομογενής (*homogenēs*) = of the same kind.] Joint or like nature.

"Every part returneth to his nature, or *homogeny*. —*Bacon: Nat. Hist.*, § 333.

¶ The word has been revived by some biologists to signify the same as homology, but embodying in the etymology, in a way that homology does not, the idea of evolution.

hŏm'-ō-grăph, *s.* [Gr. ὁμός (*homos*) = same, and γράφω (*graphō*) = to write.]

1. *Mil.:* A system of telegraphic signals by means of a white pocket-handkerchief.

2. *Philol.:* A word which has exactly the same form as another, but is of a different origin and meaning: as *fair*, the noun = a market, and *fair*, the adjective = handsome, &c.

hŏm-ō-grăph'-ĭc, *a.* [Eng. *homograph*; *-ic.*]

1. *Geom.:* A term applied to two figures so related that to any point in one only one point in the other corresponds, and *vice versa*; whilst to points situated in a line in either correspond collinear points in the other; also to rows of points, pencils of light, &c.

2. *Orthog.:* Of or pertaining to homographs or homography; employing the same character always to represent the same sound.

hŏm'-ŏg'-rạ-phў, *s.* [Eng. *homograph*; *-y.*]

Orthog.: The representation of each distinct sound by a distinctive character, which is employed for that sound only.

hŏm-ōĭ-ō-, *pref.* [Gr. ὁμοῖος or ὅμοιος (*homoios*) = like, resembling, similar.] [Homœo.]

hŏm-ōĭ-ŏp'-tō-tŏn, *s.* [Gr. ὁμοιόπτωτος (*homoioptōtos*), from ὁμοῖος (*homoios*) = like, and πτῶτος (*ptōtos*) = falling.]

Rhet.: A figure of speech in which the several parts of a sentence end with the same case or a term of like sound.

Hŏm-ōĭ-oŭ'-sĭ-ạn, *a. & s.* [Gr. ὁμοιούσιος (*homoiousios*): from pref. *homoio-*, and οὐσία (*ousia*) = essence.] [Homoousian.]

A. *As adjective:*

1. Having a similar nature. [Homoousian.]

2. Of or belonging to the Homoiousians or their tenets.

B. *As substantive:*

Church Hist. (*Pl.*): A term applied to the Eusebians and to the Semiarians generally, from their asserting that the Son of God is of a substance similar to, but not the same as, the Father.

hŏm'-ōĭ-ō-zō'-ĭc, *a.* [Homœozoic.]

hŏm'-ō-lạ, *s.* [A mythological name (*Agassiz*). Ὁμολώιος (*Homolōios*) = a name of Zeus in Bœotia.]

Zool.: The typical genus of the family Homolidæ. The head is very spiny, with an advanced and denticulated projection at the middle of the forehead. Type, *Homola spinifrons*, from the Mediterranean Sea.

hŏm-ō'-lĭ-ạnș, *s. pl.* [Mod. Lat. *homol(a)*; *-ian.*]

Zool.: The family Homolidæ (q.v.).

hŏm-ōl'-ĭ-dæ, *s. pl.* [Mod. Lat. *homol(a)*; Lat. fem. pl. adj. suff. *-idæ.*]

Zool.: Homolians; a family of decapod crustaceans; sub-order Anomoura; carapace spiny and rostrate; inner antennæ long; three middle pairs of claws long and cylindrical; the fifth short, not used in locomotion.

hŏm-ōl'-ō-gāte, *v.t.* [Low Lat. *homologatum*, sup. of *homologo*, from Gr. ὁμολογέω (*homologeō*) = to agree: ὁμός (*homos*) = same, and λεγω (*legō*) = to say.] To approve, to agree to, to ratify, to establish.

hŏ-mŏl-ō-gā'-tion, *s.* [Eng. *homologat(e)*; *-ion.*]

*1. *Ord. Long.:* The act of homologating; ratification, approval.

2. *Scots Law:* A technical expression, signifying an act by which a person approves of a deed, the effect of which approbatory act is to render that deed, though in itself defective, binding upon the person by whom it is homologated.

hŏm-ō-lŏj'-ĭ-cal, *a.* [Eng. *homolog(y)*; *-ical.*] Of or pertaining to homology; homologous.

hŏm-ō-lŏj'-ĭc-al-lў, *adv.* [Eng. *homological*; *-ly.*] In a homological manner or sense.

"*Homologically* this plane in all these related species is I—i."—*Dana: Mineralog.* (5th ed.), p. 163.

hŏm-ō-lō-goû'-mĕn-a, *s. pl.* [Gr. ὁμολογούμενα (*homologoumena*) = things granted; ὁμολογέω (*homologeō*) = to speak the same language; to agree with.]

Scrip. Canon: The term used by Eusebius of Nicomedia regarding those books of the New Testament, the evidence for the genuineness and authenticity of which was deemed so strong that they were accepted at once, or at least without lengthened inquiry. The books thus designated were the four gospels, the Acts of the Apostles, thirteen of the Epistles of St. Paul (that to the Hebrews not being one), 1 John, and 1 Peter. (Opposed to Antilogoumena.)

hŏ-mŏl'-ō-goŭs, *a.* [Gr. ὁμόλογος (*homologos*) = saying the same, agreeing: ὁμός (*homos*) = same, and λόγος (*logos*) = a word, a discourse; λεγω (*legō*) = to say, to speak.] Having the same position, proportion, value, or structure; used in—

1. *Alg.:* Having the same relative proportions or value, as the two antecedents or the two consequents of a proportion.

2. *Biol.:* Of or belonging to parts constructed upon the same fundamental plan.

3. *Chem.:* A term applied to organic compounds differing from each other in composition by CH_2 or any multiple thereof, as formic acid, HCO·OH, and acetic acid CH_3·COOH are homologous. Bodies thus related exhibit for the most part a regular gradation of properties both physical and chemical. The chemical energy of bodies thus related continually decrease as their molecules become heavier. Bodies belonging to the same homologous series exhibit for the most part regular gradations of boiling points and atomic volume. (*Watts: Dict. Chem.*)

4. *Crystallog:* Essentially the same as in Geometry (q.v.).

5. *Geom.:* Applied to the parts of similar magnitudes, which are like placed. Between any two magnitudes whatever, which are similar, the ratio of any two homologous elements of the same name is always constant.

hŏm-ō-lō-grăph'-ĭc, *a.* [Gr. ὁμός (*homos*) = same; ὁλός (*holos*) = whole, and γράφω (*graphō*) = to write.] Maintaining or preserving true relations or proportions of parts as to size, form, &c.

homolographic-projection, *s.* A method of laying down portions of the earth's surface on a map or chart, so that all the portions laid down shall preserve their proper relative size and form.

hŏm'-ō-lōgue, *s.* [Homologous.]

Biol.: The same organ in different animals under every variety of form and function.

¶ Often used in the plural to signify parts presenting homology of structure. [Homology.]

hŏm-ŏl'-ō-ğў, *s.* [Gr. ὁμολογία (*homologia*) = agreement, conformity.] [Homologous.]

Biol.: The relation between parts, results from them having been developed out of the same embryonic structures; as the arm of a man, the foreleg of a quadruped, and the wing of a bird, or the "wings" of a pteropod and the tentacles of a cuttle-fish. (*Darwin & Huxley.*)

"*Homologies* of the shell."—*S. P. Woodward: Mollusca* (3rd ed.), p. 39.

¶ *Serial homology:*

Biol.: The likeness between parts which appear to be the modified development of structures similarly repeated, as the humerus and femur in vertebrata, or the maxillæ, maxillipeds, and ambulatory limbs of crustacea. (*Huxley.*)

hŏ-mŏm'-ă-loŭs, hŏ mŏm'-ăl-loŭs, *a.* [Pref. *homō-* (q.v.), and Gr. ἀλλομαι (*hallomai*) = to sprig, to leap, to bound.]

Bot.: Bending in a similar direction, as when leaves inserted all round a stem tend to turn in the same direction. (*Gray.*)

hŏm-ō-morph'-ă, *s.* [Pref. *homo-* (q.v.), and Gr. μορφή (*morphē*) = form, shape.]

Entom.: A term occasionally used for insects in which the larva is like the imago, except that it has no wings. Examples, Hemiptera, Homoptera, Orthoptera, &c.

hŏm-ō-morph'-ĭşm, *s.* [Pref. *homo-*; Gr. μορφή (*morphē*) = form, and Eng., &c. suff. *-ism.*]

Biol.: Resemblance in certain external characters occurring in classes, orders, genera, &c., which are not really akin to each other. A bat and a bird are not akin, yet they resemble each other in having wings. Some hawk-moths look like Hymenoptera; certain prickly euphorbias and cacti are so much alike before flowering that the chief method of distinguishing them is to cut them across and see if they are milky, the genera Euphorbia being so and the Cacti not.

hŏm-ō-morph'-oŭs, *s.* [Pref. *homo-*; Gr. μορφή (*morphē*) = form, and Eng. suff. *-ous.*]

Biol.: Having the same form or appearance; exhibiting the phenomena of homomorphism (q.v.).

hŏm'-ō-morph-ў, *s.* [Homomorpha.]

Bot.: A term used when the florets of the disc in a composite flower become ligulate like those of the ray.

hŏm-ō-nē'-mĕ-æ, *s. pl.* [Pref. *homo-*, and Gr. νῆμα (*nēma*) = that which is spun, yarn, a thread; νέω (*neō*) = to spin.]

Bot.: The name given by Fries to Algæ and Fungi now ranked under Thallogens.

* **hŏm'-ō-nў,** *s.* [Hominy.]

hŏm'-ō-nўm, *hom-o-nyme, *s.* [Fr. *homonyme*, from Gr. ὁμώνυμος (*homōnumos*) = having the same name: ὁμός (*homos*) = same, and ὄνυμα (*onuma*), Æolic form of ὄνομα (*onoma*) = a name.]

Philol.: A word having the same sound and perhaps also the same spelling as another, but differing in meaning; a word which represents more than one object, as *bear*, verb, and *bear*, substantive.

"The words Ios and Ion, which furnished a name for the violet hue, for a spear, and for poison, being really *homonyms*."—*Cox: Introd. to Mythology*, p. 104.

hŏm-ō-nўm'-ĭc, hŏm-ō-nўm'-ĭc-al, *a.* [Eng. *homonym*; *-ic*, *-ical.*] Of or pertaining to homonyms or homonymy.

hŏ-mŏn'-ў-moŭs, *a.* [Gr. ὁμώνυμος (*homōnumos*).] [Homonym.]

Philol.: Having the same sound and even spelling, but differing in meaning; applied to two or more things; equivocal, ambiguous.

"Equivocal words, or those which signify several things, are called *homonymous* or ambiguous."—*Watts: Logic.*

hŏ-mŏn'-ў-moŭs-lў, *adv.* [Eng. *homonymous*; *-ly.*] In an homonymous manner or sense; equivocally; ambiguously.

hŏ-mŏn'-ў-mў, *s.* [Gr. ὁμωνυμία (*homōnumia*), from ὁμώνυμος (*homōnumos*).] [Homonym.] The quality or state of being homonymous; a sameness of name with a difference in meaning; ambiguity; equivocation.

"They attribute the *homonymy* of the same names to the powers and vertues which the gods do give, and whereof they be the authors."—*P. Holland: Plutarch*, p. 24.

† **hŏm-ō-ŏm'-ĕr-oŭs,** *a.* [Pref. *homo-*, and Gr. ομηρος (*homēros*), joined together, bound.]

Bot Joined together, compact.

homomerous-lichens, *s. pl.*

Bot.: Lichens with an unstratified thallus. They are divided into Gelatinous lichens and Pictorial lichens. (*Thomé.*)

hŏm-ō-oû'-sĭ-an, *a.* & *s.* [Gr. ὁμοούσιος (*homoousios*), pref. *homo-*, and Gr. οὐσία (*ousia*) = (1) that which is one's own, one's substance, property; (2) the being, essence, or true nature of a thing.]

A. *As adj.:* Consubstantial, of the same substance or essence. Used specially, if not even exclusively, of the second Person of the Trinity whom it asserts to be of the same substance as the first. That this is the Scriptural view was authoritatively decided by the Council of Nice in A.D. 325. Opposed to Homoiousian (q.v.).

B. *As subst.* (*Pl.*): The party constituting the majority of the Council of Nice, who held homoousian doctrine, and established it by a majority of votes. After manifold troubles and vicissitudes [Arianism], it became the general faith of Christendom, and is still held and embodied in the symbolical books of the Greek, Roman, German, Swiss, English, Scottish, and other churches. The Homoousians are sometimes called from their leader Athanasians. [Athanasian.]

* **hŏm-ŏp'-ă-thў,** *s.* [Gr. ὁμός (*homos*) = same, and πάθος (*pathos*) = suffering.] Sympathy; similarity of feeling.

hŏm-ō-pĕt'-ă-loŭs, *a.* [Pref. *homo-*; Gr. πεταλον (*petalon*) = a leaf, (mod. bot) a petal, and suff. *-ous.*]

Bot.: Having petals of the same kind: used specially of compositæ which have all the flowers in the capitule modelled alike—*i.e.*, all tubular, or all ligulate.

hŏm'-ō-phōne, *s.* [Fr., from Gr. ὁμός (*homos*) = same, and φωνή (*phōnē*) = sound.]

1. A letter or character expressing a like sound to another.

2. A word or sound agreeing in sound with another, but having a different meaning and even spelling: as, *heir* and *air*, *bare* and *bear*, &c.

hŏm-ŏph'-ō-noŭs, *a.* [Gr. ὁμόφωνος (*homophōnos*), from ὁμός (*homos*) = same, and φωνή (*phōnē*) = sound.]

I. *Ordinary Language:*

1. Of the same sound or pitch; unisonous.

2. Expressing the same letter or sound with another.

II. *Philol.:* Agreeing in sound, but differing in sense.

¶ *Homophonous words or syllables:* Words or syllables having the same sound, but differently spelt; as, *air* and *heir.*

hŏ-mŏph'-ō-nў, *s.* [Gr. ὁμοφωνία (*homophōnia*); Fr. *homophonie.*] [Homophonous.]

1. *Ord. Lang.:* Sameness of sound or pitch.

2. *Greek Music:* Unison of voices or instruments of the same character.

hŏm-ō-plăş'-mў, *s.* [Pref. *homo-*, and Gr. πλάσμα (*plasma*) = anything formed or moulded, an image; πλάσσω (*plassō*) = to form, to mould.]

Biol.: The name applied by Thiselton Dyer to the phenomenon of plants belonging to one order, which, in many respects, resemble those ranked under another. Thus there are euphorbias which, when not in flower, might be mistaken for cacti, though their structure is really widely different. [Homomorphism.]

hŏm-ō-plăs'-tĭc, *a.* [Pref. *homo-*, and Eng. *plastic* (q.v.).] [Homoplasmy.]

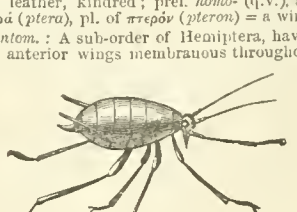
Biol.: Similarly formed, presenting the phenomenon of homoplasmy (q.v.).

† **hŏm-ŏp'-tĕr,** *s.* [Homoptera.]

Entom.: One of the homoptera (q.v.).

hŏm-ŏp'-tĕr-a, *s.* [Neut. pl. of Gr. ὁμόπτερος (*homopteros*) = of the same plumage, of like feather, kindred; pref. *homo-* (q.v.), and πτερά (*ptera*), pl. of πτερόν (*pteron*) = a wing.]

Entom.: A sub-order of Hemiptera, having the anterior wings membranous throughout.



WINGLESS APHIS, OR PLANT-LOUSE (MAGNIFIED).

When at rest they fold over the lower ones. The mouth is turned backwards, so as to spring from the back of the head. The antennæ are

small, having but few joints; ocelli present; females with an ovipositor of three-toothed blades. It is divided into three tribes, the Coccina (or Scale insects), the Phytophthiria (Aphidæ or Plant lice), and the Cicadaria (Cicadas).

hŏm-ŏp'-tĕr-an, *s.* [Mod. Lat. or Gr. *homopter(a)*; Eng., &c. suff. *-an.*]

Entom.: One of the homoptera.

hŏm-ŏp'-tĕr-oŭs, *a.* [Mod. Lat. or Gr. *homopter(a)*; Eng. suff. *-ous.*]

Entom.: Of or belonging to the homoptera; having the wings formed as in that insect sub-order.

hŏm-or'-gą-na, *s.* [Pref. *homo-*, and pl. of Gr. ὄργανον (*organon*) = an instrument, a tool, an organ.]

Bot.: One of two great primary sub-kingdoms or classes into which Prof. Schultz, on physiological principles, divides the vegetable kingdom. It consists of plants having rotation (q.v.), as opposed to cyclosis (q.v.). It contains the cellular flowerless plants and some flowering plants of low organization.

hŏm'-ō-stўled, *a.* [Pref. *homo-*, and Eng. *styled*, from *style* (*Bot.*) (q.v.)]

Bot.: Having styles all of the same length. Opposed to heterostyled (q.v.).

hŏm-ō-tăx'-ĕ-oŭs, *a.* [Eng., &c. *homotax(is)*; Eng. suff. *-eous.*]

Geol.: (See the compound).

homotaxeous-deposits, *s. pl.*

Geol.: Deposits presenting the phenomenon of homotaxis (q.v.).

hŏm-ō-tăx'-ĭ-ąl, *a.* [Eng., &c. *homotaxi(s)*; *-al.*] Contemporaneous, or nearly so; specif., occurring in strata occupying the same geological position. The same as Homotaxeous (q.v.).

hŏm-ō-tăx'-ĭ-ąl-lў, *adv.* [Eng. *homotaxial*; *-ly.*] Contemporaneously, or nearly so; specif., with reference to the geological occurrence of fossils in the same strata.

"If, however, we look at them *homotaxially* from the point of view offered by European Meiocenes, they are Meiocene."—*Dawkins: Early Man in Britain*, ch. ii.

hŏm-ō-tăx'-ĭş, *s.* [Pref. *homo-*, and Gr. τάξις (*taxis*) = an arranging.]

Geology:

1. *Gen.:* The arrangement of strata in different localities, apparently in the same relative position in the geological series, without its being known whether or not they are contemporaneous.

2. *Spec.:* The existence of the same fossils, or many of them, in strata widely separated in geographical position, or at least not occurring together, so as to have their relative age tested by proved continuity, or by visible superposition. Formerly the occurrence of such beds, even in remotely separated regions, say Britain and India, was held to prove the absolute contemporaneity of the periods at which the respective strata were deposited; now it is held that the presumption is against their being quite contemporaneous; for if the organisms came into being in one of the two regions, they would naturally take some time to spread to the other. Professor Huxley, objecting to the use of the word "contemporaneity" in such cases, proposed to substitute for it "homotaxis."

"The use of the word *homotaxis*, instead of 'synchronism,' has not, so far as I know, found much favour in the eyes of geologists. I hope, therefore, that it is a love for scientific caution, and not mere personal affection for a bantling of my own, that leads me to think that the change of phrase is of importance."—*Prof. Huxley: Presid. Address to Geol. Society.* (*Quar. Jour.*, xxvi., p. xliii.)

hŏm-ō-thăl'-ą-moŭs, *s.* [Pref. *homo-*, and Gr. θάλαμος (*thalamos*) = an inner chamber.]

Bot.: Resembling the thallus. (Used of lichens.)

hŏm-ŏt'-ō-noŭs, *a.* [Lat. *homotonus*, from Gr. ὁμότονος (*homotonos*) = of the same tone or sound; ὁμός (*homos*) = the same, and τόνος (*tonos*) = a tone; Fr. *homotone.*] Of the same tenor or tone; equable; applied to such diseases as keep a constant tenor of rise, state, and declension.

hŏm-ŏt'-ō-nў, *s.* [Homotonous.] The act or state of keeping to the same tone; monotony.

hŏm-ŏt'-rō-poŭs, hŏ-mŏt'-rō-pąl, *a.* [Gr. ομοτροπος (*homotropos*) = of the same habits in life; pref. *homo-*, and Gr. τροπός (*tropos*) = a turn, direction; way, manner, fashion.]

Bot.: Having the same direction as the body to which it belongs, but not itself being straight. (*Lindley.*)

hŏm'-ō-tўp-ąl, *a.* [Eng. *homotyp(e)*; *-al.*] Of or pertaining to a homotype; related as homotypes.

hŏm'-ō-tўpe, *s.* [Pref. *homo-*, and Eng. *type* (q.v.).]

Biol.: One of the corresponding parts in serial homology.

hŏm'-ō-tўp-ў, *s.* [Homotype.]

Biol.: The name given by Owen to what is now more generally called serial homology. [Homology.]

* **hŏm-oŭ'-sĭ-ąn,** *a.* [Homoousian.]

hŏm-ŭn'-çĭ-ōn-īte, *s.* [Lat. *homuncio* (genit. *homuncionis*) = a little man, a mannikin; dimin. of *homo.*]

Ecclesiol. & Ch. Hist.: One of the followers of Photinus, bishop of Sirmium, who, in A.D. 343, maintained that only the Father was a divine personality, that the Word of God was His understanding, and the Holy Spirit one of His attributes. Jesus he believed to have been a mere man, born by natural generation, and adopted, on account of his pre-eminent virtue and piety, by God as a son. After being censured by the councils of Antioch, Milan, and two councils at Sirmium, the last under Arian management, he was finally deposed from his office, dying in A.D. 372.

* **hŏm-ŭn'-cūle,** *s.* [Homunculus.] An Anglicised form of homunculus (q.v.). (*C. Reade: Cloister & Hearth*, ch. vii.)

* **hŏm-ŭn'-cu-lŭs,** *s.* [Lat., dimin. of *homo* = a man.] A little man; a dwarf; a mannikin.

* **hōm'-ў,** *a.* [Eng. *hom(e)*; *-y.*] Homelike. (*Davies.*)

Hŏn., *a.* [An abbreviation of Honourable (q.v.).]

hŏn̊e-kĕn'-ў-ą, hŏn̊-kĕn'-ў-ą, *s.* [Named after Gerh. Aug. Honckeny, a German botanist.]

Botany:

1. Sea-purslane; a genus of Caryophyllaceæ, tribe Alsineæ. *Honckenya peploides*, the ovate-leaved Sea-purslane, a plant growing in Britain on sandy shores, is now called *Arenaria* (*Ammodenia*) *peploides.*

2. A genus of West African Tiliaceæ, now generally called Chappertonia.

* **honde,** *s.* [Hand.]

* **honde-brede,** *s.* A handbreadth.

hŏn-dū'-raş, *s.* [See def.] A kind of mahogany brought from Honduras, a republican state of Central America.

hōne (1), * **hoone,** *s.* [A.S. *hán*; cogn. with Icel. *hein*; Sw. *hen* = a hone; Sansc. *cána* = a grindstone; Dan. *héen.*] A flat slab, usually of some description of slaty stone, used for giving a keen edge to a cutting-tool after sharpening on the grindstone. Various kinds, differing greatly in texture and hardness, are employed. Norway ragstone, water-of-Ayr, blue-stone, German-hone, and many other varieties, have a more or less extended reputation for their adaptation to special requirements, being used either dry or moistened with water or with oil. The Turkey oil-stone, which comes from Asia Minor, is generally known, and is employed for imparting an edge to chisels, plane-bits, and all the finer varieties of cutting-tools. It is usually cemented into a slab of wood and provided with a wooden cover.

"A *hone* and a parer, like sole of a boot,
To pare away grass, and to raise up the root."
Tusser: Husbandry; March.

hōne (2), *s.* [Cf. Icel. *hunn* = a knob.] A kind of swelling in the cheek.

* **hōne** (3), *s.* [Etym. doubtful.] Delay.

"Withouten *hone*." *Legends of the Holy Rood*, 109.

hōne (1), *v.t.* [Hone (1), s.] To sharpen on a hone: as, To *hone* a razor.

* **hōno** (2), *v.i.* [Fr. *hogner* = to growl, to murmur; Norm. Fr. *honer* = to hum.] To pine; to long for a thing; to give vent to longings.

"Lamenting, *honing*, [in some ed. moaning,] wishing himselfe any thing for her sake, to have opportunity to see her."—*Burton: Anatomy of Melancholy*, p. 545.

* **hōne** (3), *v.i.* [Hone (3), s.] To delay.

hŏn'-ĕst (*h* silent), *a.* [O. Fr. *honeste, honneste* (Fr. *honnête*), from Lat. *honestus* = honourable, from *honos* = honour; Sp. & Port. *honesto*; Ital. *onesto.*]

1. Upright; true; sincere; honourable; acting at all times according to the principles of justice and uprightness; full of integrity and probity; trustworthy.

"William was too wise not to know the value of an *honest* man in a dishonest age."—*Macaulay: Hist. of Eng.*, ch. xv.

2. Characterized by honesty, uprightness, and justice; honourable; just; proceeding from honourable, upright, or just motives.

* 3. Decent, fair, proper, becoming.

"Behold what *honest* clothes you send forth to bleaching."—*Shakesp.: Merry Wives of Windsor*, iv. 2.

4. Chaste; virtuous.

"She is pretty, and *honest*, and gentle."—*Shakesp.: Merry Wives of Windsor*, i. 4.

5. Open, frank, good-looking: as, an *honest* countenance.

* 6. Fair, high, unimpeached, unstained.

"Look ye out among you seven men of *honest* report."—*Acts* vi. 3.

7. It is now principally used in the meaning of trustworthy in dealings, business, or conduct, as opposed to fraudulent or cheating.

¶ For the difference between *honest* and *fair*, see Fair.

honest-hearted, *a.* Upright, true, sincere, trustworthy. (*Shakesp.: Lear*, i. 4.)

* **hŏn'-ĕst** (*h* silent), *v.t.* [Lat. *honesto*, from *honestus* = honourable.] To honour, to advise, to ornament, to grace.

"Sir Amorous! you have *honested* my lodging with your presence."—*Ben Jonson: Silent Woman*, i. 4.

* **hŏn'-ĕst-āte** (*h* silent), *v.t.* [Lat. *honestatus*, pa. par. of *honesto*, from *honestus* = honourable.] To honour.

* **hŏn-ĕs-tā'-tion** (*h* silent), *s.* [Honestate.] The act of honouring; honour; grace; adornment.

"By which virtuous qualities and *honestations* they have been more happy than others in their applications to move the minds of men."—*Mountagu: Devonte Essayes*, pt. i., treat. x., § 6.

* **hon-es-te-tee,** * **hon-es-tee,** *s.* [O. Fr. *honestet.*] Honour, virtue, decency.

"Wedded with fortunat *honestetee*."
Chaucer: C. T., 8,298.

hŏn'-ĕst-lў (*h* silent), *adv.* [Eng. *honest*; *-ly.*]

1. In an honourable, upright, or just manner; honourably; uprightly; faithfully.

"Scarcely one *honestly* furnishes the promised contingent."—*Macaulay: Hist. Eng.*, ch. xvii.

2. Fairly, frankly, openly: as, To speak one's mind *honestly.*

* 3. By honest means or dealings.

"To heap up enormous riches, *honestly* if he can."—*Knox: Winter Evenings*, even. 76.

* 4. Chastely; modestly; with chastity.

hŏn'-ĕst-ў (*h* silent), * **hon-est-e,** * **hon-ost-ee,** * **hon-est-ie,** *s.* [O. Fr. *honestet*, from Lat. *honestatem*, accus. of *honestas* = honourableness; Fr. *honnêteté*; Sp. *honestidad.*]

I. *Ordinary Language:*

1. The quality or state of being honest; honour; honourable character or conduct; uprightness; integrity; probity; justice; sincerity; good faith.

"I'll prove mine honour and mine *honesty*."
Shakesp.: Comedy of Errors, v.

* 2. Decency; what is becoming; love of what is noble and becoming.

"It is not *honesty* in me to speak
What I have seen." *Shakesp.: Othello*, iv. 1.

3. Fairness in dealings or conduct.

* 4. Chastity, modesty.

"To lay an amiable siege to the *honesty* of this Ford's wife."—*Shakesp.: Merry Wives of Windsor*, ii. 2.

II. *Bot.:* The cruciferous genus Lunaria, and spec., *L. biennis.*

hōne'-wŏrt, *s.* [Eng. *hone*, and *wort.*]

Botany:

1. The umbelliferous genus Trinia (q.v.)

Trinia vulgaris is found wild, though rarely, in the south of England.

2. *Sison Amomum*, and the genus Sison itself.

hŏn'-ĕy, *hon-y, *hun-i, *s.&a.* [A.S. *hunig*; Icel. *hunaag*; Sw. *håning*; Dan. *honning*; Dut. & N. H. Ger. *honig*; H. Ger. *honec*; O. H. Ger. *honic, honac, honag, honang.*]

A. *As substantive:*

I. *Ordinary Language:*

1. *Lit.:* In the same sense as II.

2. *Figuratively:*

(1) *Of things:* Sweetness, as of speech.

"The *honey* of his language."
Shakesp.: Henry VIII., iii. 2.

(2) *Of persons:* A name of endearment, applied specially to a female.

"[He] then intreats his dear *honey*, for Christ's sake, to perjure herself."—*Macaulay: Hist. Eng.*, ch. xviii.

II. *Technically:*

1. *Bot. & Zool.:* A product primarily of a vegetable character, in many plants existing at the base of the corolla, sometimes in a more or less elongated tube, closed at the lower end, called by Linnæus, on account of its contents, a nectary. Neuter bees collect it to store against winter, and, swallowing it by means of their proboscis, transfer it to a distended portion of the œsophagus, called the honey-bag. There certain chemical changes take place upon it, so that when placed, as it ultimately is, in the honeycomb, it is not, as at first, exclusively a vegetable product. When elaborated by young bees it is whiter than in other cases, and is called virgin honey. When obtained by the bees from some plants, it is poisonous. That which killed some of Xenophon's soldiers was taken from a heath, *Azalea pontica*. It is sometimes called Euxine honey. Narboone honey owes its fine flavour to the Rosemary (*Rosmarinus officinalis*).

2. *Comm.:* Used as an article of food, but is apt to cloy on the appetite, and be too laxative to the bowels.

3. *Phar.:* Used chiefly like sugar as a vehicle for nauseous medicines, and as a remedy for coughs and colds.

B. *As adjective:*

1. *Lit.:* Of or belonging to honey. [A.] (See the compounds.)

2. *Fig.:* Sweet. (*Shakesp.: Richard III.*, iv. 1.

honey-badger, *s.*

***honey-gnat,** *s.* "An insect." (*Ainsworth.*) It has not been identified.

honey-guide, *s.*

Ornithology:

1. *Sing.:* The genus Indicator, family Cuculidæ. Two species, *Indicator major* and *I. minor*, are found at the Cape. It was once supposed that their cry was intended to direct the natives to spots where wild honey was to be obtained; but it is their own interests they are looking after, not those of man. Honey is their own appropriate food. They build bottle-shaped pendulous nests.

2. *Pl.:* The subfamily Indicatorinæ.

honey-harvest, *s.* The harvest of honey obtained in autumn from the hive or hives.

honey-heavy, *a.* Heavy and somewhat oppressive.

"Enjoy the *honey-heavy* dew of slumber."
Shakesp.: Julius Cæsar, ii. 1.

honey-locust, *s.* [Gleditschia.]

Bot.: Melilotus officinalis. (*Paxton.*)

honey-moon, *honey-month, *s.* The first month after marriage, usually spent by the newly-married couple in travelling or visiting.

"A man should keep his finery for the latter season of marriage, and not begin to dress till the *honey-moon* is over."—*Addison.*

¶ The term is said to have arisen from an old Tentonic practice of drinking a honey-like liquid, metheglin, for thirty days after marriage. Lubbock (*Origin of Civil.*, 1882, p. 122) suggests that the honey-moon, "during which the bridegroom keeps his bride away from her relatives and friends," may be a survival from marriage by capture. [Marriage.]

honey-moth, *s.*

Entom.: Achroia grisella.

***honey-mouthed,** *a.* Sweet and smooth in speech.

"If I prove *honey-mouthed*, let my tongue blister."
Shakesp.: Winter's Tale, ii. 2.

hŏn'-ĕy-cōmb (*b* silent), s. [Eng. *honey*, and *comb.*]

Entom., &c.: The hexagonal cell formed by the hive bee for the reception of honey and for the eggs of the queen bee, and a habitation for the larva of the insect till reaching maturity. The teleologist points out that under the direction of the Divine Mathematician the bee constructs a cell with the maximum of strength and the minimum of material. Mr. Darwin attempted to explain the notable fact in a different way. (*Origin of Species*, ch. xxviii.)

honeycomb-moth, *s.*

Entomology:

(1) *Galleria cerella*, a small moth which does much damage in beehives, piercing the combs and building as it proceeds a single tube, covered with the excrement of the insect, and formed of the wax on which it feeds. Why the bees tolerate such a foe is a mystery.

(2) *Galleria alvearia.*

honeycomb-ringworm, *s.*

Pathol.: A kind of ringworm, *Tinea favosa*, making the scalp look honeycombed. [Ringworm.]

hŏn'-ĕy-cōmbed (*b* silent), *a.* [Eng. *honeycomb*; *-ed.*]

hŏn'-ĕy-lĕss, *a.* [Eng. *honey*; *-less.*] Without honey; destitute or deprived of honey; hence joyless.

"*Honeyless* days and days did he let pass."
Keats: Pot of Basil, iv.

hŏn'-ĕy-sŭc-kle, * hon-y-soc-le, *s.* [A.S. *hunigsuele*, because honey can be easily *suckled* or *sucked* from it.]

1. *Bot.:* The genus Lonicera. The Common Honeysuckle is *Lonicera Periclymenum*; the stem is ten or twenty feet high, climbing; the corolla one to one and a half inches long, dirty-red outside, and yellow within. It occurs in Europe and North Africa. A cultivated variety is common in gardens. It is called also Woodbine (q.v.), and by Milton Twisted Eglantine. There are many other species, found in North America, Europe, and Asia. The Trumpet Honeysuckle (*L. Sempervirens*) is a native of the Southern United States, where it is often called the Coral Honeysuckle. It bears beautiful red flowers. The name Honeysuckle is also given to other shrubs, whose flowers abound in honey. The Swamp Honeysuckle of the United States is an Azalea (*A. viscosa*). These species are very common in the United States.

2. *Pharm.:* The leaves of the honeysuckle are to a certain extent fetid, emetic, and drastically purgative, its flowers fragrant and sudorific.

¶ *Trifolium pratense* is called by some farmers a honeysuckle; Dwarf Honeysuckle is *Cornus suecica*; French Honeysuckle, *Hedysarum coronarium*; Heath Honeysuckle, *Banksia serrata*; Virgin Mary's Honeysuckle, *Pulmonaria officinalis*; West Indian Honeysuckle, *Tecoma capensis*, Desmodium; and White Honeysuckle, *Azalea viscosa*. Not one of these is of the same order as the Honeysuckle proper. (*Treat. of Bot.*, &c.)

honeysuckle-tree, *s.*

hooping-cough, *s.*

Pathol.: Pertussis, a spasmodic, infectious disease, usually of childhood (although Sir William Jenner suffered from it late in life), preceded by catarrh of from three to fourteen days' duration. It sometimes terminates in six weeks, but often lasts as many months, although danger is usually over at the end of six weeks. Emphysema is a dangerous complication. In fatal cases, pulmonary collapse, bronchial inflammation, nervous exhaustion, and general debility are the chief factors. Various specifics have been vaunted, the chief being belladonna, Croton-chloral-hydrate, bromide of potassium, and nitric acid with glycerine. Roche's is the favourite embrocation used on the chest and back. Boiled apples in milk, milk, &c., furnish the nourishment required, with time and change of air. Hooping-cough is more fatal in some years than others, and it is always dangerous to treat this disease without medical advice. It depends chiefly on irritation of the pneumogastric nerve by some special germ, producing the paroxysmal character of the cough.

hoo'-poe, hoo'-poo, *s.* [Named from their note, which is like hoop rapidly and softly repeated; Fr. *huppe.*]

Ornithology:

1. (*Sing.*): *Upupa Epops.* There are on the head two parallel rows of long feathers, forming a crest, their colours buff tipped with black; the head and neck are also buff; upper part of the back gray; wings and tail black, five transverse bands of yellowish white on the wings; abdomen, and a band on the tail, white. Length of the male, twelve and a half inches. Female less vivid in colour. It is a native of Asia and Africa, whence it annually visits Europe. There are six species, none of which are natives of this country. The nest, of grass and feathers, is made in the holes of trees. Eggs five or six, lavender gray. The hoopoe frequents marshy places, feeding on insects and worms. Called also the Dung bird.

2. (*Pl.*): Upupidæ, a family of Tenuirostres. They have syndactyle feet; the outer toe is united, for half its length, to the middle one. The bill is very long, and greatly compressed. The plumage is generally glossed with metallic blue and deep green. Chief genera, Upupa and Promerops, from which the family has been sometimes called Promeropidæ.

hŏp (2), **hŏppe,** *s.* [Dut. *hop, hoppe*; O. H. Ger. *hopfo*; M. H. Ger. *hopfen*; N. H. Ger. *hopfen.*]

A. *As substantive:*

1. *Botany:*

(1) (*Sing.*): *Humulus Lupulus*, the only known species of the genus Humulus (q.v.). The root, which is perennial, annually sends forth long, weak, rough, twining stems. The leaves somewhat resemble those of the vine, but are rougher, each pair with two curved stipules; the flowers are dicœcious, the males, which are in axillary panicles, have five sepals, no petals, and five stamens; the females are in cones or catkins consisting of coucave scales, each with a pair of minute flowers [(2)]. It has an aromatic odour, sent forth by glands containing a resinous secretion. The hop is a native of Europe, and of some parts of Asia, but doubtfully of North America, although it has been widely introduced here. It is extensively cultivated in the United States, particularly in New York; and still more largely in England, Germany, and some other European countries. Its industrial use is to give the bitter flavor to beer, it being largely consumed in brewing. It was known to the Romans as *Lupus salictarius.* They ate the young shoots as we eat asparagus. This is still done by many country people in Europe. Packets of it put in pillows have a narcotic effect, and tend to induce sleep. It is sometimes prescribed as a tonic. The roots are used as a substitute for sarsaparilla.

¶ *Bryonia dioica* [BRYONY] is sometimes called Wild Hop. The native hop of Australia is (1) Dodonœa, the seed vessels of which are there used in the manufacture of beer; (2) *Daviesia latifolia.*

(2) (*Pl.*); The mature cones of the hop; hop heads.

2. *Brewing* (chiefly in the pl.): Hops are boiled with the wort in brewing beer. They impart a bitter taste and aromatic flavour, and prevent fermentation from being too rapid. They owe their effect to a chemical principle called Lupuline (q.v.).

3. *Phar.: Lupulus.* The dried catkins of the female plant of *Humulus Lupulus*, the common hop. It is used to prepare *Infusum Lupuli*, Infusion of Hop; *Tinctura Lupuli*, Tincture of Hop, and *Extractum Lupuli*, Extract of Hop. Hops are tonic and stomachic, and slightly narcotic; with malt they form the materials from which beer is, or should be, made.

B. *As adj.:* Of or belonging to the plant described under A. 1., or any one akin to it.

¶ *Oil of hops:*

Chem. & Comm.: A green light acrid oil, obtained by subjecting hopheads to pressure.

hop-back, *s.*

hör'-ą (pl. **hör'-æ**), *s.* [Lat.] An hour.

horæ canonicæ, *s. pl.* The canonical hours at which religious services are held. In time of persecution a night service was held called *Nocturns*, which was, however, at a later period merged into *Lauds*—the thanksgiving for the dawn of day, and the whole was called Matins. But when Matins, or Nocturns, are retained they take place before *Lauds.* The following is the order of the canonical hours: *Lauds*, at daybreak; *Prime*, or first hour, a later service; *Tierce*, or third hour, at nine A.M.; *Sext*, or sixth hour, at noon; *Nones*, or ninth hour, at three P.M.; *Vespers*, or evening service; *Compline*, or final service, at bedtime. Each of these has fixed Psalms, except Vespers, which has certain Psalms read in course, and a Canticle. The Anglo-Saxon names of these services were Uhtsang, Primesang, Undersang, Middaysang, Noonsang, Evensang, and Nightsang. The Book for these offices came to be called Breviary towards the end of the eleventh century. It was sometimes called in England the Portifory.

* **hör'-al,** *a.* [Lat. *horalis*, from *hora* = an hour.] Pertaining or relating to an hour or hours; lasting for an hour.

"But if the *horal* orbit cease,
The whole stands still." *Prior: Alma*, iii. 268.

* **hör'-ąl-lў,** *adv.* [Eng. *horal*; *-ly.*] Hourly.

* **hor-ār'-ĭ-oŭs,** *a.* [Lat. *horarius*, from *hora* = an hour.]

Bot.: Enduring only for an hour or two, as the petals of Cistus.

* **hör'-ąr-ў,** *a.* [Lat. *horarius*; Fr. *horaire.*]

I. *Ordinary Language:*

1. Pertaining or relating to an hour or hours; noting the hours.

"In his answer to an *horary* question, he has discussed the manner of surprising all sharpers."—*Tatler.*

2. Continuing for an hour; hence, changeable, ephemeral, short-lived.

"*Horary* or soon decaying fruits of summer."—*Browne: Vulgar Errours*, bk. vii., ch. i.

3. Done by noting the hours or time.

"The famous doctor in Moorfields, who gained so much reputation for his *horary* predictions."—*Steele: Spectator*, No. 193.

II. *Astron.:* A term used of the arc which a heavenly body describes in an hour, or the angle which that arc subtends, the eye of the spectator being assumed to be at the angular point.

horary-circles, *s. pl.* Lines or circles marking the hours on globes, &c.

horary-motion, *s.* The space moved through in an hour. The horary motion of the earth is that arc which it describes in an hour—that is, one of fifteen degrees.

Hor-ā'-tian, *a.* [Lat. *Horati(us)* = Horace; Eng. suff. *-an.*] Of or pertaining to the poet Horace or his poetry; pertaining to the family Horatii.

* **hori,** * **hoori,** * **horwe,** * **horowe,** *a* [A.S. *horig.*] Dirty, filthy, obscene.

"With tonges *horwe*." *Chaucer: C. M.*, 208.

hör'-ĭ-ą, *s.* [Lat. = a small vessel, a fishing smack (?).]

Entom.: A genus of Cantharidæ. According to Lansdown Guilding, a West Indian species is parasitic on a solitary bee, *Xylocopa teredo.*

hŏr-ī'-zŏn, * **or-i-zont,** *s.* [Lat. *horizon*, from Gr. *ὁρίζων* (*horizōn*) = (as adj.) dividing, separating, bounding, limiting; (as subst.) the horizon [def.]; Sp. & Port. *horizonte*; Ital. *orozzonte*; Prov. *orizon.*]

I. *Ordinary Language:*

1. *Lit.:* The circular line where the sky and the earth seem, to a spectator on the surface of the latter, to meet. [II.]

"When the morning sun shall raise his car
Above the border of the *horizon*."
Shakesp.: 3 Henry VI., iv. 7.

2. *Fig.:* Anything bounding one's mental vision.

"While the authors of all these evils were idly and stupidly gazing on this menacing meteor, which blackened all their *horizon*."—*Burke: On the Nabob of Arcot's Debts.*

II. *Technically:*

1. *Astron.:* The horizon, in the sense I. 1, is called by astronomers the sensible, visible, or physical horizon. It is not at right angles to a vertical line at the place, for if vision be unimpeded, say when one looks from a vessel's deck on a clear day, the rotundity of the earth allows him to see a little more of the sky than if his eye were at the surface of the sphere. If he looks from a mountain top the error becomes of consequence. The term "sensible," "visible," or "physical" horizon is therefore often used, though not quite accurately, for a plane supposed to be extended from the observer's eye at right angles to a vertical line at the place and extending to the celestial vault. The horizon convenient for astronomical purposes, and called the astronomical or rational horizon, is different from this. The spectator's eye is supposed to be,

not at the surface, but at the centre of the earth, with the planet transparent enough not to impede vision. The astronomical horizon of Greenwich observatory would be obtained by supposing a line drawn downwards from that spot to the earth's centre, and a plane everywhere at right angles to that line, to extend from the latter spot to the celestial vault. It would form a great circle, both of the earth and of the heavens. Sometimes what is called an "artificial horizon" is needed, and is formed by the reflecting surface of a fluid

2. *Geol.:* A term used with regard to the apparent age of strata. Strata which appear, broadly speaking, contemporaneous or homotaxial are said to be on the same horizon.

3. *Naut.:* In the same sense as I. 1.

¶ *Dip of the horizon:*

Astron. & Geog.: The angle by which the visible horizon is depressed below the direction of a spirit-level.

horizon-bounded, *a.* Reaching to the horizon, or as far as sight will reach.

"Immense *horizon-bounded* plains succeed."
Byron: Childe Harold, i. 81.

horizon-glasses, *s. pl.*

Optics: The two speculums on one of the radii of a quadrant or sextant. The one half of the fore horizon-glass is silvered, while the other half is transparent, in order that an object may be seen directly through it. The back horizon-glass is silvered above and below, but has a transparent stripe across the middle, through which the horizon can be seen.

hŏr-ĭz-ŏn'-tal, *a.* [Fr.]

1. Pertaining or relating to the horizon.

2. At or near the horizon. (*Milton: P. L.,* i. 595.)

3. Parallel to the horizon; level; perpendicular to a vertical line.

"And several little shrubs will grow from one *horizontal* bed of salt."—*Grew: Cosmo. Sacra,* bk. i., ch. iii., § 29.

4. Measured or contained in a plane of the horizon: as, *horizontal* distance.

horizontal-cornice, *s.*

Arch.: The level portion of the cornice of a pediment, under the two inclined cornices.

horizontal-dial, *s.* A dial with a plane parallel to the horizon, having its gnomon elevated according to the latitude of the place.

horizontal-drill, *s.*

Machinery: A boring-machine whose drill-arbor works horizontally and parallel with the bed to which the work is dogged.

horizontal-escapement, *s.*

Hor.: An escapement in which the impulse is given by the wedge-shaped teeth of a horizontal wheel acting on a notched hollow cylinder on the axis of the balance. It was invented by Graham, about 1700.

horizontal-fire, *s.*

Mil.: The discharge of pieces at point-blank range, or at very low elevations.

horizontal-lathe, *s.*

Machinery: A vertical turning and boring machine.

horizontal-leaf, *s.*

Bot.: A leaf of which the upper surface makes a right angle with the stem.

horizontal-line, *s.*

Persp.: That line drawn through a picture at the point in the extreme distance where the sky and earth meet; or, at the line of the height of the eye in a picture.

horizontal-mill, *s.* A mill in which the acting surfaces are in a horizontal plane at right angles to the vertical axis of the rotating stone or stones. The term is in contradistinction to the edge-mill, otherwise known as the Chilian mill.

horizontal-parallax, *s.* [Parallax.]

horizontal-plane, *s.* A plane parallel to the horizon; specif., in persp., a plane cutting the perspective plane at right angles.

horizontal-projection, *s.* A projection on a plane parallel to the horizon.

horizontal-range, *s.*

Ordnance: The distance at which a projectile falls or strikes a horizontal plane, whatever be the angle of elevation.

horizontal root, *s.*

Bot.: A root which lies horizontally on the ground.

horizontal steam-engine, *s.* An engine the axis of whose cylinder is horizontal.

horizontal water-wheel, *s.*

Hydraul. & Engin.: A water-wheel running on a vertical axis, as do the turbines generally. The term is, however, specifically applied to a wheel having radial floats upon which a stream of water is dashed, usually from a considerable elevation. The floats may be set spirally, so as the better to receive the impact of the water.

hŏr-ĭz-ŏn-tăl'-ĭ-tў, *s.* [Eng. *horizontal; -ity.*] The quality or state of being horizontal.

hŏr-ĭz-ŏn'-tal-lў, *adv.* [Eng. *horizontal; -ly.*] In a horizontal position or direction; in a line parallel to the horizon; on a level.

"It is occasionally requisite that the object-end of the instrument be moved up and down as well as *horizontally.*"—*Paley: Nat. Theol.,* ch. viii.

hor-min'-ĭ-dæ, *s. pl.* [Lat. *hormin(um)* (q.v.); fem. pl. adj. suff. *-idæ.*]

Bot.: A family of Labiates, tribe Monardeæ.

hor-mī'-nŭm, *s.* [Lat. *horminum;* Gr. ὅρμινον (*horminon*) = the plant described in the def; ὁρμάω (*hormaō*) = to excite; the horminum of the ancients being reputed an aphrodisiac.]

Bot.: The typical genus of the family Horminidæ (q.v.). *H. pyrenaicum,* a beautiful plant, has been introduced into Britain from the mountainous parts of continental Europe.

horminum-clary, *s.*

Bot.: *Salvia Horminum.*

hor-mō-spör'-a, *s.* [Gr. ὅρμος (*hormos*) = a cord, a chain, a necklace, and σπορά (*spora*), σπόρος (*sporos*) = a spore or seed.]

Bot.: The typical genus of the sub-order Hormosporeæ. Two species, *Hormospora ramosa,* and *H. mutabilis,* are British. (*Harvey: Brit. Mar. Algæ.*)

hor-mō-spör'-ĕ-æ, *s. pl.* [Mod. Lat. *hormospor(a);* Lat. fem. pl. adj. suff. *-eæ.*]

Bot.: A sub-order of Algals, order Palmellaceæ. The cells are contained in confervoid simple or branched tubular filaments. Contains only one known genus. [Hormospora.] (*Harvey: Brit. Mar. Algæ.*)

Hor'-mŭzd, *s.* [Zend.] In the Zoroastrian Creed, the Good Principle or Being supposed to have created light, and to be the originator and patron of all good in the universe. He is perpetually in conflict with Ahriman, the Evil Principle or Being. [Ahriman.] He has under him a hierarchy of angels. [Zoroastrianism.]

horn, *s.* & *a.* [A.S.; cogn. with Icel., Dan., Sw., & Ger. *horn;* Goth. *haurn;* Ir., Gael., & Wel. *corn;* Lat. *cornu.*]

A. *As substantive:*

I. *Ordinary Language:*

1. In the same sense as II.

"No beast that hath *horns* hath upper teeth."—*Bacon: Nat. Hist.,* § 753.

2. The material or substance of which horns are composed.

"There is no staff more reverend than one tipped with *horn.*"—*Shakesp.: Much Ado About Nothing,* v. 4.

3. Anything made of or resembling a horn in shape.

(1) A powder-flask: originally made of a horn.

(2) A drinking-cup: so called from having been originally made of horn. Now the name is applied to a similar vessel, even if made of other material; a beaker.

(3) The cornucopia or horn of plenty. [Cornucopia.]

(4) In the same sense as II. 8.

"Some of them had actually been proscribed by sound of *horn* for the crime of withstanding his lawful commands."—*Macaulay: Hist. Eng.,* ch. xiii.

(5) Used as a symbol of plenty [(3).]

"With his *horn* full of good news."
Shakesp.: Merchant of Venice, v. 1.

* 4. A draught from a horn; a hornful. (Now only in use in America.)

5. Anything resembling a horn in relative position or use; anything projecting like a horn.

(1) The feeler of an insect, snail, &c.

"Tender *horns* of cockled snails."
Shakesp.: Love's Labour's Lost, iv. 3.

(2) An extremity of the moon when on the wane or waxing.

* (3) An extremity of a wing of an army or body of soldiers, drawn up in crescent form.

(4) A long horn-like projection of some precious metal, worn on the forehead by the natives of some Asiatic countries.

* (5) The imaginary antler or projection on the forehead of a cuckold.

(6) A branch of a subdivided stream.

* 6. A deer.

"My lady goes to kill *horns.*"
Shakesp.: Love's Labour's Lost, iv. 1.

II. *Technically:*

1. *Comp. Anat. & Physiol.:* The horns of animals are of three kinds: (1) those composed of bone, as the antlers of the deer; (2) those consisting of epidermic formations, as the horns of the rhinoceros and the buffalo; (3) those partly bone and partly epidermic, as in the case of the cow.

2. *Botany:*

(1) *(Gen.):* Any stiff awl-shaped process.

(2) *(Pl.):* A number of elongate antherozoids, found in the antheridia of Vaucheria.

3. *Arch.:* The Ionic volute.

4. *Forging:* The beak of an anvil around which objects are bent.

5. *Mechanics:*

(1) A projecting portion of an object.

(2) One of the prongs or crutches of an elevating screw or jack.

(3) A curved projection on the forepart of a plane.

6. *Mining:*

(1) A spoon or scoop of horn, in which washings are tested in prospecting.

(2) *(Pl.):* The guides for the ropes on the drums.

7. *Milling:* One of the points of a driver, on the summit of a millstone spindle, which project into the coffins of the runner to convey the motion of the spindle to it.

8. *Music:* The proper orchestral horn is the French horn, a metal wind instrument, formed of a continuous tube twisted into a curved shape for the convenience of holding. It is furnished with a mouthpiece and a bell. The mouthpiece is movable, so as to allow additional pieces of tubing called crooks to be added to its length, in order to alter its pitch. The bell is sufficiently wide to admit the hand of the player. The horn of military and other brass bands is usually some form of the Saxe-horn (q.v.).

9. *Nautical:*

(1) The arm of a cleat or kevel.

(2) One member of the jaw of a boom.

10. *Physiol.:* [II. 1]

11. *Saddlery:*

(1) The high pommel of a Spanish or half-Spanish saddle, sometimes made of horn.

(2) The projections on the forward part of a woman's saddle, between which the right leg is placed. The inside one is the small horn, the outer the large horn.

12. *Script.:* A horn is symbolical—

(1) Of strength, power, or might (physical or political) (Ps. lxxv. 10; Jer. xlviii. 25; Lam. ii. 3, 17).

¶ Hence kings, rulers, kingdoms, or empires are often viewed prophetically as horns (Dan. vii. 20, 21, 24, viii. 3, 6, 7, 20; Rev. xiii. 1, 11).

(2) Of glory or reputation arising from that strength or power (1 Sam. ii. 1, 10; Job xvi. 15; Ps. lxxxix. 17, 24, cxlviii. 14).

(3) Of insolence generated by it (Ps. lxxv. 4, 5).

13. *Surg.:* Sometimes, though rarely, horns, tending to become spiral, grow from the scalp or even from the face or trunk of man.

¶ (1) *Horn with horn, horn under horn:*

Law: The promiscuous feeding of all kinds of horned cattle, not excluding bulls on the same common. (*Spelman.*)

(2) *To put to the horn:*

Scots Law: To outlaw a person; to de-

nounce as a rebel. This was done by an official at the cross of Edinburgh, who, amongst other formalities, gave three blasts on a horn, by which the person named was considered to be proclaimed outlaw for contempt of the sovereign's authority.

B. *As adj.:* Made of the material described in A.

*** horn-band,** *s.* A band of trumpeters.

*** horn-beast,** *s.* An animal with horns; a deer. (*Shakesp.: As You Like It*, iii. 3.)

horn-bug, *s.*

Entom.: A popular name given in America to *Lucanus capreolus*, and some other species of stag-beetle. The resemblance to a horn is in the projecting jaws. They are not bugs.

horn-card, *s.* A graduated drafting scale or protractor, made of horn.

horn-core, *s.*

Compar. Anat. & Zool.: An osseous process of the frontal bone in those mammals which have permanent horns, as distinguished from antlers shed every year.

"Though a sheep may have the *horn-cores* usually found in goats, a goat never has the *horn-cores* usually found in sheep."—*Greenwell: British Barrows*, p. 741.

horn-distemper, *s.* A disease of cattle affecting the substance of the horns.

horn-drum, *s.*

Hydr. Eng.: A water-raising wheel divided into sections by curved partitions. It resembles one form of tympanum (q.v.).

horn-eel, *s.*

Ichth.: A name given, chiefly in Edinburgh, to the Sand-eel, *Ammodytes Tobianus*.

horn-grass, *s.*

Bot.: The genus Ceratochloa. The large-spiked Horn-grass, *C. uniloides*, is a native of the United States.

horn-lantern, *s.* A lantern having plates of horn instead of glass.

*** horn-mad,** *a.* Furiously mad; mad like an infuriated bull.

"If this should ever happen, thou wouldst be *horn-mad*."—*Shakesp.: Much Ado About Nothing*, I. 1.

horn maker, *s.*

1. *Lit.:* One who makes horns; one who makes drinking cups of horn.

* 2. *Fig.:* A maker of cuckolds.

"Virtue is no *horn-maker*."—*Shakesp.: As You Like It*, iv. 1.

† horn-mercury, *s.* [Horn-quicksilver.]

horn-mould, *s.*

Bot.: Ceratium, a genus of Fungals.

horn-of-plenty, *s.* [Cornucopia.]

Botany:

1. The rendering of Cornucopiæ, a genus of grasses, of which one species, *C. cucullatum*, was introduced into Britain, from the Levant, in 1788.

2. *Fedia cornucopia.*

horn-pike, *s.*

Ichthy.: *Belone vulgaris*, the Garfish (q.v.).

horn-plant, *s.*

Bot.: *Ecklonia buccinalis.*

horn-plate, *s.*

Rail. Eng.: The axle-guard or vertical frame in which an axle-box slides up and down as the springs dilate and contract.

horn-pock, *s.*

Pathol.: An old name for a mild variety of smallpox, in which the eruption, never confluent, consists of pustules, hard to the touch, and called seedy or horny. They mature separately, and "turn" on the fifth day. Called also stone-pock.

horn-poppy, *s.* The same as Horned-poppy (q.v.).

horn-presser, *s.* One who presses horn softened by heat into moulds, &c.

horn-quicksilver, *s.*

Min.: The same as Calomel (q.v.).

horn-silver, *s.*

Min.: The same as Chlorargyrite (*British Museum Catalogue*). The same as Cerargyrite (*Dana*).

horn-tip, *s.*

Husbandry: A button or knob placed on the end of the horn of an animal of the cow kind, put on to render the horn less dangerous, or for ornament.

horn-weed, *s.*

Bot.: *Laminaria buccinalis*, an algal.

*** horn,** *v.t.* [Horn, *s.*]

1. *Lit.:* To furnish or provide with horns.

2. *Fig.:* To cuckold; to make a cuckold of.

"You have a goodly gift in *horning*."
Shakesp.: Titus Andronicus, ii. 3.

horn'-bēak, *s.* [Eng. *horn*, and *beak*.]

Ichthy.: The garfish (q.v.). Called also the horn-pike, &c.

horn'-bēam, *s.* [Eng. *horn*, and *beam* (q.v.).]

Bot.: *Carpinus Betulus*, and the genus Carpinus (q.v.).

"The *hornbeam*, in Latin the *Carpinus*, is planted of sets."—*Evelyn: Sylva*, ch. xii., § 1.

¶ *Hop hornbeam:*

Bot.: *Ostrya vulgaris.*

horn'-bill, *s.* & *a.* [Eng. *horn*, and *bill*. The name does not mean that the bill is more horny than that of other birds, but that it has a protuberance or knob which may be called a horn.]

A. *As substantive:*

Ornithology:

1. *Sing.:* Any species of the genus Buceros, the best known being *Buceros Rhinoceros*, from

HORNBILL.

India and the Indian Archipelago. Sir Joseph Hooker found a forest near Darjeeling full of hornbills.

2. *Pl.:* The family Bucerotidæ or Buceridæ (q.v.).

B. *As adj.:* Having a bill with at least some faint resemblance to a horn.

hornbill-cuckoos, *s. pl.*

Ornith.: The name given by Swainson to Crotophaginæ, a sub-family of Cuculidæ. The resemblance to a horn, which is exceedingly slight, is in the high-arched upper mandible.

horn'-blĕnde, *s.* & *a.* [Ger. *hornblende*, from *horn* = a horn, and *blenden* = to make blind, to dazzle.]

A. *As substantive:*

1. *Min.:* According to Dana, a sub-variety of aluminous amphibole, ranked with pargasite (q.v.) as aluminous magnesia, lime-iron amphibole. It consists of the greenish-black and black kinds, whether in stout crystals or long-bladed, columnar-fibrous or massive-granular. The *Brit. Mus. Cat.* makes hornblende the genus, and amphibole one of its synonyms.

2. *Geol.:* According to Lyell hornblende is one of the five most abundant simple minerals of which rocks are composed, the others being felspar, quartz, mica, and carbonate of lime. It is closely akin to augite, but the forms of the crystals in the two species are different, and the cleavage parallel to the faces of the oblique prism in hornblende are more strongly marked than the corresponding cleavage in augite. The two are very rarely associated in the same rock, and when they are so, hornblende is in the mass of the rock, where cooling was slow, and the augite in cavities, where it was probably rapid. In a paper by Dr. Bundjiro Koto, of Japan, on the minerals of that country, read before the Geological Society of London in 1884, it was mentioned that hornblende crystals had been found with their peripheral portion converted into augite.

B. *As adj.:* The same as Hornblendic (q.v.)

hornblende-andesite, *s.*

Petrol.: An andesite, either with or without quartz. In the former case it has been called dacite, from its occurring extensively in Dacia. (*Rutley.*)

hornblende-gabbro, *s.*

Petrol.: A rock presenting the blended character of gabbro and hornblende. The name was introduced by the Rev. E. Hill, F.G.S., and was characterized by Mr. Rutley as a very useful petrographical one.

"Its oval area between St. Sampson's and St. Peter's Port [in Guernsey] is occupied by hornblendic rocks, locally called 'birds'-eye,' which maybe described as '*hornblende-gabbros*.'"—*Rev. E. Hill, F.G.S.*, in *Proc. Geol. Soc.*, Session 1883-4, pp. 80, 81.

hornblende-gneiss, *s.* [Hornblendic-oneiss.]

hornblende-rock, *s.*

Geol.: A greenstone composed principally of granular hornblende or augite. (*Leonhard, Lyell*, &c.)

hornblende-schist, † hornblende-slate, *s.*

Geol.: The name given by Macculloch to a metamorphic rock, usually black, composed, according to Lyell, principally of hornblende, with a variable quantity of felspar and occasional grains of quartz, or, according to Rutley, of hornblende and quartz. When the schistose character is not apparent, and the hornblende and felspar are in nearly equal proportions, it approaches greenstone. Lyell thinks that some hornblende schists may be metamorphosed volcanic rocks. When hornblende-schist, consists almost exclusively of hornblende it is called amphibolite.

hornblende-syenite, *s.*

Petrol.: A rock consisting chiefly of orthoclase and hornblende, occasionally with a little triclinic felspar. Prevailing colours red, brown, and white; the hornblende is usually greenish-black. The rock sometimes has in it epidote, magoetite, sphene, and pyrites. (*Rutley.*)

horn-blĕnd'-ĭe, *a.* [Eng., &c., *hornblend(e)*; *-ic.*]

Min., Petrol., & Geol.: Of, belonging to, or more or less consisting of hornblende (q.v.).

hornblendic-gneiss, hornblende-gneiss, *s,*

Petrol.: A rock consisting of orthoclase, and hornblende, with a little or no quartz. Called also syenitic gneiss (q.v.). It sometimes passes into hornblende schist (q.v.). (*Rutley.*)

hornblendic-granite, *s.*

Petrol.: A rock of the same composition as hornblendic gneiss, but not stratified. Called also syenite (q.v.).

*** horn'-blōw-ĕr,** *s.* [Eng. *horn*, and *blower*.] One who blows on or plays a horn.

*** horn'-bo̤o̤k,** *s.* [Eng. *horn*, and *book*.]

1. A primer of the fifteenth century. The alphabet, vowels, and Lord's Prayer were printed on a slip of paper, which was covered with a thin layer of horn to keep it from being torn. Hence used for the alphabet or rudiments of knowledge.

2. A book containing the elements or rudiments of any science; a primer, a manual.

"He teaches boys the *hornbook*."
Shakesp.: Love's Labour's Lost, v. 1.

horned, *a.* [Eng. *horn*; *-ed.*]

I. *Ordinary Language:*

1. *Lit.:* Furnished or provided with horns; bearing horns.

"The ox is the only *horned* animal, in these islands, that will apply his strength to the service of mankind."—*Pennant: British Zool.*; *The Ox.*

2. *Fig.:* Having extremities like horns.

"The *horned* moon to shine by night."
Milton: Trans. Ps. cxxxvi.

II. *Technically:*

1. *Bot.:* Terminating in a process like a horn, as the fruit of *Trapa bicornis*. There may be two or three horns.

2. *Her.:* Applied to animals represented as bearing horns. They are said to be *horned* of such a metal or colour when the tincture of the horns differs from that of the animal itself or from the proper colour of such horns.

horned-beetles, *s. pl.*

Entom.: The name given by Swainson to Megasominæ (q.v.), which he makes a sub-order of the lamellicorn family Cetoniadæ.

horned-cicadas, *s. pl.*

Entom.: The name given by Swainson to Centronotidæ, arranged by him as a family of Homoptera. The thorax is enormously developed, and has on each side an acute spine pointing outwards so as to resemble the horns of a bull, while the hinder part is prolonged into another spine. Swainson found about a hundred species in tropical America, not half of them described before in books.

horned-hog, *s.*

Zool.: The Babyroussa (q.v.).

horned-horse, *s.*

Zool.: The gnu (q.v.).

horned-lark, *s.*

Ornith.: *Alauda penicillata.*

horned-owl, *s.*

Ornith.: Bubo or Asio, a genus of Strigidæ. The English name refers to a double crest or a pair of egrets ornamenting the large head.

horned-pheasant, *s.*

Ornith.: *Ceriornis Blythii.*

horned pond-weed, *s.* A British Naiad *Zannichellia palustris*, and the genus Zannichellia (q.v.).

horned-poppy, horn-poppy, *s.*

Bot.: *Glaucium luteum*, and the genus Glaucium (q.v.).

horned-ray, *s.*

Ichthy.: Cephaloptera, a genus of Raiidæ. Spec., *C. Giorna.*

horned-screamer, *s.*

Ornith.: *Palamedea cornuta*, a South American grallatorial bird, larger than a goose, with a long, slender, mobile horn projecting from the forehead, whence the epithet, while its strong piercing voice gains for it the appellation of screamer.

horned-toad, *s.* A lizard of the genus *Phrynosoma*, having a frog-like body and a head surmounted with spines; found in the south-western portion of North America.

horned-viper, *s.*

Zool.: Cerastes, a genus of Viperidæ. It has a small pointed bone over each eyebrow. Found in Africa. A venomous species, occurring in Egypt, is probably the "adder," שְׁפִיפֹן (*shephiphon*), of Gen. xlix. 17, which was wont to bite the horse's heels so that the rider fell backward. It is now often called *Acanthophis cerastinus.*

* **horn'-ĕd-nĕss,** *s.* [Eng. *horned; -ness.*] The quality or state of being horned.

horn'-ĕr, *s.* [Eng. *horn; -er.*]

I. *Ordinary Language:*

1. *Literally:*

(1) One who works in horn; one who deals in horns.

"The *horner* and comb-maker enjoy a monopoly against the graziers."—*Smith: Wealth of Nations*, bk. iv., ch. viii.

(2) One who blows or plays upon a horn; a hornblower.

* 2. *Fig.:* One who cuckolds; a cuckold-maker.

II. *Scots Law:* One who has been put to the horn; an outlaw.

horneş'-īte, hœrneş'-īte (œ as ę), *s.* [Named after Dr. Hörnes.]

Min.: A monoclinic snow-white mineral, sometimes columnar, or with stellate, flexible, transparent laminæ. Compos.: arsenic acid, 44·33; magnesia, 24·54; water, 29·07. Found in the Bannat. (*Dana.*)

horn'-ĕt, *s.* & *a.* [A.S. *hyrnet, hyrnyt*, from *horn* = a horn; probably from its antennæ or horns, or else from its buzzing resembling the noise of a horn when blown; Ger. *horniss.*]

A. *As substantive:*

I. *Ordinary Language:*

1. *Lit.:* In the same sense as II.

2. *Fig.:* Any person who makes himself especially disagreeable or annoying.

"He dared not speak out, and provoke the *hornets.*"—*Jortin: Remarks on Eccles. Hist.*

II. *Entomology:*

1. *Sing.:* *Vespa crabro*, a social wasp, larger than the common one, and with a more formidable sting. It makes its nest in holes in the large trunks of trees, in barns, or in old walls.

2. *Pl.:* Any of several Vespas akin to it. An Indian species, *Vespa magnifica*, brought to Sir Joseph Hooker in the Himalayas, was nearly two inches long; its sting was said to produce fevers in men and cattle.

B. *As adj.:* Of, belonging to, or resembling the insects described under II.

¶ *To bring or raise a hornet's nest about one's ears:* To raise up enemies against one's self; to bring upon one's self troubles or annoyances.

hornet-clearwing, *s.*

Entomology (*More than one Hawk-moth*):

1. The hornet-clearwing of the *Osier, Sphecia*, or *Sesia bembeciformis.* [Hornet-moth.]

2. The hornet-clearwing of the *Poplar, Sphecia*, or *Sesia apiformis.* [Hornet-moth.]

hornet-moth, *s.*

1. *Spec.:* *Sphecia apiformis.* It has transparent wings, the hind margins brown, and the costæ yellowish-brown; the head yellow. Found about the end of May and the beginning of June. The larva is whitish-yellow, with a blackish-brown head. It feeds in the autumn and winter on the stems and roots of poplar trees. (*Stainton.*)

2. *Gen.:* The genus Sphecia. The Lunar Hornet-moth is *Sphecia bembeciformis*, found in July. The larva feeds on the wood of the sallow. Both species are British. In their wings and body they resemble hornets, which, however, have mandibles and a sting, both of which are wanting in hawk-moths. (*Stainton*, &c.)

horn'-fĭsh, *s.* [Eng. *horn*, and *fish.*] A popular name for the garfish, *Belone vulgaris.*

* **horn'-foot,** *a.* & *s.* [Eng. *horn*, and *foot.*]

A. *As adj.:* Having a hoof; hoofed.

"With *hornfoot* horses, and brass wheels, Jove's storms to emulate." *Hakewill: On Providence.*

B. *As subst.:* A cloven foot; a hoof.

"And scudding thence, while they their *hornfeet* ply, About their sire the little sylvans cry."
Dryden: Indian Emperor, ii. 2.

horn'-fŭl, *s.* [Eng. *horn; -ful(l).*] As much as a horn or drinking vessel will hold.

Horn'-ĭĕ, *s.* [Eng. *horn; -ie = y.*] One of the many popular names for the devil, in allusion to the horns which he is sometimes represented as wearing.

"Auld *Hornie* did the Laigh Kirk watch."
Burns: The Ordination.

* **horn'-ĭ-fȳ,** *v.t.* [Eng. *horn; i* connective; suff. *-fy.*] To give horns to; to horn; to cuckold.

"This versifying my wife has *hornified* me."—*Beaum. & Flet.: Four Plays in One.*

horn'-ĭng, *s.* [Eng. *horn; -ing.*]

I. *Ordinary Language:*

* I. The act of giving horns to.

2. The appearance of the moon when in the form of a crescent.

"They account from the *horning* [of the moon]."—*Gregory: Posthuma*, p. 168.

II. *Scots Law:* A writing under the king's signet, issued at the instance of a creditor against his debtor, commanding him in the king's name to pay or perform within a certain time, under pain of being declared rebel, and put in prison; so termed from the fact that the officer formerly blew a horn three times at the town cross, before proclaiming the debtor.

¶ *Letters of horning:*

Scots Law: A warrant charging persons to perform certain duties. [Horning.]

* **horn'-ĭsh,** *a.* [Eng. *horn; -ish.*] Somewhat resembling horn.

"Temperance, as if it were of a *hornish* composure, is too hard for the flesh."—*Sir M. Sandys: Essays*, p. 21.

hor-nī'-tō (*h* silent), *s.* [Sp., the same as *hornillo* = a little oven, from *horno* = an oven.]

Geol.: The name given by the Mexican Spaniards, and adopted by Humboldt, and after him by other geologists for one of the small conical heated and smoking mounds, five to ten feet high, thrown up in connection with the great eruption of Jorullo, in Mexico, in 1759, and tending more or less to occur in connection with all volcanic eruptions.

* **horn'-lĕad,** *s.* [Eng. *horn*, and *lead.*]

Chem.: An old name for chloride of lead, which when fused bears some resemblance to horn.

horn'-lĕss, *a.* [Eng. *horn; -less.*] Destitute of or without horns; having no horns.

"Many of them, males as well as females, are *horn-less.*"—*Pennant: British Zoology; The Ox.*

* **horn'-lĕt,** *s.* [Eng. *horn*; dimin. suff. *-let.*] A little horn or projection.

"Wings embracing the keel and the *hornlets* of the awning."—*Sir W. Jones: Obs. on Indian Plants*

horn'-ō, *s.* [Hornito.]

horn'-ōwl, *s.* [Horned owl.]

horn'-pīpe, * horne-pipe, * horno-pypc, *s.* [Eng. *horn*, and *pipe.*]

1. The name of an old wind instrument of the shawm or waits character, receiving its name from the fact that the bell or open end was sometimes made of horn. In Wales, Ireland, Cornwall, and in Brittany, it was called pib-corn, *pib* or *piob* meaning pipe, and *corn*, horn.

2. A dance of English origin, so called from the instrument to which it was danced. The measure or rhythm of the hornpipe is as varied as that of the tunes for country dances, and therefore all descriptions of the dance which are founded upon the supposition that there is only one form of rhythm are misleading. The hornpipe nowadays is danced by a single performer, to a tune in common time.

"Before them yode a lusty tabrere,
That to the many a *hornpipe* played."
Spenser: Shepheards Calender; May.

horns, *s.* [Horn, *s.*, II. 4 (2).]

horn'-shāv-ĭngş, *s.pl.* [Eng. *horn*, and *shavings.*] The scrapings or raspings of the horns of deer.

hōrn'-spoōn, *s.* [Eng. *horn*, and *spoon.*] A spoon made of horn.

horn'-stōne, *s.* & *a.* [Eng. *horn*, and *stone.*]

A. *As substantive:*

Min.: A cryptocrystalline variety of quartz resembling flint, but more brittle, and with a more splintery fracture. In some characters it is similar to compact felspar, but differs in being infusible. Called also chert (q.v.).

B. *As adj.:* Of, belonging to, or more or less consisting of, hornstone.

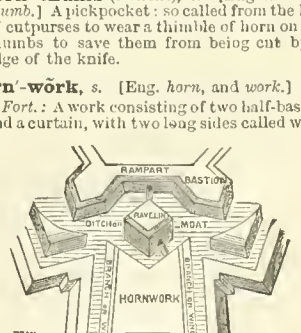
hornstone-porphyry, *s.*

Petrol. & Geol.: A kind of felspar porphyry, with a base of hornstone.

* **horn'-thŭmb** (*b* silent), *s.* [Eng. *horn*, and *thumb.*] A pickpocket: so called from the habit of cutpurses to wear a thimble of horn on their thumbs to save them from being cut by the edge of the knife.

horn'-wŏrk, *s.* [Eng. *horn*, and *work.*]

Fort.: A work consisting of two half-bastions and a curtain, with two long sides called wings,



HORNWORK.

which connect it with the main work, by which it is commanded. It is an extended defensible position to occupy advantageous ground or to command ground otherwise unseen.

horn'-wŏrt, *s.* [Eng. *horn*, and *wort.*]

Botany:

I. *Sing.:* The genus Ceratophyllum (q.v.).

2. *Pl.:* The name given by Lindley to the Ceratophyllaceæ (q.v.). They are diclinous exogens of the alliance Urticales.

horn-wrăck, *s.* [Eng. *horn*, and *wrack*.]

Zool.: A popular name for Flustra (q.v.).

horn'-ȳ, ***horn-le,** ***horn-ey,** *a.* [Eng. *horn*; *-y*.]

I. *Ordinary Language:*

1. Made or consisting of horn.

2. Resembling horn in appearance or composition.

"There is placed before the eye a transparent, *horney* convex case."—*Paley: Nat. Theol.*, ch. iii.

3. Having horns, or projections like horns; horned.

4. Hard like horn; callous; as, a *horny* hand.

II. *Bot., &c.:* Hard and very close in texture, but capable of being cut without difficulty, the parts cut off not being brittle; as, the embryo of many plants.

horny-frog, *s.* The frog, or horny prominence in the hollow of a horse's hoof.

horny-mattor, *s.*

Chem. & Anat.: The same as KERATIN (q.v.).

horny-sponges, *s. pl.*

1. *Zool.:* The order Keratosa of the class Spongida. The skeleton is of a horny texture, and consists of many fibres matted and felted together, sometimes with spicules of flint.

2. *Palæont.:* The material of which horny sponges are composed is difficult to preserve, and the fossil species of the family are few and most of them somewhat doubtful.

horny-wink, *s.* A popular provincial name for the lapwing.

hŏ-rŏg'-ra-phĕr, *s.* [Gr. ὧροι (*horoi*) = annals, and γραφω (*graphō*) = to write.] See extract.

(2) A breast-rope in the chains to secure the leadsman.

(3) An iron bar across a boat for a staysail sheet or boom-sheet to travel on.

(4) A rope reaching from the knight-head to the upper part of the bowsprit cap, for the safety of the men walking out upon the bowsprit in rough weather.

7. *Print.:* A slanting-board at the end of the bank or table to hold a supply of paper for a press.

8. *Zool., &c.: Equus caballus.* The native country of the horse seems to have been Central Asia. It became early domesticated in Egypt. In the sculptured battle scenes representing the conquests of Thothmes II. and III. over Asiatic foes, horses, some ridden by men, others drawing chariots, figure both in the Egyptian and the hostile army. It is mentioned throughout the Bible. It is believed that the original breed of horses is extinct, and that the half-wild herds existing in many places have descended from animals once in captivity. Thus when the horse was first introduced by the Spaniards in A.D. 1537 at Buenos Ayres, it is believed that there were no wild horses in America. But individuals escaping ran wild, and by 1580 their descendants had spread over the continent as far as the Straits of Magellan. Their favourite abode is on the Pampas, where they now exist in untold numbers. In Paraguay the larva of a fly kills them. In 1764 they were introduced into the Falkland Islands by the French with a similar result. But there was found in La Plata a now extinct species of horse [EQUIDÆ], and more Equidæ have been found in the New than in the Old World. The horse may have descended from a striped ancestor, stripes still sometimes remaining, especially in duns and mouse-duns. His present colours are brown, gray, or black, sometimes with roundish pale spots. His age is ascertained by examining first which teeth are developed, and then to what extent they have been worn away by use. Most animals die in nine or ten years, though they sometimes live much longer. They are best tamed by kindness. Like other domestic animals the horse has run into various breeds. The most celebrated is the Arab horse, and of European varieties the English is the best. The racehorse the hunter, the carriage horse, &c., all vary considerably in character.

* 9. *Astron.:* A constellation.

¶ Properly it is a little horse. [EQUULEUS.]

10. *Scrip.:* The rendering "horse" is accurate. It stands for three Hebrew words, סוּס (*sûs*) = a horse in general; פָּרָשׁ (*parash*) = a riding horse, a horseman, and רֶכֶשׁ (*rekesh*) = the dromedary of the A. V., but believed by Gesenius and others to be a swift horse. There is also once רַכָּשׁ (*rammak*) = a mare (Esther viii. 10). A magnificent poetic description of the horse as trained for war is given in Job xxxix. 19–25. Doubtless deviations had already arisen from the primeval type.

B. *As adj.:* Of, belonging to, resembling, operating upon, or in any other way connected with a horse.

1. *To flog a dead horse:* To agitate vainly for the revival of a political or other faith in which scarcely any one believes.

2. *To take horse:*

horse-power, *s.*

1. The power or action of horses : as, This is done by *horse-power.*

2. The measure of a steam-engine's power, as originally settled by James Watt, being a lifting power equal to 33,000 pounds raised one foot high per minute. Thus an engine is said to be of 100 horse-power (h.p.) when it has a lifting capacity equivalent to 3,300,000 pounds one foot high per minute. To ascertain the h.p. of an engine, multiply together the pressure in pounds on a square inch of the piston, the area of the piston in inches, the length of the stroke in feet, and the number of strokes per minute, divide the result by 33,000, and the quotient, less one-tenth, allowed for loss by friction, will give the horse-power. Engines are frequently said to be of so many horse-power nominal; the real or indicated horse-power, however, often exceeds the nominal by as much as three to one.

3. [Horse-gear.]

horse-purslane, *s.*

Hō-şăn'-na, *s.* [Gr. Ὡσαννά (*Hōsanna*), from Heb. הוֹשִׁיעָה נָא (*Hoshiah na*) = Save, I pray, or, Save now.]

Scripture & Theology:

1. *Jewish:* A form of acclamatory prayer or blessing, derived originally from Ps. cxviii. 25. It was often uttered at the Feast of Tabernacles, when the twenty-fifth and twenty-sixth verses of Psalm cxviii. were repeated. It therefore came to be used for the branches of myrtle, &c., or for the great palm leaves, carried about at the festival, or even for the festival itself. It spread next to the Passover and some other feasts

2. *Christian:* The acclamation raised by "the whole multitude of the disciples" (Luke xix. 37) on our Lord's triumphal entry into Jerusalem. They seem to have intended by it to offer to Jesus a prayer that they might be saved (from the Roman yoke? and other earthly trials? from the penalty of sin in the world to come? from sin itself? or from several or all of these?), and to accord him a joyous and loving welcome to Jerusalem (Matt. xxi. 9; Mark xi. 9, 10; John xii. 13). It is now employed as an acclamation of praise to any, but especially to the Second, Person of the Blessed Trinity, or as an exclamation of exultant Christian joy.

Hō-şē'-a, *s.* [Heb. הוֹשֵׁעַ (*Hoshea*) = (1) Joshua (Numb. xiii. 8, 16), (2) Hoshea, King of Israel (2 Kings xv. 30, xviii. 1), (3) the prophet Hosea (Hosea i. 2). (See def.) *Hosea* (*Hoshea*) means salvation. Called a noun, it is really the infin. absolute of יָשַׁע (*yasha*) = to set free, to save, to assist [JESUS, JOSHUA]; Sept. Ὡσηε (*Ōsēe*), N. T. Ὡσηέ (*Hosēe*).]

Scrip. Hist.: Hosea, called in the New Testament (A.V.) Osee (Rom. ix. 25), the writer of the prophecies bearing his name, was the son of Beeri. Of his history nothing authentic is known, except what can be gleaned from his writings.

¶ *The Prophecies of Hosea:*

Scrip. Canon: The first of the twelve minor prophets, according to the arrangement in the Hebrew Bible, but not in point of time, for Jonah, Amos, and perhaps Joel, were earlier in date. When Hosea began to prophesy, Uzziah was King of Judah and Jeroboam II. King of Israel; when he died Hezekiah was reigning in Judah (Hosea i. 1). Jeroboam II. reigned forty years, from B.C. 823 to B.C. 783; Uzziah, called also Azariah, began to reign B.C. 809. Hosea's prophecies, therefore, cannot have begun earlier than this latter date. Hezekiah came to the throne B.C. 726. The minimum span of Hosea's prophetic life would therefore be from B.C. 783 to B.C. 726—*i.e.*, fifty-seven years. During some period of his career he was contemporary with Isaiah and Amos. The denunciations of the prophet were directed mainly against the kingdom of Israel, that of the ten tribes, which, after the death of Jeroboam, sank into a low state religiously, morally, and politically. Hosea is quoted or referred to in the following New Testament passages: Hosea i. 10, ii. 23 in Rom. ix. 25, 26; vi. 2 in 1 Cor. xv. 4; vi. 6 in Matt. ix. 13, xii. 7; x. 8 in Luke xxiii. 30, Rev. vi. 16; xi. 1 in Matt. ii. 15; and xiv. 2 in Heb. xiii. 15.

hō'-siĕr (si as zh), *s.* [Eng. *hose; i* connect.; *-er.*] One who deals in hose or hosiery; a seller of stockings, socks, and other articles of underclothing.

hō'-siĕr-ў (si as zh), *s.* [Eng. *hosier; -y.*]

1. Stockings, hose, and other underclothing generally; articles knit like hose.

2. A manufactory where hose, stockings, &c., are woven by machinery.

3. The business of a hosier.

***hŏs'-pĭçe,** *s.* [Fr., from Lat. *hospitium*, from *hospes* (genit. *hospitis*) = a host, a guest.] A monastery or convent used also as a place for the reception and entertainment of strangers or travellers, on some difficult or dangerous road or pass, as among the Alps, as, the *Hospice* of the Great St. Bernard.

hos'-pĭt-ą-ble, *a.* [Fr., from Lat. *hospito* = to receive as a guest, *hospes* (genit. *hospitis*) = a host, a guest.]

1. Receiving and entertaining strangers with kindness and hospitality; kind, without reward, to strangers, visitors, and guests.

***hŏs'-pĭt-age (age as ĭj),** *s.* [Fr.] Hospitality. (*Spenser: F. Q.*, III. x. 6.)

hos'-pĭt-al,*hos-pĭt-alle, *hos-pĭt-ale, *hos-pўt-al, *s. & a.* [O. Fr. *hospital* (Fr. *hôpital*), from Low Lat. *hospitale* = a place, a house, from Lat. *hospitalia* = apartments for strangers, neut. pl. of *hospitalis* = hospitable, *hospes* (genit. *hospitis*) = a host, a guest.]

A. *As substantive:*

1. A place of shelter or entertainment; a lodging; a shelter.

"Which chusing for that evening's *hospital*,
They thither marched." *Spenser: F. Q.*, II. ix. 10.

2. A building for the reception, care, or treatment of persons who from any cause are unable to support or provide for themselves, and are therefore more or less dependent on the help of others.

¶ Hospitals are of various kinds, according to the class of persons for whose reception they are intended; the majority being for persons suffering from some disease, or otherwise disabled from supporting themselves; some are for the reception of the aged and infirm, and others for the education of the children of persons in reduced circumstances. Prof. Monier Williams states (*Nineteenth Century*, July, 1882, p. 77) that the first hospitals for diseased men and animals are known to have been originated by the Indian Buddhists." (See also *Rhys Davids: Buddhism* (S.P.C.K.), p. 222.) In the United States there are hospitals attached to every medical college, and others belonging to societies and nationalities, and for the treatment of infectuous diseases, so that this country is abundantly supplied with these humane institutions. In addition there are many hospitals or asylums for inebriates, opium users, &c. They are also widely distributed in Europe, and the advantages for free and skillful treatment of the sick or injured, and for the clinical study of disease, have become very great, alike to the advantage of the community, and the medical profession. Of European hospitals, the Hotel Dieu of Paris was founded in the 7th century, and is believed to be the most ancient in existence. Until the middle of the present century the organization and management of hospitals was very defective. These defects have been largely obviated by improved conditions and methods, alike in construction, administration, and nursing. The old time nurse is now being rapidly replaced by thoroughly trained experts, and nearly every hospital in this country has a school for nurses attached to it.

"One evening sumptuously lodged; the next
Humbly in a religious *hospital*."
Wordsworth: Excursion, bk. ii.

*** B.** *As adj.:* Hospitable.

"I am to be a guest to this *hospital* maid [Venice] a good while yet."—*Howell: Letters*, bk. i., § i., let. 35.

hospital-gangrene, *s.*

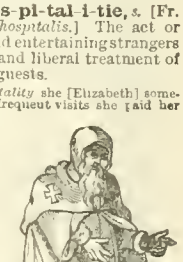
Path.: Gangrene occurring after surgical operations in hospitals, or in the case of persons taken thither for the treatment of wounds. Other things being equal, gangrene is less likely to occur in a private house where sanitary law is carried out, though the thorough ventilation of hospitals and antiseptic treatment have much diminished the frequency of hospital gangrene.

***hos'-pĭt-ąle,** *s.* [Lat.] A lodging; a shelter. (*Robert de Brunne*, p. 135.)

*** hos'-pĭt-ąl-ĭşm,** *s.* [Eng. *hospital; -ism.*] The system of conducting hospitals in such a way that, by over-crowding, diseases such as erysipelas are propagated.

hŏs-pĭ-tăl'-ĭ-tў, *hos-pĭ-tal-i-tie, *s.* [Fr. *hospitalité*, from Lat. *hospitalis.*] The act or practice of receiving and entertaining strangers hospitably; generous and liberal treatment of visitors, strangers, or guests.

"The expense of *hospitality* she [Elizabeth] somewhat encouraged by the frequent visits she paid her nobility."—*Hume: Hist. of Eng.* (App. 3.)



HOSPITALLER.

9. The audience or attendance at a place of entertainment: as, A play draws good *houses.*

10. The manner of living; a supply of food for the table; a table.

"He kept a miserable *house*, but the blame was laid wholly upon madam."—*Swift.*

* 11. A square or division on a chess-board.

II. *Technically:*

1. *Astrol.:* The station of a planet in the heavens; a twelfth part of the heavens as divided by great circles drawn through the north and south poles of the horizon, in the same way as meridians pass through the earth's poles. The heavens, visible and invisible, were thus divided into twelve equal parts, six being above and six below the horizon. These divisions, or *houses*, were numbered from one to twelve, beginning with that which lay in the last immediately below the horizon. The first *house* was the *house* of life; the second, of fortune or riches; the third, of brethren; the fourth, of relations; the fifth, of children; the sixth, of health; the seventh, of marriage; the eighth, of death, or the upper portal; the ninth, of religion; the tenth, of dignities; the eleventh, of benefactors; and the twelfth, of enemies or captivity.

2. *Comm.:* A commercial establishment or firm.

3. *Law:* A *house* is a word often difficult legally to define; its meaning in any act of parliament must be looked for in the act itself. Thus the house which confers the title to vote in burghs as a *house*holder is, in many cases, only a single room of a building.

¶ For the difference between *house* and *family*, see Family.

¶ * 1. *House of call:* A house where journeymen of a particular trade meet, especially when out of work, and where those in need of workmen can meet and engage hands.

"In a velvet bed of state drawn by six horses, *houssed* with ye same."—*Evelyn: Memoirs,* Oct. 22, 1658.

hŏuse'-flȳ, *s.* [Eng. *house,* and *fly.*]

Entom.: Musca domestica. The third joint of the antennæ is thrice the length of the second; the style is plumose; the eyes reddish-brown; the front of the head white; the neck black; the thorax blackish-gray, with four longitudinal black bands; abdomen blackish-brown, above with blackish elongated spots, pale yellowish brown beneath. Why the housefly can walk up smooth panes of glass, or traverse the ceilings of rooms, is not completely settled. The old explanation was that this was done by the "suckers" on its feet; these, however, are so hairy that they cannot act like a boy's sucker, and as the fly can traverse the inner sides and roof of the exhausted receiver of an air-pump, some other hypothesis must be sought. It may arise partly from the hairs taking hold of very minute irregularities on the surface, and by the secretion of a gummy substance as the insect walks. The larvæ are called maggots; they live in decaying animal matter. The common fly has a wide geographical distribution. In Bermuda, for instance, they may be seen on the table at meals in countless numbers. It is possible that the feet of the fly may carry infection from place to place.

hŏuse'-hōld, * **hŏus'-hōld,** *s.* & *a.* [Eng. *house,* and *hold;* from being held or kept together in one house.]

"Madonna's face upon him shone,
Painted in heavenly *hues* above."
Byron: Siege of Corinth, xxx.

2. *Paint.:* A compound colour in which one of the primaries predominates. Such are the various grays which are composed of the three primary colours, in unequal strength and proportion. A gray in which blue predominates has a blue *hue;* one in which red predominates has a red *hue,* &c. The term is often carelessly employed by writers, who substitute it for tint or shade, which are strictly primary or secondary colours, in various degrees of intensity.

hūe (2), *** huy,** *s.* [Fr. *huer* = to hoot . . . to make hue and cry; *huée* = a shouting, an outcry, or hue and cry (*Cotgrave*), from O. Sw. *huta* = to hoot (q.v.).] [Hoot.] Now only used in the phrase *hue and cry;* a loud shout or cry; a clamour.

¶ *Hue and cry:*

Law: (See extract).

"There is yet another species of arrest, wherein both officers and private men are concerned, and that is, upon a *hue and cry* raised upon a felony committed. A *hue and cry,* hutesium et clamor, is the old common law process of pursuing, with horn and with voice, all felons, and such as have dangerously wounded another. That it might more effectually be made, the hundred was bound by the statute of Winchester, c. 3, to answer for all robberies therein committed unless they took the felon, which was the foundation of an action against the hundred, in case of any loss by robbery; and the whole vill or district is still in strictness liable to be amerced, according to the law of Alfred, if any felony be committed therein and the felon escapes."—*Blackstone: Comment.,* bk. iv., ch. 21.

hūed, * hewed, *a.* [Eng. *hu(e); -ed.*]

1. Having a particular hue or colour.

Hū'-guę-nŏt, *s.* & *a.* [Many etymologies have been given, all on the supposition that the word did not arise before the Reformation. But mention is made under date Oct. 7, 1387, of a Pascal Huguenot, from St. Junien, in Limousin. It was, therefore, derived from some individual. The word *Huguenot* is believed by Mahn and Littré to be the diminutive of *Hugues.* The first known use of the word in the now established sense was in a letter from the Count de Villars, Lieutenant-general in Languedoc, dated Nov. 11, 1560. (*Littré.*)]

A. *As substantive:*

Hist.: A nickname formerly applied by the Roman Catholics to the Protestants of France, who were nearly all Calvinists, and who converted the appellation into one of honour instead of reproach. D'Aubigné believed that the Reformation began in France in A.D. 1512, while that of Switzerland commenced in 1516, and that of Germany in 1517. For a time France seemed as likely as the other two countries to adopt Protestantism. Though Margaret, the sister of Francis I., had favoured it, yet that king had been strongly against it, at least during the latter part of his reign, as were Francis II. and Henry II. It arose among the people, and through their sympathy became so formidable, that when, in 1561, a year after the accession of Charles IX., the Huguenots [Def.] were prohibited from preaching, they took up arms to achieve religious liberty. The chief seat of their power was in the south and west of France, that of the Catholics in the north and east. With an occasional hollow truce, or an interval of peace as hollow, the struggle went on for the next century and a quarter. Its two most notable incidents were the Massacre of St. Bartholomew, August 24, 1572 [Bartholomew], and the Revocation of the Edict of Nantes, Oct. 22, 1685 [Revocation]. The name Huguenot has not been permanent. Those so called were afterwards denominated Reformed or simply Protestant.

B. *As adj.:* Of or belonging to the French Protestants of the sixteenth and seventeenth centuries.

hŭm'-mŏck-ў, *a.* [Eng. *hummock; -y.*] Full of hummocks.

hŭm'-mŭm, *s.* [Pers.] A bath or place for sweating.

hū'-mŏr (or *h* silent), *s.* [Fr. *humeur*; O. Fr., Prov., Sp., & Port. *humour*, all from Lat. *humor* = a liquid, fluid, moisture, *humeo* = to be moist; Gr. χυμός (*chumos*) = juice, liquid; χέω (*cheō*) = to pour; to become liquid; cf. also Gr. ὗω (*huō*) = to wet.]

I. *Ordinary Language:*

* 1. (*Of things material*): A tendency to disease or disease itself.

"The child had a *humour*, which was cured by the waters of Glastonbury."—*Fielding.*

¶ See also II. 2.

2. *Of things mental:*

* (1) A proud conceit; an erroneous notion arising from an ill-balanced physical or mental temperament.

"To lay down their gigantic *humours*, and become as our Saviour Christ."—*Henry More: Grand Mystery of Godliness*, viii. 15.

(2) A manifestation of pettishness or peevishness.

"Those *humours* taste as wine upon the fret
Which idleness and weariness beget."
Cowper: Retirement, 761.

(3) A caprice; a whim entertained at the moment.

"It is the curse of kings to be attended
By slaves that take their *humours* for a warrant."
Shakesp.: King John, iv. 2.

(4) Mental or moral tendency; predominant inclination; general turn or temper of mind.

"The dark and sullen *humour* of the time."
Cowper: Table Talk, 616.

(5) A disposition to look at things from the mirthful point of view.

"Sorrow has, since they went, subdued and tamed
The playful *humour*."
Cowper: Task, vi. 47.

II. *Technically:*

1. *Anat., &c.:* A liquid, a fluid. [¶ 1.]

2. *Phys.:* According to Galen, &c., there are four humors, blood, choler, phlegm, and melancholy, lying at the bases respectively of the sanguineous, the bilious, the phlegmatic, and the melancholic temperaments. He believed that if all these humors were mixed in equal proportions, the temperament was a perfect one, but if, as was almost always the case, some one markedly predominated, then a person would show certain mental peculiarities produced by, or at least in harmony with the particular humor which preponderated in his physical temperament.

3. *Mental Phil.:* A mental faculty which tends to discover incongruous resemblances between things which essentially differ, or essential differences between things put forth as the same; the result being internal mirth or an outburst of laughter. Wit does so likewise, but the two are different. Humor has deep human sympathy, and loves men while raising a laugh against their weaknesses. Wit is deficient in sympathy, and there is often a sting in its ridicule. Somewhat contemptuous of mankind, it has not the patience to study them thoroughly, but must content itself with noting superficial resemblances or differences. Humor is patient and keenly observant, and penetrates beneath the surface; whilst, therefore, the sallies of wit are often onesided and unfair, those of humor are, as a rule, just and wise.

¶ 1. *Aqueous humor:* [Aqueous, Eye].

* 2. *Bad humor:*

* (1) Such predominance of one of the four humours [II. 2] as to permanently make a bad or undesirable temperament.

(2) Bad temper for the moment, or for a short time.

3. *Good humor:*

* (1) Such predominance of one of the four humors [II. 2] so as to make the temperament good.

(2) [Good-humor.]

4. *Vitreous humor:* [Eye, Vitreous].

¶ *Humour* is general; *caprice* is particular: *humour* may be good or bad; *caprice* is always taken in a bad sense. *Humour* is always independent of fixed principle; it is the feeling or impulse of the moment; *caprice* is always opposed to fixed principle, or rational motives of acting; it is the feeling of the individual setting at nought all rule, and defying all reason. (*Crabb: Eng. Synon.*)

hū'-mŏr, hū'-moŭr (*h* silent), *v.t.* [Humor, *s.*]

1. To accommodate one's self or things to the humor of another; to comply or fall in with the inclination, humor, or caprices; to gratify, to indulge, to give way to; to soothe by compliance.

humoral-pathology, *s.*

Med.: A medical hypothesis that many, if not most diseases arise from a morbid state of the blood. Galen's doctrine of humors laid the foundation of it. Hermann Boerhaave (1668–1738) was one of its great advocates. Under the influence of Professor Cullen (1712–1790) and others the humoral pathology was largely ignored, though in certain respects it still holds its ground. Chlorosis, jaundice, and gout are attended by a morbid condition of the blood and other animal fluids. Called also Galenism, humorism, and humoralism (q.v.).

hŭ'-nọo-man, hạn'-ụ-man, *s.* [Sanac., Mahratta, &c.]

1. *Zool.:* The sacred monkey of India, *Semnopithecus Entellus.* It is yellowish-white, with the eyebrows black and has a long tail. It is so much venerated by the Hindoos, that any European firing at one in a half, or even totally wild state, will find his life in danger from the people. It exists in large numbers in parts of India, eating quantities of fruit.

2. *Indian Mythol. & Religion:* The Indian monkey god. It is believed that Rávana, a man or monster in human form, from Ceylon, having enjoyed the hospitality of King Râma, of Ayodhya (Onde), basely took away by force Seeta, the queen of his entertainer. To recover his spouse, and inflict punishment on Rávana, Râma assembled an army and made an expedition to Ceylon. As he passed through the Central Indian jungles he was joined by an army of monkeys, under a leader called Hunooman, who rendered Râma the most essential service. Hence Hunooman, formed with a monkey face, is one of the chief objects of worship at present in India. Râma's expedition may actually have taken place, and the monkey army may have been the wild human tribes of the jungle.

¶ *Countess of Huntingdon's Connexion:*

Ecclesiol. & Ch. Hist.: The title by which one of the religious denominations in England is designated in the Registrar-General's books. The lady referred to is Selina, Countess of Huntingdon (1707–1792). She was deeply pious, and, holding Calvinistic views, sympathised with Whitefield when he separated in a friendly way from Wesley, whose theology was Arminian. Her purse and her influence were ever afterwards at Whitefield's disposal, and as she felt more than he did the necessity of Church organization, the denomination which rose out of his zealous labours was generally called not Whitefield's, but the Countess of Huntingdon's Connexion. When she died it is said that sixty-four such chapels existed. The number officially enumerated during the census of 1851 was 109. The Connexion is so closely akin to the Congregationalist Churches in doctrine and worship that they are scarcely to be distinguished except that some of the former use a portion of the English liturgy. Called also Lady Huntingdon's Connexion and Huntingdonians.

Hŭn-tĭng-dō'-nĭ-ans, *s. pl.* [Named after the Countess of Huntingdon; Eng. pl. suff. *-ians.*]

Hŭss'-īte, *a.* & *s.* [Named after John Huss [Def.]; *huss*, in Bohemian = a goose.]

Church & Civil History:

A. *As adj.:* Of or belonging to John Huss (B.)

B. *As subst.* (*Pl.*): The followers of John Huss, who was born of humble parents, at Hussinatz in Bohemia, about A.D. 1370, and became priest in 1400. Huss was a realist in philosophy, and adopted the views of Wycliffe, whose works he translated, giving great offence to the Archbishop of Prague. Huss appeared by citation before the Council of Constance, and, though provided with a safe-conduct from the Emperor Siegmund, or Sigismund, he was adjudged a heretic, and burnt alive July 6, 1415, as was his disciple Jerome of Prague, on May 30, 1416. By the decision of this Council, the request of the Bohemian laity to communicate under two kinds was refused. The treatment of Huss exasperated his followers, and led to a religious war in which great ferocity and cruelty were manifested on both sides. The Hussite leaders were John Ziska, or Zizka, and after his death Procopius. Sigismund commanded the imperial forces. The Hussites fortified a mountain near Prague which they called Mount Tabor. [Taborites.] Ziska was victorious in thirteen pitched battles and a hundred engagements and sieges, though, losing his second eye by an arrow, the first having been destroyed in his youth, he had to lead without the gift of sight. He died Oct. 12, 1424, soon after he had obtained religious liberty for Bohemia. Before this the Hussites had begun to split into minor sects, as the Orebites, or Horebites, the Orphanites, and the Calixtines (q.v.). In 1433, the Calixtines were conciliated by the concession of the cup to the laity. [Utraquists.] By the treaty of 1435, Siegmund was acknowledged king of Bohemia, which, however, remained in an uneasy state. The Hussite troubles prepared the way for the Lutheran Reformation.

Huttonian-theory, *s.*

Geol.: The theory first published by Dr. Hutton, in 1788, in his *Theory of the Earth*, and developed in 1795. He was the first to distinguish between cosmogony and geology, believing the latter to be in no way concerned with "questions as to the origin of things." He says that—

"The ruins of an older world are visible in the present structure of our planet, and the strata which now compose our continents have been once beneath the sea, and were formed out of the waste of pre-existing continents. The same forces are still destroying, by chemical decomposition or mechanical violence, even the hardest rocks and transporting the materials to the sea, where they are spread out and form strata analogous to those of more ancient date. Although loosely deposited along the bottom of the ocean, they become afterwards altered and consolidated by volcanic heat, and then heaved up fractured and contorted."

Hutton was the precursor of Sir Charles Lyell, whose views were essentially the same, and who procured for them large acceptance among geologists. Professor Huxley called the Huttonian theory Uniformitarianism (q.v.). [Geology, Plutonists, Vulcanists.]

*** hû-vĕtte',** *s.* [Fr.]

Mil.: A covering for the head for a soldier.

hŭx, *v.t.* [Etym. doubtful.] To fish, as for pike, with hooks and lines attached to floating bladders.

*** hŭx'-tĕr,** *s.* [Huckster.]

Huȳ-ġē'-nī-ạn, *a.* [From Hugenius, the Latinized name of Huyghens. See def.]

Optics, &c.: Of or belonging to Christian Huyghens, born at the Hague, April 14, 1629, died 1695, aged 66. He discovered double refraction in crystals, ascertained that the apparent horns, seen by Galileo, projecting from Saturn were a ring, discovered the fourth satellite to that planet, &c.

Huygenian-telescope, *s.*

Optic. Instrum.: A telescope having an object glass of 123 feet of focal length. The glass was mounted on a pole, and had no tube, the only one being a small one for the eye glass. He subsequently constructed an eye-piece of two lenses, which served the double purpose of enlarging the field of vision and diminishing aberration.

hnȳs-sĕn'-īte, *s.* [Named after Huyssen, who, in 1865, first described it under the name of *Eisenstassfurtit.*]

Min.: A greenish-gray mineral, weathering yellow, either an iron boracite or a distinct species.

*** hŭzz, * hŭss,** *v.i.* [From the sound.] To buzz; to murmur.

"If the fire then burne in the chimney pale, and keepe therewith a *huzzing* noise."—*P. Holland: Plinie*, bk. xviii., ch. xxxv.

hŭz-za', *interj.* & *s.* [Hurrah.]

A. *As interj.:* A shout of joy, acclamation, or welcome; hurrah.

"*Huzza*, my jolly cobblers! and *huzza*,
My stable sweepers." *Fawkes: Epithalamium.*

B. *As subst.:* A cheer; an hurrah.

"Three loud *huzzas* were raised."—*Macaulay: Hist. Eng.*, ch. xii.

hŭz-za', *v.i.* & *t.* [Huzza, *s.*]

A. *Intrans.:* To shout huzza; to hurrah; to cheer.

"The mob *huzzas*. Away they trudge."
Cowper: Horace; Satires, bk. i. 9.

B. *Trans.:* To cheer; to salute with huzzas or cheers; to receive with acclamations.

"The brute crowd, whose envious zeal
Huzzas each turn of Fortune's wheel."
Scott: Rokeby, vi. 26.

hŭz'-zĭĕ, *s.* [Hussy.]

hvĕr'-lĕr-ạ, *s.* [Sw.]

Min.: A white or reddish clay, described by Forchhammer, from Iceland. Compos.: silica, 50·99; alumina, 7.39; sesquioxide of iron, 21·21; magnesia, 19·96; and titanic acid, 0·46.

hvĕr'-salt, *s.* [Dan., from *hver* = every one, and *salt* = salt.]

Min.: A variety of Halotrichite. It is an alum from Iceland, described by Forchhammer.

*** hȳ'-ạ-çĭnc,** *s.* [Hyacinth.] The hyacinth.

"Some deep empurpled as the *hyacine*."
Spenser: F. Q., II. xii., liv.

hȳ'-ạ-çĭnth, hȳ-ạ-çĭn'-thŭs, Hȳ-ạ-çĭn'-thŭs, *s.* [Lat. *hyacinthus* = Gr. *ὑάκινθος* (*huakinthos*) = a plant, apparently not the modern hyacinth. Liddell & Scott consider it to have been a generic word for any of the Iris order. One of these, *Gladiolus communis*, has been specified. Other opinions are in favour of the Martagon Lily, or even of the Larkspurs; *Ὑάκινθος* (*Huakinthos*) [f. **I**]; in Fr. *hyacinthe.*]

I. *Of the forms* Hyacinthus, hyacinthus:

1. *Class. Mythol.* (*Of the form* Hyacinthus): A Laconian youth, beloved by Apollo, who killed him undesignedly by a throw of a discus or quoit. The god transformed him into a flower (hyacinthus), on which, in memorial of his grief, he inscribed the Greek letters α ι (*a i*). Scientifically viewed, the process should be reversed. The discovery of some plant with marks faintly resembling the Greek letters α ι generated the myth of the youth Hyacinthus.

2. *Bot.* (*Of the form* hyacinthus): A genus of Liliaceæ, tribe Scilleæ, once so extensive as to include the common wild hyacinth (hyacinth of the woods) or blue bell, then called *Hyacinthus nonscriptus*, next transferred to the genus Agraphis of Link, and called *Agraphis nutans* (*Hooker & Arnott*), and now figuring as *Scilla nutans* (*Sir Joseph Hooker*). It included also the present *Muscari racemosum.* As now limited its type is *H. orientalis.* [**II.** 1.] The bulb is stout; the leaves fleshy, linear, and oblong; the inflorescence a drooping spike with the perianth bell-shaped, six-parted; the stamens six, all equal; one style, with a three-cornered stigma, and the ovary subglobose, three-celled, many-seeded.

3. *Min.* (*Of the form* hyacinthus): A precious stone, described by Pliny as of the colour of a hyacinth, and also like an amethyst, but not so blue. (*Pliny: H. N.*, xvii. 9, 41.) Dana regards it as having been a sapphire, some others consider it a kind of amethyst.

II. *Of the form* hyacinth:

1. *Bot.:* A plant of the genus Hyacinthus, wide or restricted, and specially of the cultivated species, *Hyacinthus orientalis.* It is a native of the Levant and the mountains of Persia. The Dutch have cultivated it since about 1500, and Gerard mentions it in England in 1576. Here it is cultivated in spring in long glasses or bottles of suitable form. It has run into several varieties, and is of different colours.

¶ For the wild Hyacinth, see Hyacinth, I. 2. The Cape Hyacinth is (1) *Scilla corymbosa*, and (2) *Scilla brachyphylla*; the Grape Hyacinth, the genus Muscari; the Lily Hyacinth, *S. Lilio-hyacinthus*; the hyacinth of Peru, *S. peruviana*; that of Tasmania, *Thelymitra nuda*; the Spanish Hyacinth, *Hyacinthus amethystinus*; the Starch Hyacinth, *Muscari racemosum.*

2. *Mineralogy:*

(1) A variety of zircon. It is of a brownish, orange, or reddish colour.

(2) The name given in Ceylon to Cinnamon-stone or Essonite (q.v.).

(3) The same as Vesuvianite (q.v.).

3. *Jewellery:* The name applied by jewellers to Essonite (q.v.), and to some specimens of topaz.

hyacinth-pest, *s.*

Hort.: A ring disease caused by a fungal which attacks first the innermost scales of the hyacinth, then affects the leaves, which turn yellow, then the flower-stalk, which decays, and finally the whole bulb, which degenerates into a muddy mass. (*Thomé.*)

*** hȳ-ạ-çĭnth'-ĭ-ạn,** *a.* [Eng. *hyacinth*; *-ian.*] Hyacinthine.

hȳ-ạ-çĭnth'-īne, * hȳ-ạ-çĭnth'-ĭn, *a.* [Lat. *hyacinthinus*, from Gr. *ὑακίνθινος* (*huakinthinos*) from *ὑάκινθος* (*huakinthos*) = a hyacinth.] Made of or resembling hyacinths; of the colour of hyacinths; curling like a hyacinth.

"*Hyacinthine* locks
Round from his parted forelock manly hung
Clustering." *Milton: P. L.*, iv. 301.

hȳ-ạ-çĭn'-thŭs, *s.* [Hyacinth.]

Hȳ'-ạdș, Hȳ'-ạ-dēș, *s. pl.* [Lat. *hyades*; Gr. *Ὑάδες* (*Huades*), probably from *ὗς* (*hus*) = a sow, or *ὗω* (*huō*) = to wet, to water, to rain.]

Astron.: According to the classic writers, seven stars (only five of which are now clearly discernible) in the head of the Bull, Taurus. One is Aldebaran (q.v.). When the Hyades rose with the sun, the Greek and Romans expected rain.

"Thro' scudding drift the rainy *Hyades*
Vext the dim sea." *Tennyson: Ulysses*, 10.

hȳ-æ'-nạ, *s.* [Lat., from Gr. *ὕαινα* (*huaina*) = a Libyan wild beast, probably the hyæna, from *ὗς* (*hus*) = a swine, a pig, to which the hyæna has no close affinity.] [Hyena.]

1. *Zool.:* The typical genus of the family Hyænidæ (q.v.). The known recent species are four: (1) The common Striped Hyæna (*Hyæna striata*) is brownish-gray, darker above, with several irregular, transverse, distinct stripes along the sides. It is the *Canis Hyæna* of Linnæus, the only species he knew. Inhabiting Western Asia and Northern and Central Africa, it was known to the ancients, who regarded it with superstitious awe, and invented many tales as to its habits. It is nocturnal, grubbing up corpses from graveyards, hunting down animals, or, in some cases, carrying off children. Moore calls its cry a "moan," but sometimes there is a sound like sardonic laughter, whence the animal is called the Laughing Hyæna. Fierce as it is, it can be domesticated with ease. (2) *Hyæna maculata*, the Spotted Hyæna, found at the Cape of Good Hope, and in Southern Africa generally, where it is called Cape Hyæna, and, on account of its ferocity, Tiger-wolf. It is yellowish-brown, with numerous spots of a deeper colour. It is somewhat smaller than the Striped Hyæna. (3) *Hyæna villosa*, the Strand Wolf of the Dutch, is also from the Cape, where it was first discriminated, in 1833, by Dr. Andrew Smith. It is grizzled brown with some bands, whence it has been sometimes mistaken for the Striped Hyæna [(1)]. (4) The Brown Hyæna. It occurs at Natal.

2. *Palæont.:* The genus first appears in the Upper Miocene of the Siwalik Hills and of continental Europe. It was well represented in the Pliocene. Prof. Boyd Dawkins reckons the Spotted Hyæna, *Hyæna crocuta*, one of the British Mid-Pleistocene mammals, existing to the late Pleistocene. Formerly the specimens from caves were named *Hyæna spelæa*, but it is now believed that they are only a variety of *H. crocuta.* [Alnum Glacum.] When a cave like Kirkdale, or Kent's Hole, once inhabited by hyænas, is opened, it is generally found to abound in bones of other mammals, which have been broken, gnawed, and polished by the teeth of the hyæna.

hyæna-dog, *s.*

Zool.: A name applied by Swainson to the Aard Wolf (q.v.), and by J. E. Gray to the Hunting Dog (q.v.).

hȳ-æ-năn'-chē, *s.* [Lat. *hyæna* (q.v.), and Gr. *ἄγχω* (*anchō*) = to strangle.]

Bot.: A genus of Euphorbiaceæ, tribe Buxeæ. The powdered fruit of *Hyænanche globosa* or *capensis*, called also *Toxicodendron capense*, is rubbed on mutton by the Cape colonists and used to poison hyænas.

hȳ-æn-arc'-tŏs, *s.* [Lat. *hyæna*, and Gr. *ἄρκτος* (*arktos*) = a bear.]

Palæont.: A genus of Ursidæ. The remains of *Hyænarctos hemicyon* occur in the Mid-Miocene, and those of *H. insignis* in the Lower Pliocene of France.

hȳ-æn-ĭc'-tĭs, *s.* [Lat. *hyæn*(*a*), and *ictis* = Gr. *ἰκτίς* (*iktis*) = a weasel.]

Palæont.: An extinct genus of Hyænidæ, with affinities to the Viverridæ. It is found in the Upper Miocene of Greece.

hȳ-æn'-ĭ-dæ, *s. pl.* [Lat. *hyæna* (q.v.); fem. pl. adj. suff. *-idæ.*]

Zool.: A family of carnivorous mammals. Incisors $\frac{6}{6}$, canines $\frac{1—1}{1—1}$, præmolars $\frac{3—3}{3—3}$, molars $\frac{2—2}{1—2}$, the last molar in the upper jaw being tubercular, as in the Felidæ, and the tongue, as in their case, rough with prickles. They have projecting eyes and large ears. In their claws, which are not retractile, they approach the Canidæ (Dogs), but the toes are only four, while in both the cats and dogs they are five. The hind feet of the hyænas are much bent, making the shoulder higher than the haunch. The body is heavy, and the gait stooping. The whole organization adapts them

for breaking bones. [Hyæna.] They inhabit the warmer regions of the Old World, Southern Africa being their metropolis. In addition to Hyæna, the genus Proteles, though it has viverrine affinities, seems to belong to this family. [Aardwolf.]

2. *Palæont.:* [Hyæna, 2; Hyænictis].

† hȳ-æn-ī'-næ, *s. pl.* [Lat. *hyæn(a);* fem. pl. adj. suff. *-inæ.*]

Zool.: A sub-family of Canidæ, now generally raised to the rank of a family, and called Hyænidæ (q.v.).

hȳ-æn'-ō-dŏn, *s.* [Lat. *hyæn(a),* and Gr. *ὀδούς* (*odous*), *ὀδόντος* (*odontos*) = a tooth.]

Zool.: A genus of carnivorous marsupials. *Hyænodon leptorhynchus* is described by Professor Boyd Dawkins as occurring in the Upper Eocene of Hordwell. Three species occur in the Upper Eocene of France.

hȳ-æn-ō-dŏn'-tĭ-dæ, *s. pl.* [Mod. Lat. *hyænodon* (q.v.); Lat. fem. pl. adj. suff. *-idæ.*]

Palæont.: A family of carnivorous marsupials. Incisors $\frac{3-3}{3-3}$, canines $\frac{1-1}{1-1}$, præmolars $\frac{3-3}{3-3}$. All the molars have trenchant edges. Hyænodontidæ are sometimes placed among the carnivora. They occur in the Eocene and the Lower Miocene of France, England, and the United States.

hȳ'-a-hȳ-a, *s.* [Native name in Central America.]

Bot.: *Tabarnæmontana utilis*, one of the Cow-trees of America.

hȳ-a-lē'-a, hȳ-a-læ'-a, *s.* [Gr. *ὑάλεος* (*hualeos*) = glassy.]

Zool.: The typical genus of the family Hyalæidæ (q.v.). The shell is globular and translucent. The animal has long appendages to the mantle, which is slit at both sides. Nineteen recent species are known from the Atlantic, the Mediterranean, and the Indian Ocean. Five are fossil, the genus extending from the Miocene till now.

hȳ-a-lē'-ĭ-dæ, hȳ-a-læ'-ĭ-dæ, *s. pl.* [Mod. Lat. *hyale(a), hyalæ(a);* Lat. fem. pl. adj. suff. *-idæ*]

Zool.: A family of Pteropodous Molluscs, section Thecosomata. The shell is straight or curved, globular, or needle-shaped, and symmetrical. The animal has two large fins.

hȳ'-ă-līne, *a. & s.* [Lat. *hyalinus*, from Gr. *ὑάλινος* (*hualinos*), from *ὕαλος* (*hualos*)=glass; Fr. *hyalin.*]

A. *As adjective:*

1. *Ord. Lang.:* Glassy, transparent, crystalline.

2. *Bot., Anat., Zool., &c.:* Transparent and colourless, as water and glass. (*Harvey,* &c.)

B. *As substantive:*

1. *Ord. Lang.:* The glassy surface of the sea.

"On the clear *hyaline*, the glassy sea;
Of amplitude almost immense, with stars
Numerous." *Milton: P. L.*, vii. 619.

2. *Zool & Physiol.:* The pellucid substance which determines the spontaneous fission of cells. (*Owen: Comp. Anat Invert. Anim.; Glossary.*)

hyaline-cartilage, *s.*

Anat.: A kind of cartilage which is somewhat dim and faintly granular, like ground-glass. (*Quain.*)

hyaline-layer, *s.*

Anat.: The name given by Kölliker to the innermost layer of a hair follicule.

hȳ'-a-līte, *s.* [Lat. *hyalus*; Gr. *ὕαλος* (*hualos*), *ὑελος* (*huelos*) = a clear, transparent stone, glass, and *λίθος* (*lithos*) = a stone.]

Min.: A glassy and transparent or translucent variety of opal, colourless or whitish. It occurs in globular concretions and crust. Sometimes called from its discoverer Müller's glass.

hȳ-a-lō-, *pref.* [Lat. *hyalus*; Gr. *ὕαλος* (*hualos*), *ὑελος* (*huelos*) = any clear, transparent stone, glass.] Colourless and transparent like glass, resembling or in any way connected with glass.

hȳ-ăl'-ō-grăph, *s.* [Hyalography.] An instrument for tracing a design on a transparent surface.

hȳ-a-lŏg'-ra-phy, *s.* [Pref. *hyalo-*, and Gr. *γράφω* (*graphō*) = to write.] The art of writing or engraving on glass.

hȳ'-a-loid, *a.* [Gr. *ὕαλος* (*hualos*), and *εἶδος* (*eidos*) = appearance, likeness.] [Hyalite].

Anat.: Glassy; having the appearance and transparency of glass.

hyaloid-membrane, *s.*

Anat. (*Of the eye*): A membrane investing the whole of the vitreous humour except in front. (*Quain.*)

hȳ-a-lŏm'-ĕ-lăn, *s.* [Pref. *hyalo-*, and Gr. *μελάν* (*melan*), neut. of *μέλας* (*melas*) = black.]

Min.: A mineral perhaps the same as Tachylite. Found in the Vogelsbirge.

hȳ-a-lō-nē'-ma, *s.* [Pref. *hyalo-*, and Gr. *νῆμα* (*nēma*) = yarn.]

Zool.: Glass-rope; the typical genus of the family Hyalonemidæ (q.v.). *Hyalonema lusitanicum* is found in the depths of the Atlantic. The stem of *H. Sieboldii* is called the flint-rope.

hȳ-a-lō-nē'-mĭ-dæ, *s. pl.* [Mod. Lat. *hyalonem(a);* Lat. fem. pl. adj. suff. *-idæ.*]

1. *Zool.:* A family of siliceous sponges, or, according to some, a family of *Zoantharia Sclerobasica*. It consists of a cup-shaped sponge-like head, anchored in the mud of the sea-bottom by a long, glassy, twisted fibrous rope or ligament.

2. *Palæont.:* The family occurs from the Silurian times till now.

hȳ-ăl'-ō-phāne, *s.* [Pref. *hyalo-*, and Gr. *φαίνω* (*phainō*), 1st fut. *φανῶ* (*phanō*) = to make to appear.]

Min.: A monoclinic white, colourless or flesh-red mineral, transparent or translucent; its lustre vitreous; hardness, 6 to 6·5; sp. gr., 2·8 to 2·9. Compos.: silica, 45·65 to 52·67; alumina, 19·14 to 22·86; baryta, 9·56 to 21·38. Occurs in a granular dolomite in the Valais, in manganese lime at Jakobsberg in Sweden, &c.

hȳ-a-lō-sĭd'-ĕr-ite, *s.* [Pref. *hyalo-*, and Eng. *siderite* (q.v.).]

Min: A ferruginous variety of olivine.

hȳ-ăl'-ō-tȳpe, *s.* [Pref. *hyalo-*, and Eng. *type.*] A photographic positive on glass.

***hȳ-bĕrn'-a-cle, *hȳ-bĕr-nāte,** &c. [Hibernacle, Hibernate, &c.]

hȳ-bĕr'-nĭ-a, *s.* [Lat. *hibernus, hybernus* = pertaining to winter; *hiberna, hyberna* = winter quarters.]

Entom.: The typical genus of the family Hybernidæ (q.v.). *Hybernia leucophearia* is the Spring Usher (q.v.).

hȳ-bĕr'-nĭ-dæ, *s. pl.* [Lat. *hybern(ia)* (q.v.); fem. pl. adj. suff. *-idæ.*]

Entom.: A family of moths, group Geometrina. The antennæ of the male are pubescent or slightly pectinated; the abdomen is slender; the wings entire, rather broad. Female apterous or with the wings only rudimentary. Larva cylindrical, not humped.

Hȳb-læ'-an, *a.* [Lat. *Hyblæus.*] Of or pertaining to Mount Hybla in Sicily, noted for its honey.

hȳb'-līte, *s.* [From Mount Hybla, where it occurs.] [Hyblæan.]

Min.: The same as Patagonite (q.v.).

hȳb'-ō-dŏnt, *a. & s.* [Hybodontidæ.]

A. *As adj.:* Having teeth with a hump-like projection. [Hybodus.]

B. *As subst.* (*Chiefly in the pl.* Hybodonts):

Palæont.: A tooth of the genus Hybodus, or the fish to which it belonged.

hȳb-ō-dŏn'-tĭ-dæ, *s. pl.* [Gr. *ὑβός* (*hubos*) = hump-backed; *ὀδούς* (*odous*), genit. *ὀδόντος* (*odontos*) = a tooth, and Lat. fem. pl. adj. suff. *-idæ.*]

Palæont.: A family of fossil fishes, order Plagiostomi of Owen, or Cestraphori.

hȳb'-ō dŭs, *s.* [Gr. *ὑβός* (*hubos*) = hump-backed, and *ὀδούς* (*odous*) = a tooth.]

Palæont.: The typical genus of the family Hybodontidæ (q.v.). The teeth somewhat resemble those of the sharks, but are less trenchant. They are formed with a central cone, with smaller secondary cones on the sides. The ichthyodorulites (fin spines) are grooved longitudinally, and have a number of small teeth on their concave margin. A few species are from the Trias, many from the Lias and the Oolite. They die out in the Chalk.

hy'-brĭd, hy-bride, *s.* [Lat. *hibrida, hybrida*, and *ibrida* = a hybrid.] [See def.]

A. *As adjective:*

I. *Lit.* (*Of animals or plants*): Produced by the union of two distinct species.

"Perfectly fertile *hybrid* animals."—*Darwin: Origin of Species* (6th ed.), p. 241.

2. *Fig.* (*Of persons or things*): Derived from two sources, as an Act of Parliament, a faith, a word, &c.

"These Judaising *hybrid* Christians."—*South: Sermons*, vol. v., ser. 12.

B. *As substantive:*

I. *Ordinary Language:*

1. *Literally:*

(1) *Strictly:* In the same sense as II.

(2) *Loosely:* A human being born of parents belonging to different races. Such a person should be called a mongrel, not a hybrid.

2. *Fig.:* Anything deriving its origin from two wholly distinct sources.

II. *Biol.:* An animal or plant produced by the union of two distinct species. Plant hybrids are artificially produced by applying the pollen of one species to the stigma of another closely allied to the first. [Hybridism.]

"In the first generation mongrels are more variable than *hybrids*."—*Darwin: Origin of Species* (6th ed), 259.

hy'-brĭd-īz-ĕr, *s.* [Hybridizer.]

hy'-brĭd-īzm, *s.* [Eng. *hybrid; -ism.*]

Biol.: The state or quality of being hybrid; hybridity.

¶ It was long believed that hybrids were uniformly sterile, and had been made so to prevent the confusion of species. Darwin (*Origin of Species*, ch. ix.) combats this view, pointing out that two classes of facts, to a great extent fundamentally different, have generally been confounded—viz., the sterility of species when first crossed, and the sterility of the hybrids produced from them.

"First crosses between forms sufficiently distinct to be ranked as species and their hybrids are very generally, but not universally, sterile. The sterility is of all degrees, and is often so slight that the most careful experimentalists have arrived at diametrically opposite conclusions in ranking forms by this test. The sterility is innately variable in individuals of the same species, and is eminently susceptible to the action of favourable and unfavourable conditions. The degree of sterility does not strictly follow systematic affinity, but is governed by several curious and complex laws. It is generally different, and sometimes widely different, on reciprocal crosses between the same two species. It is not always equal in degree in a first cross, and in the hybrids produced from this cross."—*Darwin: Origin of Species* (6th ed.), 262.

Mr. Darwin believed that the sterility of first crosses and that of their hybrid progeny had not been effected by natural selection; it had arisen from various causes. Nor, he thought, are mongrels—*i.e.* crossed, between varieties, uniformly fertile; he considered, therefore, that there was nothing in the phenomena of hybridization to negative the view that species had first existed as varieties.

***hy'-brĭd-ĭst,** *s.* [Eng. *hybrid; -ist.*] One who hybridizes.

***hy-brĭd'-ĭ-tȳ,** *s.* [Eng. *hybrid; -ity.*] The quality or state of being hybrid; a mongrel state.

***hy'-brĭd-īz-a-ble,** *a.* [Eng. *hybridiz(e); -able.*] Capable of being hybridized; capable of being crossed with an individual of another species or stock.

hy-brĭd-ĭ-zā'-tion, *s.* [Eng. *hybridiz(e); -ation.*] The act or process of hybridizing; the state of being hybridized.

"*Hybridization* is not considered by Mr. Darwin as a cause of new species, but rather as tending to keep variation within bounds."—*Lyell: Antiquity of Man* (1863), p. 411.

hy'-brĭd-īze, *v.t.* [Eng. *hybrid; -ize.*] To render hybrid; to produce by the union of different species or stocks.

"This power of *hybridizing* appears to be far more common in plants than in animals."—*Lindley: Introd. to Bot.* (3rd ed.), p. 348.

hy'-brĭd-īz-ĕr, hy'-brĭd-īs-cr, *s.* [Eng. *hybridiz(e); -er.*] One who or that which hybridizes.

"The evidence from fertility adduced by different *hybridisers*."—*Darwin: Origin of Species* (6th ed.), p. 237.

hȳ'-brĭd-oŭs, *a.* [Eng. *hybrid*; *-ous.*] Hybrid. (*Ray: On the Creation*, pt. ii.)

*** hyd,** *s.* [Hide.]

*** hyd-agc,** *s.* [Hidage.]

hȳ-dăn-tō'-ĭc, *a.* [Eng. *hydanto(in)*; *-ic.*]

Chem.: Of or belonging to hydantoin (q.v.).

hydantoic-acid, *s.*

Chem.: Glycoluric acid, $C_7H_8N_2O_3$, or $CO<^{NH_2}_{NH\cdot CH_2\cdot COOH}$. A monobasic acid, obtained by boiling hydantoin with baryta water; also by heating amidoacetic acid with urea to 120°, or by heating amidoacetic acid with isocyanate of potassium and sulphuric acid. Hydantoic acid is nearly insoluble in cold water and in cold alcohol, but easily dissolved by boiling water. It is only slightly soluble in ether. It forms large rhombic prisms.

hȳ-dăn'-tōin, *s.* [Gr. *ὕδωρ* (*hudōr*) = water, and Eng., &c. (*all*)*antoin* (q.v.).]

Chem.: Glycolyl urea, $C_3H_4N_2O_2$, or $CO<^{NH-CO}_{NH-CH_2}$. Obtained by heating bromacetyl urea with alcoholic ammonia; also by the action of hydriodic acid and allantoin. Hydantoin is easily soluble in hot water; it crystallizes in needles, melting at 216°.

hȳd-ar'-thrŭs, *s.* [Gr. *ὕδωρ* (*hudōr*) = water, and *ἄρθρον* (*arthron*) = a joint.]

Path.: *Phlegmosia dolens*, white swelling (q.v.).

hȳ'-da-tĭds, *s.* [Gr. *ὑδατίς* (*hudatis*), genit. *ὑδατίδος* (*hudatidos*) = a hydatid; *ὕδωρ* (*hudor*) = water.]

Path. (*Pl.*): Tumours resulting from the development of the embryo of a tapeworm, *Tænia solium*, in the human body; *Echinococcus hominis*, found in the liver, brain, &c. Uncommon in this country, specially prevalent in Iceland. [Staggers, Tape-worm.]

¶ *Hydatids of Morgagni:*

Anatomy:

1. One or more small pedunculated bodies (not real hydatids) in the testicle.

2. A hydatid-looking body at the fimbriated extremity of the uterus.

hȳ-dăt'-ĭ-form, *a.* [Eng. *hydati(d)*, and Lat. *forma* = form, appearance.] Resembling a hydatid.

hȳ-da-tī'-na, *s.* [Gr. *ὑδατίς* (*hudatis*) = a watery vesicle; Lat. suff. *-ina.*]

Zool.: The typical genus of the family Hydatinæa (q.v.). Type, *Hydatina senta.*

hȳ-da-tĭn'-æ-a, *s. pl.* [Mod. Lat. *hydatin(a)*; Lat. neut. pl. suff. *-æa.*]

Zool.: A family of Rotatoria, established by Ehrenberg. There is neither a carapace nor an enveloping sheath; the rotatory organ multiple or more than bipartite. Eighteen genera known. Called also Notommatina (q.v.).

hȳ'-da-tĭsm, *s.* [Eng., &c. *hydat(id)*; *-ism.*] A sound produced by the motion of a liquid which has been effused into some cavity of the body.

hȳ'-da-tōid, *a.* & *s.* [Gr. *ὕδωρ* (*hudōr*) = water, and *εἶδος* (*eidos*) = appearance, likeness.]

A. *As adj.:* Resembling water in quality, nature, appearance, or consistency.

B. *As substantive:*

Anat.: The membrane surrounding the aqueous humour of the eye or that humour itself.

*** hyde,** *s.* [Hide.]

hȳd'-nĕ-ī, *s. pl.* [Mod. Lat. *hydn(um)*; Lat. masc. pl. adj. suff. *-ei.*]

Bot.: A sub-order of hymenomycetous fungi having the basidia spores on tubercles or spine-like processes on the under side of a discoid cup-shaped, or funnel-shaped, stalked or sessile pileus.

hȳd-nō-car'-pŭs, *s.* [Gr. *ὕδνον* (*hudnon*) = an esculent fungus, perhaps the truffle, and *καρπος* (*karpos*) = fruit.]

Bot.: A genus of Pangiaceæ, the Took. *Hydnocarpus venenatus* is described by Sir Joseph Hooker as a beautiful evergreen tree with tufts of yellow blossoms on the trunk. Its fruit is as large as an orange, and is used to poison fish. An oil is expressed from its seeds. (*Hooker: Himalayan Journ.*, ii. 7.)

hȳd-nŏr'-a, *s.* [Gr. *ὕδνον* (*hudnon*) = an esculent fungus, a truffle; suff. *-ora* (?).]

Bot.: A genus of Cytinaceæ. *Hydnora africana* smells like roast beef, and is eaten by the native Africans.

hȳd'-nŭm, *s.* [Gr. *ὕδνον* (*hudnon*) = an eatable fungus, probably a truffle.]

Bot.: The typical genus of the sub-order Hydnei (q.v.). It consists of fungals having the hymenum composed of prickles projecting from the pileus. *Hydnum repandum*, properly dressed and cooked, is eatable.

hȳdr-, *pref.* [Hydro-.]

Hȳ'-dra, *s.* [Lat., from Gr. *ὕδρα* (*hudra*) = a water-snake, from *ὕδωρ* (*hudōr*) = water; Sanse. *udras*; Russ. *ouidra*; A.S. *otter* = a otter (q.v.).]

I. *Ordinary Language:*

1. *Lit. & Gr. Myth.:* A celebrated monster which infested the Lake Lerna in Peloponnesus. It was the offspring of Ichidna's union with Typhon. It had one hundred heads, and as soon as one was cut off, two grew up if the wound was not stopped by fire. It was one of the labours of Hercules to destroy this monster: this he effected with the assistance of Iolaus, who applied a red-hot iron to the wound as soon as one head was cut off. The conqueror dipped his arrows in the gall of the Hydra, and all the wounds which he gave proved incurable.

"Another king! they grow like *Hydra's* heads."
Shakesp.: 1 Henry IV., v. 4.

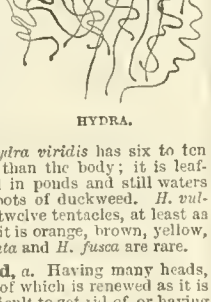
2. *Fig.:* Any evil or misfortune arising from many sources.

"And yet the *hydra* of my cares renews."
Daniel: Sonnets to Delia, xv.

II. *Technically:*

1. *Astron.:* The Hydra or Watersnake, one of the fifteen ancient southern constellations. It is so long that it has been divided into four parts: (1) Hydra—*i.e.* Hydra proper; (2) Hydra et Crater; (3) Hydra et Corvus; and (4) Hydræ continuatio. Hydra proper is a little south of the bright star, Regulus, which is in Leo.

2. *Zool.:* The typical genus of the family Hydridæ. The animal is locomotive, single, naked, gelatinous, subcylindrical, but very contractile and variable in form; the mouth surrounded by a single row of filiform tentacles. Propagation by the formation of gemmæ and ova upon or within the substance of the animal's body. If cut into pieces each will become a new hydra. If turned inside out the exterior surface will digest food and the interior one respire. Hydra was first described by Trembley in 1774. The genus contains the fresh-water polypes. *Hydra viridis* has six to ten tentacles, shorter than the body; it is leaf-green, and is found in ponds and still waters adhering to the roots of duckweed. *H. vulgaris* has seven to twelve tentacles, at least as long as the body; it is orange, brown, yellow, or red. *H. attenuata* and *H. fusca* are rare.



HYDRA.

hydra-headed, *a.* Having many heads, like a hydra, each of which is renewed as it is cut off; hence, difficult to get rid of, or having many sources or origins; multiform; spreading; not to be killed or quelled. (*Lit. & fig.*)

hydra-tainted, *a.* Dipped in the gall of the Hydra; hence, poisonous, deadly.

"The *hydra-tainted* dart."
Cowper: Death of the Vice-Chancellor. (Trans.)

hydra-tuba, *s.*

Zool.: The name given by Sir J. G. Dalyell to a body which ultimately becomes trumpet-shaped, with a mouth and tentacles at the expanded extremity. It is called Hydra-tuba from its resemblance to the hydra. It is an immature form belonging to some of the Lucernarida, and is regarded as a fixed Lucernaroid. (*Nicholson.*)

hȳ-dræ'-çĭ-a, *s.* [Hydrecia.]

hȳ-drăch'-na, *s.* [Pref. *hydr-*, and Gr. *ἀχνη* (*achnē*) = anything shaved off; froth, chaff.]

Zool.: The typical genus of the family Hydrachnidæ (q.v.). When young they have only six legs. Example, *Hydrachna cruenta.*

hȳ-drăch'-nĭ-dæ, *s. pl.* [Mod. Lat. *hydrachn(a)*; Lat. fem. pl. adj. suff. *-idæ.*]

Zool.: Water-mites, a family of Acarina. They swim about in the water by means of the fringes on their legs.

hȳ-drăç'-ĭds, *s. pl.* [Eng. *hydr(ogen)*, and *acids.*]

Chem.: A name formerly given to acids which did not contain oxygen, as hydrochloric acid, HCl, hydrocyanic acid, HCn. But now all acids are regarded as salts of hydrogen.

hȳ-dra-crȳ'-ĭc, *a.* [Eng. *hydr(ated)*, and *acrylic.*]

Chem.: (See the compound).

hydracrylic-acid, *s.*

Chem.: $CH_2(OH)\cdot CH_2\cdot COOH$, Ethylene lactic acid, ethene lactic acid. A diatomic monobasic acid, obtained by heating β iodopropionic acid with moist silver oxide, $CH_2I\cdot CH_2\cdot COOH + AgOH = AgI + CH_2OH\cdot CH_2\cdot COOH$. It is a thick syrup, and forms crystalline salts. Hydracrylic-acid, when heated alone, or when boiled with equal parts of H_2SO_4 and H_2O, is converted into acrylic acid $CH_2\cdot OH$ | CH_2 | CH_2 $- H_2O =$ CH | $COOH$ $COOH$.

hȳ-dra-dĕph'-a-ga, *s. pl.* [Pref. *hydr-*, and neut. pl. of Gr. *ἀδηφάγος* (*adēphagos*) = gluttonous.]

Entom.: The name given by Macleay to a sub-section of Adephaga, a section of pentamerous beetles. It contains the aquatic Adephaga. The legs are formed for swimming, the hinder ones having only a horizontal motion; the body ovate. They are very predatory and aquatic, but come to the surface occasionally to breathe. Hydradephaga contains the families Dyticidæ and Gyrinidæ (q.v.).

hȳ-dra-dĕph'-a-goŭs, *a.* [Mod. Lat. *hydradephag(a)*; Eng. suff. *-ous.*]

Entom.: Of or belonging to the Hydradephaga (q.v.). (*Swainson & Shuckard.*)

hȳ'-dra-form, hȳ'-drĭ-form, *a.* [Eng., &c. *hydra*; and Lat. *forma* = form, appearance.]

Zool.: Resembling the hydra or common fresh-water polype in form.

hȳ'-dra-gŏgue, *s.* [Pref. *hydro-* (1), and Gr. *ἀγω* (*agō*) = to lead, to drive.]

Med.: An active purgative, causing a very large secretion of fluid from the mucous membrane of the bowels. Hydragogues cause relief by the partial emptying of the veins of the portal system. The chief hydragogues are gamboge, elaterium, and cream of tartar in large doses.

hȳ-dræ'-mĭ-a, *s.* [Pref. *hydro-* (1), and Gr. *αἷμα* (*haimo*) = blood.]

Path.: The same as Anæmia (q.v.).

hȳ'-dral, *a.* [Hydrales.]

Bot.: Of or belonging to Hydrales, as Hydral Endogens. (*Lindley: Veg. King.* (1853), p. 140.)

hydral-alliance, *s.*

Bot.: The same as Hydrales (q.v.).

hȳ-drā'-lēs, *s. pl.* [Masc. & fem. pl. of Mod. Lat. *hydralis*, from Gr. *ὕδωρ* (*hudōr*), in compos. *ὑδρο* (*hydro*) = water.

Bot.: An alliance of endogens, having the flowers perfect or imperfect, usually scattered, not on a spadix; the embryo axile, without albumen. It consists of unisexual aquatic plants. Lindley includes under it the orders Hydrocharidaceæ, Naiadaceæ, and Zosteraceæ.

hȳ'-drăm-ĭnes, *s. pl.* [Eng. *hydr(oxyl)*, and *amines.*]

Chem.: Oxethene bases. These compounds may be considered as amines, containing hy-

droxyl substitution compounds of ethyl. They are obtained by the action of aqueous ammonia on ethene oxide $\frac{CH_2}{CH_2}>O$. One, two, or three molecules of the oxide uniting with one molecule of ammonia, forming $CH_2{\cdot}OH{\cdot}CH_2{\cdot}NH_2$. Ethene hydramine. $(CH_2{\cdot}OH{\cdot}CH_2)_2NH$, Diethene hydramine. $(CH_2{\cdot}OH{\cdot}CH_2)_3N$ triethene hydramine. They are viscid alkaline liquids decomposed by heat, but their hydrochlorates can be fractionally distilled.

hȳ-drăn'-ġĕ-a, *s.* [Pref. *hydr-* (q.v.), and Gr. *ἀγγεῖον* (*anggeion*) = a vessel, a pail.]

Bot.: The typical genus of the order Hydrangeaceæ (q.v.). The calyx is superior, five-toothed; the petals and stamens five; pistils two; capsule two-beaked, two-celled, opening by a hole between the beaks. It consists of showy shrubs. *Hydrangea hortensis*, a native of China, is cultivated here in gardens. The leaves of *H. Thunbergii* are dried in Japan and infused to make a kind of tea.

hȳ-drăn'-ġĕ-ā'-çĕ-æ, *s. pl.* [Mod. Lat. *hydrange(a)*; Lat. fem. pl. adj. suff. *-aceæ.*]

Bot.: A family of Perigynous Exogens, alliance Saxifragales. It consists of shrubs with opposite simple leaves; flowers usually in cymes; calyx partly adherent to the ovary, four to six-toothed; petals four to six, deciduous; stamens in two rows, eight to twelve; fruit a two to five-celled capsule, with few or many minute seeds. Found chiefly in the temperate parts of Asia and America. Genera about nine, species forty-five or more. Sometimes reduced to a tribe of Saxifragaceæ.

hȳ-drăn'-ġĕ-ăds, *s. pl.* [Mod. Lat. *hydrange(a)*; pl. suff. *-ads.*]

Bot.: The name given by Lindley to the order Hydrangeaceæ (q.v.).

hȳ'-drant, *s.* [Gr. *ὑδραίνω* (*hudrainō*) = to water, to irrigate; *ὕδωρ* (*hudōr*) = water.] A spout and a valve connected with a water-main, and designed for drawing water from the latter; a street-fountain.

hȳ'-drănth, *s.* [Pref. *hydr-*, and Gr. *ἄνθος* (*anthos*) = a blossom, a flower.]

Zool.: The polypite or proper nutritive zoöid of the Hydrozoa.

hȳ-drăr'-ġĭl-līte, *s.* [Pref. *hydr-*; Lat. *argilla* = white clay, potter's earth, and suff. *-ite* (*Min.*) (q.v.).]

Min.: The hydrargillite of Cleaveland is the same as Gibbsite (q.v.); that of Davy the same as Wavellite (q.v.). Dana arranges part of Hydrargillite under Turquoise (q.v.).

hȳ-drăr'-ġȳ-rāte, *a.* [Mod. Lat. *hydrargyr(um)*; suff. *-ate* (*Chem.*) (q.v.).]

Chem.: Of or belonging to mercury (q.v.).

hȳ-drăr'-ġȳ-rŭm, *s.* [Lat. *hydrargyrus* = Gr. *ὑδράργυρος* (*hudrarguros*) = fluid quicksilver.]

*1. *Old Chem.:* Quicksilver, mercury.

2. *Pharm.: Hydrargyrum cum Creta.* Mercury with chalk; also called grey powder. Obtained by rubbing one ounce of mercury with two ounces of prepared chalk till the globules are no longer visible. It is a light grey powder, insoluble in water. It is one of the mildest preparations of mercury.

hȳ-drās'-tĭs, *s.* [From Gr. *ὕδωρ* (*hudōr*) = water, referring to the moist places in which it grows.]

Bot.: A genus of Ranunculaceæ, tribe Anemoneæ. Sepals three, petals none; fruit baccate, resembling a raspberry. Only one known species. *Hydrastis canadensis*, the yellow puccoon orange root or yellow root, has a strong and somewhat narcotic smell, and is used in North America as a tonic. It also affords a bright yellow dye.

hȳ'-drāte, *s.* [Gr. *ὕδωρ* (*hudōr*), in compos. *ὑδρο* (*hudro*); *-ate.*]

Chem.: A chemical substance having water in direct combination with it.

hydrate-of-chloral, *s.* [Chloral-hydrate.]

hȳ'-drāt-ĕd, *a.* [Eng. *hydrat(e)*; *-ed.*] Formed into a hydrate.

hȳ-drā'-tion, *s.* [Eng. *hydrat(e)*; *-ion.*] The act of moistening or impregnating with water; the state of being moistened; the process of becoming hydrated.

hȳ-drâul'-ĭc, * **hȳ-drâul'-ĭck,** *a.* [Fr. *hydraulique*, from Lat. *hydraulicus*, from Gr. *ὑδραυλικός* (*hudraulikos*) = pertaining to a water-organ; *ὕδραυλις* (*hudraulis*) = a water-organ: *ὕδωρ* (*hudōr*) = water, and *αὐλός* (*aulos*) = a pipe.] Of or pertaining to hydraulics, or fluids in motion.

hydraulic-belt, *s.* An endless woollen band for raising water. The lower bight is immersed in water, and the upper bight passes between two rollers, where the absorbed water is squeezed out.

hydraulic-block, *s.*

Shipbuild.: An hydraulic lifting-press occupying the place of a building block beneath the keel of a vessel in a repairing-dock. Being adjustable as to height, it is useful for straightening a ship that has become hogged or sagged.

hydraulic-brush, *s.* A brush having a hose connection through its handle, so as to discharge water upon the surface or object being scrubbed.

hydraulic-cane, *s.* This pump consists of a vertical pipe whose lower end has a valve opening upwardly and plunged in the water of the cistern or well. A rapid vertical reciprocation is given to the tube, and the water is caused to ascend therein; positively as the lower end plunges into the water raising the valve, and relatively as the water slips in the tube as the latter descends quickly. An air-chamber above makes the discharge continuous.

hydraulic-cement, *s.* [Hydraulic-mortar.]

hydraulic-clock, *s.* [Clepsydra.]

hydraulic-condenser, *s.*

Gas: The chamber into which gas from the retorts is conveyed by the dip-pipes to be cooled. [Hydraulic-main.]

hydraulic-crane, *s.* [Hydraulic-lift, &c.]

hydraulic-dock, *s.* An apparatus by which a vessel is raised clear of the water for examination and repairs.

hydraulic-elevator, *s.* A platform lift worked by hydraulic power.

hydraulic-engine, *s.*

1. An engine or machine employed in raising water, as pumps, &c.; or receiving motion by the weight or impulse of water, as water-wheels, &c.; or in transmitting power, as the hydrostatic press, &c.

2. A machine driven by the pressure of a column of water; the term is especially applied to one in which the piston of a cylinder is driven by water-power.

hydraulic-indicator, *s.* A gauge to indicate hydraulic pressure.

hydraulic-lift, *s.*

Hoisting: An apparatus on the principle of the hydraulic press, caused by means of a lever to draw up a chain which passes over sets of pulleys, and is thence conducted by leading pulleys over a jib. The weight is by this arrangement raised many times the stroke of the ram.

hydraulic lifting-jack, *s.* A portable lifting apparatus in which the power is a form of the hydrostatic press.

hydraulic-lime, *s.* A kind of lime having the property of hardening under water. [Hydraulic-cement.]

hydraulic-limestone, *s.*

Min., Petrol., &c.: An impure limestone of use in forming cement which is likely to be exposed to the action of water. The impurities are generally magnesia, silica, and alumina. Occurs in the United States, France, &c. Dana arranges it under calcite.

hydraulic-main, *s.*

Gas: A strong, cast-iron pipe, usually about twelve inches in diameter, and of a length sufficient to receive all the perpendicular pipes that convey to it the gas generated in the several retorts. The main is horizontal, and is supported on the brick-work that covers the ovens. The hydraulic main contains a certain quantity of water, and the mouth of each gas-tube is submerged in the water, so that the gas flows through water and parts with a portion of its ammonia at this stage of the process.

hydraulic-mining, *s.*

Mining: A system of mining in which the force of a jet of water is used to sluice down a bed of auriferous gravel or earth, which is passed through sluices to detain the particles of gold.

hydraulic-mortar, *s.* Mortar in which the presence of alumina enables it to harden under water, producing an insoluble silicate of alumina. It usually contains burned clay along with the more abundant lime, and sometimes oxide of iron. [Pozzolana.]

hydraulic-motor, *s.*

1. An hydraulic ram having connections which raise a piston that is forced down by atmospheric pressure at each cessation of the downward flow of water. By suitably arranged valves, the water may be admitted alternately above and below the piston, causing a reciprocating action similar to that of the steam-engine.

2. [Hydraulic-engine, 2.]

hydraulic-nozzle, *s.* A hose-nozzle used in hydraulic-mining (q.v.)

hydraulic-organ, *s.* [Organ.]

hydraulic-pivot, *s.*

Mach.: A contrivance of Girard, by which a film or body of water is introduced below the end of a vertical axis to bear its weight, and to prevent the actual friction of the axis on its step.

hydraulic platform-lift, *s.*

Hoisting: A form of hoisting apparatus in which a small pump, operated by a lever, forces water into a cylinder containing a piston bearing an upright stem, upon the upper end of which the platform, sliding upon appropriate guides, is fixed.

hydraulic-press, *s.*

Mach.: The same as Bramah-press (q.v.).

hydraulic-propeller, *s.* A means of propelling vessels by the ejection of a body of water at the stern.

hydraulic rail-bender, *s.* An implement for bending or straightening rails by hydraulic pressure.

hydraulic-ram, *s.* A machine by which the fall of a column of water in a tube is caused to elevate a portion of itself to a height greater than that of its source.

hydraulic-slip, *s.* A slip-dock in which the cradle and its load, the ship, are hauled up the rails or ways, for the purpose of cleaning or repair, by the power of an hydraulic press.

hydraulic-tourniquet, *s.*

Mach.: The same as Barker's mill (q.v.). [Mill.]

hydraulic-valve, *s.* An inverted cup which is lowered over the upturned open end of a pipe, the edge of the cup being submerged in water, and closing the pipe against the passage of air.

* **hȳ-drâul'-ĭc-al,** *a.* [Eng. *hydraulic*; *-al.*] Hydraulic.

"An *hydraulical* or rather hydraulo-pneumatical engine."—*Boyle: Works*, p. 232.

hȳ-drâul'-ĭc-ŏn, *s.* [Gr. *ὑδραυλικός* (*hudraulikos*) = pertaining to a water-organ; *ὕδραυλις* (*hudraulis*) = a water-organ: *ὕδωρ* (*hudōr*) = water, and *αὐλός* (*aulos*) = a pipe.]

Music: A water-organ. This form was known to the Alexandrian Greeks in the time of Hero, 150 B.C. It is supposed that air was forced by means of water. If so, it was rather a water-bellows. [Organ.]

hȳ-drâul'-ĭcs, *s.* [Hydraulic.]

Physics: The department of science which treats of the application of hydrodynamics to practical purposes, and specially to the raising of water in pipes. [Hydrodynamics.] It treats also of machines in which water is a moving power, as water-wheels. A subordinate part is called hydraulic architecture.

hȳ'-drą-zīnes, *s. pl.* [Eng. *hydr(ogen)*, *az(ote)*, and suff. *-ines.*]

Chem.: H_2N-NH_2. Hydrazine is not known in a free state. Its derivatives are obtained by the reduction of nitrosoamines by zinc dust and acetic acid, $(CH_3)_2N{\cdot}NO+4H' = (CH_3)_2N-NH_2+HOH$ (dimethylnitrosoamine) = (dimethylhydrazine); also formed by the action of nascent hydrogen on

$$\begin{matrix} C_2H_5NH \\ C_2H_5N \\ \diagdown NO \\ \text{(nitrosodiethyl urea)} \end{matrix} \diagup CO + 4H = HOH + \begin{matrix} C_2H_5NH \\ C_2H_5N \\ \diagdown NH_2 \\ \text{(diethyl hydrazine urea)} \end{matrix} \diagup CO$$

This compound, boiled with concentrated HCl in a water-bath, gives $C_2H_5{\cdot}HN-NH_2=HCl$, ethyl hydrazine hydrochlorate + $C_2H_5NH_2{\cdot}HCl$ (ethylamine hydrochlorate) + CO_2. They are strong bases. A primary hydrazine has only one H substituted by an alcohol radical, as $C_2H_5{\cdot}HN-NH_2$. They reduce Fehling's solution in the cold. A secondary hydrazine has two H's substituted by alcohol radicals, as $(CH_3)_2N-NH_2$. They only reduce Fehling's solution when warmed. Aromatic hydrazines are formed in the same manner. $C_2H_5N{\cdot}CH_3{\cdot}NO + 4H'$ (nitrosomethyl aniline) = $HOH + C_6H_5{\cdot}CH_3{\cdot}N-NH_2$ (phenylmethyl hydrazine). An alcoholic solution of diazoamido-benzene, reduced by zinc dust and acetic acid, yields $C_6H_5N = N-NH{\cdot}C_6H_5 + 4H = NH_2{\cdot}C_6H_5$ (aniline) = $C_6H_5HN-NH_2$ (phenyl hydrazine). Primary phenyl hydrazines are converted into diazo compounds by the action of mercuric oxide on their sulphates.

hȳ-drăz-ō-bĕn'-zēne, *s.* [Eng. *hydr(ogen); az(ote)*, and *benzene.*]

Chem.: $C_{12}H_{12}N_2$, or $C_6H_5{\cdot}NH{\cdot}C_6H_5$. An aromatic compound, obtained by the action of H_2S on an alcoholic solution of azobenzene, $C_6H_5N=NC_6H_5$. Hydrazobenzene crystallizes in large plates, insoluble in water, but soluble in alcohol and ether. They melt at 131°.

hȳ-drăz-ō-bĕn-zō'-ĭc, *a.* [Eng. *hydr(ogen); az(ote)*, and *benzoic.*] (See the compound.)

hydrazobenzoic-acid, *s.*

Chem.: $C_{14}H_{12}N_2O_4$. A compound formed by adding ferrous sulphate to a boiling solution of azobenzoic acid in caustic soda, and precipitating the filtered solution by hydrochloric acid. It is a yellowish substance, slightly soluble in hot alcohol.

† hȳ-drĕn-çĕ-phăl'-ō-çēle, *s.* [Pref. *hydro-* (1); Gr. *ἐγκέφαλος* (*engkephalos*) = the brain, and *κήλη* (*kēlē*) = a tumour.]

Pathol.: A tumour or swelling, producing, on rupture, watery effusion on the brain. Not very different from hydrocephalus (q.v.).

hȳ-drĕn-çĕph'-ą-lōid, *a.* [Mod. Lat. *hydrencephal(us)*, and Gr. *εἶδος* (*eidos*) = form, appearance.]

Pathol.: Of or belonging to hydrencephalus (q.v.).

† hȳ-drĕn-çĕph'-ą-lŭs, hȳ-drĕn-çĕph-ą-lŏn, *s.* [Pref. *hydro-* (1), and Gr. *ἐγκέφαλος* (*engkephalos*) = the brain.]

Pathol.: The same as HYDROCEPHALUS (q.v.).

hȳ-drĕn-tĕr'-ō-çēle, *s.* [Pref. *hydro-* (1); Gr. *ἔντερον* (*enteron*) = an intestine, and *κήλη* (*kēlē*) a tumour.]

Surg.: Intestinal hernia, the sac of which encloses fluid.

*** Hȳ'-drĭ-ăd,** *s.* [Gr. *ὑδριάς* (*hudrias*), genit. *ὑδριάδος* (*hudriados*) = belonging to the water, *Ὑδριάδες Νύμφαι* (*Hudriades Numphai*) = water nymphs.)]

Mythol.: A water-nymph.

hȳ'-drĭc, *a.* [Eng. *hydr(ogen); -ic.*]

Chem.: A term given to acids, which are regarded as salts of hydrogen, as hydric nitrate, HNO_3, or nitric acid; hydric sulphate, H_2SO_4, or sulphuric acid. When H and a polybasic acid are replaced by a metal, there is formed an acid salt, or a salt containing basic hydrogen and another metal. Thus $KHSO_4$ is called acid potassium sulphate, or potassic hydric sulphate.

hydric-bromide, *s.* [HYDROBROMIC-ACID.]

hydric-chloride, *s.* [HYDROCHLORIC-ACID.]

hydric-iodide, *s.* [HYDRIODIC-ACID.]

hydric-sulphide, *s.* [HYDROGEN-SULPHIDE.]

hȳ-drĭ-dą, *s. pl.* [Lat. *hydra*, and Or. *εἶδος* (*eidos*) = form.]

Zool.: An order of Hydroida. The hydrozoma consists of a single locomotive polypite, with tentacles and a discoid hydrorhiza, never developing into hard enticle. The reproductive organs appear as simple external processes of the body wall. It contains only one family, Hydridæ.

hȳ'-drĭ-dæ (1), hȳ'-drą-dæ, *s. pl.* [Lat. *hydr(a)*; fem. pl. adj. suff. *-idæ, -adæ.*]

Zool.: A family of Water-snakes, now called Hydrophidæ (q.v.).

hȳ'-dride, *s.* [Eng. *hydr(ogen); -ide.*]

Chem.: A compound of hydrogen with another element, as silicon hydride SiH_4, or with a hydrocarbon radical, as ethyl hydride, $C_2H_5{\cdot}H$.

hȳ-drĭl'-ą, *s.* [Dimin. (?) of Lat. *hydra* = Gr. *ὑδρία* (*hudria*) = a waterpot.]

Bot.: A genus of Hydrocharidacæ, tribe Valisneræ. The Jangi (*Hydrilla* or *Vallisneria alternifolia*) is one of the plants used in India to supply water mechanically to sugar in process of being refined.

hȳ-drĭn'-dĭc, *a.* [Pref. *hydro-* (2); Eng. *ind(igo)*, and suff. *-ic.*] (See the compound.)

hydrindic-acid, *s.*

Chem.: This acid is not obtained in a free state. Its anhydride Dioxindol, $C_8H_7NO_2$, is obtained by boiling isatin in water with a little zinc dust, and hydrochloric acid. It crystallizes in colourless prisms which turn yellow on exposure to the air; it melts at 180° and decomposes at 115°, yielding aniline. An aqueous solution of hydriadic acid is oxidised by the air, turning red.

hȳ'-drĭ-ō-dāte, *s.* [Eng., &c. *hydriod(ic); -ate* (*Chem.*).]

Chem.: A salt of hydriodic acid (q.v.).

hȳ-drĭ-ŏd'-ĭc, *a.* [Eng. *hydr(ogen); iod(ine)*, and suff. *-ic.*] (See the compound.)

hydriodic-acid, *s.*

Chem.: Hydric iodide, hydrogen iodide, HI. Hydriodic acid is a colourless gas forming in the air. At a pressure of four atmospheres at 0° it is condensed to a liquid. It can be frozen at ordinary temperature by a mixture of ether and solid CO_2 at a temperature of 55°. Its sp. gr. is 4·3737, air = 1. Hydriodic acid is prepared by the action of phosphorus and iodine in the presence of water, $P+5I+4H_2O = 5HI+H_3PO_4$. One part, by weight, of amorphous phosphorus is placed in fifteen parts of water, and twenty parts of iodine are added gradually. Then the flask is gently warmed, and the HI collected over mercury. H_2SO_4 does not liberate HI from potassium iodide; the reaction is $3H_2SO_4+2KI=2KHSO4+I_2+SO_2+2H_2O$. Hydriodic acid is not combustible, and will not support combustion. It is decomposed by passing it through a red-hot tube, the gas becoming violet-coloured. HI is very soluble in water. A solution kept cold by ice will have a density of 1·990. The solution decomposes in the air, water being formed and iodine liberated, which redissolves in the solution, turning it dark coloured. A solution of HI in water dissolves Zn, iron ore, with evolution of H, forming iodides. An aqueous solution of HI can be formed by passing H_2S through water in which iodine is suspended, $H_2O+H_2S+I_2 = 2HI+S+H_2O$. A solution having the density of 0·7 can be prepared in this manner.

hȳ-drō- (1), *pref.* [Latinised form of Gr. *ὑδρο* (*hudro*), the form in which *ὕδωρ* (*hudōr*) = water, appears in a Greek prefix, especially before a consonant. Before a vowel it is generally *hydr*, Gr. *ὑδρ* (*hudr.*)] [Etym.]

hydro-barometer, *s.* An instrument for determining the depth of sea-water by its pressure.

hydro-extractor, *s.* [CENTRIFUGAL-MACHINE.]

hȳ-drō- (2), *pref.* [HYDROGEN.]

Chem.: A prefix used to denote that the acid contains *no oxygen*, the acid being a combination of hydrogen with a non-metallic element, as H_2S, hydrosulphuric acid, HCl, hydrochloric acid, or with a radical, as hydrocyanic acid, HCN.

hȳ-drō- (3), *pref.* [HYDRA.]

Zool.: Of, belonging, or akin to, the hydra (q.v.).

hȳ-drō-ăp'-ą-tīte, *s.* [Pref. *hydro-* (1), and *apatite* (q.v.).]

Min.: Hydrous apatite, a milk-white warty transparent mineral; its hardness, 5·5; sp. gr., 3·10. Compos.: phosphoric acid, 40·00; lime, 47·31; fluorine, 3·36; calcium, 3·60; water, 5·30. Found in mammillary concretions in the fissures of an argillaceous school in St. Girons, in the Pyrenees. [HYDROBENZAMIDE.]

hȳ-drō-bĕn'-za-mīde, *s.* [Pref. *hydro-* (2), and Eng., &c. *benzamide* (q.v.).]

Chem.: $C_{21}H_{18}N_2(C_6H_5{\cdot}CH'')N_2$. Obtained by the action of ammonia on benzoic aldehyde. It crystallizes out of alcohol in large crystals which melt at 110°.

hȳ-drō-bŏn'-zoïn, *s.* [Pref. *hydro-* (2), and Eng. *benzoin.*]

Chem.: $C_{14}H_{14}O_2$. Tolylene glycol. An aromatic compound, slightly soluble in water, crystallizing in rhombic tables, which melt at 134°. It is obtained by the action of zinc and hydrochloric acid and benzaldehyde. An isomeric compound, isohydro-benzoin, is obtained at the same time.

hȳ-drō'-bĭ-ą, *s.* [Pref. *hydro-* (1), and Gr. *βιος* (*bios*) = life, course of life.]

Zool.: A subgenus of gasteropodous molluscs, genus Rissoa. The shell is smooth, the foot rounded behind. Fifty recent species are known, and ten fossil: the former from Britain, &c.; the latter from the Wealden, onward.

hȳ-drō'-bĭ-ŭs, *s.* [HYDROBIA.]

Entom.: A genus of beetles, family Hydrophilidæ. It is more convex than its allies. According to Stephens, twenty-four have been found in Britain: all of these but two are now transposed to other genera.

hȳ-drō-bŏr'-ą-çite, *s.* [Pref. *hydro-* (1), and Eng. *boracite* (q.v.).]

Min.: Hydrous borate of lime and magnesia. Compos.: boracic acid, 49·22 to 49·92; lime, 13·30 to 13·74; magnesia, 10·43 to 10·71; water, 26·33 = 100. Its colour is white, with rust spots. Hardness, 2; sp. gr., 1·9 to 2·0. Resembles gypsum, but is fusible. Found in the Caucasus.

hȳ-drō-bŏr-ō-căl'-çite, *s.* [Pref. *hydro-* (1), and Eng., *borocalcite* (q.v.).]

Min.: The same as BORONATROCALCITE (q.v.). See also Hayesite.

hȳ-drō-brō'-māte, *s.* [Eng., &c. *hydrobrom(ic); -ate.*]

Chem.: A salt formed by the molecular union of hydrobromic acid with ammonia, aniline, ethylamine, &c.

hȳ-drō-brō'-mĭc, *a.* [Pref. *hydro-* (2), and Eng. *bromic* (q.v.).] (See the compound.)

hydrobromic-acid, *s.*

Chem.: Hydric bromide, hydrogen bromide. Hydrobromic acid is a colourless gas, having an irritating smell, fuming in the air. It can be condensed into a colourless liquid at 73°; it freezes at 87°. It is not inflammable, and extinguishes flame. It is very soluble in water. A solution of sp. gr. 1·486 contains 47 per cent. of HBr. The composition of the distillate changes with the pressure of the barometer. Bromine does not unite with hydrogen in the sunlight, nor by the electric spark nor by flame. Hydrobromic acid can be obtained by the action of concentrated phosphoric acid and potassium bromide; if sulphuric acid is used, a mixture of HBr, SO_2, and Br_2 is obtained, but is prepared by placing one part, by weight, of amorphous phosphorus and two parts of water, and then ten parts of bromine are allowed to fall on it, drop by drop, from a tap funnel; then the flask is gently warmed, and the HBr is given off. It is passed through a U-tube containing amorphous phosphorus to free it from the vapour of bromine, and then it is collected in dry cylinders by displacement over mercury,

$2P+5Br_2+8H_2O = 10HBr+2H_3PO_4$. It can also be prepared by passing H_2S through a solution of bromine in water. Hydrobromic acid is decomposed by chlorine, $Cl_2+2HBr = Br_2+2HCl$. The hydrogen can be replaced by metals forming bromides.

hȳ-drō-bū-chŏl'-zīte, *s.* [Pref. *hydro-* (1), and *bucholzite* (q.v.).]

Min.: A variety of Fibrolite, believed to be from Sardinia.

hȳ-drō-căm'-pa, *s.* [Pref. *hydro-* (1), and Lat. *campe* = Gr. κάμπη (*kampē*) = a caterpillar.]

Entom: The typical genus of the family Hydrocampidæ (q.v.). *Hydrocampa nymphæata* is the Brown China Mark, and *H. stagnata* the Beautiful China Mark, both British.

hȳ-drō-căm'-pī-dæ, *s. pl.* [Mod. Lat. *hydrocamp(a)*; Lat. fem. pl. adj. suff. *-idæ.*]

Entom.: A family of moths, group Pyralidina. The antennæ of the male are simple, the abdomen rather long, slender, and the wings silky, but not transparent. The larvæ feed below the water on duckweed, waterlilies, and pond-weeds.

hȳ-drō-căn'-thar-ī, *s. pl.* [Pref. *hydro-* (2), and Lat. *cantharis.*]

Entom.: Swimmers. The name given by Latreille, Cuvier, &c. to a tribe of pentamerous aquatic beetles, now more generally called Hydradephaga (q.v.). The latter is a better name, for they have no close affinity to the Cantharides.

hȳ-drō-car'-bŏn, *s.* [Pref. *hydro-* (2), and *carbon* (q.v.).]

Chem.: A name given to compounds of one or more atoms of carbon, with atoms of hydrogen. Carbon is a tetrad element, capable of uniting with four atoms of H, as CH_4 methane. But carbon atoms can unite with each other, by one or more pairs of bonds, thus $\equiv C-C\equiv$, $=C=C=$, $-C\equiv C-$, the hydrocarbons having the C atoms united by only one pair of bonds are called paraffins, $Cn'H_{2n+2}$, as ethane H_3C-CH_3. Hydrocarbons having two C atoms united by two pairs of bonds are called olefines CnH_{2n}, as $H_2C=CH_2$ ethene. By three pairs of bonds, are called acetylenes CnH_{2n-2}, as acetylene $HC\equiv CH$. Besides these there are hydrocarbons belonging to the aromatic series, having the carbon atoms arranged to form a closed ring, as benzene C_6H_6 (q.v.), and the naphthalene series containing two closed rings. The constitution of the other groups of hydrocarbons are described under their respective names. [Anthracene.]

hydrocarbon-burner, *s.* A burner for liquid fuel. It usually has a jet of air or steam, frequently both, which carries with it petroleum in the form of spray, which is ignited and burns below a boiler, cooking vessel, &c.

hydrocarbon furnace, *s.* A furnace specially adapted to the use of liquid fuel for a steam-boiler or a metallurgic furnace.

hydrocarbon-stove, *s.* A heating or cooking stove in which liquid fuel is burned.

* **hȳ-drō-car'-bu-rĕt,** *s.* [Pref. *hydro-* (2), and Eng. *carburet.*] Carburetted hydrogen, a name formerly given to hydrocarbons.

* **hȳ-drō-car'-dī-a,** *s.* [Pref. *hydro-* (1), and Gr. καρδία (*kardia*) = the heart.]

Path.: A name given by Hildanus to a serous, sanious, or purulent tumour of the pericardium.

hȳ-drō-câul'-ŭs, *s* [Lat. *hydro-* (1), and Gr. καυλός (*kaulos*) = the stalk or stem of a plant.]

Bot.: The main stem of the cœnosarc of a hydrozoon.

hȳ'-drō-çēle, *s.* [Lat., = Gr. ὑδροκήλη (*hudrokēlē*): pref. *hydro-* (1), and κήλη (*kēlē*) = a tumour.]

Path.: A serous effusion, dropsy of the scrotum, consequent on inflammation.

hȳ-drō-çĕ-phăl'-ĭc, *a.* [Mod. Lat. *hydrocephal(us)*; Eng. suff. *-ic.*] Of, pertaining, or akin to hydrocephalus, hydrocephaloid (q.v.).

hȳ-drō-çĕph'-a-lōid, *a.* [Mod. Lat. *hydrocephal(us)* (q.v.), and Gr. εἶδος (*eidos*) = form, appearance.] Of, pertaining to, or akin to hydrocephalus.

hydrocephaloid-disease, *s.*

Path.: A disease in infants, partly resembling hydrocephalus, but less formidable. Called also spurious hydrocephalus.

hȳ-drō-çĕph'-a-lŭs, *s.* [Gr. ὑδροκέφαλον (*hudrokephalon*): pref. *hydro-* (1), and κεφαλή (*kephalē*) = the head.]

1. *Path.:* Dropsy in the ventricles of the brain, or in the arachnoid cavity, in children, and usually rapidly fatal, although cases have been known to go on to adult life.

2. *Palæont.:* A genus of Trilobites.

¶ *Spurious hydrocephalus:* [Hydrocephaloid-disease].

hȳ-drŏch'-ar-ăds, *s. pl.* [Mod. Lat., &c. *hydrochar(is)*; *-ads.*]

Bot.: The name given by Lindley to the order Hydrocharidaceæ (q.v.).

hȳ-drō-chăr-ĭ-dā'-çĕ-æ, hȳ-drō-chă-rĭd'-ĕ-æ, *s. pl.* [Mod. Lat. *hydrocharis*, genit. *hydrocharid(is)*; Lat. fem. pl. adj. suff. *-aceæ, -eæ.*]

Bot.: Hydrocharads; an order of endogens, alliance Hydrales. It consists of floating or water-plants; the leaves sometimes spiny; the flowers in a spathe; the sepals three, herbaceous; the petals three, petaloid or wanting; stamens epigynous, definite or indefinite; ovary one, six, eight, and nine-celled; ovules indefinite; fruit dry or succulent. They are found in Europe, North America, Egypt, and Australia. Genera about twelve, species twenty or more. Genera represented in Britain, Anacharis, Hydrocharis, and Stratiotes (q.v.).

hȳ-drŏch'-ar-ĭs, *s.* [Gr. Ὑδρόχαρις (*hudrocharis*) = Grace of the waters, the name of a frog (*Batrach.*, 229); ὑδροχαρής (*hudrocharēs*) = delighting in water: pref. *hydro-* (1), and Gr. χάρις (*charis*) = favour, grace.]

Bot.: Frog-bit. The typical genus of the order Hydrocharidaceæ (q.v.). It is dicœcious; the male flowers with six to twelve stamens,

HYDROCHARIS.

three or six without anthers. Female flowers solitary, long-peduncled. *Hydrocharis Morsus-Ranæ* is a plant with orbicular reniform leaves and white flowers, occurring in ponds and ditches in England; rare in Ireland.

hȳ-drō-chlōr'-āte, *s.* [Pref. *hydro-* (2), and Eng. *chlorate* (q.v.).]

Chem.: Also wrongly called hydrochloride. A compound formed by the molecular union of hydrochloric acid with a base or an alkaloid, as $C_6H_5NH_2$·HCl, hydrochlorate of aniline, or aniline hydrochlorate. Chloride of ammonium, NH_4Cl, is probably a similar compound, and should be called ammonium hydrochlorate, NH_3·HCl, the nitrogen being a triad and the molecule of HCl being united by molecular attraction to the molecule of ammonia, in the same manner in which the molecules of the water of crystallization in $CuSO_4·5H_2O$, blue crystallized cupric sulphate, are united with the molecules of $CuSO_4$.

hydrochlorate of morphia, *s.* [Morphia.]

hȳ-drō-chlōre, *s.* [Pref. *hydro-* (1), and Gr. χλωρός (*chlōros*) = yellowish-green, because under the blow-pipe it becomes of that colour.]

Min.: The same as Pyrochlore (q.v.).

hȳ-drō-chlōr'-ĭc, *a.* [Pref. *hydro-* (2), and *chloric* (q.v.).]

Chem.: Compounded of chlorine and hydrogen.

hydrochloric-acid, *s.*

1. *Chem.:* HCl. Discovered by Priestley in 1772. It is a colourless, pungent, irritating gas, which destroys vegetation when liberated from soda works. It can be liquefied under a pressure of forty atmospheres at 10°. It is incombustible and extinguishes flames; it readily absorbs moisture, fuming in a moist atmosphere. It dissolves about 450 volumes of HCl at ordinary temperatures; the strongest solution has a density of 1·21, and fumes in the air; at 180° hydrochloric acid and water distil over, the distillate has the sp. gr. of 1·1, and contains about 20 per cent. of acid. Hydrochloric acid is prepared by heating a mixture of twelve parts by weight of sodium chloride with twenty parts of H_2SO and eight of water. Hydrochloric acid forms salts called chlorides. Hydrogen and chlorine unite directly when exposed to diffused daylight without condensation, forming hydrochloric acid, $H_2+Cl_2 = 2HCl$. The mixture explodes in direct sunlight.

2. *Phar.:* Hydrochloric acid is used to prepare *Acidum hydrochloricum dilutum*, dilute hydrochloric acid, a refrigerant, tonic, and astringent; it is given for dyspepsia, and used as a gargle in diphtheria. Concentrated hydrochloric acid is an acrid poison, and is used externally as a powerful caustic.

hȳ-drō-chlōr'-īde, *s.* [Hydrochlorate.]

hȳ-drō-chœr'-ŭs, *s.* [Pref. *hydro-* (1), and Gr. χοῖρος (*choiros*) = a young swine, a pig, or a swine of any age.]

Zool.: A genus of mammals, family Cavidæ, *Hydrochærus capybara*, is the Capybara (q.v.)

hȳ-drō-çœ-ru-lĭg'-nōne, *s.* [Pref. *hydro-* (2), and Eng. *cœrulignone.*]

Chem.: $C_{12}H_4\{(O·CH_3)_4·(OH)_2$. Obtained by the action of tin and hydrochloric acid and cœrulignone. It crystallizes from alcohols in colourless plates, which melt at 190°. Heated with concentrated hydrochloric acid, it is converted into methyl chloride CH_3Cl and hexoxydiphemyl $C_{12}H_4(OH)_6$.

hȳ-drō-cŏr-al-lī'-næ, *s. pl.* [Pref. *hydro-* (1); Lat. *coralium, coralium*, and fem. pl. adj. suff. *-inæ.*]

1. *Zool.:* The name given by Moseley to a sub-class of Hydrozoa having a regular skeleton, often of large size, of carbonate of lime. Families Milleporidæ and Stylasteridæ.

2. *Palæont.:* The sub-class is not known earlier than the Tertiary.

hȳ-drŏc'-ō-rēs, hȳ-drŏc-ō-rī'-sæ, *s.* [Pref. *hydro-* (1), and Gr. κόρις (*koris*) = a bug.]

Entom.: Water bugs. One of two tribes of the sub-order Heteroptera. Antennæ small, three or four-jointed, concealed behind the eyes, which are generally large; tarsi usually with but one or two articulations. Families Notouectidæ and Nepidæ (q.v.).

hȳ-drō-cō-tar'-nĭne, *s.* [Pref. *hydro-* (2), and Eng. *cotarnine.*]

Chem.: $C_{12}H_{15}NO_3$. An alkaloid which occurs in opium, also obtained by the action of Zn + HCl and cotarnine. It gives monoclinic prisms when crystallized from ether, which melt at 50°. It dissolves in sulphuric acid with a yellow colour, which turns carmine-red on heating, then a dirty violet-red colour.

hȳ-drō-cŏt'-ȳ-lē, *s.* [Pref. *hydro-* (1), and Eng. *cotyle* (q.v.).]

Bot.: White-rot or Pennywort. The typical genus of the family Hydrocotylidæ. Usually it has simple umbels. The fruit is laterally compressed. Seventy species are known. One, *Hydrocotyle vulgaris*, the Common White-rot or March Pennywort, a plant with orbicular peltate, crenate leaves, is common in bogs, &c. in Britain.

hȳ-drō-cō-tȳl'-ĭ-dæ, *s. pl.* [Mod. Lat. *hydrocotyl(e)*; Lat. fem. pl. adj. suff. *-idæ.*]

Bot.: A family of Apiaceæ (umbelliferous plants.

hȳ-drō-çȳ'-an-āte, *s.* [Pref. Eng. *hydrocyan(ic)*, and suff. *-ate.* (*Chem.*).]

Chem.: A salt formed by the molecular union of hydrocyanic acid with ammonia, &c.

hȳ-drō-çȳ-ăn'-ĭc, *a.* [Pref. *hydro-* (2), and Eng. *cyanic* (q.v.).]

hydrocyanic-acid, *s.*

Chem.: HCN, or H—C≡n, or HCy, cyanide of hydrogen, hydric cyanide, hydrogen cyanide, prussic acid. Discovered by Scheele in 1782. The pure anhydrous hydrocyanic acid can be prepared by passing dry H_2S over dry mercuric cyanide, gently heated in a glass tube connected with a small receiver cooled by a freezing mixture. It is liquid which boils at 26·5°, and freezes at 15°. It is very poisonous, and smells like bitter almond oil. It easily decomposes. Heated with alkalis or acids it is converted into formic acid and ammonia $HCN + 2H_2O = HCO{\cdot}OH + N{\cdot}H_3$. By the action of nascent hydrogen from zinc and hydrochloric acid it is converted into methylamine $H—C{\equiv}N + 4H = H_3C—NH_2$. An aqueous solution of HCN is best obtained by distilling powdered ferrocyanide of potassium with dilute sulphuric acid, a white residue of potassiumferrous ferrocyanide mixed with potassium sulphate remains in the retort. $2K_4Fe(CN)_6 + 3H_2GO_4 = 6HCN + 3K_2SO_4 + FeK_2FeCN_6$ When the leaves of the cherry laurel, bitter almonds, the kernels of peaches and cherries are distilled with water, the distillate contains hydrocyanic acid. When a series of strong induction sparks are passed through a mixture of acetylene C_2H_2 and nitrogen, hydrocyanic acid is formed. Hydrocyanic acid is a weak acid, and forms salts called cyanides.

Phar.: Dilute acid is used to allay spasm. The dilute acid of the pharmacopœia contains two per cent. of HCN. Scheele's prussic acid contains four per cent. anhydrous. Hydrocyanic acid is the most rapid poison known, it causes death in a few seconds. The strength of a solution of HCN is determined by adding a solution of silver nitrate of known strength to a given volume of the HCN solution, to which excess of caustic soda has been added. The precipitate of AgCN is redissolved, on being well stirred, till all the hydrocyanic acid has been converted into a double salt of $NaCN{\cdot}AgCN$, afterwards a precipitate of AgOH is thrown down, which does not redissolve. Each molecule of $AgNO_3$ represents two molecules of HCN.

hȳ-drō-çȳ'-ą-nīte, *s.* [Pref. *hydro-* (1), and Eng. *cyanite* (q.v.).]

Min.: An orthorhombic, pale-green, brownish, yellowish, or azure, translucent mineral, soluble in water. Compos.: oxide of copper, 49·47; sulphuric acid, 50·30; loss, 0·40 = 100.

hȳ-drŏç'-ȳ-ŏn, *s.* [Pref. *hydro-* (1), and *κύων* (*kuōn*) = a sea-fish, perhaps the swordfish.]

Ichthy.: A genus of Salmonidæ. Many are found in Brazil, others in the Nile.

Bot.: A tribe of Siphonaceæ, Confervoid Algæ. They contain pure chlorophyll.

hȳ-drō-dĭc'-tȳ-ŏn, *s.* [Pref. *hydro-* (1), and Gr. *δίκτυον* (*diktuon*) = a net.]

Bot.: The typical genus of the tribe Hydrodictyeæ. It consists of a sac-like meshed net. *Hydrodictyon utriculatum* resembles a green net, and produces granules, each of which becomes a cell of a new hydrodictyon. It is found in freshwater pools in the midland and southern counties of England.

hȳ-drō-dŏl'-ō-mīte, *s.* [Pref. *hydro-* (1), and Eng., &c. *dolomite* (q.v.).]

Min.: A variety of Hydromagnocalcite (*Brit. Mus. Cat.*). Dana makes it a distinct species. A yellowish-white, grayish, or greenish mineral, occurring as stalactites, stalagmites, concretions, &c. Found at Haroldswick, in Unst, the most northerly of the Shetland Isles; in Mount Somma, and in Texas.

hȳ-drō-ğĕn, *s.* [Gr. *ὕδωρ* (*hudōr*) = water, and *γεννάω* (*gennaō*) = to generate, to produce.]

Chem.: Hydrogenium. A monatomic metallic element, which exists in the state of gas. Symbol H; atomic weight, 1; density, 0·06927; air being 1; weight of a litre of hydrogen, 0·0896 grammes, called a crith. Hydrogen can be obtained by the electrolysis of water, H_2O, the H being liberated at the platinum pole; by the action of metallic sodium and water; by passing steam over iron filings, $3Fe + 4HOH = Fe_3O_4 + 8H'$; by boiling zinc with caustic potash, $2KHO + Zn = K_2ZnO_2 + 2H'$; but H is generally made by the action of dilute H_2SO_4 on zinc. Hydrogen can be purified by passing it through a solution of two parts of $K_2Cr_2O_7$ in twenty parts of water and one part of H_2SO_4, then washing it with KHO, and drying it by passing it through concentrated H_2SO_4. The apparatus should be airtight and the gas rejected till the air is all displaced by hydrogen. Hydrogen is absorbed by red-hot iron and platinum; palladium absorbs 935 times its volume of hydrogen; about seven litres of gas are condensed into the space of 1 c.c. Graham called this an alloy of hydrogenium, a metal having the sp. gr. of 0·62 and magnetic properties. Hydrogen has been found occluded in meteoric iron, and is contained in the gases given off by volcanoes. The spectroscope shows that a large quantity of free hydrogen exists around the sun. The spectrum of hydrogen contains four bright lines, a red are corresponding to C and a greenish-blue to F in the solar spectrum, and a blue and indigo line. Hydrogen has been condensed by Pictet, of Geneva, at a temperature of − 140°, and at a pressure of 650 atmospheres. When the pressure is removed the hydrogen is evolved in a jet of a steel-blue colour. Pure hydrogen is a colourless, inodorous, tasteless gas; it is inflammable mixed with oxygen; it explodes in contact with a flame, or when the electric spark is passed through it, forming water. The calorific power of H is 34,462 thermal units. Hydrogen gas cannot support life, but it is not poisonous; it is slightly soluble in water. Hydrogen when kept in a bag for a long time is dangerous, owing to diffusion. One volume of hydrogen mixed with 2·5 volumes of air gives the loudest detonation. Hydrogen in the nascent state is used as a reducing agent in chemistry.

hydrogen-chloride, *s.* [Hydrochloric-acid.]

hydrogen-dioxide, *s.*

Chem.: Hydrogen peroxide, H_2O_2, or HO—OH. Obtained by the action of dilute sulphuric acid and barium peroxide, BaO_2. The barium peroxide is added gradually to a mixture of one part of H_2SO_4 and five parts of water till the solution is only slightly acid, the $BaSO_4$ is allowed to settle, and the clear liquid is concentrated by evaporation in vacuo. It can be obtained as a colourless oily liquid; it is decomposed by alkalis; it blisters the skin and bleaches litmus. At 60° F. it gives off oxygen and bubbles, when boiled, oxygen is liberated so rapidly that it sometimes explodes. It is very soluble in ether. Finely-divided gold, silver, and platinum decompose H_2O_2 into water and oxygen; oxides of gold and silver are reduced to the metallic state, $Ag_2O + H_2O_2 = 2Ag + H_2O + O_2$. If a solution of H_2O_2 be acidified with H_2SO_4, and ether and potassium chromate be added; the ethereal solution turns blue on being well shaken, owing to the formation of perchromic acid. Hydrogen-dioxide liberates iodine from KI in the presence of $FeSO_4$. A dilute solution of hydrogen-dioxide is used to clean stained engravings, and also to bleach dark-coloured hair to a fashionable golden hue.

hydrogen-oxide, *s.* [Water.]

hydrogen-persulphide, *s.*

Chem.: H_2S_2, or H_2S_3. A yellowish oily liquid, which readily dissolves sulphur, therefore its composition cannot be determined. It is easily decomposed. It can be prepared by boiling for half an hour equal weights of slaked lime and flowers of sulphur with six parts of water, and then slowly pouring the deep orange filtered solution into dilute sulphuric

acid; the mixture being stirred, a precipitate of sulphur and $CaSO_4$ is produced along with the oily hydrogen persulphide.

hydrogen-sulphide, *s.*

Chem.: H_2S, sulphide of hydrogen, hydric sulphide, sulphydric acid, hydrosulphuric acid, sulphuretted hydrogen. A gas obtained by passing hydrogen through sulphur, or by burning sulphur vapour in hydrogen. It is formed by the putrefaction of organic bodies containing sulphur; by allowing a soluble sulphate to remain in contact with decaying animal or vegetable matter, $CaSO_4 = CaS + 4O$, the oxygen uniting with the organic matter, the probable origin of sulphuretted springs. But H_2S is generally prepared by the action of eight parts water + one part H_2SO_4, on ferrous sulphide, $FeS + H_2SO_4 = FeSO_4 + H_2S$; the water dissolves the ferrous sulphate. Pure H_2S is obtained by heating roughly-powdered antimony tersulphide with hydrochloric acid, $Sb_2S_3 + 6HCl = 3H_2S + 2SbCl_3$; the gas is washed by passing it through water. Granulated zinc and fragments of native PbS acted upon with dilute HCl gives off a regular current of H_2S. Hydrogen-sulphide is a colourless inflammable gas, of a sweetish taste and odour of rotten eggs. It is a narcotic poison. It burns with a blue flame, forming water and SO_2. A mixture of two volumes of H_2S and three volumes of oxygen explodes violently on sending an electric spark through it. Chlorine decomposes it, the whole of the sulphur being separated; this is the best antidote to poisoning by H_2S. Water at 0° dissolves 4·37 volumes, at 15° 3·23 volumes of H_2S. The solution reddens blue litmus paper; it decomposes in the air, sulphur being deposited. H_2S in contact with a base and a moist atmosphere is partially converted into H_2SO_4. At a pressure of seventeen atmospheres at 10° hydrogen-sulphide is reduced to a liquid, which boils at −61°; it freezes at −85°. CO_2 liberates H_2S from a moist sulphide; the composition of H_2S can be shown by heating metallic tin in a given volume of the gas: the sulphur unites with the tin, and the hydrogen liberated occupies the same volume as the original gas. H_2S is used as a test for metals; if the sulphide is soluble in acids, it is not precipitated till the solution is neutralized, as free acid is liberated by the H_2S, as $ZnSO_4 + H_2S = ZnS + H_2SO_4$. The sulphides of the alkaline earths Ba, Sr, Ca, and Mg, and those of the alkalis are soluble in water.

hydrogen-telluride, *s.*

Chem.: H_2Te, a gas prepared by the action of hydrochloric acid on zinc telluride. Called also Tellurhydric acid, Hydrotelluric acid, and Telluretted hydrogen.

hȳ-drŏ̆g'-ĕn-āte, hȳ-drŏ̆g'-ĕn-īze, *v.t.* [Eng., &c. *hydrogen; -ate, -ize.*]

Chem.: To cause to combine with hydrogen.

hȳ-drŏ-ĝĕn'-ĭ-ŭm, *s.* [Hydrogen.]

hȳ-drŏ̆g'-ĕn-īze, *v.t.* [Hydrogenate.]

hȳ-drŏ̆g'-ĕn-oŭs, *a.* [Eng., &c. *hydrogen; -ous.*]

Chem.: Of, belonging to, or containing hydrogen.

hȳ-drŏg'-nō-sȳ, *s.* [Pref. *hydro-* (1), and Gr. γνωσις (*gnosis*) = knowledge; γιγνώσκω (*gignōskō*) = to know.] A treatise on, or a history and description of the waters of the earth.

hȳ-drŏg'-ra-phẽr, *s.* [Eng. *hydrograph(y); -er;* Fr. *hydrographe.*] One who is skilled in hydrography; one who draws maps or charts of the sea, and adjacent land.

"Erroneously laid down by all former *hydrographers.*"—*Anson: Voyage,* bk. i., ch. viii.

hȳ-drō-grăph'-ĭc, hȳ-drō-grăph'-ĭc-al, *a.* [Eng. *hydrograph(y); -ic, -ical.*] Of or pertaining to, or treating of hydrography; containing a description of the sea, coast, islands, shoals, &c.

"Divers celestial and *hydrographical* truths."—*Boyle: Works,* vi. 724.

hȳ-drŏg'-ra-phȳ, *s.* [Pref. *hydro-* (1), and Gr. γραφω (*graphō*) = to write, to describe; Fr. *hydrographie.*] That branch of science which deals with the measurement and description of the seas, lakes, rivers, and other waters, as used for purposes of commerce or navigation; the art of marine surveying and of the construction of charts.

hȳ-drō-hæ'-ma-tīte, *s.* [Pref. *hydro-* (1), and Eng. *hæmatite* (q.v.).]

Min.: The same as Turgite (q.v.).

hȳ-drō-īd, *a.* [Lat. *hydra* (q.v.), and Gr. εἶδος (*eidos*) = form; cf. also Gr. ὑδρώδης (*hudrōdēs*) = like water, watery, wet.]

Zool.: Hydra-like; of or belonging to the Hydroida or any animal of the class.

hydroid-polypes, hydroid-zoophytes, *s. pl.*

Zool.: The same as Hydroida (q.v.).

hȳ-drō'-ĭ-dą, *s. pl.* [Hydroid.]

1. *Zool.:* The typical sub-class of Hydrozoa. They have an alimentary region or polypite provided with an adherent disc or hydrorhiza and prehensile tentacles. Unlike hydra, the type of the sub-class, most of the hydroida live in societies, each of which constitutes a polypidom so like a seaweed that it is often collected as such. But while the apertures on an ordinary seaweed are only minute pores, the Hydroida have little cup-like cells along the stem and at the extremities of the branches, in which the individual polype lives. The cells have a small hole at the bottom, and the stalk is hollow, so as to enable the individual polypes to remain part of a compound organism. The sub-class is divided into five ordera, Hydrida, Corynida, Sertularida, Campanularida, and Thecomeduaæ. The Polyzoa or Bryozoa, once ranked with the sub-class, now figure as a distinct class, arranged under the sub-kingdom Molluscoida.

2. *Palæont.:* For the distribution of the Hydroida in time, see the different orders.

hȳ-drō-kĭn-ĕt'-ĭcs, *s.* [Pref. *hydro-* (1), and Eng. *kinetics* (q.v.).] The same as Hydrodynamics (q.v.).

hȳ-drō-lăn'-thą-nīte, *s.* [Pref. *hydro-* (1) (q.v.), and *lanthanite* (q.v.).]

Min.: The same as Lanthanite (q.v.).

hȳ-drō-lĭn'-ĕ-æ, *s. pl.* [Mod. Lat. *hydrolin(um)* (q.v.); Lat. fem. pl. adj. suff. *-eæ.*]

Bot.: A sub-order or tribe of Diatomaceæ. The individuals are enclosed in tubes and are angular in form.

hȳ-drō-lī'-nŭm, *s.* [Pref. *hydro-* (1), and Lat. *linum* = flax.]

Bot.: The typical genus of the sub-order or tribe Hydrolineæ (q.v.).

hȳ'-drō-līte, *s.* [Pref. *hydro-* (1), and Gr. λίθος (*lithos*) = a stone.]

Min.: The same as Gmelinite (q.v.).

hȳ-drō-lŏ̆g'-ĭc-al, *a.* [Eng. *hydrolog(y); -ical.*] Of or pertaining to hydrology.

hȳ-drŏl'-ō-ĝĭst, *s.* [Eng. *hydrolog(y); -ist.*] One who is skilled in hydrology.

hȳ-drŏl'-ō-ĝȳ, *s.* [Pref. *hydro-* (1), and Gr. λόγος (*logos*) = a discourse.] That branch of science which treats of water, its properties, phenomena, and laws, and its distribution over the surface of the globe.

hȳ-drō-măg'-nĕ-sīte, *s.* [Pref. *hydro-* (1), and Eng. *magnesite.*]

Min.: A monoclinic white, brittle mineral of vitreous silky or almost pearly lustre; its hardness 3·5, its sp. gr. 2·14 to 2·18. Compos.: carbonic acid, 36·00 to 36·82; magnesia, 42·30 to 43·96; water, 18·53 to 20·10, with a trace of silica. Found in Moravia, in the Island of Negropont, in Texas, Pennsylvania, and New Jersey.

hȳ-drō-măg-nō-căl'-çīte, hȳ-drō-măn-gą-nō-căl'-çīte, *s.* [Pref. *hydro-*; Eng. *mangan(ese)*, and *calcite* (q.v.).]

Min.: According to Dana, hydromagnocalcite is the same as hydrodolomite. In the *Brit. Mus. Cat.* hydromagnocalcite is the specific name, with hydromanganocalcite as a synonym and hydrodolomite as a variety.

* **hȳ-drō-măn-çy,** *s.* [Pref. *hydro-* (1), and Gr. μαντεία (*mantikos*) = prophecy; divination.] Divination by means of water.

"The Persians are said by Varro to have been the first inventors of *hydromancy.*"—*Ennemoser: Hist. Magic* (ed. Bohn), ii. 458.

* **hȳ-drō-măn'-tĭc,** *a.* [Pref. *hydro-* (1), and Gr. μαντικος (*mantikos*) = pertaining to prophecy or divination.] Of or pertaining to hydromancy or divination by water.

"There are also various *hydromantic* machines."—*Ennemoser: Hist. Magic* (ed. Bohn), ii. 458.

hȳ-drō-mĕ-chăn'-ĭcs, *s.* [Pref. *hydro* (1), and Eng. *mechanics.*]

Nat. Science: The mechanics of water and fluids in general; hydrostatics, hydrodynamics, and hydraulics are branches of hydromechanics.

"*Hydromechanics* must be regarded as a modern science."—*Encyc. Brit.* (ed. 9th), xii. 435.

* **hȳ-drō-mĕl,** * **hȳ-drō-mĕll,** *s.* [Fr., from Gr. ὑδρόμελι (*hudromeli*), from ὕδωρ (*hudōr*) = water, and μέλι (*meli*) = honey.] A drink or liquor prepared of honey diluted with water; when allowed to ferment it is called mead (q.v.).

hȳ-drō-mĕ-tăl'-lŭr-ĝȳ, *s.* [Pref. *hydro-* (1), and Eng. *metallurgy.*] The wet process of extracting metals from ores; in contradistinction to the hot process.

hȳ-drō-mĕt-ą-morph'-ĭsm, *s.* [Pref. *hydro-* (1), and Eng. *metamorphism* (q.v.).]

Geol., &c.: Metamorphism produced mainly by the operation of water, as opposed to pyrometamorphism effected chiefly through the action of fire. (*Rutley.*)

hȳ-drō-mē'-tĕ-ŏr, *s.* [Pref. *hydro-* (1), and Eng. *meteor* (q.v.).]

Meteorol.: A meteor produced by water in some form, the term meteor being used in its original sense of anything seen in the air as distinguished from the ground. Rain, snow, hail, &c., are all hydrometeors. (*Nichol.*)

hȳ-drō-mō-tē-ōr-ō-lŏ̆ĝ'-ĭc-al, *a.* [Eng. *hydrometeorolog(y); -ical.*] Pertaining or relating to hydrometeorology.

hȳ-drō-mē-tē-ō-rŏl'-ō-ĝȳ, *s.* [Pref. *hydro-* (1), and Eng. *meteorology.*]

Meteorol.: The branch of meteorology which treats of hydrometeors. [Hydrometeor.]

hȳ-drŏm'-ē-tẽr, *s.* [Pref. *hydro-* (1), and Gr. μέτρον (*metron*) = a measure.]

I. An instrument for determining the relative densities of liquids. Distilled water is usually referred to as the standard of comparison. It consists essentially of a bulb or float weighted at bottom so as to float upright, and having an elongated stem, graduated to indicate the density of the liquid by the depth to which it sinks.

2. An instrument for measuring velocity or discharge of water; a current-gauge.

hȳ-drŏm'-ē-trą, *s.* [Gr. ὑδρομέτριον (*hudrometrion*) = a vessel for measuring hydrometrically; pref. *hydro-* (1), and Gr. μέτρον (*metron*) = a measure.]

Entom.: The typical genus of the family Hydrometridæ (q.v.). The antennæ are setaceous, the head is prolonged into a snout, the rostrum bending beneath it. *Hydrometra stagnorum,* an insect about three-eighths of an inch long, and as narrow as a pin, is common on the margin of ponds and brooks.

hȳ-drō-mĕt'-rĭc, hȳ-drō-mĕt'-rĭc-al, *a.* [Pref. *hydro-* (1), and Eng. *metric, metrical.*]

1. Of or pertaining to a hydrometer, or to the measurement of the specific gravity, velocity, discharge, &c., of fluids.

2. Made by means of an hydrometer: as, *hydrometric* observations.

hydrometric-pendulum, *s.* A current-gauge. An instrument consisting of a ball suspended from the centre of a graduated quadrant, and held in a stream to mark by its deflection the rate of motion of the water.

hȳ-drō-mĕt'-rĭ-dæ, *s. pl.* [Mod. Lat. *hydrometr(a);* Lat. fem. pl. adj. suff. *-idæ.*]

Entom.: A family of Heteroptera, tribe Geocorizæ (Land-bugs). It may seem a contradiction in terms to name the genus from the water and the tribe from the land, but the Hydrometridæ do not swim like the Water-bugs, they only walk on the surface of the water by means of their long legs. Their rostrum has two or three distinct joints, the labrum is very short, the eyes of moderate size. Genera, Hydrometra, Velia, Gerris (q.v.).

hȳ-drō-mĕt'-rō-grăph, *s.* [Pref. *hydro-* (1), and Eng. *metrograph* (q.v.).] An instrument

for determining and recording the amount of water issuing from a pipe, &c., in a given time.

hȳ-drŏm'-ĕ-trȳ, *s.* [Hydrometer.] The art or process of measuring the specific gravity, velocity, density, force, &c., of fluids by means of an hydrometer.

hȳ-drŏm'-phą-lŏn, *s.* [Gr. *ὑδρομφαλός* (*hudromphalos*) = suffering from water in the umbilical region; pref. *hydro-* (1), and Gr. *ὀμφαλός* (*omphalos*) = the navel.]

Pathol.: A watery tumour which arises in the umbilicus or navel in some cases of ascites.

hȳ-drō-mų-cŏn'-ĭc, *a.* [Pref. *hydro-* (2), and Eng. *muconic.*] (See the compound.)

hydromuconic-acid, *s.*

Chem.: $C_6H_8O_4$ or $C_4H_6(COOH)_2$. A bibasic acid, obtained by the action of sodium amalgam on di-chloromuconic-acid. It crystallizes in large prisms, which melt at 195°. By the action of sodium amalgam it is converted into adipic acid $C_6H_{10}O_4$.

hȳ'-drō-mȳs, *s.* [Pref. *hydro-* (1), and Gr. *μῦς* (*mus*) = a mouse.]

Zool.: A genus of Muridæ, containing *Hydromys leucogaster* and *H. chrysogaster*, perhaps only varieties of the same species. They are from Australia and Tasmania.

hȳ-drō-nĕ-phrō'-sĭs, *s.* [Pref. *hydro-* (1), and Eng. *nephrosis* (q.v.).

Path.: Dropsy of the kidney.

hȳ-drō-nĭo-kĕl-măg'-nĕ-sīte, *s.* [Pref. *hydro-* (1); Eng. *nickel*, and *magnesite* (q.v.).]

Min.: The same as Pennite (q.v.).

hȳ-drō-pą-răs'-tą-tēs, hȳ-drŏ-pą-răs'-tą-tą, *s. pl.* [Gr. *ὑδροπαραστάται* (*hudroparastatai*); pref. *hydro-* (1), and *παραστάτης* (*parastatēs*) = one who stands by or near.]

Ch. Hist.: The same as Encratites (q.v.).

hȳ-drō-păth'-ĭc, hȳ-drŏ-păth'-ĭc-ąl, *a.* [Eng. *hydropath(y)*; *-ic.*] Of or pertaining to hydropathy.

hȳ-drŏp'-ą-thĭst, *s.* [Eng. *hydropath(y)*; *-ist.*]

1. One who is skilled in or practises hydropathy.

2. A supporter of the system of hydropathy.

hȳ-drŏp'-ą-thȳ, *s.* [Pref. *hydro-* (1), and Gr. *πάθη* (*pathē*) = a passive state of suffering.]

Med.: The water cure. The cure of diseases by the use of the warm bath, the cold bath, &c. Hippocrates, in the fourth century, B.C., and the Arabian physician Rhazes, in 920, advocated it. In mediæval times it had followers first in Italy, then in Germany, and next in England, where it was recommended by Floyer (1649–1734), George Cheyne in 1725, Lucas in 1750, and Dr. Currie in 1797. Vincenz Preissnitz (1799–1851) systematized hydropathy, and, to a certain extent, made it popular. In his youth he was attacked and severely injured by a horse, and had two of his ribs broken. He kept down the inflammation so successfully that, on his recovery, he began to prescribe water in other cases, and in 1825 set up a hydropathic establishment at Gräffenberg. Within twenty years at least 10,000 patients had been treated by him, and his system had become known in all civilized countries. Abstaining from venesection, then far too much employed, and from the use of purgatives, he prescribed water internally and externally, sweating, &c. As subsidiary aids open-air exercise, early hours, and cheerful society were recommended.

hȳ-drō-pĕl'-tĭs, *s.* [Pref. *hydro-* (1), and Gr. *πέλτη* (*peltē*) = a small light shield of leather without a rim.]

Bot.: A genus of Cabombaceæ (Water-shields). *Hydropeltis purpurea* is said to be nutritious, but slightly astringent. The leaves are used in phthisis and dysentery.

hȳ-drō-pĕr-ĭ-car'-dĭ-ŭm, *s.* [Pref. *hydro-* (1), and Lat. *pericardium* (q.v.).]

Path.: Watery pus effused into the pericardium, and which has not been reabsorbed. Unless absorbed it is generally fatal.

hȳ'-drō-phāne, *s.* [Pref. *hydro-* (1), and Gr. *φανός* (*phanos*) = light, bright; *φαίνω* (*phainō*) = to bring to light. So named because it becomes more translucent or even transparent when immersed in water.]

Min.: A variety of opal. It is whitish or light-coloured.

hȳ-drŏph'-ą-noŭs, *a.* [Pref. *hydro-* (1); Gr. *φανος* (*phanos*) = bright, and Eng. suff. *-ous.*]

Min., &c.: Becoming more translucent or brighter when immersed in water.

hȳ-drō-phĭd, *s.* [Hydrophidæ.]

Zool.: A serpent of the genus Hydrophis, or of the family Hydrophidæ (q.v.).

hȳ-drŏph'-ĭ-dæ, *s. pl.* [Mod. Lat. *hydroph(is)* (q.v.); Lat. fem. pl. adj. suff. *-idæ.*]

Zool.: Sea snakes, water snakes; a family of Colubrine snakes, having the tail short and compressed, so that it can be used as an oar. The nostrils are close together on the upper part of the snout, and have valves which may be closed over them when the animal is under water. The Hydrophidæ inhabit the Indian seas and the Pacific Ocean near islands. They swim with rapidity, and are very venomous.

hȳ-drō-phĭl'-ĕ-æ, *s. pl.* [Pref. *hydro-* (1), and Gr. *φίλος* (*philos*) = beloved, dear to.]

Bot.: The name given by Delpino to plants fecundated by the aid of the water in which they grow.

hȳ-drō-phĭl'-ĭ-dæ, *s. pl.* [Mod. Lat. *hydrophil(us)*; Lat. fem. pl. adj. suff. *-idæ.*]

Entom.: Water-beetles; a family of Pentamerous beetles belonging to Latreille's tribe Palpicornes. Antennæ generally nine, rarely six-jointed, perfoliate elevate, the club distinctly cleft, the body oval or somewhat rounded, sometimes almost globose, the tibiæ slightly spinose, the posterior tarsi occasionally ciliated. They are more truly aquatic than the allied Helophoridæ (q.v.). The typical species swim by means of their paddle-like tarsi. They feed in all their stages of life, but not so voraciously as the Hydradephaga, on aquatic mollusca and insects. British genera six.

hȳ-drŏph'-ĭ-lŭs, *s.* [Pref. *hydro-* (1), and Gr. *φιλέω* (*phileō*) = to love.]

Entom.: The typical genus of the family Hydrophilidæ. *Hydrophilus caraboides*, is about eight or ten lines long. It is not uncommon in ponds and ditches round London.

hȳ'-drō-phĭs, *s.* [Pref. *hydro-* (1), and Gr. *ὄφις* (*ophis*) = a serpent, a snake.]

Zool.: The typical genus of the family Hydrophidæ (q.v.). There are many species.

hȳ'-drō-phīte, *s.* [Pref. *hydro-* (1); Gr. *ὄφις* (*ophis*) = a serpent, and suff. *-ite* (*Min.*) (q.v.).]

Min.: A green translucent or opaque mineral, of subvitreous lustre, occurring massive or in fibrous crusts. Compos.: silica, 36·19 to 38·97; alumina, 0·53 to 2·90; protoxide of iron, 19·30 to 22·73; protoxide of manganese, 1·66 to 4·36; magnesia, 21·08 to 22·87; and water, 13·36 to 16·08. Found at Taberg in Smaland, in Sweden, and in Orange county, New York. Called also Jenkinsite. (*Dana.*)

hȳ-drō-phlŏr'-ōne, *s.* [Pref. *hydro-* (2), and *phlorone.*]

Chem.: $C_6H_2(CH_3)_2(OH)_2$, obtained by the action of SO_2 on phlorone. It crystallizes in plates, which melt at 208°.

hȳ-drō-phō'-bĭ-ą, † **hȳ'-drō-phō-bȳ,** *s.* [Lat., from Gr. *ὑδροφοβία* (*hudrophobia*) = a horror of water, which is a symptom of the disease: pref. *hydro-* (1), and Gr. *φόβος* (*phobos*) = fear.]

Path.: Rabies, from bite of mad dog, more rarely cat, wolf, or fox; a contagious disease, the result of a specific poison. The great danger lies in the fact that a person bitten by a supposed mad dog imagines or simulates its symptoms, especially if nervous or hysterical; whereas only a very few of those bitten by a mad dog take the disease. The average period of incubation is forty days, but it varies from fifteen days to two years. Immediate cauterisation or excision of the part is the only effective remedy. After the disease appears, inhalation of chloroform and sub-cutaneous injections may be tried, but, unless all that is claimed for Pasteur's method of inoculation prove true, the antidote is yet to be found.

hȳ-drō-phō'-bĭc, *a.* [Lat. *hydrophobi(a)*; *-ic.*] Of or belonging to hydrophobia.

* **hȳ-drō-phō-bȳ,** *s.* [Hydrophobia.]

hȳ-drŏph'-ō-ra, *s.* [Neut. pl. of Gr. *ὑδροφορος* (*hudrophoros*) = carrying water; pref. *hydro-* (1), and *φορός* (*phoros*) = carrying.]

Zoology:

1. According to Prof. Huxley's classification, an order of Hydrozoa. The alimentary zoöid, or polype, is provided with numerous tentacles, which are either set round its mouth or scattered over its surface. When free swimming reproductive zoöids are developed, which they are always by the process of budding, the genitalia are borne by a nectocalyx or swimming-bell, with the inner margin of its aperture produced into a muscular velum. These zoöids are generally called craspedote, or gymnophthalmous medusæ. The immediate product of the growth of the embryo is a fixed Hydroid, Tubularian, or Sertularian Polype. (*Huxley: Class. of Animals* (1869), p. 117.)

2. A genus of physomycetous fungi. Two are British. *Hydrophora stercorea* is found, after much rain, on dung, and *H. murina* on rats' dung.

hȳ'-drō-phöre, *s.* [Hydrophora.] An instrument for obtaining specimens of water from any given depth below the surface.

hȳ-drŏph-thăl'-mĭ-ą, *s. pl.* [Pref. *hydro-* (1), and Eng., &c. *ophthalmia* (q.v.).]

Path.: Dropsy of the eye.

hȳ'-drō-phȳl, *s.* [Hydrophyllum.]

Botany:

1. (*Sing.*): One of the Hydrophyllaceæ (q.v.).

2. (*Pl.*): The name given by Lindley to the order Hydrophyllaceæ (q.v.).

hȳ-drŏph'-ȳ-lăx, *s.* [Lat., from Gr. *ὑδροφύλαξ* (*hydrophulax*) = a water inspector.]

Bot.: A genus of Cinchonaceæ, family Spermacocidæ. *Hydrophylax maritima*, which grows on the sandy seashores in India, is used in dyeing.

hȳ-drō-phȳl-lā'-çē-æ, *s. pl.* [Mod. Lat. *hydrophyll(um)*; Lat. fem. pl. adj. suff. *-aceæ.*]

Bot.: An order of perigynous exogens, alliance Cortusales. It consists of small trees, bushes, or herbs, often hispid. The flowers are arranged in gyrate racemes or unilateral spikes, or are occasionally solitary and axillary. Calyx inferior, persistent, deeply five-cleft, the recesses often with reflexed appendages; corolla gamopetalous, regular, five-cleft; stamens five, inserted in the petals; ovary one- or two-celled; styles two, long; stigmas two, terminal; fruit capsular, one- or two-celled, seeds reticulated. Most of the order are American, though some occur in India and at the Cape of Good Hope. Known genera about sixteen, species seventy-five or more. (*Lindley.*)

hȳ-drō-phȳl'-lĭ-ŭm (*pl.* **hȳ-drō-phȳl'-lĭ-ą),** *s.* [Pref. *hydro-* (3), and Gr. *φύλλον* (*phullon*) = a leaf.]

Zool. (*Pl.*): Overlapping appendages or plates protecting the polypites in the Calycophoridæ and the Physophoridæ, two families of oceanic Hydrozoa. Called also bracts.

hȳ-drŏph'-ȳl-lŭm, *s.* [Hydrophyllium.]

Bot.: The typical genus of the order Hydrophyllaceæ. It consists of American perennial marsh herbs, with blue or white flowers. *Hydrophyllum canadense* has been used in snake bites, also as a remedy in the erysipelatous eruptions produced by *Rhus toxicodendron.*

hȳ-drō-phȳs'-ō-çēle, *s.* [Pref. *hydro-* (1); Gr. *φῦσα* (*phusa*) = flatus, and *κήλη* (*kēlē*) = a tumour.]

Path.: A hernia containing both water and air or gas.

hȳ'-drō-phȳte, *s.* [Pref. *hydro-* (1), and Gr. *φυτον* (*phuton*) = a plant.]

Bot. (*Pl.*): Plants growing wholly in water, especially Algæ. They are distributed in the ocean, within certain areas, fewer than land plants, because the temperature of the ocean is more uniform. Some float or live in shallow, others in deep water.

hȳ-drō-phȳ-tŏl'-ō-gȳ, *s.* [Eng., &c. *hydrophyte*, and Gr. *λόγος* (*logos*) = a discourse.]

Bot.: The branch of botany which treats of water plants.

hȳ-drŏp'-ĭc, *a.* & *s.* [Lat. *hydropicus*, from Gr. *ὑδροπικός* (*hudropikos*), from *ὕδρωψ* (*hudrōps*) = dropsy (q.v.); Fr. *hydropique.*]

A. *As adjective:*

1. Containing or produced by water; suffering from dropsy; dropsical.

"*Hydropick* wretches by degrees decay." *Blackmore*

2. Of or pertaining to dropsy; of the nature of dropsy; dropsical.

3. Resembling dropsy.

Some men's *hydropick* insatiableness learned to thirst the more."—*Eikon Basilike.*

† **B.** *As subst.:* A medicine fitted to relieve the dropsy.

* **hȳ-drŏp'-ĭ-cal,** *a.* [HYDROPIC, *a.*]

* **hȳ-drŏp'-ĭc-al-lȳ,** *adv.* [Eng. *hydropical; -ly.*] In an hydropical manner.

hȳ'-drō-pīte, *s.* [Gr. *ὕδρωψ* (*hudrōps*) = dropsy; suff. *-ite* (*Min.*) (q.v.).]

Min.: A rose-coloured mineral from Kapnik; impure rhodonite (q.v.).

hȳ drō-pneu-măt'-ĭc (*p* silent), *a.* [Pref. *hydro-* (1), and *pneumatic* (q.v.).] Pertaining to or produced by the combined action of water and air or gas.

hȳ-drŏp'-ŏr-ŭs, *s.* [Pref. *hydro-* (1), and Lat. *porus*; Gr. *πόρος* (*poros*) = a passage.]

Entom.: A genus of small beetles, family Dyticidæ. Fifty-eight British species are known. They move about in the water in merry gambols.

* **hȳ'-drŏps,** *s.* [Gr.] Dropsy.

* **hȳ'-drŏp-sȳ,** *s.* [Gr. *ὕδρωψ* (*hudrōps*).] Dropsy (q.v.).

"Soft-swoln and pale, here lay the *hydropsy*." *Thomson: Castle of Indolence,* i. 75.

* **hȳ'-drō-pŭlt,** *s.* [Pref. *hydro-* (1), and *pult*, as in *catapult* (q.v.).] A machine for throwing water by hand-power, as in a garden-engine or fire-annihilator.

hȳ-drō-pȳ-rĕt'-ĭc, *a.* [Mod. Lat. *hydropyretus*; suff. *-ic.*] Of or belonging to sweating sickness.

† **hȳ-drō-pyr'-ĕ-tŭs,** † **hȳ-drō-pyr'-ĕ-tŏs (yr** as **ir),** *s.* [Pref. *hydro-* (1), and *πυρετός* (*puretos*) = burning heat, fever.]

Path.: The name given by Blanchard to *Sudor Anglicanus*, sweating sickness.

hȳ-drō-pyr'-ŭm (yr as **ir),** *s.* [Pref. *hydro-* (1), and Gr. *πυρήν* (*purēn*) = the stone of a stone-fruit.]

Bot.: A genus of grasses, tribe Oryzeæ. *Hydropyrum esculentum* is the Canada rice, eaten by the North American Indians, besides supporting many water-birds.

hȳ'-drō-quĭn-ōne, *s.* [Pref. *hydro-* (2), and *quinone.*]

Chem.: $C_6H_4\langle^{OH}_{OH}$ (1—4). A para-diatomic phenol, obtained by dry distillation of quinic acid, or by heating an aqueous solution with plumbic dioxide, $C_7H_{12}O_6 + O = C_6H_4(OH)_2 + CO_2 + 3H_2O$; also from arbutin, which, when boiled with dilute sulphuric acid, yields hydroquinone and glucose. It has been obtained synthetically by heating para-iodo-phenol with potash to 180°; but it is easiest obtained by passing SO_2 into an aqueous solution of quinone, $C_6H_4\langle^{O}_{O}\rangle$ till it becomes colourless; it is then evaporated, and the hydroquinone extracted with ether; also by oxidizing one part of aniline, eight parts of H_2SO_4, and thirty of water, with two and a half parts of $K_2Cr_2O_7$. Hydroquinone crystallizes in colourless prisms, which melt at 169°, which can be sublimed, but if heated strongly it is decomposed. It is easily soluble in water, alcohol, and ether. Ammonia turns an aqueous solution of hydroquinone a red-brown colour. Ferrichloride converts it into quinone.

hȳ'-drō-rā'-chĭs, *s.* [Pref. *hydro-* (1), and Gr. *ῥαχις* (*rhachis*) = the sharp ridges along the back of a man or an animal.]

Path.: An abnormal collection of fluid within the spinal column. It is generally congenital, and associated with *spina bifida.* The pressure of the fluid tends ultimately to produce atrophy of the cord.

hȳ'-drō-rhī-zą, *s.* [Pref. *hydro-* (3), and Gr. *ῥίζα* (*rhiza*) = a root.]

Zool.: The adherent base or proximal extremity of a Hydrozoon. (*Nicholson.*)

† **hȳ-drō-săr'-cō-çēlc,** *s.* [Pref. *hydro-* (1), and Eng. *sarcocele* (q.v.).]

Path.: An old term for sarcocele, in which the testicle is dropsical as well as scirrhous. It is a stage of sarcocele rather than a distinct malady.

hȳ'-drō-sâu'-rŭs, *s.* [Pref. *hydro-* (1), and Gr. *σαῦρα* (*saura*); *σαῦρος* (*sauros*) = a lizard.]

Path.: A genus of Lizards, family Varanidæ (Monitors). They frequent the vicinity of water. *Hydrosaurus salvator* of the Eastern islands is eight feet long. Another species is *H. Bellii*, occurring in Australia.

hȳ'-drō-scōpe, *s.* [Pref. *hydro-* (1), and Gr. *σκοπέω* (*skopeō*) = to see, to observe.]

1. [CLEPSYDRA.]

2. [HYDROMETER.]

hȳ-drō-sĕl'-ĕn-āte, *s.* [Pref. *hydro-* (2), and Eng. *selenate.*]

Chem.: A salt of hydroselenic acid, also called selenide.

hȳ-drō-sĕ-lĕn'-ĭc, *a.* [Pref. *hydro-* (2), and Eng. *selenic.*] (See the compound.)

hydroselenic-acid, *s.*

Chem.: Hydrogen selenide, H_2Se. An irritating, colourless gas, obtained by the action of dilute sulphuric acid and ferrous selenide. Soluble in water, and precipitates metallic selenides.

hȳ-drō-sĭd'-ĕr-īte, *s.* [Pref. *hydro-* (1), and Eng. *siderite* (q.v.).]

Min.: The same as LIMONITE (q.v.).

hȳ-drō-sĭl'-ĭ-çīte, *s.* [Pref. *hydro-* (1), and Eng. *silicite* (q.v.).]

Min.: A mineral having the composition silica 43·31 to 44·90; alumina, 0 to 3·14; magnesia, 4·60 to 8·66; lime, 28·70 to 33·32, &c. Found amorphous or in crusts at Palagonia and Aci Castello in Sicily. (*Dana.*)

hȳ'-drō-sō-mą, *s.* [Pref. *hydro-* (3), and Gr. *σῶμα* (*sōma*) = the body.]

Zool.: The entire organism of a hydrozoon, whether simple as in hydra or composite as in a sertularian.

hȳ'-drō-stăt, *s.* [HYDROSTATIC.] A general term, signifying an apparatus or contrivance to prevent the explosion of steam-boilers.

hȳ-drō-stăt'-ĭc, * **hȳ-drō-stăt'-ĭck,** *a.* [Pref. *hydro-* (1), and Gr. *στατικός* (*statikos*) = static or standing.] Pertaining or relating to hydrostatics; pertaining to the principles of the equilibrium of fluids.

hydrostatic-arch, *s.*

Arch.: A linear arch suited for sustaining normal pressure at each point, proportional—like that of a liquid in repose—to a depth below a given horizontal plane. It is sometimes called the "Arch of Yvon-Villaceaux," from the name of the mathematician who first demonstrated its properties.

hydrostatic-balance, *s.* A balance for weighing substances in water for the purpose of ascertaining their specific gravities.

hydrostatic-bed, *s.* [WATER-BED.]

hydrostatic-bellows, *s.* [BELLOWS.]

hydrostatic-lamp, *s.* A lamp in which a stratum of oil is sustained by water or other fluid of greater specific gravity than the oil.

hydrostatic-level, *s.*

Civil Eng.: A water-level.

hydrostatic-paradox, *s.* The principle that any quantity of water, however small, may be made to balance any weight, however great.

hydrostatic-press, *s.* A machine in which the pressure of a relatively small piston on a body of water in a small cylinder communicates such pressure to the water in a large cylinder, and impels the ram or piston. The power gained is directly, and the speed inversely, as the difference between the two cylinders.

hydrostatic-pressure, *s.* The pressure exerted by water at rest on the artificial vessel or bed containing it.

hȳ-drō-stăt'-ĭc-ăl, *a.* [Eng. *hydrostatic; -al.*] Hydrostatic. (*Boyle: Works,* v. 455.)

hy drō-stăt'-ĭc-ăl-lȳ, *adv.* [Eng. *hydrostatical; -ly.*] In a hydrostatic manner; according to hydrostatics or hydrostatic principles.

"One of the first pieces of black marble that I examined *hydrostatically*."—*Boyle: Works,* iii. 557.

hȳ-drō-stą-tĭ-cian, *s.* [Eng. *hydrostatic; -ian.*] One who is versed or skilled in hydrostatics.

"Known to *hydrostaticians*."—*Boyle: Works,* vi. 492.

hȳ-drō-stăt'-ĭcs, *s.* [HYDROSTATIC.]

Physics: The department of science which treats of the conditions of equilibrium in liquids. For a liquid to remain at rest in any vessel, *first*, its surface must be everywhere at right angles to the forces which act on the molecules of the liquid, and, *second*, every molecule of the mass of the liquid must be subject in every direction to equal and contrary pressure. If the same liquid be placed in several vessels freely communicating with each other it will stand in them all at the same horizontal level. If two or more liquids be placed in the same vessel they will arrange themselves according to their relative densities, after which the equilibrium will be stable. Pascal's law (a fundamental one in hydrostatics) is that pressure existing anywhere upon a mass of liquid is transmitted undiminished in all directions, and acts with the same force on all equal surfaces, and in a direction at right angles to those surfaces. In ancient times Archimedes and Hero of Alexandria made some advance in hydrostatics, as did Galileo (1564–1642), but, according to Hallam, the real creators of the science were Castellio (1577–1644), and Torricelli (1608–1647). It has since been advanced by Sir Isaac Newton, Bernoulli, McCanton, Coulomb, and recently by Professor Airy and others.

hȳ-drō-stē'-ą-tīte, *s.* [Pref. *hydro-* (1), and Eng. *steatite* (q.v.).]

Min.: A variety of Steatite, with less silica than the typical mineral. Found at Göpfersgrün.

hȳ-drō-sŭl'-phāte, *s.* [Eng., &c. *hydrosulph(uric)*; suff. *-ate.*]

Chem.: A salt of hydrosulphuric acid.

hȳ-drō-sŭl-phū'-rĭc, *a.* [Pref. *hydro-* (2), and Eng. *sulphuric.*]

Chem.: Having in its composition sulphuric acid and hydrogen.

hydrosulphuric-acid, *s.* [HYDROGEN-SULPHIDE.]

hȳ'-drō-tălc, *s.* [Pref. *hydro-* (1), and Eng. *talc* (q.v.).]

Min.: The same as PENNINITE (q.v.).

hȳ-drō-tăl'-çīte, *s.* [Pref. *hydro-* (1), and *talcite* (q.v.).]

Min.: An hexagonal, massive, foliated, fibrous white translucent mineral of pearly lustre and greasy feel. Compos.: alumina, 16·3; magnesia, 39·2; water, 44. Found in serpentine at Snarum, in Norway, &c. (*Dana.*)

hȳ-drō-tĕl'-lu-rāte, *s.* [Eng. *hydrotellur(ic); -ate* (*Chem.*).]

Chem.: A salt of hydrotelluric acid.

hȳ-drō-tĕl'-lu-rĭc, *a.* [Pref. *hydro-* (2), and Eng. *telluric.*]

Chem.: Having telluric acid and hydrogen in its composition.

hydrotelluric-acid, *s.* [HYDROGEN-TELLURIDE.]

hȳ-drō-tĕph'-rō-īte, *s.* [Pref. *hydro-* (1), and Eng. *tephroite* (q.v.).]

Min.: A pale yellow hydrous variety of Tephroite, from Paisberg.

hy-drō-thē'-cą (*pl.* **hȳ-drō-thē'-cæ),** *s.* [Pref. *hydro-* (3), and Lat. *theca.*]

Zool.: The little chitinous cup which protects the polypites of the Sertularida and the Campanularida.

hȳ-drō-thĕr'-mal, *a.* [Pref. *hydro-* (1), and Eng. *thermal.*] Relating to the action of heated water.

hȳ-drō-thōr'-ăx, *s.* [Pref. *hydro-* (1), and Eng. *thorax.*]

Pathol.: Serous fluid occupying the pleura. It may take place as the result of inflammation

[Pleuraisy], also in heart disease, in disease of the kidneys, and sometimes in anæmia.

***hȳ-drŏt'-ĭc, *hȳ-drŏt'-ĭck,** *a. & s.* [Fr. *hydrotique*, from Gr. *ὕδωρ* (*hudōr*) = water.]

A. *As adj.:* Causing a discharge of water or phlegm.

B. *As subst.:* A medicine that causes a discharge of water or phlegm.

"He seems to have been the first who divided purges into *hydrotieks* and purges of bile."—*Arbuthnot.*

***hȳ-drŏt'-ĭ-cal,** *a.* [Eng. *hydrotic; -al.*] Hydrotic.

***hȳ'-droŭs,** *a.* [Gr. *ὕδωρ* (*hudōr*) = water; Eng. adj. suff. *-ous.*] Containing water; watery.

hydrous-anthophyllite, *s.* [Anthophyllite.]

hȳ-drŏ'-ŭs, *s.* [Gr. *ὑδρόεις* (*hudroeis*) = fond of the water.]

Entom.: A genus of Beetles, family Hydrophilidæ (*Hydrous piceus*), which is not uncommon in marshy places near the metropolis, is, with the exception of the Stagbeetle (*Lucanus Cervus*), and a Cockchafer (*Melolontha Fullo*), the largest coleopterous insect indigenous in Britain.

hȳ-drŏx'-ĭde, *s.* [Pref. *hydro-* (2), and *oxide.*]

Chem.: A compound of an element with the monad radical hydroxyl (OH)', as K'(OH)' potassium hydrate, $Ca''(OH)_2'$ calcium hydrate. These compounds can be formed by adding water to an oxide, as $CaO+H_2O = Ca(OH)_2$, or by decomposing a salt with KHO, as $FeSO_4+2KHO = K_2SO_4 + Fe(OH)_2$.

hȳ-drŏx'-ȳl, *s.* [Pref. *hydro-* (2); *ox(ygen)*, and *yl* = Gr. *ὕλη* (*hulē*) = matter.]

Chem.: A name given to the monatomic radical (OH)'.

hȳ-drŏx-ȳl'-ą-mīne, *s.* [Eng. *hydroxyl*, and *amine.*]

Chem.: $NH_2{\cdot}OH$. Obtained by passing nitrogen dioxide through a series of vessels containing tin and hydrochloric acid, precipitating the tin by H_2S, filtering, evaporating to dryness, washing with cold alcohol, then boiling with absolute alcohol, adding ether, which precipitates the hydrochlorate of hydroxylamine, $NH_2OH{\cdot}HCl$, in crystals. Also by the action of hydrogen, obtained from tin and HCl on ammonium nitrate, or ethyl nitrate. The base is very volatile and easily decomposed: it is only known in solution. Hydroxylamine gives a light green precipitate with cupric sulphate, which is reduced to cuprous oxide on boiling with water. Hydroxylamine is a powerful reducing agent. A solution of the base can be obtained by decomposing the nitrate dissolved in alcohol by alcoholic potash, also by the addition of an alkaline carbonate to the hydrochlorite. The salts of hydroxylamine are decomposed by potash with evolution of nitrogen and formation of ammonia.

hȳ-drō-zĭn'-cīte, *s.* [Pref. *hydro-* (1), and *zincite.*]

Min.: A dull earthy or compact white, grayish, or yellowish mineral, occurring massive, earthy, or compact, in incrustations, reniform, pisolitic, or stalactitic. Hardness, 2 to 2·5; sp. gr., 3·58 to 3·80. Compos.: carbonic acid, 15·3; oxide of zinc, 73·4; water, 11·3 = 100. Found abundantly at the Dolores mine in the Udras Valley, in the province of Santander, and elsewhere, in Spain; also in Carinthia, Westphalia, Bavaria, and Persia. (*Dana.*)

hȳ-drō-zō'-ŏn (*pl.* **hȳ-drō-zō'-ą**), *s.* [Pref. *hydro-* (3), and Gr. *ζῷον* (*zōon*) = a living being, an animal.

Zoology:

I. *Sing.:* One of the Hydrozoa [2].

2. *Pl.:* The name given by Prof. Owen, followed by Prof. Huxley, &c., to the great class of the sub-kingdom Cœlenterata, of which Hydra is the type. They exhibit a definite histological structure, their tissues having a cellular organization. These tissues are two, an outer or ectoderm, and an inner or endoderm. The digestive cavity communicates directly by a wide aperture with the general cavity of the body. The digestive sac and the reproductive organs are developed as outward processes of the body-wall. In most the prey is seized by tentacles surrounding the mouth and furnished with offensive weapons, called thread-cells. The Hydrozoa are all aquatic, and nearly all marine. Their distribution is world-wide. They are the Dimorphæa of Ehrenberg, the Sertularians of Milne Edwards, and the Nudibranchiata of Farre. Prof. Huxley divided the class into three orders, Hydrophora, Siphonophora, and Discophora, doubtfully adding as a fourth the Trachymedusæ of Haeckel. Nicholson divides them into six sub-classes, Hydroida, Siphonophora, Lucernarida, Discophora, Graptolitidæ, and Hydrocorallinæ. (*Owen, Huxley, Nicholson,* &c.)

"In the first and lowest organised class [of Polypi] which I have called *Hydrozoa*."—*Owen: Compar. Anat. Invertеb.* (1845), lect. vii., p. 82.

2. *Palæont.:* See the several orders or sub-classes of Hydrozoa.

hȳ'-drŭs, *s.* [Lat. *hydrus*, *Hydrus*; Gr. *ὕδρος* (*hudros*) = a water-serpent; "Ὕδρος (*Hudros*) = a constellation (2).]

1. *Zool.:* A genus of Hydrophidæ. Sometimes it is made the type of the family, which is then called Hydridæ.

2. *Astron.:* The Southern Snake, one of Lacaille's constellations. It is situated between the South Pole and Achernar, the bright star in Eridanus.

hȳ-du-rĭl'-ĭc, *a.* [Pref. *hydro-* (2), and Eng. *uric* (?).] (See the compound.)

hydurilic-acid, *s.*

Chem.: $C_8H_6N_4O_6$. An acid obtained as an ammonia salt by heating diuturic acid to 160° in glycerine; the ammonia salt is converted into a copper salt, and then treated with H_2S. It crystallizes out of hot water in small prisms. Ferric chloride gives a dark green colour with a solution of hydurilic acid or its salts.

*** hȳ'-ĕm-ąl,** *a.* [Lat. *hiemalis*, from *hiems* = winter.]

1. *Ord. Lang.:* Of or pertaining to winter; done or made in the winter.

"The ancients had also *hyemal* garlands."—*Browne: Miscellanies*, p. 92.

2. *Bot.:* Of or belonging to plants which flower in winter.

*** hȳ'-ĕm-āte,** *v.i.* [Lat. *hiematum*, sup. of *hiemo*, from *hiems* = winter.] To pass the winter.

*** hȳ-ĕm-ā'-tion,** *s.* [Lat. *hiematio*, from *hiemo* = to pass the winter; *hiems* = winter.]

1. The act or state of passing the winter in a particular state.

"Setting it in cases in our conservatories for *hyemation*."—*Evelyn: Sylva*, ch. xx.

2. The act of affording shelter during the winter.

hȳ-ē'-ną, hȳ-æ'-ną, * hy-en, *s.* [Hyæna.]

hyena-dog, *s.* [Hyæna-dog.]

hȳ'-ĕt-ąl, *a.* [Gr. *ὑετός* (*huetos*) = rain; *ὗω* (*huō*) = to rain.]

Meteor.: Of or belonging to rain; relating to the rainfall of different countries.

hȳ-ĕt'-ō-grăph, *s.* [Gr. *ὑετός* (*huetos*) = rain, and *γράφω* (*graphō*) = to write.] A chart indicating the comparative distribution of rain over a given geographical surface.

hȳ-ĕt-ō-grăph'-ĭc, hȳ-ĕt-ō-grăph'-ĭc-ąl, *a.* [Eng. *hyetograph*; *-ic, -ical.*] Of or pertaining to hyetography.

hȳ-ĕt-ŏg'-ra-phy, *s.* [Eng. *hyetograph*; *-y.*] That branch of physical science which treats of the distribution of rain; a knowledge of the quantities of rain falling in different places in a given time.

hȳ-ĕt-ŏm'-ĕ-tĕr, *s.* [Gr. *ὑετός* (*huetos*) = rain, and *μέτρον* (*metron*) = a measure.] A rain-gauge.

Hȳ-ġē'-ą (**1** as **y**), *s.* [Gr.]

1. *Class. Myth.:* The daughter of Esculaphus, and goddess of health.

2. *Astron.:* [Asteroid].

hȳ-ġē'-ąn (**1** as **y**), *a.* [Hygeia.] Pertaining or relating to hygeia or health.

hȳ'-ġĕ-īne, *s.* [Hygiene.]

hȳ'-ġĕ-ĭst, *s.* [Eng. *hyge(ia); -ist.*] One versed or skilled in hygiene.

hȳ-ġiē'-ąn, *a.* [Hygeian.]

hȳ'-ġiŏ-īne, *s.* [Hygiene.]

*** hȳ'-ġiŏ-ĭst,** *s.* [Hygeist.]

*** hȳ-ġĭ-ĕn'-ąl, * hȳ-ġiŏ-ĭn'-ąl,** *a.* [Eng. *hygien(e); -al.*] Relating or pertaining to hygiene, or the preservation of health.

"Presenting some things relating to the *hygieinal* part of physic."—*Boyle: Works*, II. 103.

hȳ'-ġĭ-ēne, *s.* [Fr. *hygiène*, from Gr. *ὑγιαίνω* (*hugiainō*) = to be sound, healthy, or in health.]

Med.: The study of the prevention of disease, the art of preserving health, and securing what Juvenal (x. 356) considered the best gift of the gods, *mens sana in corpore sano*, through wise sanitary precautions, and attention to diet, regimen, &c. In this way growth will be increasingly perfected, life more vigorous, decay less rapid, and death more remote. Hygiene has been a subject of serious and incessant study of recent years, much to the advantage of the health of the community. In the United States the supervision of public Hygiene is delegated to Boards of Health, to which medical officers and experts report, and which publish important matter for the guidance of the community at large. Quarantine receives particular attention, in order to prevent the introduction of epidemic diseases from beyond the Atlantic.

hȳ-ġĭ-ĕn'-ĭc, *a. & s.* [Eng. *hygien(e); -ic.*]

A. *As adj.:* Relating to hygiene or the preservation of health.

B. *As subst.* (*Pl.*): The science of health; hygiene; sanitary science.

hȳ-ġĭ-ĕn'-ĭc-ąl, *a.* [Eng. *hygienic; -al.*] Hygienic.

hȳ-ġĭ-ĕn'-ĭc-ąl-lȳ, *adv.* [Eng. *hygienical; -ly.*] In a hygienic manner; according to the rules or principles of hygiene.

hȳ'-ġĭ-ĕn-ĭsm, *s.* [Eng. *hygien(e); -ism.*] The science of health; hygiene.

hȳ'-ġĭ-ĕn-ĭst, *s.* [Eng. *hygien(e); -ist.*] One versed in hygiene.

hȳ-ġĭ-ŏl'-ō-ġȳ, *s.* [Gr. *ὑγεία* (*hugeia*)=health, and *λόγος* (*logos*) = a discourse, a treatise.] A treatise on hygiene; hygiene.

† hygre, *s.* [Eagre, Eager, *s.*]

hȳ-grō-, *pref.* [Gr. *ὑγρός* (*hugros*) = wet.] A prefix denoting a combination with or the presence of wet or moisture.

hȳ-grō-blĕ-phăr'-ĭc, *a.* [Pref. *hygro-* (q.v.); Gr. *βλέφαρον* (*blepharon*) = an eyelid, and suff. *-ic*; Fr. *hygroblépharique.*]

Anat.: Of or belonging to the lachrymal ducts, and orifices of the eye.

hȳ-grō-grăph, *s.* [Pref. *hygro-*, and Gr. *γράφω* (*graphō*) = to write, to describe.] An automatically recording hygrometer.

† hȳ-grŏl'-ō-ġȳ, *s.* [Pref. *hydro-*, and Gr. *λογος* (*logos*) = a discourse.]

Med.: The doctrine of the humours of the body. [Humour.]

hȳ-grŏm'-ĕ-tĕr, *s.* [Pref. *hygro-*, and Gr. *μέτρον* (*metron*) = a measure.] An instrument for measuring the comparative moisture of the air. There are three kinds: (1) those which act by absorption; (2) by condensation, and (3) those in which the hygrometric condition is deduced from observations of a wet and dry bulb. Of the first class is the hygrometer of Saussure (died 1799). It consists of a human hair boiled in lye, and acts by absorption and evaporation, lengthening or contracting as the air is more or less moist.

hȳ-grō-mĕt'-rĭc, hȳ-grō-mĕt'-rĭc-ąl, *a.* [Pref. *hygro-*; Eng. *metric, metrical.*]

I. *Ordinary Language:*

1. Pertaining or relating to hygrometry; made or done by or with the hygrometer: as, *hygrometric* observations.

2. Readily absorbing and retaining moisture: as *hygrometric* substances, like chloride of calcium, sulphuric acid, &c.

II. *Bot.:* Indicating the approach of moisture. (*Loudon.*)

¶ *The hygrometric state of the atmosphere:* The degree to which at the time it is saturated with moisture.

hygrometric-balance, *s.* An instrument for indicating the relative density of the

air, and consequent changes of rain or dry weather. It consists of a balance, from one arm of which is suspended a brass weight, and from the other a large, thin, hollow cylinder, closed at each end. The two are arranged so as to be in equilibrium at a given density of the atmosphere, and it is evident that if the air become heavier, the large cylinder, displacing more air than the solid weight, will become more buoyant and ascend. If, on the contrary, the air become lighter, it will sink. A rod descending from the scale-beam serves to indicate, on the graduated arc below, the comparative density of the air at the time of making the observation. If the air be heavy, fine weather may be expected; but if the cylinder sink, rain usually follows.

hygrometric plants, *s. pl.*

Bot.: Plants so sensitive to changes in the atmosphere that they will indicate a change in its hygrometric conditions. Thus, the flower of *Anagallis arvensis* shuts when rain is about to fall; hence it has been called the poor man's weather-glass. *Convolvulus arvensis* does the same. If the "African" Marigold (which, however, came from Peru) shuts after seven a.m., rain is near at hand.

hȳ-grŏm'-ĕ-trȳ, *s.* [HYGROMETER.] The measurement of the amount of aqueous vapour in the air at any time. This may be effected by absorbing the moisture from a given quantity of air; by finding the dew point, that is the point at which dew is deposited, or by a psychrometer (q.v.). (*Rossiter.*)

hȳ-grŏph'-ą-noŭs, *a.* [Pref. *hygro-*; Gr. φαινω (*phainō*) = to cause to appear, and Eng suff. *-ous.*]

Bot.: Having such a structure that it is transparent when moist and opaque when dry.

hȳ-grŏph'-ĭ-lą, *s.* [Pref. *hygro-*, and Gr. φιλεω (*phileō*) = to love.]

Bot.: The typical genus of the tribe Hygrophilæ (q.v.). About twenty-four species are known.

hȳ-grō-phĭl'-ē-æ, *s. pl.* [Mod. Lat. *hygrophil(a)*; Lat. fem. pl. adj. suff. *-eæ.*]

Bot.: A tribe of Acanthaceæ.

hȳ'-grō-scōpe, *s.* [Pref. *hygro-*, and Gr. σκοπεω (*skopeō*) = to observe.] An instrument for indicating the degree of moisture in the atmosphere.

hȳ-grō-scŏp'-ĭc, hȳ-grō-scŏp'-ĭc-ąl, *a.* [Eng. *hygroscop(e)*; *-ic*, *-ical.*]

1. Of or pertaining to the hygroscope; indicated or detected by the hygroscope.

2. Having the property or quality of imbibing moisture from the atmosphere, or of becoming coated with a film of moisture.

"More information as to the *hygroscopic* condition of the atmosphere is needed."—*Athenæum*, Feb. 21, 1880, p. 251.

hȳ-grō-scō-pĭç'-ĭ-tȳ, *s.* [Eng. *hygroscopic*; *-ity.*] The property of extending when water is applied, and shrinking when it is withdrawn.

hȳ-grō-stăt'-ĭcs, *s.* [Gr. ὑγρός (*hugros*) = wet; στατική (ἐπιστήμη), (*statikē epistēmē*) = statics; ἵστημι (*histēmi*) = to stand.] The science of comparing or measuring degrees of moisture.

*** hȳke,** *s.* [HEAK.]

hȳ'-lą, *s.* [Lat. *hyle*; Gr. ὕλη (*hulē*) = a wood, a forest.]

Zool.: Tree Frog. The typical genus of the family Hylidæ (q.v.). *Hyla arborea* is found in continental Europe.

hȳ'-lą-dæ, *s. pl.* [HYLIDÆ.]

hȳ-læ-ō-sâu'-rŭs, *s.* [Gr. ὑλαῖος (*hulaios*) = belonging to the forest, savage, and σαῦρος (*sauros*) = a lizard.]

Palæont.: A genus of Dinosaurian reptiles. The bony dermal scutes were prolonged along the ridge of the back in a series of enormous spines. Discovered by Mantell in the Wealden of Tilgate Forest.

hȳ-læ'-ŭs, *s.* [Lat. = a centaur; also = one of Actæon's dogs; Gr. ὑλαῖος (*hulaios*) = belonging to the forest.]

Entom.: A genus of Bees, family Andrenidæ. The species burrow, and are parasitic. When caught they emit a fragrance like that of lemons.

*** hȳl-arch'-ĭc-ąl,** *a.* [Gr. ὕλη (*hulē*) = matter, and ἀρχικός (*archikos*) ruling; ἄρχω (*archō*) = to rule.] Presiding over matter.

*** hylde,** *v.t.* [A.S. *hyldan.*] To pour out.

*** hyld-ing,** *a.* [HILDING.]

hȳ'-lē, *s.* [Gr. ὕλη (*hulē*) = matter.]

Manicheism: The name given by the Manicheans to the Regent of the World of Darkness. (*Mosheim: Ch. Hist.*, cent. iii., pt. ii., ch. 5, § 3.)

hȳ-lĕ-ō-sâur, *s.* [HYLÆOSAURUS.] A popular form of hylæosaurus (q.v.).

hȳ-lĕ-ō-sâu'-rŭs, *s.* [HYLÆOSAURUS.]

hȳ-lĕs'-ĭ-nŭs, *s.* [Gr. ὕλη (*hulē*) wood, and σίνος (*sinos*) = damage. (*Agassiz.*)]

Entom.: A genus of Beetles, family Scolytidæ. Four species are British. One, *Hylesinus fraxini* feeds on the ash, and another, *H. oleiperda*, destroys the olive.

hȳ'-lī-dæ, hȳ'-lą-dæ, *s. pl.* [Mod. Lat. *hyl(a)*; Lat. fem. pl. adj. suff. *-idæ*, *-adæ.*]

Zool.: Tree Frogs. A family of Amphibians, order Anoura or Batrachia. They are akin to the Ranidæ (typical frogs), but have the extremities of their toes dilated into knobs with a viscous secretion, enabling them to climb trees on which they live. They are also more elegant, and, as a rule, more brightly coloured.

*** hyll, * hylle,** *v.t.* [A.S. *helan.*] To cover, to hide.

hȳ-lō-, *pref.* [Gr. ὕλη (*hulē*) = matter.] Pertaining to matter, materialistic.

hylo-ideal, *a.* Pertaining to or in any way connected with hylo-idealism (q.v.).

"Many a cherished ideal must fall when the . . . *hylo-ideal* theory is finally established."—*Journ. of Science*, March, 1883, p. 127.

hylo-idealism, *s.*

Philos.: Somatic or material idealism, a school of philosophy adopted from Protagoras by Dr. Robert Lewins. The central insistence of the hylo-ideal philosophy is that man is, for man, the measure of the universe. It is sometimes called hylo-phenomenalism.

"*Hylo-idealism* cannot be wholly unknown to readers of this journal."—*Journ. of Science*, March, 1883, p. 122.

hylo-idealist, *s.* One who accepts the philosophy of hylo-idealism.

hylo-phenomenalism, *s.* [HYLO-IDEALISM.]

hȳ-lō-bā'-tēş, *s.* [Gr. ὑλοβάτης (*hulobatēs*) = one who haunts the woods.]

Zool.: A genus of Anthropoid Apes, containing the Gibbons. [GIBBON.]

hȳ-lō'-bĭ-ŭs, *s.* [Gr. ὑλόβιος (*hulobios*) = living in the woods.]

Entom.: A genus of Beetles, family Curculionidæ. There is one British species, *Hylobius abietis*, and it is destructive to the pine-tree, attacking both the bark and the bud.

hȳ'-lō-ĭşm, *s.* [Gr. ὕλη (*hulē*) = matter; Eng. suff. *-ism.*] The same as HYLOTHEISM (q.v.).

"An assumption *hyloism* is not concerned to dispute."—*Journ of Science*, Dec., 1881, p. 753.

*** hȳ'-lō-ĭst,** *s.* [Gr. ὕλη (*hulē*) = matter; Eng. suff. *-ist.*] A hylotheist; a pantheist.

hȳ-lŏn'-ō-mŭs, *s.* [Gr. ὕλη (*hulē*) = matter, and νόμος (*nomos*) = a feeding-place, an abode.]

Palæont.: A genus of Labyrinthodonts, order Sierosauria. Found in the coal of Nova Scotia. It may possibly be a lizard.

*** hȳ-lŏp'-ą-thĭşm,** *s.* [Gr. ὕλη (*hulē*) = matter, and πάθος (*pathos*) = suffering, feeling.] The doctrine that matter is sentient.

*** hȳ-lŏp'-ą-thĭst,** *s.* [HYLOPATHISM.] A believer in hylopathism.

hȳ-lŏph'-ąg-oŭs, *a.* [Gr. ὕλη (*hulē*) = wood; φαγειν (*phagein*) = to eat, and Eng. suff. *-ous.*]

Entom.: Eating wood.

hȳ-lō-thē'-ĭşm, *s.* [Gr. ὕλη (*hulē*) = matter, and Eng. *theism* (q.v.).]

Religions: The system of belief which regards God and matter as identical; pantheism. [MATERIALISM.]

"All adoration, therefore, becomes pure *hylotheism* and self-worship."—*Journ. of Science*, Jan. 1881, p. 50.

hȳ-lō-thē'-ĭst, *s.* [Gr. ὕλη (*hulē*) = matter, and Eng. *theist* (q.v.).] A believer in the doctrine of hylotheism.

hȳ-lŏt'-ō-mą, *s.* [Gr. ὑλοτόμος (*hulotomos*) = cutting or felling wood.]

Entom.: A genus of Hymenopterous Insects, family Tenthredinidæ. *Hylotoma rosæ* is the rose Saw-fly.

hȳ-lō-zō'-ĭc, *a.* & *s.* [Gr. ὕλη (*hulē*) = matter, and ζωη (*zōē*) = life.]

A. *As adj.:* Of or pertaining to hylozoism (q.v.).

"*Hylozoic* materialism is essentially identical with that of Democritus. —*Journal of Science*, Sept. 1881, p. 522.

B. *As subst.:* A hylozoist (q.v.).

*** hȳ-lō-zō'-ĭc-ąl,** *a.* [Eng. *hylozoic*; *-al.*] Hylozoic.

hȳ-lō-zō'-ĭşm, *s.* [Gr. ὕλη (*hulē*) = matter; ζωη (*zōē*) = life, and Eng. *-ism.*]

Philos.: The system according to which matter has a necessary existence, and is equally necessarily endowed with life. There are two forms: (1) that each atom of matter lives entirely independent of all other atoms; (2) that the whole world is a living being, whose material elements participate in a common life. The first form is the doctrine of Strato of Lampsacus, the second that of the Stoics, who conceived the universe animated by a living principle. Hylozoism reappears in the Alexandrian school, in the teaching of Cardan and Paracelsus, and in that of Spinoza, who attributed life to all things though in a different degree. "Omnia, quamvis diversis gradibus, animata tamen sunt."

"We cannot express animistic ideas except in terms which belong to *hylozoism*."—*Journal of Science*, Jan. 1882, p. 47.

*** hȳ-lō-zō'-ĭst,** *s.* [Gr. ὕλη (*hulē*) = matter; ζωη (*zōē*) = life, and Eng. suff. *-ist.*] A believer in the doctrine of hylozoism (q.v.).

"The *hylozoists*, by Cudworth's account of them, ascribed a little more to their atoms."—*Search: Light of Nature*, vol. ii., pt. i., ch. ix.

hȳ-lō-zō-ĭst'-ĭc, *a.* [Eng. *hylozoist*; *-ic.*] Of, belonging to, or connected with hylozoism (q.v.).

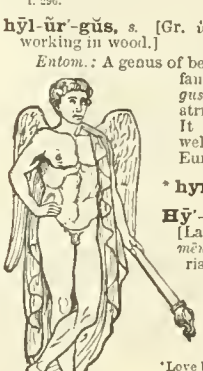
"The . . . *hylozoistic* conception of the universe."—*Journal of Science*, June 1881, p. 318.

hȳ-lō-zō-ĭst'-ĭc-ąl-lȳ, *adv.* [Eng. *hylozoistic*; *-al*, *-ly.*] After the manner of hylozoists; materially.

"This infinite substance was, he said, immortal and imperishable, and he designated it *hylozoistically* the Deity."—*S. Baring-Gould: Origin of Religious Belief*, i. 296.

hȳl-ŭr'-gŭs, *s.* [Gr. ὑλουργός (*hulourgos*) = working in wood.]

Entom.: A genus of beetles, tribe Xylophaga family Scolytidæ. *Hylurgus piniperda* is very destructive in pine forests. It occurs in Britain, as well as in continental Europe.



HYMEN.
(*From an Antique.*)

*** hym,** *pron.* [HIM.]

Hȳ'-mĕn, hȳ'-mĕn, *s.* [Lat., from Gr. ὑμην (*humēn*)=(1) the god of marriage, (2) a membrane.]

1. *Greek Antiq.* (*Of the form* Hymen): The god of marriage, son of Bacchus and Venus.

"Love knits their hearts and *Hymen* joins their hands."
Crabbe: The Borough.

2. *Anat.:* A membrane of a semi-lunar shape, stretched before the vaginal entrance, although in many cases non-existent, or nearly so, sometimes imperforate, requiring a slight operation at or before puberty. It is of little or no medico-legal importance.

† 3. *Bot.:* The fine pellicle which encloses a flower in the bud.

hȳ-mĕn-æ'-ą, *s.* [From *Hymen* (q.v.), because the leaves are formed of a pair of leaflets.]

Bot.: A genus of Cæsalpinieæ, tribe Amherstieæ. There are two bracts at the base of the flowers; the calyx is tubular, with five

deciduous segments; the petals are five; the aeeds are imbedded in a fibrous pulpy substance filling the legume, and eaten by Indians. *Hymenæa Courbaril* is the Locust-tree of the West Indies and Brazil. It attains to a great age and size. It yields a valuable resin called anime. The wood is close-grained and tough, and is used for tree-nails. Its inner bark is anthelmintic. *H. verrucosa* produces the copal of Madagascar, and perhaps that of India.

hȳ-mĕn-ē'-al, hȳ-mĕn-ē'-an, *a.* & *s.* [O. Fr. *hymeneal*, from Lat. *Hymenæus*; Gr. ὑμέναιος (*humenaios*)=a wedding song.] [HYMEN.]

A. *As adjective:*

* 1. *Lit.:* Pertaining to or used in the rites of Hymen (q.v.). The expression in the example seems to be modelled on the "tripudia Hymenæa" of Martianus Capella.

"Thence, borne at last by movements *hymenean*
Rises a maid more fair than man hath known."
J. A. Symonds, in *Fort. Rev.*, xiv. 171.

2. *Fig.:* Of or pertaining to marriage.

"Here, in the bonds of *hymeneal* truth."
Cowper: Approach of Spring. (Trans.)

B. *As subst.:* A marriage hymn or song.

"For her white virgins *hymeneals* sing."
Pope: Eloisa to Abelard, 220.

hȳ-mē'-nĭ-al, *a.* [Mod. Lat. *hymeni(um)*; Eng. suff. *-al.*] Pertaining to or connected with the botanical hymen (q.v.).

hymenial-layer, *s.*

Bot.: A layer in lichens, composed of parallel hyphæ or paraphyses, and of the asci. (*Thomé.*)

hȳ-mē'-nĭ-ŭm, *s.* [Gr. ὑμένιον (*humenion*), dimin. from Ὑμήν (*Humēn*).] [HYMEN.]

Bot.: The fructifying surface in fungi, in which the spores are naked; the parts in which the sporules immediately lie. The term is used of Agaricus and similar genera, and more loosely of Helvella and Peziza. Distinguished from a nucleus (q.v.).

hȳ-mĕn-ō-, *pref.* [Gr. ὑμήν (*humēn*)=a skin, a membrane.] (See etym.)

hȳ-mĕn-ŏc'-a-rĭs, *s.* [Pref. *hymeno-*, and Lat. *caris* = Gr. καρίς (*karis*) = a small crustacean, probably a shrimp or prawn.]

Paleont.: A genus of crustaceans, order Phyllopoda. *Hymenocaris vermicauda* occurs in the Upper Cambrian age at Festiniog and Dolgelly.

hȳ-mĕn-ō-dĭc'-tȳ-ŏn, *s.* [Pref. *hymeno-*, and δίκτυον (*dictuon*) = a net.]

Bot.: A genus of Cinchonaceæ, family Cinchonidæ. The species are ornamental trees, twenty to thirty feet high. The inner bark of *Hymenodictyon excelsum*, an East Indian shrub, is as bitter and astringent as Pernvian bark. It is used for tanning.

hȳ-mĕn-ŏg'-ĕn-ȳ, *s.* [Pref. *hymeno-*, and Gr. γεννάω (*gennaō*) = to produce.]

Physiol.: The production of membranes by the simple contact of two liquids, as albumen and fat, when the former gives a coating to the globules of the latter. (*Dunglison.*)

hȳ-mĕn-ŏl'-ō-ğȳ, *s.* [Pref. *hymeno-*, and Gr. λόγος (*logos*) = a discourse; Fr. *hyménologie.*]

Anat.: The branch of anatomical science which treats of the membranes.

hȳ-mĕn-ō-mȳ-çē'-tēş, *s. pl.* [Pref. *hymeno-*, and Gr. μύκης (*mukēs*), genit. μύκητος (*mukētos*) = a mushroom.]

Bot.: An order of fungals, having the spores generally quaternate on distinct sporophores. Called also Agaricaceæ (q.v.). It is divided into six suborders: Agaricini, Polyporei, Hydnei, Auricularini, Clavati, and Tremellini.

hȳ-mĕn'-ō-phōre, hȳ-mĕn-ŏph'-ŏr-ŭm, *s.* [Pref. *hymeno-*, and Gr. φορός (*phoras*) = bearing, carrying.]

Bot.: The cellular or filamentous structure in hymenomycetous fungi on which the hymenium, or fructifying surface, is spread, like wax on a mould. In the Agaricini and Polyporei it is the same as the trama or inner substance of the gills or partitions of the pores. (*M. J. Berkeley*, in *Treas. of Bot.*)

hȳ-mĕn-ō-phȳl'-lĕ-æ, *s. pl.* [Mod. Lat. *hymenophyll(um)*; Lat. fem. pl. adj. suff. *-eæ.*]

Bot.: A tribe of ferns, order Polypodiaceæ. The frond is very membranous, translucent, and reticulate. The involucre is two-valved, urceolate, or two-lipped; capsules minute, membranous, reticulate, sessile on a clavate or filiform receptacle, surrounded by a complete horizontal or oblique ring, vernation circinate. Sometimes made an order, Hymenophyllaceæ.

hȳ-mĕn-ŏph'-ȳl-īte, *s.* [Eng. *hymenophyllum*; suff. *-ite* (q.v.).]

Paleobot.: A genus of Carboniferous Ferns, resembling Sphenopteris, but with the margin of the frond lobed, each lobe with a single nervure.

hȳ-mĕn-ō-phȳl'-lŭm, *s.* [Pref. *hymeno-*, and Gr. φύλλον (*phullon*) = a leaf.]

HYMENOPHYLLUM TUNBRIDGENSE.

Bot.: The typical genus of the fern tribe, Hymenophylleæ (q.v.). The sori are marginal, axillary, or terminal; the involucre free and small in the frond, two-valved, or two-lipped, opening outwards; capsules sessile on a columnar receptacle; ring complete, oblique. Seventy species are known, most of them from the tropics and the southern temperate zone. Two are British — *Hymenophyllum tunbridgense* and *H. unilaterale.* Both are of dwarf size.

† **hȳ-mĕn-ŏp'-tĕr,** *s.* [HYMENOPTERA.]

Entom.: An insect of the order Hymenoptera (q.v.).

hȳ-mĕn-ŏp'-tĕr-a, *s. pl.* [Pref. *hymeno-*, and Gr. πτερά (*ptera*), pl. of πτερόν (*pteron*) = a wing.]

1. *Entom.:* An order of insects, sub-class Metabola. They have four wings, all membranous, with the nervures few, or in some cases wanting. Mouth with mandibles, sometimes with a suctorial organ in addition, the latter formed by the united maxillæ and labrum. Females either with an ovipositor or a sting. Metamorphoses complete, the larvæ generally footless, and requiring to be fed by the parent insects. If intelligence fix the place of an order in the system, the Hymenoptera containing the bees, the ants, &c., should stand at the head of the Annulose sub-kingdom. Latreille divided the order into two sub-orders: Terebrantia, in which the females have an auger; and Aculeata, in which there is a sting. The Terebrantia had two sub-sections—Securifera and Pupivora; and the Aculeata four — Heterogynæ, Fossores, Diploptera, and Anthophila. Swainson's arrangement was into the tribes—Apides, Spheeides, Ichneumonides, Cynipsides, and Tenthredines. Another division is into Securifera, in which the abdomen is attached to the thorax by its whole breadth, and Petiolata in which the two are connected by a more or less slender footstalk. Under the first are the tribes Phyllophaga and Xylophaga; under the second, Terebrantia and Aculeata.

2. *Paleont.:* The order does not occur before the Secondary, if not even the Tertiary, period.

hȳ-mĕn-ŏp'-tĕr-an, *s.* [Mod. Lat. *hymenopter(a)*; *-an.*]

Entom.: An insect of the order Hymenoptera (q.v.).

* **hȳ-mĕn-ŏp-tĕr-ŏl'-ō-ğĭst,** *s.* [Eng., &c. *hymenopter*; *o* connective, and Gr. λόγος (*logos*) = a discourse.] One well acquainted with the habits or devoted to the study of the hymenoptera (q.v.).

"Our most learned *hymenopterologist* classes the hive-bee, the humble bee, and the parasitic apathus in the same sub-family."—*Lubbock: Origin of Civilisation* (4th ed.), 497.

hȳ-mĕn-ŏp'-tĕr-oŭs, hȳ-mĕn-ŏp'-tĕr-al, *a.* [Mod. Lat. *hymenopter(a)*; *-ous*, *-al.*]

Entom.: Having membranous wings of the kind described under Hymenoptera; of or belonging to that insect order.

"The great order of *Hymenopterous* insects."—*Darwin: Origin of Species* (6th ed.), p. 142.

hȳ-mĕn-ō-thą-lăm'-ĕ-æ, *s. pl.* [Pref. *hymeno-*, and Gr. θάλαμος (*thalumos*) = an inner chamber.]

Bot.: A tribe of Lichens, having the shields open, the nucleus forming a disc, permanent, and bearing asci.

hȳ-mĕn-ŏt'-ō-mȳ, *s.* [Pref. *hymeno-*, and Gr. τομή (*tomē*) = a cutting; Fr. *hyménotomie.*]

1. *Anat.:* A dissection of the membranes, or the branch of science recording its results.

2. *Surg.:* An incision made in an imperforate hymen for the exit of the menses.

hȳ-mĕn'-ŭ-lŭm, *s.* [Latinized dimin. of Gr. ὑμήν (*humēn*).] [HYMEN.]

Bot.: A disc or shield containing asci, but without excipulum. (*Treas. of Bot.*)

hȳmn (*n* silent), * **ympne,** *s.* [O. Fr. *ymne*, *hymne*, from Lat. *hymnus*; Gr. ὕμνος (*humnos*).]

1. A song or ode in praise, honour, or adoration of God, or some deity; a sacred song.

"Exhort your owne selues in psalmes, and *hymnes*, and spiritual songes."—*Colossians* iii. (1551.)

2. *Spec.:* A sacred composition in poetry intended to be sung with or without the aid of a musical instrument, and not being versified from the book of Psalms, else it is called a Psalm, or directly from any other part of Scripture, or else it is a paraphrase. Hilary, Bishop of Arles, is said to have composed the first hymn for Christian worship about A.D. 431, but as early as the time of Pliny the the Younger the Christains are said to have habitually sung one to Christ as God. On Dec. 9, 633, the Council of Toledo sanctioned the use of hymns in churches. Luther did much to popularise hymnody in the infant Protestant Church in Germany. Of the hymns now in use many were composed by Isaac Watts, who died in 1784, Charles Wesley, who died in 1788, John Wesley, who died in 1791, and Cowper, who died in 1800. Not a few of the most devotional English hymns are translations from the German, or from the Latin and Greek hymns of the early or of the mediæval Church.

hȳmn (*n* silent), *v.t.* & *i.* [HYMN, *s.*]

A. *Transitive:*

1. To praise, adore, or worship in hymns; to sing to.

"Ten thousand throats, that from the flowering thorn,
Hymn their good God."
Thomson: Castle of Indolence, i. 10.

2. To express or describe in hymns; to sing.

"*Hymn* the requiem to his parted soul."
Southey: Joan of Arc, bk. viii.

B. *Intrans.:* To sing hymns or songs in praise or adoration.

"The *hymning* angels, and the herald star."
Cowper: To Charles Deodati. (Trans.)

hȳm'-năl, *s.* [Eng. *hymn*; *-al.*] A collection of hymns, especially one for use in public worship.

"Used side by side with other *hymnals* in many Anglican churches."—*Notes & Queries*, Aug. 12, 1882, p. 133.

* **hȳm'-nĭc, * hȳm'-nĭcke,** *a.* [Eng. *hymn*; *-ic.*] Relating or pertaining to hymns.

"Tuning her chast layes
Of England's empresse to her *hymnicke* string."
Mirrour for Magistrates, p. 773.

hȳm'-nĭst, *s.* [Eng. *hymn*; *-ist.*] A composer of hymns.

"We have a pretty clear indication of the birthplace of the *hymnist*."—*W. E. Gladstone: Homeric Synchronism*, p. 102.

¶ This is a much more correct form than hymnologist, though that word, which really means "one who writes or discourses about hymns," is in more general use. (See *Notes & Queries*, April 30, 1859, p. 359.)

* **hȳm'-nō-dĭst,** *s.* [Eng. *hymnod(y)*; *-ist.*] A writer of hymns, an hymnologist.

"Dryden as a *hymnodist*."—*Notes & Queries*, Dec. 29, 1883, p. 517.

* **hȳm'-nō-dȳ,** *s.* [Eng. *hymn*; suff. *-ody*, as in *psalmody.*] The same as HYMNOLOGY (q.v.).

"This *hymnody* would lengthen the burial-service."—*Matthew Arnold: Last Essays*, p. 220.

* **hȳm-nŏg'-ra-phĕr,** *s.* [Gr. ὕμνος (*humnos*) = a hymn, and γράφω (*graphō*) = to write.] A writer of hymns. (*Notes & Queries*, Dec. 22, 1883, p. 497.)

* **hȳm-nŏg'-ra-phȳ,** *s.* [HYMNOGRAPHER.] The art or act of writing hymns.

* **hȳm-nŏl'-ō-ğĭst,** *s.* [Eng. *hymnolog(y)*; *-ist.*] A writer or composer of hymns.

hȳm-nŏl'-ō-ğȳ, * **hym-nol-o-gie,** *s.* [Gr. ὕμνος (*humnos* = a hymn, and λόγος (*logos*) = a

word, a treatise.] A collection of hymns; hymns collectively; the hymns used by any particular church or body.

"Any one conversant with Wesleyan Methodist *hymnology*."—*Notes & Queries*, Feb. 19, 1881, p. 158.

hȳ-ō-chŏl'-ĭc, hȳ-ō-chŏl'-ĭc-ĭo, *a.* [Gr. *ὗς* (*hus*), genit. *ὑός* (*huos*) = a pig, and Eng. *cholic*.] (See the compound.)

hyocholic-acid, *s.*

Chem.: $C_{25}H_{40}O_5$. An acid obtained by boiling hyoglycocholic acid, or hyotauro-cholic acid, with acids or alkalis.

hȳ'-ō-dŏn, *s.* [Gr. *ὗς* (*hus*), genit. *ὑός* (*huos*) = a swine, a pig, and *ὀδούς* (*odous*), genit. *ὀδόντος* (*odontos*) = a tooth.]

Ichthy.: The typical genus of the family Hyodontidæ.

hȳ'-ō-dŏnt, *a.* & *s.* [Hyodontidæ.]

A. *As adj.*: Having teeth like those in the pigs; of or belonging to the Hyodontidæ (q.v.).

B. *As subst.*: An annual belonging to the family Hyodontidæ (q.v).

hȳ-ō-dŏn'-tĭ-dæ, *s. pl.* [Mod. Lat. *hyodon* (q.v.), genit. *hyodont(is)*; Lat. fem. pl. adj. suff. *-idæ*.]

Ichthy.: A family of fishes, order *Malacopterygii Abdominales*. It has been separated from the Clupeidæ, under which some still place the genus Hyodon, suppressing the family. The few known species are from the fresh-water streams and lakes of North America.

hȳ-ō-glŏs'-sal, *a.* [Mod. Lat. *hyogloss(us)*; *-al*.]

Anat.: Connecting the tongue and the hyoid bone. There are a hyoglossal membrane and muscle. [Hyoglossus.]

hȳ-ō-glŏs'-sŭs, *s.* [Gr. *ὑοειδής* (*huoeidēs*), and *γλῶσσα* (*glōssa*) = the tongue.] [Hyoid.]

Anat.: (See the compound).

hyoglossus-muscle, *s.*

Anat.: A flat quadrate muscle, connecting the tongue with the hyoid bone.

hȳ-ō-glȳ-cō-chŏl'-ĭc, *a.* [Gr. *ὗς* (*hus*), genit. *ὑός* (*huos*) = a pig, and Eng. *glycocholic*.] (See the compound.)

hyoglycocholic-acid, *s.*

Chem.: $C_{27}H_{43}NO_5$. An acid contained in the bile of a pig.

hȳ'-ōid, *a.* & *s.* [Gr. *ὑοειδής* (*huoeides*) = the hyoid bone: *Hy* = the Gr. Υ (*upsilon*), the form of which anything called hyoid resembles.]

A. *As adjective*:

Anat.: (See the compound).

B. *As subst.*: The hyoid-bone (q.v.).

hyoid-arch, *s.* [Hyoid-bone.]

hyoid-bone, hyoid-arch, *s.*

1. *Anat.*: The second arch developed from the cranium, giving support to the tongue and attachment to numerous muscles of the neck. It consists of a body, two larger cornua projecting backwards, and two smaller cornua ascending from the angles between the body and two larger cornua.

2. *Comp. Anat.*: Called also *Os linguæ*, because it supports the tongue. The U form is much less marked in the inferior vertebrates.

hȳ-ōi'-dĕ-al, hȳ-ōi'-dĕ-an, *a.* [Eng., &c. *hyoid*; *-eal*, *-ean*.]

Anat.: Of or belonging to the hyoid-bone.

hȳ-ōi'-dēs, *s.* [Gr.] [Hyoid.]

Anat.: The hyoid bone.

hȳ-ō-pō-tăm'-ĭ-dæ, *s. pl.* [Mod. Lat. *hypotam(us)*; Lat. fem. pl. adj. suff. *-idæ*.]

Paleont.: According to Kowalewsky, a family of omnivorous ungulated mammals akin to Suidæ, from which it may not be distinct.

hȳ-ō-pŏt'-a-mŭs, *s.* [Gr. *ὗς* (*hus*), genit. *ὑός* (*huos*) = a swine, a pig, and *ποταμός* (*potamos*) = a river.]

Paleont.: The typical genus of the family Hyopotamidæ, or a genus of Suidæ, found in the Eocene and Lower Miocene beds.

hȳ-ŏs-çȳ'-ăm'-ĕ-æ, *s. pl* [Lat. *hyoscyam(us)*; fem. pl. adj. suff. *-ea*.]

Bot.: A tribe of Solanaceæ.

hȳ-ŏs-çȳ'-ą-mīne, *s.* [Lat. *hyoscyamus*, and suff. *-ine* (*Chem.*) (q.v.).]

Chem.: $C_{17}H_{23}NO_3$. A white crystalline substance obtained from *Hyoscyamus niger* and *DaturaStramonium*. Hyoscyamine is generally an oily liquid; its aqueous solution is strongly alkaline. It can be crystallized from chloroform in silky needles, which melt at 108°. Hyoscyamine has been shown to be identical with duboisin, an alkaloid obtained from *Duboisia myoporoides*.

hȳ-ŏs-çȳ'-ą-mŭs, *s.* [Lat.= Gr. *ὑοσκύαμος* (*huoskuamos*) = henbane: *ὗς* (*hus*), genit. *ὑός* (*huos*) = a swine, and *κνάμος* (*kuamos*) = a bean.]

HYOSCYAMUS.

1. *Bot.*: Henbane; the type of the tribe Hyoscyameæ. The calyx is tubular: the capsule opening transversely with a lid. When its seeds are forming, the plant is a powerful narcotic, though comparatively inert at a previous period. In Greece the stalks of *Hyoscyamus albus* are used against toothache. They are also dried and smoked in lieu of tobacco. The seeds of the henbane are sometimes used for the same purpose in England. [Henbane.]

2. *Phar.*: The fresh and carefully-dried leaf and young branches of *H. niger*. The plant has a strong, unpleasant odour and a slightly acrid taste. The fresh juice dropped into the eye dilates the pupil. It is used to prepare *Extractum hyoscyami*, extract of hyoscyamus; *Tinctura hyoscyami*, tincture of hyoscyamus; and *Succus hyoscyami*, juice of hyoscyamus. It is used as a sedative, to diminish pain, and allay irritation of the bladder, to prevent the griping of purgatives, and to relieve spasm.

hȳ-ō-sĕr'-ĭd'-ĕ-æ, *s. pl.* [Mod. Lat. *hyoseris*, genit. *hyoserid(is)*; Lat. fem. pl. adj. suff. *-eæ*.]

Bot.: A tribe of Composites, sub-order Ligulifloræ.

hȳ-ŏs'-ĕr-ĭs, *s.* [Lat. *hyosiris*; Gr. *ὑοσερίς* (*huoseris*) = a plant resembling endive. (*Wm. Smith.*)]

Bot.: The typical genus of the tribe Hyoserideæ (q.v.). The same flower-head yields achenes of three different forms. Three species are known, all from the countries bordering the Mediterranean.

hȳ-ō-tâu-rō-chŏl'-ĭc, *a.* [Gr. *ὗς* (*hus*), genit. *ὑός* (*huos*) = a pig, and Eng. *taurocholic*.] (See the compound.)

hyotaurocholic-acid, *s.*

Chem.: $C_{27}H_{45}NSO_6$. An acid contained in the bile of a pig.

hȳ-ō-thĕr'-ĭ-ŭm, *s.* [Gr. *ὗς* (*hus*), genit. *ὑός* (*huos*) = a swine, and *θηρίον* (*thērion*) = a wild animal.]

Palæont.: A genus of Suidæ from the European Miocene.

* **hȳp,** *s.* [An abbreviation of *hypochondria* (q.v.).] Melancholy, vexation. [Hip, *s.*]

"Heaven send thou hast not got the *hyps*."
Swift: Cassinus & Peter.

* **hȳp,** *v.t.* [Hyp, *s.*] To make melancholy; to vex, to depress.

hȳ-pæ'-thral, *a.* [Lat. *hypæthrus*, from Gr. *ὑπαίθρος*, *ὑπαίθριος* (*hupaithros*, *hupaithrios*) = under the open sky: *ὑπό* (*hupo*) = under, and *αἰθήρ* (*aithēr*) = the sky.]

Arch.: A term applied to a building entirely uncovered.

"This very drafty and *hypæthral* style of architecture."—*Fergusson: Rude Stone Monuments*, ch. iii.

hȳ-pæ'-thrŭm, *s.* [Hypæthral.]

Arch.: That portion of the interior of a building which is not protected by a roof.

hȳ-păl'-ląg-ĕ, *s.* [Lat., from Gr. *ὑπαλλαγή* (*hupallagē*) = an interchange, an exchange: *ὑπό* (*hupo*) = under, and *ἀλλαγή* (*allagē*) = a change; *ἀλλάσσω* (*allassō*) = to change, to exchange.]

Rhet.: A figure of speech by which attributes are transferred from their proper subjects to others. Thus Virgil (*Æneid* iii. 61) says, "Dare classibus austros" (to give the winds to the fleet), instead of "Dare classes austris" (to give the fleet to the winds).

hȳp-ăn'-thĕr-a, *s.* [Gr. *ὑπανθηρός* (*hupanthēros*) = slightly coloured.]

Bot.: A genus of Cucurbitaceæ, tribe Nhandirobeæ. The seeds of *Hyppantheræ Guapera*, a Brazilian climber, taken in moderation, are a stomachic, but eaten in too large quantities they act as purgatives.

hȳp-ăn'-thĭ-ŭm, *s.* [Mod. Lat., from Gr. *ὑπό* (*hupo*) = under, and *ἄνθος* (*anthos*) = a flower.]

Bot.: The fleshy enlarged hollow of the end of a peduncle supporting the flower in the rose, the apple, the myrtle, &c.

hȳ-păn-thŏc'-rĭ-nŭs, *s.* [Gr. *ὑπανθέω* (*hupantheō*) = to begin to flower, to blossom, and *κρίνον* (*krinon*) = a lily.]

Palæont.: A genus of Crinoids, family Encalyptocrinidæ. Found in the Silurian and Devonian rocks.

† **hȳp-ăn-thō'-dĭ-ŭm,** *s.* [Mod. Lat., from Gr. *ὑπό* (*hupo*) = under, and Eng., &c. *anthodium* (q.v.).]

Bot.: Link's name for what is usually called hypanthium (q.v.).

hȳ-pą-pŏph'-ȳ-sēs, *s. pl.* [Gr. *ὑπό* (*hupo*) = under, and pl. of Eng. *apophysis* (q.v.).]

Anat.: The sub-central parts of the atlas; ventral processes from the body of the vertebræ.

hȳp-ar'-gyr-īte (gyr as ĝĭr), *s.* [Gr. *ὑπάργυρος* (*huparguros*) = having silver underneath: *ὑπό* (*hupo*) = under, and *ἄργυρος* (*arguros*) = silver.]

Min.: A variety of Miargyrite (q.v.), containing about thirty-five per cent. of silver. Found at Clausthal.

* **hȳ-pās'-pĭst,** *s.* [Gr. *ὑπασπιστής* (*hupaspistēs*), from *ὑποσπίζω* (*hupospizō*) = to carry a shield for one: *ὑπό* (*hupo*) = under, and *ἀσπίς* (*aspis*) = a shield.]

Greek Antiq.: A shield-bearer, an armour-bearer; a heavy-armed soldier.

hȳp-ăx'-ĭ-al, *a.* [Gr. *ὑπό* (*hupo*) = under; Lat., &c. *axis* (q.v.), and suff. *-al*.]

Anat.: Lying below the embryonic vertebral axis. Used of the hypaxial, called by Huxley the hyposkeletal, muscles. (*Quain.*)

hȳ-pĕ-cō'-ĕ-æ, *s. pl.* [Mod. Lat. *hypecoo(um)*; Lat. fem. pl. adj. suff. *-eæ*.]

Bot.: A tribe of Fumariaceæ, having the stamens distinct instead of diadelphous.

hȳ-pĕ-cō'-ŭm, *s.* [Lat. *hypecoon*; Gr. *ὑπήκοον* (*hupēkoon*) = a narcotic plant with leaves like rue.]

Bot.: The typical genus of the tribe Hypecoeæ (q.v.). They have four stamens and two stigmas, and are small herbaceous annuals from the South of Europe and parts of Asia.

hȳ-pē'-na, *s.* [Gr. *ὑπήνη* (*hupēnē*) = the under part of the face, the beard.]

Entom.: The typical genus of the family Hypenidæ (q.v.). *Hypena proboscidialis* is a brown moth about an inch and a half across the expansion of its wings, and is called, from its prominent palpi, the Snout.

hȳ-pēn'-ĭ-dæ, *s. pl.* [Mod. Lat. *hypen(a)*; Lat. fem. pl. adj. suff. *-idæ*.]

Entom.: A family of moths, group Pyralidina. Antennæ in male generally ciliated or pubescent; palpi rather long, ascending; anterior legs not tufted; wings broad, anterior ones often with tufts of raised scales. Larva long, with fourteen legs. Only six British species are known. (*Stainton.*)

* **hȳ'-pĕr,** *s.* [An abbreviation of *hypercritic* (q.v.).] A critic or criticism upon a critic or criticism; a hypercritic.

"Critics I read on other men,
And *hypers* upon them again."
Prior: To Fleetwood Shepheard, Esq.

hȳ-pĕr-, *pref.* [Lat., from Gr. *ὑπέρ* (*huper*) = above, beyond; cogn. with Lat. *super* = above, beyond.]

1. *Ord. Lang.*: A common prefix used to denote excess or superabundance.

*2. *Chem.:* Now replaced by the prefix *per-* (q.v.).

hȳ-pĕr-æ'-mĭ-a, *s.* [Pref. *hyper-*, and Gr. αἷμα (*haima*) = blood.]

Pathol.: Plethora or fulness of blood. The whole mass of the blood is increased to a variable extent. The face is full and turgid, with a purplish tinge. There is a tendency to lassitude and sleep. Called also polyæmia.

hȳ-pĕr-æ'-mĭc, *a.* [Hyperæmia.] Suffering from or affected with hyperæmia.

hȳ-pĕr-æs-thē'-sĭs, hȳ-pĕr-æs-thē'-sĭ-a, *s.* [Gr. ὑπέρ (*huper*)=above, beyond, and αἴσθησις (*aisthēsis*) = perception, sensation.] [Æsthesia.]

Pathol.: Increased sensibility of various tissues, often a symptom of hysteria. When it affects the skin, the electric brush, with faradic currents, is useful.

"The condition termed *hyperæsthesia* or excessive sensibility."—*Carpenter: Mental Physiology*, § 136.

hȳ-pĕr-a-pŏph'-ȳ-sēs, *s. pl.* [Pref. *hyper-*, and Eng. *apophyses.*]

Compar. Anat.: Processes in the vertebræ extending from one vertebra to another. Not found in man.

***hȳ-pĕr-ăs-çĕt'-ĭc,** *a.* [Pref. *hyper-*, and Eng. *ascetic.*] Immoderately ascetic; carrying ascetic teaching or penitential practices to undue lengths.

"The error is connected with the *hyperascetic* errors which follow."—*Blunt: Dict. of Sects* (1874), p. 193.

***hȳ-pĕr-ăs'-pĭst,** *s.* [Gr. ὑπερασπιστής (*huperaspistēs*), from ὑπερασπίζω (*huperaspizō*) = to cover or protect with a shield: ὑπέρ (*huper*) = over, and ἀσπίς (*aspis*) = a shield.] One who protects or defends another with a shield; a defender, a protector.

"I appeal to any indifferent reader, whether C. M. be not by his *hyperaspist* forsaken in the plain field."—*Chillingworth: Religion of Protestants*, pt. i., ch. i.

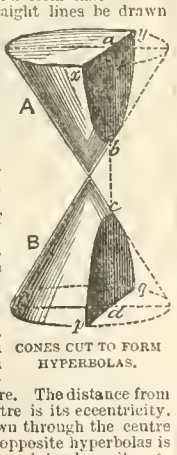
hȳ-pĕr'-băt'-ĭc, *a.* [Hyperbaton.] Pertaining to or of the nature of an hyperbaton.

hȳ-pĕr'-ba-tŏn, *s.* [Gr., from ὑπερβαίνω (*huperbainō*) = to go beyond: ὑπέρ (*huper*) = beyond, and βαίνω (*bainō*) = to go.] (See extract.)

"An *hyperbaton* is a transposing of words or thoughts out of their natural and grammatical order, and it is a figure stamped with the truest image of a most forcible passion."—*Smith: Longinus; On the Sublime*, § 21.

hȳ-pĕr'-bŏl-a, *s.* [Low Lat. *hyperbola*, from Gr. ὑπερβολή (*huperbolē*) = a throwing beyond; excess; the conic section, hyperbola, so named because the angle which its plane forms with the base of the cone is greater than in the case of the parabola.]

Math.: One of the three conic sections. It is a plane curve of such a form that if from any point in it two straight lines be drawn to two given fixed points, the excess of the straight line drawn to one of the points above the other will always be equal. The two points are called the foci. If a cone be cut by a plane in such a direction that the plane cuts the base at a greater angle than the side of the cone makes, a hyperbola will be generated. If two cones, A and B, placed apex to apex be both cut by a plane *a b*, *c d*, the hyperbolas, *x b y*, *p c q*, will be generated with their convexities turned to each other. If a straight line be drawn from the foci and then bisected, the point of bisection is called its centre. The distance from either focus to the centre is its eccentricity. Any straight lines drawn through the centre and terminated by two opposite hyperbolas is called a diameter. The point where it cuts the hyperbola is its vertex. The diameter which passes through the foci is called the axis major, or principal axis. An axis minor, or minor axis, can be constructed at right angles to the first. Other terms used of the hyperbola are abscissæ, parameter, *latus rectum*, directrix, and a term peculiar to it, asymptotes (q.v.).



CONES CUT TO FORM HYPERBOLAS.

hȳ-pĕr'-bŏ-lē, *s.* [Fr. *hyperbole.*] [Hyperbola.]

Rhet.: (See extract).

"The next figure is called *hyperbole*, or exaggeration. It consists in magnifying an object beyond its natural bounds. In all languages, even in common conversation, hyperbolical expressions very frequently occur; as swift as the wind; as white as the snow, and the like; and our common forms of compliment are almost all of them extravagant *hyperboles*."—*Blair:* vol. i., lect. 16.

hȳ-pĕr-bŏl'-ĭc, hȳ-pĕr-bŏl'-ĭc-al, *a.* [Eng. *hyperbol(e)*; *-ic*, *-ical.*]

1. *Geom.:* Of or pertaining to the hyperbola; of the nature of an hyperbola.

"Of an *hyperbolical* or a parabolical figure."—*Ray: On the Creation.*

2. *Rhet.:* Of the nature of or containing hyperbole; exaggerating or diminishing beyond the truth; exaggerated.

"Insipid and *hyperbolical* adulation."—*Macaulay: Hist. Eng.*, ch. viii.

hyperbolic-arc, *s.*

Geom.: An arc of the hyperbola.

hyperbolic-conoid, *s.*

Geom.: A conoid formed by the revolution of an hyperbola about its minor axis.

hyperbolic-space, *s.*

Geom.: The space comprehended between the curve of an hyperbola and a double ordinate.

hyperbolic-spiral, *s.*

Geom.: A spiral curve, in which the distance from the pole to the generatrix varies inversely as the distance swept over.

hȳ-pĕr-bŏl'-ĭc-al-lȳ, *adv.* [Eng. *hyperbolical*; *-ly.*]

1. *Geom.:* In form of an hyperbola.

2. *Rhet.:* In manner of an hyperbole; in an exaggerated manner.

"The word heaven very oft used for air, and taken also *hyperbolically* for any great height."—*Raleigh: Hist. World*, bk. i., ch. i., § 8.

hȳ-pĕr-bŏl'-ĭ-form, *a.* [Eng. *hyperbola*; *-form.*] Having the form, or nearly so, of an hyperbola; resembling an hyperbola in form or figure.

hȳ-pĕr'-bō-lĭzm, *s.* [Eng. *hyperbol(e)*; *-ism.*] The use of hyperbole; the quality of being hyperbolical.

"The *hyperbolisms* of the oriental style."—*Bp. Horsley: Sermons*, vol. i., ser. 5.

hȳ-pĕr'-bō-lĭst, *s.* [Eng. *hyperbol(e)*; *-ist.*] One who uses hyperbole.

"[I cannot but] cease to think the Psalmist an *hyperbolist*."—*Boyle: Works*, ii. 322.

***hȳ-pĕr'-bō-lĭze,** *v.i. & t.* [Eng. *hyperbol(e)*; *-ize.*]

A. *Intrans.:* To use or write in hyperbolical language.

"They *hyperbolize* sometimes in some points in their popular sermons."—*Mountague: Appeale to Cæsar*, ch. xxii.

B. *Trans.:* To express in hyperbolical language; to exaggerate.

"Vain people *hyperbolizing* this fact."—*Fotherley: Atheomastix.*

hȳ-pĕr'-bō-lōĭd, *s.* [Eng. *hyperbol(a)*, and Gr. εἶδος (*eidos*) = appearance, form.]

Geom.: A hyperbolic conoid; a solid formed by the revolution of an hyperbola about its axis.

hȳ-pĕr-bŏr'-ĕ-an, *a. & s.* [Lat. *hyperboreus*, from Gr. ὑπερβόρεος, ὑπερβόρειος (*huperboreos*, *huperboreios*) = beyond Boreas—*i.e.*, in the extreme north; ὑπέρ (*huper*) = above, beyond, and Βορέας (*Boreas*) = the north; Fr. *hyperborèen.*]

A. *As adjective:*

1. *Lit.:* Belonging to or inhabiting a region in the extreme north; northern.

"The snail-paced *hyperborean* nights."
Armstrong: Imitation of Shakespeare.

*2. *Fig.:* Cold, frigid.

***B.** *As subst.:* One of a people supposed to live in the extreme north, distinguished for their piety and happiness. Being, as their name implied, placed beyond the influence of the north wind, they enjoyed a mild and delightful climate, the natural duration of life amongst them being 1,000 years. They are first mentioned by Homer (*Hymns*, vi. 29). They are generally identified with the Laplanders or Norwegians.

hȳ-pĕr'-cāt-a-lĕc'-tĭc, *a.* [Gr. ὑπερκαταληκτικός (*huperkatalēktikos*), from ὑπέρ (*huper*) = above, beyond, and καταληκτικός (*katalēktikos*) = catalectic (q.v.).]

Pros.: Having a syllable or two more than the regular and proper measure.

hȳ-pĕr-cą-thär'-sĭs, *s.* [Pref. *hyper-*, and Eng. *cathársis.*]

Med.: An excessive purging induced by the action of acrid catharties.

hȳ-pĕr-cą-thär'-tĭc, *s.* [Pref. *hyper-*, and Eng. *cathartic.*]

Pharm.: A medicine which produces too powerful effects as a purgative. (*Paxton.*)

hȳ-pĕr-cŏm'-pa, *s.* [Gr. ὑπέρκομπος (*hypercompos*) = overweening, boastful.]

Entom.: A genus of Moths, family Chelonidæ. *Hypercompa dominula* is the Scarlet Tiger Moth. [Tiger-moth.]

***hȳ-pĕr-crĭt'-ĭc,** *s. & a.* [Pref. *hyper-*, and Eng. *critic* (q.v.); Fr. *hypercritique.*]

A. *As subst.:* One who is unreasonably critical; a captious critic or censor.

"The supreme theomastix, *hypercritic* of manners."—*Carew: Cœlum Britannicum.*

B. *As adj.:* Unreasonably critical; captiously censorious; over nice or exact.

hȳ-pĕr-crĭt'-ĭc-al, *a.* [Eng. *hypercritic*; *-al.*] Hypercritic; over nice or censorious.

"I enclose my remarks . . . they are, as you seemed to wish, somewhat *hypercritical*."—*Sir W. Jones: Letter to Count Reiczki.*

hȳ-pĕr-crĭt'-ĭc-al-lȳ, *adv.* [Eng. *hypercritical*; *-ly.*] In a hypercritical manner; with excessive or unreasonable censoriousness or niceness.

hȳ-pĕr-crĭt'-ĭ-çĭzm, *s.* [Pref. *hyper-*, and Eng. *criticism* (q.v.).] Excessive or unreasonable criticism; over-niceness or exactness.

***hȳ-pĕr-crĭt'-ĭ-çĭze, *hȳ-pĕr-crĭt'-ĭ-çĭse,** *v.t.* [Pref. *hyper-*, and Eng. *criticise* (q.v.).] To criticize over nicely or captiously.

hȳ-pĕr-dū'-lĭ-a, hȳ-pĕr-dū'-lȳ, *s.* [Pref. *hyper-*, and Eng., &c. *dulia* (q.v.).]

Roman Theol.: A sub-division of dulia (q.v.). This is an important point; if it be lost sight of, there is danger of forgetting that the Blessed Virgin is a creature, and of putting her between creatures and God. (*St. Thomas of Aquin.*) The higher veneration given to the Blessed Virgin as the most exalted of mere creatures, though, of course, infinitely inferior to God, and incomparably inferior to Christ in his human nature. (*Addis & Arnold.*)

"Take care . . . that you do not give latria to that where *hyperdulia* is only due."—*Bp. Taylor: Dissuasive from Popery*, pt. ii., bk. ii., § 6.

***hȳ-pĕr-dū'-lĭc-al,** *a.* [Eng. *hyperdul(ia)*; and suff. *-ical.*] Consisting of, approaching, or resembling *hyperdulia* (q.v.).

"Be careful that if dulia only be due that your worship be not *hyperdulical*."—*Bp. Taylor: Dissuasive from Popery*, pt. ii., bk. ii., § 6.

hȳ-pĕr-dȳ-năm'-ĭc, *a.* [Pref. *hyper-*, and Eng. *dynamic* (q.v.).]

Pathol.: For the time being morbidly over-excitable, with the attendant symptom of undue strength, sure to be followed sooner or later by proportionate exhaustion and feebleness.

hȳ-pĕr-hĕl-lĕn-ĭst'-ĭc, *a.* [Pref. *hyper-*, and Eng. *hellenistic.*] Excessively devoted to Greek learning.

"The *hyperhellenistic* collegian need not accuse us of instituting a parallel between Socrates and Voltaire."—*J. Morley: Voltaire*, ch. iii.

hȳ-pĕr-ĭ-cā'-çē-æ, *s. pl.* [Mod. Lat. *hyperic(um)*; Lat. fem. pl. adj. suff. *-aceæ.*]

Bot.: Tutsans; an order of hypogynous exogens, alliance Guttiferales. It consists of herbs, shrubs, or trees, having a resinous juice. The stems are often angular, the leaves generally opposite, entire, without stipules, generally with transparent dots over their surface, and black glands around their margins. Flowers generally yellow, sometimes red or white. Sepals four or five persistent, two exterior to the others. Petals as many as the sepals, bordered with black dots. Stamens generally indefinite in number, as a rule polyadelphous. Carpels three to five; styles three to five; fruit capsular, many or one-celled;

seeds minute. Distribution, warm and temperate regions; known genera, eight; species about 210. [HYPERICUM.] It is divided into two tribes, Hypericeæ and Elodeæ (q.v.).

hȳ-pĕr-ĭ-cē'-ē-æ, *s. pl.* [Mod. Lat. *hyperic(um)*; Lat. fem. pl. adj. suff. *-eæ.*]

Bot.: A tribe of Hypericaceæ, having no glands between the stamens.

hȳ-pĕr'-ĭ-cŭm, *s.* [Lat. *hypericon*; Gr. *ὑπέρικον* (*huperikon*), *ὑπέρεικος* (*hupereikos*) = St. John's Wort (see def.); pref. *hyp-*, and *ἐρείκη* (*ereikē*) = heath, heather.] [ERICA.]

Bot.: St. John's Wort. The typical genus of the order Hypericaceæ (q.v.). The flowers are in cymes, and are yellow, sepals and petals five; ovary three to five-celled, with axile placentas. Known species 160, all from temperate regions. They are widely distributed, and are particularly abundant in the United States and elsewhere in North America, in Western Asia, and Southern Europe. They abound in a yellow resinous juice more or less purgative and anthelmintic. In France and Germany the common European species is gathered with ceremony on St. John's Day, the people considering it a charm against evil spirits, storms, and lightning. In France and England the leaves were formerly used to dress fresh wounds. Several species are cultivated for their flowers. A gargle for sore throats is prepared in Brazil from *H. connatum*. *H. laxiusculum* has been given against the bite of serpents.

hy-pĕr-ĭ-nō'-sis, *s.* [Pref. *hyper-*, and Gr. *ἰσ* (*is*), genit. *ἰνός* (*inos*) = muscle; the fibrous vessels in the muscles; fibrine.]

Path.: A morbid state of the blood, in which the fibrine is too abundant. It sometimes accompanies hyperæmia.

Hȳ-pĕr'-ĭ-ŏn, *s.* [Lat., = Gr. *Ὑπηρίων* (*Hupērion*), see def. 1.]

I. *Class. Myth.:* In Homer the Sun-god; according to Hesiod the son of Uranos and Gaia, and father of Helios (the Sun), Selene (the Moon), and Eos (the Dawn).

"*Hyperion's* quickening fire."
Shakesp.: Timon of Athens, iv. 3.

2. *Astron.:* The seventh satellite of the planet Saturn.

hȳ'-pĕr-īte, *s.* [HYPERYTE.]

* **hȳ-pĕr'-mĕ-tĕr,** *s.* [Pref. *hyper-*, and Eng. *meter* (q.v.).]

I. *Lit.:* A hypercatalectic verse.

2. *Fig.:* Anything greater than the standard requires.

"When a man rises beyond six foot, he is an *hypermeter*, and may be admitted into the Tall Club."—*Addison.*

hȳ-pĕr-mĕt'-rĭc-ăl, *a.* [Pref. *hyper-*, and Eng. *metrical* (q.v.).] Having a redundant or superfluous syllable; hypercatalectic.

hȳ-pĕr-mȳr-ĭ-ō-ra'-ma, *s.* [Pref. *hyper-*, and Eng. *myriorama.*] An exhibition of an innumerable number of views.

hȳ-pĕr-ō-ŏ-dăp'-ĕ-dŏn, *s.* [Gr. *ὑπερος* (*huperos*) = a pestle, a knocker, and *δάπεδον* (*dapedon*) = any level surface.]

Palæont.: A genus of fossil reptiles, order Lacertilia. It was about six feet high, and is believed by Prof. Huxley to have been akin to the Sphenodon (Halteria), of New Zealand. Probably it was terrestrial. Found in the Elgin sandstones of Triassic (?) age, which have furnished Telerpeton, also in Central India, &c. (*Quar. Jour. Geol. Soc.*, xxv. 138, &c.)

hȳ-pĕr-ō-ō-dŏn, † **hȳ-pĕr'-ō-dŏn,** *s.* [Gr. *ὑπερῴη* (*huperōē*) = the palate, and *ὀδούς* (*odous*), genit. *ὀδόντος* (*odontos*) = a tooth.]

Zool.: A genus of cetaceans, family Rhyncoceti. The beak of the lower jaw has a wing-like expansion just before the blowers; the lower jaw has two rudimentary teeth in front. *Hyperoodon Butzkopf* (?) is the Bottlehead (q.v.). It has been found in the British seas. It is called also the Beaked Whale and the Flounder's Head.

hȳ-pĕr-or'-thō-dŏx, *a.* [Pref. *hyper-*, and Eng. *orthodox* (q.v.).] Excessively orthodox.

hȳ-pĕr-or'-thō-dŏx ȳ, *s.* [Pref. *hyper-*, and Eng. *orthodoxy* (q.v.).] Excessive orthodoxy; orthodoxy carried to excess.

hy-pĕr-ŏs-tō'-sis, *s.* [Pref. *hyper-*, Gr. *ὀστέον* (*osteon*) = a bone, and suff. *-osis.*]

Path.: An excessive growth of bone.

* **hȳ-pĕr-phȳs'-ĭc-ăl,** *a.* [Pref. *hyper-*, and Eng. *physical* (q.v.).] Supernatural.

hȳ-pĕr-pȳ-rĕx'-ĭ-ą, *s.* [Pref. *hyper-*, and Eng., &c. *pyrexia* (q.v.).]

Path.: Excessively high temperature, ranging from 107° to 112°, most frequent in acute rheumatism and sunstroke, sometimes also in pneumonia.

hȳ-pĕr-sar-cō'-ma, *s.* [Pref. *hyper-*, and Gr. *σάρκωμα* (*sarkōma*) = a fleshy excrescence, especially on the nose. (*Galen.*)]

Path.: For def. see etym.

hȳ-pĕr-sar-cō'-sĭs, *s.* [Pref. *hyper-*, and Gr. *σάρκωσις* (*sarkōsis*) = the growth of flesh.]

Path.: A fleshy excrescence, so called; proud flesh.

hȳ'-pĕr-sthēne, *s.* [Pref. *hyper-*, and Gr. *σθένος* (*sthenos*) = strength.]

Min.: An orthorhombic brownish-green, grayish, or greenish-black or pinchbeck brown foliated brittle mineral of nearly pearly lustre, with bronze-like reflections when fractured. Hardness, 5–6; sp. gr., 3·39. Compos.: silica, 51·35 to 52·88; alumina 0 to 3·00; protoxide of iron, 18·23 to 33·92; magnesia, 11·09 to 22·59; lime 1·60 to 3·55, &c. Before the blowpipe it fuses to a black enamel. Being first found on the coast of Labrador, it was called Labrador Horoblende; then it was met with at Coverack Cove, Cornwall, and finally in Norway, Sweden, the Tyrol, Canada, &c. Some diallages have been loosely ranked as hypersthene. (*Dana.*)

hypersthene-andesite, *s.*

Path.: An andesite described by Drasche with hypersthene as one of the leading constituents.

hypersthene-rock, *s.* [HYPERYTE.]

† **hȳ-pĕr-sthĕn'-ĭc,** *a.* [Eng., &c. *hypersthen(e)*; *-ic.*]

Petrol.: Of, belonging to, containing, or resembling hypersthene.

¶ Generally the substantive hypersthene is adjectively used instead of hypersthenic.

hȳ-pĕr-sthĕn'-īte, *s.* [Eng. *hypersthen(e)*; *-ite* (*Min.*) (q.v.).]

Min.: The same as HYPERYTE (q.v.).

hȳ-pĕr-tâu-tŏl'-ŏ-ġy, *s.* [Pref. *hyper-*, and Eng. *tautology* (q.v.).] Excessive tautology.

"Can any other instance be produced of this *hypertautology*?"—*Notes & Queries*, Aug. 30, 1851, p. 151.

hȳ-pĕr'-thĕ-sĭs, *s.* [Gr., from *ὑπέρ* (*huper*) = above, beyond, and *θέσις* (*thesis*) = a placing; *τίθημι* (*tithēmi*) = to place.]

Philol.: The transferring of a letter from the syllable to which it properly belongs to another syllable immediately preceding or succeeding, as in Gr. *μελαίνα* (*melaina*) for *μελάνια* (*melania*).

* **hȳ-pĕr-thĕt'-ĭc-ăl,** *a.* [Gr. *ὑπερθετικός* (*huperthetikos*), from *ὑπερθεσις* (*huperthesis*) = a placing over.] Exaggerated, excessive.

"These *hyperthetical* or superlative sort of expressions and illustrations are too bold and bombasted."—*Chapman: Homer; Iliad* xv. (Comment.)

hȳ-pĕr-thyr'-ĭ-ŏn (yr as ir), *s.* [Gr., from *ὑπερ* (*huper*) = above, beyond, and *θύρα* (*thura*) = a door.]

Arch.: That part of the architrave which is over a door or window. [HEAD-MOULDING.]

hȳ-pĕr-trĭ-chō'-sĭs, *s.* [Pref. *hyper-*, and Eng., &c. *trichosis* (q.v.).]

Path.: An abnormally large development of hair either locally or generally over the body.

hȳ-pĕr-trŏph'-ĭc, hȳ-pĕr-trŏph'-ĭc-ăl, *a.* [Eng. *hypertroph(y)*; *-ic*, *-ical.*] Producing or tending to produce hypertrophy.

hȳ-pĕr'-trĕ-phīĕd, *a.* [Eng. *hypertrophy*; *-ed.*] Caused or affected by hypertrophy; excessively developed.

hȳ-pĕr'-trŏ-phȳ, *s.* [Pref. *hyper-*, and Gr. *τροφή* (*trophē*) = nourishment.]

1. *Zool., Phys., Path.:* Excessive development of the body or any of its organs from over-nutrition. The most dangerous hypertrophy in man is that of the heart. There are three forms of it, simple hypertrophy, eccentric hypertrophy, or hypertrophy with dilatation, and the congenital malformation of concentric hypertrophy.

2. *Bot.:* The excessive development of one part of a plant to the detriment of another. The horticulturist often does this intentionally to gain an important object.

hȳ' pĕr-ȳte, *s.* [Gr. *ὑπέρ* (*huper*) = over, beyond, referring to the strength, or contracted from *hypersthene* (q.v.), and suff. *-yte* (*Petrol.*) (q.v.).]

Petrol.: A dark-coloured granite-like rock, composed of serpentine and hypersthene. Labradorite, in which the hornblendic constituent is a dark lamellar variety of either hornblende or pyroxene, or is hypersthene. (*Dana.*) Called by Lyell, &c. hypersthene rock, and by others hypersthenite (q.v.) Rutley considers that the so-called hypersthene is really diallage, and doubts the propriety of continuing the name hypersthenite. Hyperyte is abundant among the traps of Skye.

hȳ-pē'-thrąl, *a.* [HYPÆTHRAL.]

hȳ'-phą, *s.* [Gr. *ὑφή* (*huphē*) = a weaving, a web.]

Botany:

1. The name given by Willdenow to the filamentous fleshy, watery thallus of Byssaceæ.

2. The mycelium or spawn of certain fungals. The cells are destitute of chlorophyl, and grow only at their apices.

hȳ-phæ'-nē, *s.* [Gr. *ὑφαίνω* (*huphainō*) = to weave, referring to the fibres of the fruits.]

Bot.: A genus of Palms, tribe Borasseæ. *Hyphæne thebaica* is the Down or Doom Palm of Egypt [DOOM]; this and *H. coriacea*, an allied species, branch dichotomously, a rare character in palms.

hȳ-phăġ'-ma, *s.* [Gr. *ὕφασμα* (*huphasma*) = a thing woven, a web.] [HYPHÆNE.]

Bot.: A name applied to the mycelium of the fungals which constitute moulds. Berkeley thinks it a useless term.

hȳ'-phĕn, *s.* [Lat., from Gr. *ὑφέν* (*huphen*) = in or under one, together; *ὑφ-* for *ὑπό* (*hupo*) = under, and *ἕν* (*hen*) = one thing; neut. of *εἷς* (*heis*) = one.] A short stroke, line, or mark used between two words to mark that they form a compound word, or are connected, as *five-leaved*; also in writing or printing to connect the syllables of a divided word.

hȳ-phĕn, *v.t.* [HYPHEN, *s.*] To connect or join by a hyphen.

* **hȳ'-phĕn-āt-ĕd,** *a.* [Eng. *hyphen*; *-ated.*] Joined by hyphens.

"The Germans giving the *hyphenated* title thus."—*Notes & Queries*, Feb. 7, 1852, p. 154.

* **hȳ-phĕn'-ĭc,** *a.* [Eng. *hyphen*; *-ic.*] Pertaining to the use of the hyphen (q.v.).

"I should call the following a *hyphenic* error."—*Notes & Queries*, Sept. 20, 1851, p. 204.

* **hȳ'-phĕn-ĭsm,** *s.* [Eng. *hyphen*; *-ism.*] Two or more words connected by a hyphen.

"The word hyphen being Greek, and being made a substantive, we might join Greek suffixes to it, and speak of *hyphenisms* and hyphenic phrases."—*Notes & Queries*, Sept. 20, 1851, p. 204.

* **hȳ-phĕn-ĭ-zā'-tion,** *s.* [Eng. *hyphen*; *-ization.*] The act of joining words by a hyphen.

"A neglect of mental *hyphenization* often leads to mistakes as to the author's meaning."—*Notes & Queries*, Sept. 20, 1851, p. 204.

hȳ-phō-mȳ-çē'-tēs, *s.* [Gr. *ὑφαίνω* (*huphainō*) = to weave.] [HYPHÆNE.]

Bot.: An order of Fungals, having naked spores, often septate, and a floccose thallus. It is composed of microscopic plants, growing as moulds over dead or living organic substances. Called also Botrytaceæ (q.v.). The order is divided into five sub-orders: Isariacei, Stilbacei, Dematei, Mucedines, and Sepedonici (q.v.).

hȳ-phō-strō'-ma, *s.* [Gr. *ὑφαίνω* (*huphainō*) = to weave, and Mod. Lat., &c. *stroma* (q.v.).]

Bot.: The mycelium or spawn of fungals.

hȳ-pĭn-ō'-sĭs, *s.* [Pref. *hyp-* (q.v.); Gr. *ἴς* (*is*), genit. *ἰνός* (*inos*) = strength, muscle, fibre, and suff. *-osis.*]

Path.: A diminished amount of fibrin in the blood, an occasional attendant on anæmia-

hȳp'-næ-ī, hȳp-nōī'-dē-æ, *s. pl.* [Mod. Lat. *hypn(um)*; Lat. masc. pl. adj. suff. *-oi*, or Gr. εἶδος (*eidos*) = form, and fem. pl. adj. suff. *-eæ*.]

Bot.: A large order, tribe, or family of pleurocarpous mosses, with nodding capsule on a long footstalk, the stems generally cylindrical, the leaves imbricated. Chief British genera: Neckera, Pilotrichum, Hookeria, and Hypnum.

hȳp'-nĕ-ą, *s.* [From Mod. Lat. *hypnum*, or Gr. ὕπνος (*hupnos*) = sleep, and suff. *-ea* (?).]

Bot.: A genus of Rhodymeniaceæ (Florideous Algæ). Several have a peculiar odour produced by the iodine which they contain. There is one British species, *Hypnea purpurascens*, a purplish-pink, feathered or shrubby sea-weed, common on stones, rocks, &c., between tide marks. In the Greek Archipelago *H. musciformis* is considered a vermifuge.

hȳp-nōī'-dē-æ, *s.* [Hypnæi.]

hȳp-nŏl'-ō-ĝĭst, *s.* [Eng. *hypnolog(y)*; *-ist.*] One versed in hypnology.

hȳp-nŏl'-ō-ĝȳ, *s.* [Gr. ὕπνος (*hupnos*) = sleep, and λόγος (*logos*) = a discourse.] A treatise or discourse on sleep and its phenomena; the study of the phenomena of sleep.

hȳp-nŏt'-ĭc, *a. & s.* [Gr. ὑπνωτικός (*hupnōtikos*) = putting to sleep, aleepy; ὑπνόω (*hupnoō*) = to put to sleep; ὕπνος (*hupnos*) = sleep.]

A. *As adj.:* Having the quality or property of putting to sleep; causing or tending to cause sleep; soporific.

B. *As subst.:* A medicine or preparation which produces or tends to produce sleep; a soporific, an opiate.

hȳp'-nō-tĭzm, *s.* [Fr. *hypnotisme*, from Gr. ὕπνος (*hupnos*) = sleep.]

Therapeutics: A method of artificially inducing sleep for remedial purposes. Mr. Braid adopted the method of holding any small bright object about ten or twelve inches above the middle of the forehead, so as to require a slight exertion of the attention to enable the patient to look at with a steady uninterrupted gaze. In a few minutes sleep follows in susceptible persons. If the eyes do not quickly close, two of the fingers of the operator's hand are brought towards the patient's eyes, when he closes them involuntarily. [Mesmerism.] Another method is to exhort the patient to imagine that he sees his breath on a frosty day, and to count the respirations; few people can reach a hundred.

"The facts of *hypnotism*, or induced somnambulism, are well known to physiologists."—*Saturday Review*, Nov. 10, 1883, p. 595.

hȳp'-nō-tīze, *v.t.* [Gr. ὕπνος (*hupnos*) = sleep; *t* connective, and Eng. suff. *-ize.*] To affect with hypnotism.

hȳp'-nŭm, *s.* [Gr. ὕπνον (*hupnon*) = a kind of moss growing under trees.]

Bot.: A genus of mosses, the typical one of the Hypnei, or Hypnaceæ (q.v.). It has prostrate, pinnate, bright green branches. Formerly nearly a hundred British species were included in the genus, now it is considerably subdivided.

hȳ-pō-, *pref.* [Gr. ὑπό (*hupo*) = under.]

1. *Ord. Lang.:* A common prefix, used especially with words derived from the Greek, and signifying under, beneath.

2. *Chem.:* A prefix used to denote that the compound contains less oxygen. Thus, hypochlorous acid has the formula HClO, and chlorous acid $HClO_2$.

***hȳ'-pō,** *s.* [A contr. for *hypochondriac* (q.v.).] The same as Hyp (q.v.).

hȳ'-pō-blast, *hȳ-pō-blăs'-tŭs, *s.* [Pref. *hypo-*, and Gr. βλαστός (*blastos*) = a sprout, a shoot.]

1. *Anat.:* The term applied by Foster and Balfour to the lower germs or lower layer of cellular elements in a blastoderm (q.v.). There are ultimately developed from it the alimentary canal, the liver, &c.

2. *Bot.:* The name given by Richard to a scutelliform cotyledon of wheat, which he thought a particular modification of the radicle.

hȳ-pō-brăn'-chĭ-ąls, *s. pl.* [Pref. *hypo-*, and pl. of *branchial* (q.v.).]

Comp. Anat. & Ichthy.: The lower portion of the branchial arches or supporta of the gilla in fishes.

hȳ-pō-brō'-mīto, *s.* [Eng. *hypobrom(ous)*; *-ite.*]

Chem.: A salt of hypobromous-acid (q.v.).

hȳ-pō-brō'-mŏŭs, *a.* [Pref. *hypo-*; Eng. *brom(ine)*, and suff. *-ous.*] (See the compound.)

hypobromous acid, *s.*

Chem.: HBrO. A solution of this acid can be obtained by shaking bromine water with mercuric oxide, HgO, and then shaking the yellow liquid successively with Br_2 and HgO; a liquid can thus be formed which contains 6·2 per cent. of bromine combined as hypobromous acid, $HgO + 2Br_2 + H_2O = 2(HBrO) + HgBr_2$. It is a powerful oxidizing agent, and bleaches vegetable colours. Bromine added to milk of lime forms a compound resembling bleaching powder; it may be a mixture of $CaBr_2$ with hypobromite of calcium, $Ca(BrO)_2$.

hȳ-pŏb'-ō-lē, *s.* [Gr. ὑποβολή (*hupobolē*), from ὑπό (*hupo*) = under, and βάλλω (*ballō*) = to throw.]

Rhet.: A figure in which several things which seem to be opposed to the argument are mentioned, each of them being then refuted in turn.

hȳ-pō-car-pō'-ĝĕ-ąn, *a.* [Pref. *hypo-*; Gr. καρπός (*karpos*) = fruit; γῆ (*gē*) = the earth, and Eng. suff. *-an.*]

Bot.: Producing its fruit below the ground.

hȳ-pō-cą-thăr'-sĭs, *s.* [Pref. *hypo-*, and Eng., &c. *catharsis.*]

Phar.: Slight purging.

hȳ-pō-câu'-sĭs, *s.* [Gr.] [Hypocaust.] Among the Greeks, a furnace with flues running underneath the pavement of an apartment, to increase the temperature.

hȳ'-pō-câust, *s.* [Gr. ὑπόκαυστον (*hupokauston*), from ὑπό (*hupo*) = under, and καίω (*kaiō*), fut. καύσω (*kausō*) = to burn.]

1. *Arch.:* A furnace for heating a building by hot air conducted under the floor and through the walls. Hypocausts were used by the Romans for heating their baths.

"At the south-eastern corner of the dwelling was found a singular *hypocaust*, or subterranean stove for heating the building."—*Pall Mall Gazette*, Dec. 1, 1883.

2. *Hort.:* A place where a fire is kept up for the purpose of heating a stove or hot-house.

hȳ-pō-chæ-rĭd'-ĕ-æ, *s. pl.* [Lat. *hypochœr(is)*, genit. *hypochœrid(is)*; fem. pl. adj. suff. *-eæ.*]

Bot.: A tribe of Compositea, sub-order Ligulifloræ.

hȳ-pō-chæ'-rĭs, *s.* [Lat. = Gr. ὑπόχαιρις (*hupochairis*), ὑποχοιρίς (*hypochoiris*) = a plant, *Hyoscris lucida.*]

Bot.: Cat's ear. The typical genus of the tribe Hypochærideæ (q.v.). The achenes are striate, often beaked, the pappus feathery, the receptacle chaffy, the involucre oblong, imbricated. Six species are known; three, *Hypochœris glabra*, *H. radicata*, and *H. maculata*, are British, the third is rare. They have yellow flowers.

hȳ'-pō-chīl, hȳ-pō-chĭl'-ĭ-ŭm, *s.* [Pref. *hypo-*, and Gr. χείλος (*cheilos*) = the lip.]

Bot.: The lower part of the lip of some orchids.

hȳ-pō-chlōr'-īte, *s.* [Gr. ὑπόχλωρος (*hupochlōros*) = greenish-yellow. Named on account of the green chlorite-like colour.]

1. *Min.:* A brittle mineral of feebly vitreous lustre, occurring crystalline and earthy. Compos.: silica, 50·24; alumina, 14·65; oxide of bismuth, 13·03; protoxide of iron, 10·54; phosphoric acid, 9·62, with a trace of manganese. Found in Saxony and at Voigtland. (*Dana.*)

2. *Chem.:* A salt of hypochlorous-acid (q.v.). [Bleaching-powder.]

hȳ-pō-chlōr'-ŏŭs, *a.* [Pref. *hypo-*, and Eng. *chlorous.*] (See the compound.)

hypochlorous-acid, *s.*

Chem.: HClO. A monobasic acid, obtained by dissolving chlorine monoxide Cl_2O in water, also by passing HCl through a warm solution of permanganic acid and then distilling; also by passing chlorine into water containing calcium carbonate in suspension $CaCO_3 + H_2O + 2Cl_2 = CO_2 + CaCl_2 + 2HClO$. The aqueous solution has a yellow colour and powerful bleaching properties. It oxidizes arsenic and iodine. When mixed with hydrochloric acid the gases are decomposed, chlorine being liberated $HClO + HCl = H_2O + Cl_2$. Hypochlorous acid unites directly with ethene C_2H_4, forming glycol-chlorhydrin $CH_2OH{\cdot}CH_2Cl$. The salts of hypochlorous acid are called hypochlorites. They are unstable and give off oxygen, and are converted into a mixture of chlorite, chlorate, and chloride.

† hȳ-pō-chŏn'-dre (dre as **dĕr), † hȳ-pō-chŏn'-drȳ,** *s.* [Hypochondriasis.]

hȳ-pō-chŏn'-drĭ-ą, *s.* [Hypochondriasis.]

hȳ-pō-chŏn'-drĭ-ăc, * hȳ-pō-chŏn'-drĭ-ăck, *a & s.* [Eng. *hypochondri(a)*; *-ac.*]

A. *As adjective:*

1. Pertaining to or connected with the hypochondrium.

2. Produced by hypochondria; characterized by hypochondria.

3. Suffering from hypochondria; having a disordered mind.

"The *hypochondriac* visionary."—*V. Knox: Essays*, No. 22.

4. Causing hypochondria, melancholy, or lowness of spirits.

B. *As subst.:* A person suffering from or affected with hypochondria.

"Terrour has frequently excited languid *hypochondriacs*, to exertions."—*Cogan: On the Passions*, vol. i., pt. ii., ch. iii.

hypochondriac-regions, *s. pl.* [Abdomen.]

*** hȳ-pō-chŏn-drī'-ąc-ąl,** *a.* [Eng. *hypochondriac*; *-al.*] Hypochondriac.

"Under the power of *hypochondriacal* melancholy."—*Sharp: Sermons*, vol. iii., ser. 2.

hȳ-pō-chŏn-drī'-ąc-ąl-lȳ, *adv.* [Eng. *hypochondriacal*; *-ly.*] In a hypochondriac or melancholy manner.

hȳ-pō-chŏn'-drĭ-ą-çĭzm, *s.* [Eng. *hypochondriac*; *-ism.*] The condition or state of being affected with hypochondria.

hȳ-pō-chŏn-drī'-ą-sĭs, *s.* [Mod. Lat., from Lat. *hypochondria* (q.v.).]

Path.: A complaint, usually of adult males, characterized by absurd attention to their real or supposed bodily ailments and sensations, with loss of spirits and want of feeling for others.

hȳ-pō-chŏn'-drĭ-ăzm, *s.* [Eng. *hypochondria*; *-(i)sm.*] The same as Hypochondriasis (q.v.).

hȳ-pō-chŏn'-drĭ-ăst, *s.* [Eng. *hypochondria*; *-(i)st.*] A person suffering from hypochondriasis; a hypochondriac.

hȳ-pō-chŏn'-drĭ-ŭm, *s.* [Gr. ὑποχόνδριος (*hupochondrios*): ὑπό (*hupo*) = under, and χόνδρος (*chondros*) = a cartilage.]

Anat.: Either of the two regions to the right and left of the epigastric one, the three together forming the upper zone of the abdomen.

hȳ-pō-chŏn'-drȳ, *s.* [Hypochondriasis.]

hȳ-pō-chth'-thŏn, *s.* [Gr. ὑποχθόνιος (*hypochthonios*) = under the earth: ὑπό (*hypo*) = under, and χθών (*chthōn*) = the earth.]

Zool.: A genus of Amphibians, family Proteidæ. *Hypochthon* or *Proteus anguinus*, is a snake-like animal, but without scales, and having four feet. It is pale flesh-coloured or white, with red gills, and lives in caves in Carinthia, &c.

hȳ'-pō-çĭst, *s.* [Gr. ὑποκίστις (*hypokistis*) = a parasitic plant which grows on the roots of the cistus; Fr. *hypociste.*]

1. *Bot.:* A plant, *Cytinus Hypocistis*, a native of the south of France.

2. *Pharm, &c:* An inspissated juice obtained from the fruit of the plant described under 1. It is reduced under the influence of the sun's rays to the consistence of an extract. Used as a styptic and astringent.

hȳ-pō-crā-tĕr'-ĭ-form, *a.* [Pref. *hypo-*, and Eng. *crateriform.*]

Bot.: Salver-shaped; used of a calyx, a corolla, or other organ having a long slender tube and a flat limb. Example, Phlox.

hȳ-pŏc'-rĭ-sȳ, *hy-poc-ri-sie, *y-poc-ri-sic, *s.* [Fr. *hypocrisie*, from Lat. *hypocrisis*, from Gr. ὑποκρισις (*hupokrisis*) = a reply, the acting of a play on the stage, hypocrisy; ὑποκρίνομαι (*hupokrinomai*) = to make answer, to play a part; ὑπό (*hupo*) = under, and κρίνομαι (*krinomai*) = to contend, to dispute.] The act or practice of a hypocrite; dissimulation or hiding of one's true character under a false or specious appearance of virtue or goodness; a feigning to be what one is not; a pretence to virtue or goodness.

"This abject *hypocrisy* had been rewarded by a place in the ecclesiastical commission."—*Macaulay. Hist. Eng.*, ch. viii.

hȳp'-ō-crīte, *yp-o-crite, *s.* [Fr. *hypocrite*, from Lat. *hypocrita, hypocrites*, from Gr. ὑποκριτής (*hupokritēs*) = a dissembler, a hypocrite.] One who assumes a false appearance of virtue or goodness; one who, for ulterior purposes, puts on a fair outside show; one who makes a false pretence to virtue.

"The *hypocrite* evaded the demand with characteristic dexterity."—*Macaulay: Hist. Eng.*, ch. xvii.

¶ The *hypocrite* feigns to be what he is not; the *dissembler* conceals what he is: the former takes to himself the credit of virtues which he has not; the latter conceals the vices that he has: the *hypocrite* makes truth serve the purpose of falsehood; the *dissembler* is content with making falsehood serve his own particular purpose. (*Crabb: Eng. Synon.*)

***hȳp'-ō-crīte-lȳ,** *adv.* [Eng. *hypocrite; -ly.*] In a hypocritical manner; like a hypocrite; hypocritically.

hȳp-ō-crĭt'-ĭc-al, *hȳp-ō-crĭt'-ĭc, *a.* [Eng. *hypocrit(e); -ic, -ical.*] Characterized by or full of hypocrisy; false; insincere.

"This is an old rogue, a schismatical knave, a *hypocritical* villain."—*Macaulay: Hist. Eng.*, ch. iv.

hȳp-ō-crĭt'-ĭc-al-lȳ, *adv.* [Eng. *hypocritical; -ly.*] In a hypocritical manner; with hypocrisy.

"Insidiously, nay, *hypocritically*, abusing at once their proselytes and their religion."—*Government of the Tongue.*

***hȳp'-ō-crĭt-ĭsh,** *a.* [Eng. *hypocrit(e); -ish.*] Hypocritical.

"Their olde *hypocritish* holy flatering frandes."—*Joye: Expos. of Daniel*, ch. vii.

hȳ-pō-çȳ-clōĭd, *s.* [Pref. *hypo-*, and Eng. *cycloid* (q.v.).]

Geom.: A curve generated by the movement of a curve upon the concave side of another curve. [Epicycloid.]

hȳ-pō-dĕr-ma, *s.* [Pref. *hypo-*, and Gr. δέρμα (*derma*) = the skin.]

Bot.: A layer or string of cells lying below the epidermis, and not in general distinguished from it.

hȳ-pō-dĕr'-mal, *a.* [Pref. *hypo-*, and Eng. *dermal.*] The same as Hypodermic (q.v.).

hȳ-pō-dĕr'-mĭc, *a.* & *s.* [Hypodermal.]

A. *As adj.:* Pertaining to parts immediately underlying the dermis or true skin; spec., applied to medical treatment by injection under the skin.

B. *As subst.:* A medicine introduced into the system by injection under the skin.

hypodermic-injection, *s.*

Surg.: Injections beneath the skin, chiefly of morphia or some other narcotic. Hypodermic injections are valuable remedies, but should only be used under medical advice.

hȳ-pō-dĕr'-mĭc-al, *a.* [Eng. *hypodermic; -al.*] The same as Hypodermic (q.v.).

hȳ-pō-dĕr'-mĭc-al-lȳ, *adv.* [Eng. *hypodermical; -ly.*] Under the skin.

"Varying quantities of poison are to be *hypodermically* injected into dogs."—*Times*, May 21, 1873.

hȳ-pō-dĕr'-mis, *s.* [Hypoderma.]

Bot.: The underlayer of the spore-case of an urn moss.

hȳ-pō-dī-ăs'-tō-lē, *s.* [Gr.]

In Greek Gram.: A mark like a comma placed after some form of the article and relative pronoun, when followed by the enclitics τέ, τί (*te, ti*) to distinguish them from other words having the same marks, as ὅ,τε, ὅ,τι (*ho te, ho ti*), as distinguished from ὅτε, ὅτι (*hote, hoti*).

hȳ-pō-gæ'-ạn, hȳ-pō-ge'-ạn, hȳ-pō-gē'-ạl, hȳ-pō-gæ'-oŭs, *a.* [Gr. ὑπό (*hupo*) = below, under, and γῆ, γαῖα (*gē, gaia*) = the earth.]

Bot.: Growing under the ground.

hȳ-pō-gæ'-ī, *s. pl.* [Hypogæan.]

Bot.: A sub-order of gasteromycetous fungals. They have a fleshy dehiscent sporange excavate into sinuosities lined with basidiospores either smooth or tuberculated

hȳ-pō-gæ'-ĭc, *a.* [Hypogæan.]

hypogæic-acid, *s.*

Chem.: $C_{16}H_{30}O_2$. A monatomic fatty acid contained as a glyceride, together with palmitin and arachin, in the oil of the earthnut *Arachis hypogæa*. Hypogæic acid crystallizes from ether in needles which melt at 33°.

*** hȳ-pō-gæ'-ŭm,** *s.* [Hypogæan.]

Arch.: A name given to all parts of a building below the level of the ground, as vaults, cellars, &c.

hȳ-pō-găs'-trĭc, *a.* [Pref. *hypo-*, and Eng. *gastric.*] Relating to or in any way connected with the hypogastrium (q.v.).

hypogastric-region, *s.*

Anat.: The middle part of the lower region of the abdomen, that just below the stomach. [Abdomen.]

hȳ-pō-găs'-trĭ-ŭm, *s.*

Anat.: The middle part of the lowest zone into which the abdomen is divided. [Abdomen.]

hȳ-pō-găs'-trō-çēle, *s.* [Pref. *hypo-*, and Eng. *gastrocele.*]

Surg.: Hernia of the hypogastrium (q.v.).

hȳ-pō-ge'-ạn, hȳ-pō-ge'-ạl, *a.* [Hypogæan.]

hȳ'-pō-gēne, *a.* [Pref. *hypo-*, and Gr. γίγνομαι (*gignomai*) = to come into being.]

Geol.: Nether-formed. A name applied to rocks, believed by Sir Charles Lyell and his followers, to have originated some considerable distance beneath the surface of the ground. He included under the designation igneous rocks like granite, and metamorphic ones like gneiss. He introduced the term hypogene to supersede the word primary, when it was found that some of the rocks to which the latter term was applied were posterior to many of the secondary rocks.

hypogene-limestone, *s.* [Metamorphic-limestone.]

hȳ-pō-ge'-oŭs, *a.* [Hypogæous.]

*** hȳ-pō-gē'-ŭm,** *s.* [Hypogæum.]

hȳ-pō-glŏs'-sal, *a.* [Pref. *hypo-*, and Eng. *glossal.*]

Anat.: Beneath the tongue. Used specially of the hypoglossal nerve, which is the motor nerve of the tongue, and partly of some dorsal muscles. It is the ninth cranial nerve.

hȳ-pō-glŏt'-tĭs, hȳ-pō-glŏs'-sĭs, *s.* [Gr. ὑπό (*hupo*) = under, and γλῶττα, γλωσσα (*glōtta, glōssa*) = the tongue.]

1. The under part of the tongue.

2. A lozenge to be kept under the tongue, until dissolved.

† hȳ'-pō-gȳn, *s.* [Hypogynous.]

Bot.: A hypogynous plant.

hȳ-pŏg'-ȳn-oŭs, *a.* [Gr. ὑπό (*hupo*) = under; γυνή (*gunē*) = that which is feminine, and Eng. suff. *-ous.*]

Botany:

1. *Of stamens:* Growing from below the base of the ovary—*i.e.*, on the receptacle, and not united to any other organ.

2. *Of plants:* Not having the stamens adherent to either calyx or corolla, or inserted into the pistil.

hypogynous-exogens, *s. pl.*

Bot.: A class of exogens, consisting of those which have hypogynous stamens. Lindley divides them into fourteen alliances:

Violales, Cistales, Malvales, Sapindales, Guttiferales, Nymphales, Ranales, Berberales, Ericales, Rutales, Geraniales, Silenales, Chenopodales, and Piperales. [See these words.]

hȳ-pō-lȳt'-rĕ-æ, *s. pl.* [Mod. Lat. *hypolytr(um)*; Lat. fem. pl. adj. suff. *-æ.*]

Bot.: A tribe of Cyperaceæ, type Hypolytrum.

hȳ-pŏl'-ȳ-trŭm, *s.* [Pref. *hypo-*, and Gr. ἔλυτρον (*elutron*) = a cover, a covering.]

Bot.: The typical genus of the tribe Hypolytreæ (q.v.).

hȳ-pŏm'-ĕn-oŭs, *a.* [Gr. ὑπό (*hupo*) = under, μενω (*menō*) = to remain, and Eng. suff. *-ous.*]

Bot.: Arising from below an organ without adhering to it or any other; free.

hȳ-pō-nī'-trītes, *s. pl.* [Pref. *hypo-*, and Eng. *nitrites.*]

Chem.: Compounds formed by the action of sodium amalgam on a solution of an alkaline nitrite; on acidifying with acetic acid a yellow precipitate is formed of argentic hyponitrite $AgNO$. A solution of sodium hyponitrite $NaNO$ is alkaline to test paper, and when strongly acidified with acetic acid evolves N_2O nitrous oxide.

hȳ-pō-nō-mcū'-tạ, *s.* [Mod. Lat., from Gr. ὑπονομεύω (*huponomeuō*) = to undermine, to make passages under ground. (*Agassiz.*)]

Entom.: The typical genus of the family Hyponomeutidæ (q.v.). *Hyponomeuta padellus* is common; its larva feeds on hawthorn, the apple, the aloe, &c., that of *H. evonymellus* on the spindle bushes, and that of *H. padi* on the bird-cherry.

hȳ-pō-nō-mcū'-tĭ-dæ, *s. pl.* [Mod. Lat. *hyponomeut(a)*; Lat. fem. pl. adj. suff. *-idæ.*]

Entom.: A family of Moths, group Tineina. The male has wings of the normal size, the female has hers abbreviated; the antennæ rather thick, pubescent, the maxillary palpi undeveloped. Larva with sixteen legs, the third pair often clubshaped, feeding between united leaves. Known British species six. (*Stainton.*)

*** hȳ'-pō-phĕt,** *s.* [Gr. ὑποφήτης (*hupophētēs*): ὑπό (*hupo*) = under, and φημί (*phēmi*) = to speak.] An expounder, an interpreter.

hȳ-pō-phlœ'-ō-dal, *a.* [Pref. *hypo-*; Gr. φλοιός (*phloios*) = the rind or bark of trees, and suff. *-al.*]

Bot.: Existing beneath the epidermis of the bark. (*Cooke.*)

hȳ-pō-phŏs'-phīte, *s.* [Pref. *hypo-*, and Eng. *phosphite.*]

Chem.: A salt of hypophosphorous acid.

hȳ-pō-phŏs'-phŏr-oŭs, *a.* [Pref. *hypo-*, and Eng. *phosphorous.*] (See the compound.)

hypophosphorous-acid, *s.*

Chem.: H_3PO_2, hydric hypophosphite. It can be obtained as a barium-salt. By boiling phosphorus with barium hydrate, phosphuretted hydrogen escapes as a gas. On evaporation the salt separates out, by adding sulphuric acid till the barium is precipitated the acid is obtained, which can be evaporated till the temperature rises to 105°, and then placing it under a desiccator, a syrupy oil is obtained, which at a temperature below 0° forms a snow-white mass. When heated above 110°, it is converted into PH_3, and phosphoric acid H_3PO_4. It is a powerful reducing agent. If the free acid in excess be added to a solution of cupric solphate, and then heated to 55°, it gives a red precipitate of copper hydride Cu_2H_2.

hȳ-pō-phȳl'-lĭ-ŭm, *s.* [Gr. ὑπό (*hupo*) = under, and φύλλον (*phullon*) = a leaf.]

Bot.: The name given by Link and others to a small abortive leaf, like a scale, placed below a cluster of leaf-like branches or leaves.

hȳ-pŏph'-ȳl-loŭs, *a.* [Hypophyllium.]

Bot.: On the under surface of a leaf.

hȳ-pŏph'-ȳ-sĭs, *s.* [Gr. ὑπό (*hupo*) = under, and φύσις (*phusis*) = nature.]

1. *Anat.:* (See the compound).

2. *Bot.:* A cell which afterwards becomes the root, as in Angiosperms.

hypophysis-cerebri, *s.* [Pituitary-body.]

hȳ-pō'-pĭ-ŭm, hȳ-pō'-pĭ-ŏn, *s.* [Hypopyum.]

hȳ-pō-pō′-dĭ-ŭm, *s.* [Gr. *ὑποπόδιον* (*hupopodion*) = a footstool.]

Bot.: The stalk of a carpel or carpela.

hȳ-pŏp′-ō-rŭm, *s.* [Pref. *hypo-*, and Gr. *πόρος* (*poros*) = a passage.]

Bot.: A genus of Cyperaceæ, tribe Sclereæ. *Hypoporum mutans* is said to be diaphoretic and diuretic.

hȳ-pŏp′-tĕr-āte, *a.* [Gr. *ὑπόπτερος* (*hupopteros*) = feathered, winged; Eng. suff. *-ate.*]

Bot.: Having a wing produced at the base or below.

hȳ-pŏp′-tĕr-ȳ́g′-ō-ī, hȳ-pŏp-tĕr-ȳ́g′-ĭ-ā′-cē-æ, *s. pl.* [Mod. Lat. *hypopteryg(ium)*: Lat. masc. pl. adj. suff. *-ci*, or fem. *-aceæ.*]

Bot.: A tribe or family of pleurocarpous mosses, having the leaves in two opposite straight rows, united on the upper side of the stem with a third medium row of smaller stipuliform leaves, on the under side having a resemblance to the intermediate leaves in Selaginella; the cells of the leaves are parenchymatous, and equal in all parts. All the genera are exotic. (*Griffith & Henfrey.*)

hȳ-pŏp-tĕr-ȳ́g′-ĭ-ŭm, *s.* [Pref. *hypo-*, and Gr. *πτερύγιον* (*pterugion*) = a little wing.]

Bot.: The typical genus of the tribe Hypopterygei (q.v.).

hȳ-pō′-pȳ-ŭm, *s.* [Gr. *ὑπό* (*hupo*) = under, and *πύον* (*puon*) = pus.]

Pathol.: A collection of purulent matter in the anterior chamber of the eye. It was preceded by inflammation of the parts adjacent, if not also of all the tissues of the eye.

hȳ-pō-săth′-rĭ-a, *s.* [Gr. *ὑπόσαθρος* (*hupo-sathros*) = somewhat rotten.]

Bot.: The same as Blettino (q.v.).

hȳ-pō-sclēr′-īte, *s.* [Pref. *hypo-*; Gr. *σκληρός* (*sklēros*) = hard, and suff. *-ite* (*Min.*).]

Min.: A variety of Albite (q.v.), not so hard as the normal mineral.

hȳ-pō-skĕl′-ĕ-tal, *a.* [Pref. *hypo-*, and Eng. *skeletal.*]

Anat.: The same as Hypaxial (q.v.).

hȳ-pō-spā′-dĭ-ăs, *s.* [Pref. *hypo-*, and Gr. *σπάω* (*spaō*) = to draw out.]

Anat.: A defect in which the parts of the male urethra are not united into a tube.

hȳ-pō-spō-răn′-gĭ-ŭm, s. [Pref. *hypo-*, and Eng., &c. *sporangium* (q.v.).]

Bot.: The indusium of ferns when it grows from below the spore cases.

hȳ-pŏs′-ta-sĭs, hȳ-pŏs′-ta-sȳ, * **hy-pos-ta-sie,** *s.* [Lat. *hypostasis*, from Gr. *ὑπόστασις* (*hupostasis*)= a standing under, substance, a Person of the Trinity: *ὑπό* (*hupo*) = under, and *στάσις* (*stasis*) = standing; Fr. *hypostase.*]

I. *Ord. Lang.:* That which lies at the basis or foundation of anything. (*Huxley*, in *Annandale.*)

II. *Technically:*

* 1. *Alchemy:* The principle or element of anything; spec., mercury, sulphur, and salt, which the alchemists deemed the principles or elements of all material bodies.

2. *Bot.:* The name given by Dutrochet to what is more commonly called the suspensor or suspensory cord of the embyro of an ovule. [Suspensor.]

3. *Med.:* The sediment in urine. (*Parr.*)

4. *Theol. & Ch. Hist.:* The name given by the Greek ecclesiastical writers to what the Latins called Persona = a Person of the Trinity.

* **hȳ-pŏs′-ta-sīze,** *v.t.* [Hypostatize.]

hȳ-pō-stăt′-ĭc, hȳ-pō-stăt′-ĭc-al, *a.* [Gr. *ὑποστατικός* (*hupostatikos*); Fr. *hypostatique.*]

1. Pertaining to hypostasis; constituent, constitutive or elementary.

2. Personal; distinctly personal; constituting a distinct personality or substance.

hypostatic-union, hypostatical-union, *s.*

Theol.: The union of the divine and human natures in the person of Christ.

"The *hypostatical* or personal *union* of the divine and human natures in the person of our blessed Saviour."—*Tillotson: Sermons*, vol. i., ser 45.

hȳ-pō-stăt′-ĭc-al-lȳ, *adv.* [Eng. *hypostatical*; *-ly.*] In a hypostatic manner; personally.

"Christ's body, and his soul and deity be *hypostatically* united therewith."—*Sharp: Sermons*, vol. viii., ser. 13.

* **hȳ-pŏs′-ta-tīze,** * **hȳ-pŏs′-ta-sīze,** *v.t.* [Hypostasis.] To make or regard as a distinct person or substance; to attribute proper personal existence to.

"Reason up to a God, and the best you can do is to *hypostatize* and deify the finest product of your own faculties."—*Morell: Philosophy of Religion*, p. 173.

hȳ-pō-stĭl′-bīte, *s.* [Pref. *hypo-*, and Eng. *stilbite.*]

Min.: Two minerals. The Hypostilbite of Mallet is the same as Laumonite; that of Beudant the same as Stilbite. Dana makes it a distinct species, with Laumonite for a synonym.

hȳ-pō-stōme, *s.* [Pref. *hypo-*, and Gr. *στόμα* (*stoma*) = a mouth.]

Compar. Anat.: The labrum or upper lip of trilobites.

hȳ-pō-strō′-ma, *s.* [Pref. *hypo-*, and Eng., &c. *stroma.*]

Bot.: The mycelium of certain fungals.

†**hȳ-pŏs′-trō-phē,** *s.* [Gr. *ὑπό* (*hupo*)=under, and *στροφή* (*strophē*) = a turning.]

Pathol.: A relapse.

hȳ-pō-stȳle, *a.* & *s.* [Gr. *ὑπόστυλος* (*hupostulos*) = resting on pillars beneath: *ὑπό* (*hupo*) = under, and *στῦλος* (*stulos*) = a pillar.]

A. *As adjective:*

Arch.: Having the roof supported by pillars.

B. *As substantive:*

Arch.: A porch of a building supported by pillars; a covered colonnade; a pillared hall.

hȳ-pō-sŭl′-phīte, *s.* [Pref. *hypo-*, and Eng. *sulphite.*]

Chemistry:

1. A salt of hyposulphurous acid.

* 2. A name given formerly to a thiosulphate. The most important salt is thiosulphate of sodium, which is used in medicine under the name of hyposulphite of sodium.

hyposulphite of sodium, *s.*

Pharm.: $Na_2S_2O_3$. The chemical properties and methods of preparing this salt are described under Thiosulphate of sodium. It is given in cases of sarcinous vomiting to check fermentation, and as an external application in parasitic skin diseases. It is not irritating like sulphurous acid. It is also used as an antichlore for removing the last traces of chlorine from bleached goods, and in photography for dissolving salts of silver, which are insoluble in water.

hȳ-pō-sŭl′-phŭr-ŏŭs, *a.* [Pref. *hypo-*, and Eng. *sulphurous.*]

Chem.: (See the compound).

hyposulphurous-acid, *s.*

Chemistry:

1. H_2So_2; by the action of Fe or Zn on sulphurous acid H_2SO_3, contained in a closed vessel, a yellow solution of zinc hyposulphite is obtained. Nearly pure $NaHSO_2$ is obtained by dissolving zinc in a concentrated solution of acid sodium sulphite, $NaHSO_3$. A double salt of zinc and sodium sulphite first crystallizes out, then alcohol is added to precipitate the rest of this salt, and the decanted liquid is placed in a well-corked flask, and colourless needles of sodium hydrogen hyposulphite, $NaHSO_2$, crystallize out. The solution has bleaching properties. The free acid is liberated by oxalic acid, giving an orange solution, which bleaches strongly and decomposes in the air.

* 2. A name formerly given to thiosulphuric-acid (q.v.).

hȳ-pŏt′-ĕ-nūse, *s.* [Hypothenuse.]

* **hȳ-pŏt-ĕ-nūs′-al,** *a.* [Eng. *hypotenus(e)*; *-al.*] Of the nature of an hypothenuse; forming an hypothenuse.

"If the *hypotenusal*, or screw be five, the perpendicular or elevation must be three, and the basis four."—*Wilkins: Dædalus*, ch. xv.

hȳ-pō-thăl′-lūs, *s.* [Pref. *hypo-*, and Eng. *thallus.*]

Botany:

1. Delicate filaments constituting the vegetation of coniomycetous fungals.

2. The inferior stratum of the thallus of lichens.

hȳ-pŏth′-ĕc, *s.* [Fr. *hypothèque* = an engagement, a mortgage, a pawning, from Lat. *hypotheca*, from Gr. *ὑποθήκη* (*hupothēkē*) = (1) an underprop, (2) a pledge, a mortgage: *ὑπό* (*hupo*) = under, and *τίθημι* (*tithēmi*) = to place.]

Scots Law: A claim or right, corresponding to a lien in English law, by which the ownership in the effects of a debtor is vested in the creditor, while the effects at the same time remain in the possession of the debtor. Thus the furniture and crops of a tenant are subject to the hypothec of the landlord in respect of the current rent. By recent legislation hypothec has been rendered less stringent.

hȳ-pŏth′-ĕ-car-ȳ, *a.* [Lat. *hypothecarius*, from *hypotheca* = a pledge, a mortgage.] Of or pertaining to a pledge, mortgage, or hypothecation.

hypothecary-note, *s.*

Scots Law: A note given in acknowledgment of debt, but which cannot pass into circulation.

hȳ-pŏth′-ĕ-cāte, *v.t.* [Eng. *hypothec*; *-ate.*]

1. To pledge or mortgage to a creditor in security for some debt or liability, but without transfer of title or delivery of possession.

"Distinguished like all other *hypothecated* estates, by small columns."—*Sir W. Jones: Commentary on Isaeus.*

2. To pledge generally; to mortgage.

"He had no power to *hypothecate* any part of the public revenue."—*Macaulay: Hist. Eng.*, ch. xii.

hȳ-pŏth-ĕ-cā′-tion, *s.* [Eng. *hypothec*; *-ation.*] The act of hypothecating; the state of being hypothecated.

"The Athenian *hypothecations* were open and notorious."—*Sir W. Jones: Commentary on Isaeus.*

hȳ-pŏth′-ĕ-cā-tor, *s.* [Eng. *hypothecat(e)*; *-or.*] One who hypothecates or pledges anything as security for a debt or liability.

hȳ-pō-thē′-cĭ-ŭm, *s.* [Mod. Lat., from Gr. *ὑπό* (*hupo*) = under, and *θήκη* (*thēkē*) = a case.]

Bot.: A layer of cellular tissue, on which are attached the thecæ or spore sacs of the fruits of lichens.

hȳ-pŏth′-ĕ-năr, *a.* [Pref. *hypo-*, and Gr. *θέναρ* (*thenar*) = the palm.] (See the compound.)

hypothenar-eminence, *s.*

Anat.: The fleshy mass at the inner border of the hand. It consists of three muscles passing to the little finger.

hȳ-pŏth-ĕ-nūs′-al, *a.* [Hypotenusal.]

hȳ-pŏth′-ĕ-nūse, hȳ-pŏt′-ĕ-nūse, *s.* [Fr. *hypoténuse*, from Lat. *hypotenusa*, from Gr. *ὑποτείνουσα* (*γραμμή*), *hupoteinousa* (*grammē*) = the subtending (line): *ὑπό* (*hupo*) = under, and *τείνω* (*teinō*) = to stretch.]

Geom.: The name given to that side of a right-angled triangle which subtends, or is opposite to, the right angle. Its property—that the square described on it is equal to the sum of the squares described on the other two sides—is demonstrated (I. 47), and generalized, so as to apply to any figure (VI. 31) in Euclid. The discovery of this property is attributed to Pythagoras. [Lunes.]

hȳ-pŏth′-ĕ-sĭs, *s.* [Low Lat., from Gr. *ὑποθέσις* (*hupothesis*) = a placing under, a supposition: *ὑπό* (*hupo*) = under, and *τίθημι* (*tithēmi*) = to place; Fr. *hypothèse.*]

1. A supposition; a proposition or principle assumed or taken for granted in order to draw a conclusion or inference in proof of the point in question.

"*Hypothetical* necessity is that which the supposition or hypothesis of God's foresight and pre-ordination lays upon future contingents."—*Clarke: Leibnitz's Fifth Paper.*

2. A theory assumed to account for something which is not understood.

hȳ-pŏth′-ĕ-sīze, hȳ-pŏth′-ĕ-sīse, *v.i.* [Eng. *hypothes(is)*; *-ize.*] To form hypothesis; to assume what is not proved.

"The Greeks soon lost or entirely neglected it, when they began to *hypothesize*."—*Warburton: Divine Legation*, bk. iii., § 4.

hȳ-pō-thĕt′-ĭc, hȳ-pō-thĕt′-ĭc-al, *a.* [Gr. *ὑποθετικός* (*hupothetikos*) = supposed, imaginary Fr. *hypothétique.*] [Hypothesis.] Founded

on or including an hypothesis or supposition; of the nature of an hypothesis; assumed or taken for granted, though not proved, for the purpose of deducing proof of a point in question; conjectural; conditional.

"It is in vain that *hypothetic* notions will be assumed."—*Cogan: Theol. Disq.*, pt. ii., ch. i.

Hypothetical Universalists, *s. pl.*

Ch. Hist.: A name given in the seventeenth century to the followers of Moses Amyrant, who believed that God is disposed to show mercy to all, yet only on condition of their believing in Christ. [AMYRALDISM.]

hȳ-pō-thĕt'-ĭc-al-lȳ, *adv.* [Eog. *hypothetical; -ly.*] In a hypothetical manner; upon supposition or conjecture; conjecturally.

"This precept commands some things absolutely, which oblige all; some things only *hypothetically*."—*South: Sermons*, vol. viii., ser. 6.

* **hȳ-pŏth'-ĕ-tĭst,** *s.* [HYPOTHESIS.] One who makes or supports an hypothesis.

hȳ-pō-tra-chē'-lĭ ŭm, *s.* [Gr. *ὑποτραχήλιον* (*hupotrachēlion*) = the lower part of the neck, the neck of a column: *ὑπό* (*hupo*) = under, and *τραχηλος* (*trachēlos*) = a neck.]

Arch.: The necking of a column in the classical orders, consisting of several narrow cincturea cut into the shaft at the base of the echinus.

hȳ-pō-trō'-chŏĭd, *s.* [Gr. *ὑπότροχος* (*hupotrochos*) = with wheels under, on wheels, and *εἶδος* (*eidos*) = form; or, pref. *hypo-*, and Eng. *trochoid* (q.v.).]

Mach.: The curve traced by a point which is fixed relative to a circle rolling on the concave side of a fixed circle.

hȳ-pō-tū'-phĭte, *s.* [Pref. *hypo-*; Gr. *τῦφος* (*tuphos*) = smoke, mist; *τύφω* (*tuphō*) = to raise a smoke.]

Min.: The same as ARSENIC-GLANCE (q.v.). (*Brit. Mus. Cat.*)

hȳ-pŏt-ȳ-pō'-sĭs, *s.* [Gr. *ὑποτύπωσις* (*hupotupōsis*) = an outline, a sketch; from *ὑποτυπόω* (*hupotupoō*) = to sketch, to outline: *ὑπό* (*hupo*) = under; and *τύπος* (*tupos*) = a blow.]

Rhet.: A vivid, forcible, or animated description of a scene, so as to present it attractively to the mind.

hȳ-pŏx-ăn'-thĭn, hȳ-pŏx-ăn'-thĭne, *s.* [Gr. *ὑπόξανθος* (*hupoxanthos*) = yellowish or lightish brown.]

Chem.: The same as SARCINE or SARKIN (q.v.). (*Quain, Fownes, &c.*)

hȳ-pŏx-ăn'-thīte, *s.* [Gr. *ὑπόξανθος* (*hupoxanthos*) = yellowish or lightish brown; pref. *hypo-*; Gr. *ξανθός* (*xanthos*) = yellow, and suff. *-ite* (*Min.*) (q.v.).]

Min.: Sienna Earth. A brownish-yellow clay or ochre, believed by Dana to be only clayey yellow ochre.

hȳ-pŏx-ĭ-dā'-çē-æ, *s. pl.* [Mod. Lat. *hypoxis*, genit. *hypoxid(is)*; Lat. fem. pl. adj. suff. *-aceæ.*]

Bot.: Hypoxids. An order of endogens, alliance Narcisalea. It consists of herbs with a tuberous or fibrous perennial root, leaves growing from the root and crown; linear entire, plaited; perianth petaloid, six-parted; stamens six; ovary three-celled; fruit indehiscent, dry, or berried, one, two, or three-celled; seeds indefinite in number. Found in the warmer parts of the world. Known genera about four, species about sixty. (*Lindley.*)

hȳ-pŏx'-ĭdș, *s. pl.* [Mod. Lat. *hypoxis*, genit. *hypoxidis.*]

Bot.: Lindley's name for the Hypoxidaceæ (q.v.)

hȳ-pŏx'-ĭs, *s.* [Pref. *hypo-*, and Gr. *ὀξύς* (*oxus*) = sharp, referring to the base of the capsule. Cf. also *ὑποξίζω* (*hupoxizō*) = to be sourish.]

Bot.: The typical genus of the order Hypoxidaceæ (q.v.). The tubers of *Hypoxis erecta* are used by the North American Indians as a remedy for ulcers, and as a medicine in intermittent fevers.

hȳ-pō-zō'-ĭc, *a.* [Pref. *hypo-*, Gr. *ζῷον* (*zōon*) = a living creature, and Eng. suff. *-ic.*]

Geol.: Beneath the strata, in which traces of former organic life have hitherto been found. It is intended to be a less positive term than azoic, which absolutely declares that the strata to which it is applied are destitute of organic remains.

† **hypozoic-system,** *s.*

Geol.: The name applied by Phillips to rocks of the character now described. [HYPOZOIC.]

* **hȳpped,** *a.* [HIPPED.] Rendered melancholy or low-spirited; affected with hypochondria.

* **hȳp'-pĭsh,** *a.* [HIPPISH.]

hȳp-sĭ-prȳm'-nŭs, *s.* [Gr. *ὑψίπρυμνος* (*hupsiprumnos*) = with a high stern, *ὕψι* (*hupsi*) = high, and *πρύμνα* (*prumna*) = the stern; the hindermost part of anything.]

Zool.: A genus of marsupials, section Poephaga. The genus contains the Kangaroo-rats or Potoroos. [KANGAROO-RAT.]

Hȳp-sĭs-tär'-ĭ-ąnș, *s. pl.* [Gr. *ὑψιστος* (*hupsistos*) = the highest; *ὑψι* (*hupsi*) = high, aloft; Eng. pl. suff. *-arians.*]

Ch. Hist. & Eccles.: A sect of heretics which existed in Cappadocia, in the fourth century; their leading principle was the recognition of God as the "Most High." Rejecting sacrifices, circumcision, pictures, and images, they observed the Jewish Sabbath and Jewish distinctions as to clean and unclean food, and like the Magians, used fire and lights as symbols of the Deity. (*Blunt.*)

hȳp'-sō-dŏn, *s.* [Gr. *ὑψι* (*hupsi*) = high, and *ὀδούς* (*odous*), genit. *ὀδόντος* (*odontos*) = a tooth.]

Palæont.: A fish with saurodont teeth, found in the Cretaceous rocks, and the London clay.

hȳp-sŏm'-ĕ-tĕr, *s.* [Gr. *ὕψος* (*hupsos*) = height, and *μέτρον* (*metron*) = a measure.] An instrument for measuring heights by observing differences in barometric pressures at different altitudes. Specif., an instrument for determining altitudes by observation of the boiling-points of water.

hȳp-sō-mĕt'-rĭc, hȳp-sō-mĕt'-rĭc-ąl, *a.* [Eng. *hypsometer; -ic, -ical.*] Of or pertaining to hypsometry.

hȳp-sō-mĕt'-rĭc-ąl-lȳ, *adv.* [Eng. *hypsometrical; -ly.*] According to the rules or principles of hypsometry.

hȳp-sŏm'-ĕ-trȳ, *s.* [HYPSOMETER.] The art or science of measuring heights by observing differences in barometric pressures at different altitudes.

hȳp-sō-phȳl'-ląr-ȳ, *a.* [Gr. *ὕψος* (*hupsos*) = height; *φύλλον* (*phullon*) = a leaf, and Eng. suff. *-ary.*] (See the compound.)

hypsophyllary-leaves, *s. pl.*

Bot.: Bracts of leaves, in the axils of which the flowers are placed.

hȳp'-tĭ-dæ, *s. pl.* [Mod. Lat. *hypti(s)*; Lat. fem. pl. adj. suff. *-idæ.*]

Bot.: A family of labiate plants, tribe Ocimeæ.

hȳp'-tĭs, *s.* [Gr. *ὕπτιος* (*huptios*) = bent back, because the limb of the corolla is turned on its back.]

Bot.: The typical genus of the family Hyptidæ (q.v.).

hȳ-rā'-çē-ŭm, hȳ-rā'-çĭ-ŭm, *s.* [Mod. Lat. *hyrax*, genit. *hyraci(s)*; Lat. neut. sing. suff. *-um.*] The dung of the Cape hyrax, used as a substitute for castor.

hȳ-răç'-ĭ-dæ, *s. pl.* [Mod. Lat. *hyrax*, genit. *hyrac(is)*; Lat. fem. pl. adj. suff. *-idæ.*]

Zool.: The typical and only family of the order Hyracoidea (q.v.).

hȳ-ra-cōĭ'-de-ą, *s. pl.* [Mod. Lat. *hyrax*, genit. *hyrac(is)*; Gr. *εἶδος* (*eidos*) = form.]

Zool.: An order of mammals, one of three, having a zonary deciduate placenta, the others being Carnivora and Proboscidea. Incisors $\frac{2-2}{2-2}$, canines $\frac{0-0}{0-0}$, premolars $\frac{4-4}{4-4}$, molars $\frac{3-3}{3-3}$. The upper incisors have persistent pulpa, and are long and grooved, as in rodents; the lower are straight, and grooved longitudinally. The molars resemble those of the rhinoceros. The forefeet have four toes, the hind have three. The inner nail of the hind foot is singularly curved. There are no clavicles. The stomach is simple. The intestine has two accessory cæca in addition to the ordinary one. Only known genus, *Hyrax*, which Linnæus placed under Glires (Rodentia), and Cuvier under Pachydermata. None are known fossil.

hȳ-ra-cō'-thĕr'-ĭ-ŭm, *s.* [Gr. *ὕραξ* (*hurax*) [HYRAX], and *θηρίον* (*thērion*) = a wild animal.]

Palæont.: A genus of Tapiridæ(?). From the Eocene of Europe.

hȳ'-răx, *s.* [Gr. *ὕραξ* (*hurax*) = a shrew.]

Zool.: The typical genus of the family Hyracidæ, and the order Hyracoidea (q.v.). *Hyrax syriacus* is the Syrian hyrax, or Damau. [CONEY, DAMAN.] Other species are *H. capensis*, from Southern Africa (the Dutch call it badger), and *H. dorsalis*, from the west of Africa.

hyrse (y as ī), *s.* [Ger. *hirse.*] Millet.

* **hyrst** (y as ī), *s.* [HURST.]

hȳ'-sŏn, *s.* [Chinese *hi-tshun* = lit. first crop or blooming spring.] A kind of green tea imported from China.

hȳs-sŏp, hȳs-sō'-pŭs, *s.* [Lat. *hysopum*; Gr. *ὕσσωπος* (*hussōpos*), from Heb., see def.; Fr. *hysope, hyssope*; Prov. *isop, ysop*; Sp. *hisopo*; Port. *hysopo*; Ital. *isopo.*]

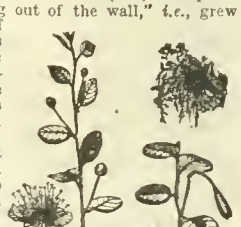
I. (*Of the form* hysaop):

1. *Bot.: Hyssopus officinalis*, a labiate plant with blue flowers. Wild in Southern Europe. Formerly used as a carminative and antispasmodic. It yields a kind of camphor.

¶ The Bastard Hysaop is *Teucrium pseudo-hyssopus*; the Hedge Hyasop, *Gratiola officinalis*; Water Hyssop, *Herpestes Monnieria.*

2. *Scripture:*

(1) *Old Test.:* Heb. אֵזוֹב (*ezob*) = a plant which "apruag out of the wall," *i.e.*, grew in crevices of walls, and was as remarkable for its diminutive size as the cedar for its magnitude (1 Kings iv. 33). A branch of it could be used like a sponge to take up a liquid (Exod. xii. 22). It had, at least ceremonially, if not even actually, detergent properties (Lev. xiv. 6, 49, 51, 52; Numb. xix. 6, 18). It was the symbol of spiritual purification from sin (Ps. li. 7). The passages in 1 Kings and Exod. suggest moss. But the probability is in favour of Dr. J. Forbes Royle's view that the plant is the caper (*Capparis spinosa*), the *asuf* of the Arabs, a climber among rocks, rooting in the fissures.



CAPPARIS SPINOSA.

(2) *New Test.:* In Heb. ix. 19, 21, the Old Testament *ezob* is rendered by the Gr. *ὕσσωπος* (*hussōpos*). If the hyssop of John xix. 29 furnished the stick to which the sponge was affixed, and was not itself the sponge, then moss would not answer the description, but the caper plant would [1].

II. (*Of the form* hyssopus):

Bot.: The typical and only genus of the family Hyssopidæ. The calyx has fifteen ribs, the four stamens are divergent.

hȳs-sŏp'-ĭ-dæ, *s. pl.* [Lat. *hyssop(us)*; fem. pl. adj. suff. *-idæ.*]

Bot.: A family of labiate plants, tribe Satureæ.

hȳs'-sō-pŭs, *s.* [HYSSOP.]

hȳs'-tą-tīte, *s.* [Gr. *ὕστατος* (*hustatos*) = the last, the utmost, the hindmost; suff. *-ite* (*Min.*).]

Min.: A variety of Ilmenite (*Br. Mus. Cat.*). Dana makes the two separate varieties of Menaccinite. Hystatite has about twenty per cent. of titanium and much sesquioxide of iron. From Arendal, in Norway, &c.

hys-ter- (1), *pref.* [Gr. *ὕστερος* (*husteros*) = the latter, later.] Later.

hys-tĕr- (2), **hys-tĕr-ō-**, *pref.* [Gr. *ὑστέρα* (*hustera*) = the womb.] Of or belonging to the womb.

hys-tĕr-ăl'-gĭ-ą, *s.* [Pref. *hyster-* (2), and *ἄλγος* (*algos*) = pain.]

Pathol.: Pain in the uterus.

hys-tĕr-ăn'-thoŭs, *a.* [Pref. *hyster-* (1); Gr. *ἄνθος* (*anthos*) = flower, and suff. *-ous.*]

Bot. (Of leaves): Appearing after the flowers. Example, many trees.

hys-tĕr'-ĭ-ą, *s.* [Gr. *ὑστέρα* (*hustera*) = the womb.]

Pathol.: A nervous disorder of females, usually most frequent at the catamenial period and in the unmarried. Indolent and luxurious habits, over-spoiling, disappointed affection, grief, &c., are amongst the chief causes. The symptoms are innumerable, and the imitation of other diseases allied to it endless; indeed, Dr. O. W. Holmes has said that a young hysterical girl would beat Ananias and Sapphira; but in many cases, owing to a real defect of will and mental power, the symptoms are extremely distressing, and the bodily health very indifferent, with great eructation of gas and copious discharge of pale urine, extreme spasmodic action, *globus hystericus*, shrieking, laughing, sobbing, &c. The remedy for all this is undoubtedly mental and moral treatment, change of scene and associations, with general care of the bodily health, particularly as regards diet and the digestive organs, and strict avoidance of alcoholic stimulants.

hys-tĕr'-ĭc, hys-tĕr'-ĭc-ąl, *a.* [Lat. *hystericus* = Gr. *ὑστερικός* (*husterikos*) = hysterical.]

Pathol.: Of or belonging to hysteria.

hys-tĕr'-ĭc-ąl-lў, *adv.* [Eng. *hysterical*; *-ly.*] In an hysterical manner.

hys-tĕr'-ĭcs, *s.* [Hysteria.]

hys-tĕr-ī'-tĭs, *s.* [Gr. *ὑστέρα* (*hustera*) = the womb, and suff. *-itis*, denoting inflammation.]

Pathol.: Inflammation of the womb.

hys-tĕr'-ĭ-ŭm, *s.* [Said to be from Gr. *ὑστέρησις* (*husterēsis*) = a coming too late, want, need, from the appearance of the parts of trees infested by the fungal.]

Bot.: A large genus of ascomycetous fungals, growing on the dead or living bark, stems, and leaves of various plants.

hys-tĕr-ō-, *pref.* [Hyster- (2).]

hys-tĕr'-ō-çēle, *s.* [Pref. *hystero-*, and Gr. *κήλη* (*kēlē*) = a tumour.]

Surg.: A tumour or hernia of the womb.

hys'-tĕr-ōid, *a.* [Eng., &c. *hysteria*, and Gr. *εἶδος* (*eidos*) = resemblance.] Resembling hysteria: as, a *hysteroid* disease. (*Dunglison.*)

hys-tĕr-ŏl'-ō-ġў, *s.* [Gr. *ὑστερολογία* (*husterologia*), from *ὕστερος* (*husteros*) = last, and *λόγος* (*logos*) = a word.] The same as Hysteron proteron (q.v.).

hys'-tĕr-ŏn prŏt'-ĕr-ŏn, *s.* [Gr. *ὕστερον* (*husteron*), neut. of *ὕστερος* (*husteros*) = last, and *πρότερον* (*proteron*), neut. of *πρότερος* (*proteros*) = before others.]

Rhetoric:

1. A figure of speech in which that word which should properly come last is placed first; as, *valet atque vivit* = he is well and lives.

2. An inversion of the natural or logical order; as by placing the conclusion before the premisses, &c.

"How wild
A *hysteron proteron's* this, which Nature crosses."
Beaumont: Psyche, c. 1, s. 85.

hys-tĕr'-ō-phўte, *s.* [Pref. *hystero-*, and Gr. *φυτόν* (*phuton*) = a plant.]

Bot.: A plant growing on dead or living matter; as a fungal.

hys-tĕr'-ō-tome, *s.* [Pref. *hystero-*, and Gr. *τομή* (*tomē*) = a cutting.] An instrument for cutting into the womb.

hys-tĕr-ŏt'-ō-mў, *s.* [Hysterotome.]

Surg.: The Cæsarean operation (q.v.).

hўs-trĭç'-ĭ-dæ, *s. pl.* [Lat. *hystrix*, genit. *hystric(is)*; fem. pl. adj. suff. *-idæ.*]

Zool.: A family of Rodentia having the body covered by quills—*i.e.*, long spines mingled with bristly hairs. There are four molars on each side in each jaw; the clavicles are imperfect.

hўs'-trĭx, *s.* [Lat. = Gr. *ὕστριξ* (*hustrix*) = a hedgehog.]

1. *Zool.:* The typical genus of the family Hystricidæ (q.v.). Tail not prehensile. *Hystrix cristata* is the Common Porcupine. [Porcupine.]

2. *Palæoat.:* The genus is found in the Upper Miocene of Europe, and in the Pliocene of Europe and America.

* **hўthe,** *s.* [Hithe.]

I.

I. The ninth letter, and the third vowel in the English alphabet. It has two principal sounds: (1) a long sound, as in *bind*, *find*, and in all words of one syllable ending in *e*, as in *fine*, *wine*, &c.; (2) a short sound, as in *fin*, *bill*, *fill*, &c. Besides these it has also three minor sounds: (1) as in *dirk*, *first*, &c.; (2) the French sound, as in *intrigue*, *machine*, &c.; and (3) the consonantal sound of *y*, when followed by a vowel, as in *Christian*, *million*, &c. *I* is uttered with a less opening of the mouth than *e*, the tongue being brought back to the palate, and striking the teeth next the cheek plate. With *a* and *e*, *i* makes several digraphs, as in *wail*, *neigh*, *field*, *seize*, *friend*: with *o* it forms a proper diphthong, as in *oil*. *A*, *i*, and *u* are by philologists called the primitive vowels, and from them all the various vowel sounds in the Aryan language have been developed. As a prefix, *i* was used in Middle English to represent the A.S. *ge*, as in *iwis* = *gewiss*. No true English word ends in *i*, its place as a final vowel being taken by *y*. *I* and *j* were formerly regarded as one character, and in dictionaries up to a comparatively modern date words beginning with these letters were classed together.

Ī, * **Ic,** * **Ich,** * **Ik,** * **Uch** (posses. **mi*, *my*, *mine*, dat. & obj. *me*, pl. nom. *we*, possess. *our*, *ours*, dat. & obj. *us*), *pron.* [A.S. *ic*; cogn. with Dut. *ik*; Icel. *ek*; Dan. *jeg*; Sw. *jag*; Goth. *ik*; O. H. Ger. *ih*; Ger. *ich*; Lat. *ego*; Gr. *ἐγώ* (*egō*); Sansc. *aham*; Wel. *i*; Run. *ia.*]

I. The nominative case of the first personal pronoun of the singular number; that pronoun by which a speaker or writer denotes himself.

2. (*As a noun*) *In metaphys.:* The conscious thinking subject; the ego. [Ego.]

* **Ī,** *exclam.* [Ave.]

Ī-ăc'-chŭs, *s.* [Bacchus.]

1. *Zool.:* A genus of Catarrhine monkeys occurring in South America.

2. *Palæont:* Found fossil in Tertiary or Post-Tertiary deposits in South America.

* **iacinth,** *s.* [Hyacinth.]

* **Ī'-ămb,** *s.* [Lat. *iambus.*] An iambus or iambic.

"Far be it from us to decide which of these so-called feet the grammarians considered to be *iambs*."—*Saturday Review*, February 23, 1883, p. 248.

ī-ăm'-bĭc, *a.* & *s.* [Lat. *iambicus*, from Gr. *ἰαμβικός* (*iambikos*).] [Iambus.]

A. *As adjective:*

1. Of or pertaining to the iambus.

2. Composed of iambics.

"Our common conversation frequently falls into *iambick* verse."—*Twining: Aristotle; On Poetry*, pt. i., § 7.

B. *As substantive:*

I. (*In Pros.*): A foot consisting of one short and one long syllable, or one unaccented and one accented.

2. (*Pl.*): Verses consisting of iambic feet. The iambic metre having been originally, according to Aristotle, employed in satirical poems, the term *iambics* came to be used as equivalent to a satire or lampoon.

"Stings, with *iambicks*, Bupalus his foe."
Fawkes: Epitaph on Hipponax.

* **ī-ăm'-bĭc-ąl,** *a.* [Eng., &c. *iambic*; *-al.*] The same as Iambic, *a.* (q.v.). (*Meres*, in *Eng. Garner*, ii. 110.)

* **ī-ăm'-bĭc-ąl-lў,** *adv.* [Eng. *iambical*; *-ly.*] In the manner of an iambic or iambics.

ī-ăm'-bĭcs, *s.* [Iambic, B. 2.]

* **ī-ăm'-bĭze,** *v.t.* [Eng. *iamb*; *-ize.*] To satirize in iambic verse, to lampoon.

"Iambick was the measure in which they used to *iambize* each other."—*Twining: Aristotle; On Poetry*, pt. i., § 6.

* **ī-ăm-bŏg'-rą-phĕr,** *s.* [Gr. *ἰαμβος* (*iambos*) = an iambus, and *γράφω* (*graphō*) = to write.] A writer of iambic verse.

ī-ăm'-bŭs, *s.* [Lat., from Gr. *ἴαμβος* (*iambos*).]

Pros.: A foot consisting of two syllables, of which the first is short or unaccented, and the second long or accented.

Ī-ăn'-thē, *s.* [Lat., = a Cretan virgin figuring in Ovid (*Met.* ix.).] [Asteroid, No. 98.]

ī-ăn'-thĭ-nąe, *s. pl.* [Lat. *ianthinæ* (pl.) = violet-coloured garments; *ianthinus* = Gr. *ἰάνθινος* (*ianthinos*) = violet-coloured: *ἴον* (*ion*) = the violet, and *ἄνθος* (*anthos*) = a flower.]

Zool.: Violet snail; a genus of molluscs, family Haliotidæ. The shell is thin, translucent, trochiform; the aperture four-sided; the animal with a large head, muzzle-shaped, with a tentacle and an eye-pedicel on each side, but no actual eye. Four species are known, all recent, from the Atlantic and the Coral Sea. (*S. P. Woodward.*) *Ianthina fragilis* is found in nearly every sea, and has helped to extend the range of other species parasitic on its shell. (*Lyell.*)

ī-ăn-thĭn'-ĭ-dæ, *s. pl.* [Mod. Lat. *ianthin(a)*; Lat. fem. pl. adj. suff. *-idæ.*]

Zool.: A family of Gasteropodous Molluscs, now generally merged in Haliotidæ. [Ianthina.]

Ī-ăp'-ĕ-tŭs, *s.* [Lat.]

1. *Mythol.:* The son of Titan and Terra.

2. *Astron.:* One of the satellites of Saturn (q.v.).

* **iasp,** *s.* [Fr. *jaspe.*] A jasper.

"The floore of *iasp* and emeraude was dight."
Spenser: Visions of Bellay, ii.

* **ī-ā-trą-lĭp'-tĭc,** * **ī-ā-trą-lĕp'-tĭc,** *a.* [Gr. *ἡ ἰατραλειπτική τέχνη* (*hē iatraleiptikē technē*) = the art of a surgeon who practises by anointing: *ἰατρός* (*iatros*) = a physician, and *ἀλειπτικος* (*aleiptikos*) = connected with training, from *ἀλείφω* (*aleiphō*) = to rub, to anoint.]

Med.: Of or belonging to an ancient system of therapeutics which aimed at cures by anointing with friction and other appliances.

* **ī-ăt'-rĭc,** * **ī-ăt'-rĭc-ąl,** *a.* [Gr. *ἰατρικός* (*iatrikos*), from *ἰατρός* (*iatros*) = a physician.] Relating or pertaining to physicians or medicine.

ī-ā-trō-, *pref.* [Gr. *ἰατρός* (*iatros*) = a physician.] In comp., a physician.

* **iatro-chemist,** *s.* A physician who was also a chemist. (*Bailey.*)

iatro-mathematician, *s.*

Hist.: One of a school of physicians who arose in Italy about the middle of the seventeenth century. They attempted to explain the mechanism and action of the human body on hydraulic and mechanical principles, making use, for the purpose, of mathematical calculations. Called also mechanicians.

* **iavel,** *s.* [Gavel.]

ib., *adv.* [A contraction of *ibidem* (q.v.).

Ī-bĕr'-ĭ-ąn, *s.* [From *Iberia*, the Latin name of Spain.]

1. One of the original inhabitants of Spain, now represented by the Basques.

2. The language of the Iberians, of which the modern Basque is supposed to be the representative.

ī-bĕr'-ĭs, *s.* [Named from Iberia, Spain, in which many of the species grow.]

Bot.: Candy-tuft; a genus of cruciferous plants, family Thlaspidæ. The pouch is emarginate, the valves keeled and winged, the cells one-seeded, the petals unequal. *Iberis*

amara, the Bitter Candy-tuft—a plant with white or purplish flowers—is found, but not properly wild, in Oxfordshire and Berkshire.

Ī-bĕr'-īte, *s.* [Lat. *Iber(ia)*; *-ite* (*Min.*) (q.v.).] [IBERIAN.]

Min.: Altered iolite, constituting a mineral akin to Pinite and Fahlunite. From Montalvan, near Toledo, in Spain.

Ī'-bĕx, *s.* [Lat.]

Zool.: A wild goat, or rather several species of wild goats, the best known of which is the Common Ibex (*Capra Ibex.*) It is the Ibex of the ancient Romans, the Steinbock of the Germans, and the Bouquetin of the French. The adult male is about five feet long from nose to tail, and two feet eight inches high at the shoulder. The horns are flat, with two longitudinal ridges at the sides, crossed by numerous transverse knots; they are subvertical, curved backwards, dark in colour. The hair is red-brown in summer and gray-brown in winter, the beard short and dark, the inside of the ears and under part of the tail white. The general colour of the female is earthy-brown and ashy. The young are gray. It inhabits the highest regions of the Alps. An analogous species, the *C. Pyrenaicus*, is found on the Spanish side of the Pyrenees. Three other species are found upon the Asiatic, and two more on the Abyssinian and Nubian mountains.

Ib'-id., *adv.* [A contraction of IBIDEM (q.v.).

Ib-ī'-dem, *adv.* [Lat., properly *ibi*, with demonstrative *-dem*, as in *idem*, *tandem*, &c.] In the same place; moreover.

Ib'-ĭ-jau (au as ŏw), *s.* [An American word.]

Ornith.: *Nyctibius grandis* of Vieillot. The Grand Ibijau is found in Guiana, &c.

Ī'-bĭs, *s.* [Lat. *ibis*; Gr. ἶβις (*ibis*) = the sacred ibis. See def.]

Ordinary Language & Zoology:

1. A genus of Tantalinæ. The bill is long, cylindrical, and arched from the base; the head naked; the wings broad, ample, the second and third quills longest; the plumage metallic. The Sacred Ibis (*Ibis religiosa*) was venerated among the ancient Egyptians, who preserved its remains as mummies, and represented it upon their monuments. It is about the size of a hen, the plumage white, with the end of the wing feathers black, the last coverts with elongated loose barbs, black with violet reflections; bill and feet black, as is the naked part of the head and neck. It is found through Africa. It is the *Abou Hannes* of Bruce. The Scarlet Ibis (*I. rubra*) is abundant on the banks of the Amazon, and in many other parts of South America. The Glossy Ibis (*I. falcinellus*) is dark-green above, and reddish-brown below; the whole plumage silky, and with a purplish bronze reflection. It is found in Europe, Egypt, Asia, and has straggled to Britain. It is believed to have been the Black Ibis of the ancients.

2. (*Pl.*): Tantalinæ, a sub-family of Ardeidæ. [TANTALINÆ.]

Ī-bȳc'-tĕr, *s.* [Gr. ἰβυκτήρ (*ibuktēr*) = one who begins a war song.]

Ornith.: A genus of Aquilinæ. *Ibycter leucogaster* is the Gallinaceous Eagle found in South America.

***ic,** *pron.* [I.]

Ī-căç-ī'-ną, *s.* [Sp. *icaco* = *Chrysobalanus icaca*, which Icacina resembles.]

Bot.: The typical genus of the order Icacinaceæ (q.v.). It consists of three or four shrubs from Western Africa.

Ī-căç-ĭ-nā'-çĕ-æ, Ī-cą-çĭn'-ē-æ, *s. pl.* [Mod. Lat. *icacin(a)*; Lat. fem. pl. adj. suff. *-aceæ*, *-eæ*.]

Bot.: A tribe of Olacaceæ, sometimes elevated into a distinct order. It consists of Hypogynous Exogens, of the alliance Berberales. The species are trees or shrubs, having alternate, simple leaves, without stipules, the flowers, which are generally hermaphrodite, being in cymes or panicules, each distinctly articulated on its pedicel. Calyx small, cup-shaped, five, rarely four, to six toothed, persistent. Corolla hypogynous, of five, or more rarely of four, or six, petals, sometimes united at the base into a short fleshy tube. Stamens equal in number to the petals; ovary five-, three-, or two-celled; ovules two in each cell. Fruit a drupe, generally one-celled, one-seeded; the seed pendulous. Found in the East Indies, Africa, South America, &c. Known genera about thirteen; species sixty-five or more.

Ī-căr'-ĭ-an, *a.* [From Icarus, a mythological hero, the son of Dædalus, who, when flying on wings from the anger of Minos, mounted too high, so that the heat of the sun melted the wax which cemented his wings, causing him to fall and perish in that part of the Ægean Sea, which was called after him.] Soaring too high; rash or adventurous in flight.

īçe, *yse, *iys, *iis, *s.* [A.S. *is*, *iss*; Icel. *iss*; Sw. *is*; Dan. *iss*; Dut. *ijs*; Ger. *eis*. Mahn believes these to be from a hypothetical A.S. root *isan*; Goth. *eisan* = to shine, cogn. with. Ger. *eisen* = iron, and Lat. *æs* = brass, copper. Skeat supposes its root is in *is* = to go swiftly; cf. Sansc. *ish* = to go, to hasten, to fly; Icel. *eisa* = to go swiftly.]

I. *Ordinary Language*:

1. Water, or more rarely any other liquid, congealed by cold.

†2. Concreted sugar. (*Johnson.*)

3. An ice-cream (q.v.).

¶ *To break the ice*: [BREAK, *v.*, B. II. 41 (2)].

II. *Technically*:

1. *Chem. & Min.*: Water congealed so as to be rendered solid by cold. Dana ranks water as a mineral species, and notes that its crystals are hexagonal and occur usually in compound stellate forms. Ice is transparent owing to the close contact of the crystals which compose it: this makes the individual particles so blend as to render the mass optically, as well as mechanically, continuous. Its specific gravity is 0·914. Water freezes at 32° of Fahr., at zero (0) of Centigrade. Its greatest density is at about 40° F., 4° or 5° C., hence ice floats on water. The surface of sheets of water is frozen while their mass remains liquid.

2. *Meteor., Physical Geog., Geol., &c.*: Ice exists at all seasons, both on land and on the ocean around the Northern and the Southern Poles, and in all latitudes on mountain tops; it occurs in winter, in most countries, by the freezing of lakes, ponds, streams, &c. Some of the forms in which it is found are ice-fields, icebergs, &c. (q.v.). Its action is the key to explain many geological phenomena [ICE-AGE, &c.] In some places, as in Siberia, it has been found interstratified with sand, or, as in New South Shetland, with volcanic ash.

3. *Manuf. & Comm.*: Ice is very largely gathered from the rivers of the Northern United States, Norway, &c., and sent to the cities for summer use. Its exportation began at Boston, in 1806. Ice-making machines have been much perfected of late years, and artificial ice has come into extensive use in this country.

4. *Therap.*: It is used as a remedy or palliative in hernia, hæmorrhage, inflammation of the brain, &c.

¶ *Anchor-ice*: [GROUND-ICE].

ice-age, *s.*

Geol.: The glacial period (q.v.).

ice-anchor, *s.*

Naut.: A bent bar whose prong enters a hole in the ice; to the other end a mooring-hawser is bent.

ice-apron, *s.* [ICE-BREAKER.]

ice-beam, *s.*

Ship-build.: A guard-plank at a ship's bow to fend off ice.

ice-bearer, *s.*

Mach.: A cryophorus (q.v.).

ice-belt, *s.* A belt or fringe of ice along the shore in the Arctic regions.

ice-box, ice-chest, *s.* [REFRIGERATOR.]

ice-breaker, *s.*

1. A starling to protect the upper end of a bridge-pier. It presents an inclined edge up stream to break a field or cake of floating ice, or to sustain the pressure of a gorge of ice.

2. A pier arranged with reference to the current, to prevent access of ice to the vessels in a harbour.

3. An ice-breaker for harbours is a steam-vessel provided with means for opening or keeping open a channel for ships.

ice-brook, *s.* A frozen stream or brook.

"A sword of Spain, the *ice-brook's* temper."
Shakesp. Othello, v. 2.

ice-calorimeter, *s.*

Mach.: A method of determining specific heats by means of ice. Black's calorimeter consists of a block of ice with a cavity in its centre, with a cover of ice. The body, whose specific heat is to be determined, is raised to a certain temperature, and then put in the cavity. When the body falls to 32° F., the freezing point, it is wiped clean, as is the cavity itself, with a cloth previously weighed. The increase of weight in the cloth measures the ice converted into water, whence may be deduced the specific heat of the body, the rule being that 79·25, or in round numbers 80 thermal units, are needed to liquefy a pound of ice.

ice-cap, *s.*

1. *Geol.*: The great sheet of land-ice formed round the pole in glacial times. (*Croll.*)

2. *Med.*: A bladder filled with pounded ice, applied to the head in cases of inflammation of the brain.

ice-eave, *s.* [GLACIÈRE.]

ice-chair, *s.* A chair on runners to hold a lady who is pushed along by a skater in the rear.

ice-chisel, *s.* A socket chisel with a long handle, used in cutting holes in ice, either in Arctic explorations or as a starting-point for the saw in gathering in for use.

ice-claw, *s.* A rope and pair of claws for grappling blocks of ice.

ice-cold, *a.* As cold as ice; very cold.

"And *ice-cold* grew the night."
Longfellow: Sir Humphrey Gilbert.

ice-cream, iced cream, *s.* A kind of confectionery made by congealing cream, previously flavoured with various essences in a vessel surrounded by a freezing mixture.

† ice-drops, *s. pl.*

Bot.: Processes resembling icicles in form and transparency, as in *Mesembryanthemum glaciale.*

ice-escape, *s.* A contrivance for rescuing persons from drowning by the breaking of ice.

ice-fall, *s.* A mass of ice resembling a waterfall in outline.

ice-fender, *s.* A fender or guard used to protect a vessel from injury by ice; an ice-beam.

ice-fern, *s.* A fern-like incrustation of ice or hoar-frost produced on window-panes by the freezing of the insensible moisture. (*Tennyson: Aylmer's Field*, 222.)

ice-field, *s.* [ICE-PLAIN.]

ice-foot, *s.* The same as ICE-BELT (q.v.).

"The cliffs to the base of which the *ice-foot* clings."—*Geikie: Great Ice Age* (ed. 1877), p. 65.

ice-hill, ice-mountain, *s.* An iceberg.

ice-hook, *s.* A hook used in landing ice and transporting it on ways to a house or hold.

ice-island, ice-isle, *s.* A vast body of floating ice.

ice-master, *s.* One who has charge of a whaler on the ice.

ice-pack, *s.* An icefloe (q.v.).

ice-pail, *s.* A pail containing ice for cooling wines, &c., for dinner.

ice-pitcher, *s.* A metallic pitcher with non-conducting interval between its double sides.

ice-plane, *s.* A tool for dressing the surfaces of ice-blocks before stowage in bulk.

ice-plough, *s.* A tool for cutting grooves in pond ice, to facilitate its fracture or cleavage into square blocks for landing, transportation, and stowage.

ice-poultice, *s.*

Med.: A poultice for application to hernial tumours, &c. It is made by filling a bladder with pounded ice.

ice-safe, *s.* [REFRIGERATOR.]

ice-saw, *s.* A long saw with a weight at the lower end (beneath the ice), for cutting long kerfs in pond ice, to make a track for vessels, or to form long slices of ice.

ice-system, *s.* Ice action within a defined area, or emanating from a local centre.

"Under such circumstances Wales, Scotland, and Scandinavia must have had their own *ice-systems*."—*Rev. J. Bonney: Abstract of Proceedings of Geol. Soc. of London*, No. 366, Session 1875-76.

ice-table, *s.* A flat level sheet or mass of ice.

ice-tongs, *s. pl.* Grasping implements for carrying blocks of ice; or, on a small scale, for handling pieces of ice at table.

ice-water, iced-water, *s.*

1. Water from melted ice.
2. Water cooled by ice.

īçe, *v.t.* [Ice, *s.*]

I. *Lit.:* To cover with ice; to convert into ice: to freeze.

"*Icing* the pole." *Byron: Childe Harold*, iv. 183.

II. *Figuratively:*

1. To cover with concreted sugar; to frost.
2. To chill, to freeze.

īçe'-bĕrg, *s.* [Eng. *ice*, and *berg* (q.v.).]

Ord. Lang. & Geol.: A hill of ice which is either floating in the ocean or has somewhere taken the ground. The genesis of an iceberg is generally on the shore; it exists first as a glacier (q.v.), but when this in its onward progress reaches the cliffs and glides down them into the ocean, it loses the name of glacier and takes that of iceberg. Scoresby counted 500 of them drifting between lat. 69° and 70° N. The magnitude of some icebergs is very great. Capt. Sir John Ross saw several of them together in Baffin's Bay aground in water 1,500 feet deep. One seen off the Cape of Good Hope was two miles in circumference and a hundred and fifty feet high. Others were from 250 to 300 feet above the sea. For every cubic foot above there must be at least eight below. The rotation of the earth makes the icebergs which escape from the North Polar regions in proximity to Europe drift partly to the westward, and they rarely reach Britain, though Cowper has a poem "On the Ice-islands seen floating in the German Ocean, March 19, 1799." Many impinge upon the eastern shores of Iceland; escaping that island they are borne away in the direction of the eastern shores of America. They do not approach the equator nearer than about 40° N. and 36° to 39° S. When an iceberg reaches a coast and melts, it generates chilling fogs, and so reduces the temperature as temporarily to deteriorate the climate of the adjacent land. They carry with them earth, rocks, &c., obtained when they were in the glacier state. These, when the ice melts, fall to the bottom of the sea and form moraines. When they scrape their way over the bed of the ocean they score the several rocks over which they pass. They often transport animals and seeds of plants to great distances. īçe'-blĭnk, *s.* [Dan. *iisblink*; Sw. *isblink*.] [Blink.]

īçe'-bōat, *s.* [Eng. *ice*, and *boat*.]

A boat employed for travelling on ice.

2. A strong boat, driven by steam, and used for breaking a passage through ice.

īçe'-bŏ̄und, *a.* [Eng. *ice*, and *bound*.]

1. Totally or completely surrounded with ice, so as to be incapable of moving: as, an *icebound* vessel.

2. Fringed or edged with ice, so as to be inaccessible to ships.

"From the *ice-bound*
Desolate northern bays."
Longfellow: Evangeline, i. 2.

īçe'-bŭĭlt, *a.* [Eng. *ice*, and *built*.]

1. Composed of ice.
2. Loaded with ice.

"Where shaggy forms o'er *ice-built* mountains roam."
Gray: Progress of Poesy.

īçed, *pa. par.* & *a.* [Ice, *v.*]

A. *As pa. par.:* (See the verb).

B. *As adjective:*

I. *Ordinary Language:*

1. Converted into or covered with ice; frozen; congealed.

2. Covered with concreted sugar; frosted.

II. *Bot.:* Covered with glistening particles resembling icicles; as in *Mesembryanthemum pisiforme*.

īçe'-flŏe, *s.* [Eng. *ice*, and *floe*.] A sheet of ice; a small ice-field.

"He reached Hudson's Bay, where his ship was frozen up among the *ice-flocs*."—*Taylor: Words & Places* (1878), ch. ii.

īçe'-hŏ̄use, *s.* [Eng. *ice*, and *house*.] A house, structure, or repository for the storage of ice during warm weather; it is frequently constructed underground, with a drain for carrying off the water of the ice when dissolved.

Īçe'-land, *s.* & *a.* [Eng. *ice*, and *land*.]

A. *As substantive:*

Geog.: An island in the north-west corner of Europe, between lat. 63° 24′ and 66° 33′ N., long. 13° 30′ to 24° 30′ W.

B. *As adj.:* Of, belonging to, or in any way connected with the place described under A.

Iceland-moss, *s.*

Bot.: *Cetraria islandica*, formerly called *Lichen islandicus*. The thallus, which is olive-brown, paler on one side, is erect and tufted, laciniated, channelled, and dentato-ciliated; the fertile lacinia very broad, the shields, which are brown, flat, with their border elevated. It is found in small quantity on the ground in exposed places in Scotland. It is slightly bitter, as well as mucilaginous. An aqueous decoction of it, when cooled, makes a thick jelly. It is used as a tonic, demulcent, and nutrient.

Iceland-spar, *s.*

Min.: A transparent variety of Calcite. Called also Doubly-refracting spar. Prisms of it are used for the polarization of light.

Īçe'-land-ĕr, *s.* [Eng. *Iceland*; *-er*.] A native of Iceland.

Īçe-lăn'-ĭc, *a.* & *s.* [Eng. *Iceland*; *-ic*.]

A. *As adj.:* Of or pertaining to Iceland.

B. *As subst.:* The language or literature of Iceland; sometimes called also Old Norse. It is the oldest language of the Scandinavian group.

īçe'-măn, *s.* [Eng. *ice*, and *man*.]

1. One who is skilful in travelling upon ice.

2. One who collects ice for sale; a dealer in ice.

īçe'-măn-shĭp, *s.* [Eng. *iceman*; *-ship*.] Skill in travelling upon ice or in mountaineering.

"What I may venture to call *icemanship* is a fine art, only acquired by much experience."—*Pall Mall Gazette*, June 11, 1884.

īçe'-plāin, *s.* [Eng. *ice*, and *plain*.] A plain or sheet of ice; an ice-field.

īçe'-plant, *s.* [Eng. *ice*, and *plant*.]

Bot.: *Mesembryanthemum crystallinum*. It is called ice-plant from the many watery pustules covering its leaves and shining like ice. It is a diffusely procumbent herb, with ovate alternate leaves, clasping the stem and axillary, almost sessile, flowers. It grows on sandy seashores at the Cape of Good Hope, in the Canary Islands, and in Greece near Athens. There are two varieties, *M. crystallinum* and *M. glaciale*; the latter is that cultivated in gardens. The juice is said to be diuretic, and has been given in liver complaints. The burnt ashes are used by the Spaniards like barilla in glass works. Called from its lustre also Diamond-plant.

īçe'-quāke, *s.* [Eng. *ice*, and *quake*.] The crash which precedes and gives warning of the breaking up of icefloes.

īçe'-spar, *s.* [Eng. *ice*, and *spar*.]

Min.: The same as Ryacolite or Rhyacolite (q.v.).

*** ich, * iche,** *pron.* [I.]

ich dien, *phrase.* [Ger.] Literally, I serve. The motto of the Prince of Wales, originally adopted by the Black Prince, and continued to the present day.

*** ich,** *v.t.* [Eke, *v.*]

*** ich, * iche,** *pron.* or *a.* [Each.]

ĭch-neŭ'-mŏn, *s.* [Lat. *ichneumon*, from Gr. ἰχνεύμων (*ichneumōn*) = literally, the tracker; hence, (1) the animal described under 1, (2) a wasp which hunts spidera (not the modern use of the word by entomologists); from ἰχνεύω (*ichneuō*) = to track or trace out; ἴχνος (*ichnos*) = a track, a footstep.]

I. *Zool.:* *Herpestes Ichneumon*, which has been called also *H. Pharaonis*, *Ichneumon Pharaonis*, and, by Linnæus, *Viverra Ichneumon*. It is a chestnut-brown and yellow colour, the feet and muzzle black or deep chestnut, the tail with a tuft of long hair. It is the animal correctly described by the classic writers as devouring the eggs of the crocodile, on which account it was a sacred animal among the Egyptians. It feeds also on other eggs, fowls, plants, &c. It is occasionally domesticated in Egypt.

2. *Entom.:* The typical genus of the family Ichneumonidæ (q.v.). Linnæus placed under it nearly the whole Pupivora; now it is much restricted.

ichneumon-flies, *s.pl.* [Ichneumonidæ.]

ĭch-neŭ-mŏn'-ĭ-dæ, *s. pl.* [Lat. *ichneumon*; fem. pl. adj. suff. *-idæ*.]

Entom.: Ichneumon-flies, cuckoo-flies; a family of Hymenopterous Insects, sub-tribe Pupivora of Latreille, now often called Entomophaga. Once made to contain the whole of that tribe, it is now limited to species which have straight antennæ, and the abdomen attached to the extremity of the metathorax. Like other entomophaga, they lay their eggs in the bodies or eggs of other insects; these hatching produce larvæ which devour the egg or the animal, whether immature or mature, in which they were developed. When a caterpillar is attacked, the larvæ of the ichneumon feed on its fat, avoiding all destruction of the alimentary canal; the animal is sickly, but is able to go into the chrysalis state; instead, however, of a lepidopterous insect emerging, there come forth multitudes of small ichneumons. Myriads of chrysalides are thus destroyed.

ĭch-neŭ-mŏn'-ĭ-dan, *a.* & *s.* [Mod. Lat. *ichneumonid(æ)*; *-an*.]

A. *As adj.:* Classed under, or in any way connected with the Ichneumonidæ (q.v.).

B. *As substantive:*

Entom.: One of the Ichneumonidæ.

ĭch-neŭ-mŏn'-ĭ-dēs, *s. pl.* [Lat. *ichneumon*; masc. or fem. pl. adj. suff. *-ides*.]

Entom.: The name given by Swainson to one of the five primary tribes into which he divides the Hymenoptera. It is nearly identical with Latreille's Pupivora (q.v.), now often called Entomophaga (q.v.).

ĭch'-nīte, *s.* [Gr. ἴχνος (*ichnos*) = a track, a footprint; *-ite* (*Min.*) (q.v.).]

Palæont.: A fossil footprint. Ichnite occurs much more frequently in compos. than as a separate word—*e.g.*, ornith*ichnite* = the fossil footprint of a bird; tetrapod*ichnite* = the fossil foot-print of a saurian or batrachian. [Cheirotherium.]

ĭch-nŏ-car'-pŭs, *s.* [Gr. ἴχνος (*ichnos*) = a trace, a vestige, and καρπος (*karpos*) = fruit.]

Bot.: A genus of Apocynaceæ, tribe Wrightieæ. *Ichnocarpus frutescens* is sometimes used in India as a substitute for sarsaparilla.

ĭch'-nŏ-grăph, *s.* [Gr. ἴχνος (*ichnos*) = a footstep, and γράφω (*graphō*) = to write, to draw.]

Drawing: A ground-plan; an orthograph is a front elevation, a scenograph a general view.

ĭch-nŏ-grăph'-ĭc, ĭch-nŏ-grăph'-ĭc-al, *a.* [Eng. *ichnograph*; *-ic*, *-ical*.] Of or pertaining to ichnography; describing or forming a ground plan.

"Penault has assisted the text with a figure or *ichnographical* plot."—*Evelyn: Architecture.*

ĭch-nŏg'-ra-phy, *s.* [Eng. *ichnograph*; *-y*.]

* I. *Ord. Lang.:* A description of ancient works of art, as statuary, &c.

2. *Arch.:* A horizontal section of a building, &c., showing its true dimensions according to a geometric scale; a ground-plan.

"To have a draught of the ground-plot or *ichnography* of every story in a paper by itself."—*Moxon: Mechanical Exercises.*

ĭch'-nŏ-līte, *s.* [Gr. ἴχνος (*ichnos*) = a footprint, and λίθος (*lithos*) = a stone.]

Geol. & Palæont.: A stone on which an ichnite or footprint of a fossil animal or bird is impressed.

ĭch-nŏ-lith-ŏ-lŏg'-ĭc-al, ĭch-nŏ-lŏg'-ĭc-al, *a.* [Eng. *ichnolitholog(y)*, *ichnolog(y)*; *-ical*.] Pertaining to or connected with ichnolithology or ichnology (q.v.).

ĭch-nō-lĭth-ŏl'-ō-ğў, *s.* [Gr. ἴχνος (*ichnos*) = a footprint; λίθος (*lithos*) = a stone, and λόγος (*logos*) = a discourse.] The same as ICHNOLOGY (q.v.).

ĭch-nŏl'-ō-ğў, *s.* [Gr. ἴχνος (*ichnos*) = a footprint, and λόγος (*logos*) = a discourse.]

Geol. & Palæont.: That branch of science which classifies and treats of fossil footprints; such phenomena taken collectively. [FOOTPRINTS.]

ī'-chŏr, *s.* [Gr. ἰχώρ (*ichōr*) = juice, the blood of the gods.]

1. *Ord. Lang.:* A thin watery humour like serum; a watery, acrid discharge from a wound, ulcer, &c.

"Milk, drawn from some animals that feed only upon flesh, will be more apt to turn rancid and putrefy . . . then it will turn into an ichor."—*Arbuthnot: On Aliments.*

2. *Myth.:* The ethereal fluid which took the place of blood in the veins of the gods.

"Of course his perspiration was but *ichor*,
Or some such other spiritual liquor."
Byron: Vision of Judgment, XXV.

ī-chŏr-hæ'-mĭ-ą, *s.* [Gr. ἰχώρ (*ichōr*), and αἷμα (*haima*) = blood.]

Pathol.: The same as PYÆMIA (q.v.).

***ī-chŏr-ŏl'-ō-ğў,** *s.* [Gr. ἰχώρ (*ichōr*) = juice, blood of the gods, and λόγος (*logos*) = a discourse.] The anatomy of the lymphatic and secreting systems.

***ī'-chŏr-oŭs, *ī'-chŏr-ōse,** *a.* [Eng. *ichor; -ous, -ose.*] Like ichor; thin, watery, serous.

"The pus from an ulcer of the liver, growing thin and *ichorous*, corrodes the vessels."—*Arbuthnot: On Diet*, ch. iii.

ĭch-thĕl'-ĭ-dæ, *s. pl.* [Mod. Lat. *ichthel(is);* Lat. fem. pl. adj. suff. *-idæ.*]

Ichthy.: The Sun-fishes of Jordan, a family of Acanthopteri. They are percoid fishes, with a single dorsal fin, either continuous or deeply divided, with eight to twelve spines; anal fin large with three to nine spines; body oblong, more or less elevated, sometimes much compressed. Colours usually brilliant, chiefly olive green, with spots or shades of blue, yellow, orange, or violet. Fresh-water carnivorous fishes, many of which build nests which they defend with great courage. Genera about fifteen, species forty, all American; most abundant in the Mississippi valley. Subfamilies, Micropterinæ, Centrarchinæ, and Ichthelinæ. (*Jordan: Vert. Anim. Nor. U. States.*)

ĭch-thĕ-lĭ'-næ, *s. pl.* [Mod. Lat. *ichthel(is);* Lat. fem. pl. adj. suff. *-inæ.*]

Ichthy.: A sub-family of Ichthelidæ. They have the dorsal fin undivided, notably larger than the anal one. (*Jordan.*)

ĭch'-thĕ-lĭs, *s.* [Gr. ἰχθύς (*ichthus*) = a fish, and ἥλιος (*helios*) = the sun.]

Ichthy.: The typical genus of the sub-family Ichthelinæ and the family Ichthelidæ (q.v.). *Ichthelis incisor* is the Blue Sun-fish, or Copper-nosed Bream. Nine others are in the Northern States of America. (*Jordan.*)

ĭch'-thĭ-dĭn, *s.* [Gr. ἰχθύς (*ichthus*) = a fish; εἶδος (*eidos*) = form, and suff. *-in.*]

Chem.: A substance contained in the immature eggs of cyprinoid fishes.

ĭch'-thĭn, ĭch'-thĭne, *s.* [Gr. ἰχθυς (*ichthus*) = a fish, and suff. *-in, -ine* (*Chem.*).]

Chem.: The azotised constituent of the eggs of cartilaginous fishes. It forms homogeneous, white, transparent grains, soft to the touch, insoluble in water, alcohol, and ether. It gives by analysis 50·2 to 51 per cent. of carbon; 6·7 to 7·8 hydrogen; 14·7 to 15·8 nitrogen, and 1·9 phosphorus (?). (*Watts.*)

ĭch'-thu-lĭn, *s.* [Gr. ἰχθύς (*ichthus*) = a fish; ὕλη (*hulē*) = matter, and suff. *-in.*]

Chem.: A strongly albuminous liquid in the very young eggs of cyprinoid fishes. It contains 52·5 to 53·3 per cent. of carbon; 8 to 8·3 hydrogen; 15·2 nitrogen; 1 sulphur, and 6 phosphorus. It seems to disappear as the eggs approach maturity, and to be replaced by albumin. (*Watts.*)

ĭch-thў-dī'-ną, *s. pl.* [Mod. Lat. *ichthydi(um);* Lat. neut. pl. adj. suff. *-ina.*]

Zool.: A family of Rotatoria, founded by Ehrenberg. There is no carapace, the rotatory organ is single, not continuous, not lobed nor divided at the margin.

ĭch-thў'-dī-ŭm, *s.* [Mod. Lat. from Gr. ἰχθύδιον (*ichthudion*) = a little fish.]

Zool.: The typical genus of the family Ichthydina (q.v.). It is somewhat doubtfully established.

*** ĭch'-thў-ĭc,** *a.* [Gr. ἰχθύς (*ichthus*) = a fish.] Of or pertaining to fishes; having the characteristics of a fish.

ĭch'-thў-ō-cŏl, ĭch-thў-ō-cŏl'-ą, *s.* [Gr. ἰχθυόκολλα (*ichthuokolla*) = slime from the belly of a fish, from ἰχθύς (*ichthus*) = a fish, and κόλλα (*kolla*) = glue.] Fish-glue; isinglas; a glue prepared from the air-bladders of certain fishes, particularly of the great aturgeon, *Acipenser huso.*

ĭch-thў-ō-cŏp'-rŭs, ĭch-thў-ō-cŏp'-rō-lĭte, *s.* [Gr. ἰχθύς (*ichthus*) = a fish; κόπρος (*kopros*) = dung, and λίθος (*lithos*) = a stone.]

Palæont.: A coprolite derived from fishes; the excrement of fishes fossilized.

ĭch-thў-ō'-dŏ-ą, *s. pl.* [Mod. Lat., from Gr. ἰχθύς (*ichthus*) = a fish, and εἶδος (*eidos*) = resemblance.]

Entom.: A genus of Beetles, family Cerambycidæ. Habitat of the typical species the Philippine Islands. (*Larousse.*)

ĭch-thў-ō-dor'-ų-lĭte, *s.* [Gr. ἰχθύς (*ichthus*) = a fish; δόρυ (*doru*) = a spear, and λίθος (*lithos*) = a stone.]

Palæont.: The spine of a fin. Most Ichthyodorulites are believed to have come from fishes of the order Cestraphori of Owen. They are found in the Lias, the Upper Silurian, &c.

ĭch-thў-ŏğ'-rą-phў, *s.* [Gr. ἰχθύς (*ichthus*) = a fish, and γράφω (*graphō*) = to write.] A treatise or discourse on fishes; a description of fishes.

ĭch'-thў-ōĭd, *a.* [Gr. ἰχθύς (*ichthus*) = a fish, and εἶδος (*eidos*) = form.]

Zool. & Palæont.: Resembling fish. Used chiefly of reptiles having some of the characteristics of fishes.

ĭch-thў-ŏl'-ą-trў, *s.* [Gr. ἰχθύς (*ichthus*) = a fish, and λατρεία (*latreia*) = worship.]

Religions: Fish-worship; the adoration of gods partially or entirely fish-shaped.

"An *ichthyolatry* connected with Derceto or Margates."—*Layard: Nineveh*, ii. 466.

ĭch'-thў-ō-lĭte, *s.* [Gr. ἰχθύς (*ichthus*), genit. ἰχθύος (*ichthuos*) = a fish, and λίθος (*lithos*) = stone.]

Palæont.: Fish remains; a fossil fish or part of one, or the impression left by one or other of these on the rocks. [FISH, II. 2.]

"The Ludlow rock still remains—*i.e.*, the lowest stage in the crust of the globe in which any *ichthyolites* have been detected."—*Murchison: Siluria*, ch. vi.

ĭch-thў-ŏ-lŏğ'-ĭc, ĭch-thў-ō-lŏğ'-ĭc-ąl, *a.* [Eng. *ichthyolog(y); -ic, -ical.*] Of or pertaining to ichthyology.

ĭch-thў-ŏl'-ō-ğĭst, *s.* [Eng. *ichthyolog(y); -ist.*] One versed or learned in ichthyology.

ĭch-thў-ŏl'-ō-ğў, * ĭc-thў-ŏl'-ō-ğў, *s.* [Gr. ἰχθύς (*ichthus*) = a fish, and λόγος (*logos*) = a discourse.]

Nat. Science: The science which treats of fishes. Aristotle (B.C. 384–322) described fishes as well as other animals in his *Natural History.* Belon in 1553, Rondelet in 1554 and 1555, Salviani (1554–1558), Willoughby (1635–1672), John Ray (1628–1705), all made important contributions to Ichthyology. Artedi (1705–1735) was the precursor of Linnæus (1707–1778). Cuvier's *Histoire Naturelle de Poissons* was issued between 1828 and 1849; Agassiz's various papers and publications on Ichthyology between 1829 and 1844; Yarrell's *History of British Fishes* in 1835 and 1836. [FISH.]

*** ĭch'-thў-ō-măn-çў,** *s.* [Gr. ἰχθύς (*ichthus*) = a fish, and μαντεία (*manteia*) = prophecy, divination.] Divination by the inspection of the heads or entrails of fish.

ĭch-thў-ō-mor'-phą, *s pl.* [Gr. ἰχθύς (*ichthus*) = a fish, and μορφη (*morphē*) = form.]

Zool.: Owen's name for the Urodela, or Tailed Amphibians.

ĭch-thў-ō-mor'-phĭc, *a.* [Gr. ἰχθύς (*ichthus*) = a fish; μορφή (*morphē*) = form, shape, and Eng. suff. *-ic.*] Formed in all or some respects like a fish.

ĭch-thў-ō-mўz'-ŏn, *s.* [Gr. ἰχθύς (*ichthus*) = a fish, and μυζάω (*muzaō*) = to suck.]

Ichthy.: A genus of Petromyzontidæ (Lampreys). *Ichthyomyzon argenteus* is the Silvery Lamprey. It occurs in the great American lakes, &c. (*Jordan: Vert. Anim. Nor. Unit. States.*)

ĭch-thў-ō-păt'-ō-lĭte, *s.* [Gr. ἰχθύς (*ichthus*) = a fish; πάτος (*patos*) = a beaten way, and λίθος (*lithos*) = a stone.]

Palæont.: A fossil track supposed to have been left by the pectoral fins of fishes moving over wet silt, sand, &c.

ĭch-thў-ŏph'-ą-ğĭst, *s.* [Eng. *ichthyophag(y); -ist.*] One who eats or lives upon fish.

ĭch-thў-ŏph'-ą-goŭs, *a.* [Eng. *ichthyophag(y); -ous.*] Eating or living upon fish. (*De Quincey: Autog. Sketches*, i. 78.)

ĭch-thў-ŏph'-ą-ğў, *s.* [Gr. ἰχθύς (*ichthus*) = a fish, and φαγεῖν (*phagein*) = to eat.] The practice or habit of eating fish; fish-diet.

ĭch-thў-ŏph-thăl'-mīte, *s.* [Gr. ἰχθύς (*ichthus*) = a fish, and ὀφθαλμός (*ophthalmos*) = an eye.]

Min.: A variety of Apophyllite.

ĭch-thў-ŏph'-thĭ-rą, *s. pl.* [Gr. ἰχθύς (*ichthus*), genit. ἰχθύος (*ichthuos*) = a fish, and φθείρ (*phthеir*) = a louse.]

Zool.: An order of Crustacea, sub-class Epizoa. The species, which when adult are parasitic on the skin, eyes, or gills of fishes, has rudimentary limbs, a suctorial mouth, and in the female external ovisaca. The larva is locomotive.

ĭch-thў-ŏps'-ĭ-dą, *s. pl.* [Gr. ἰχθύς (*ichthus*) = a fish, and ὄψις (*opsis*) = an appearance.]

Zool.: A primary division of the Vertebrated Sub-kingdom. They have temporary or permanent branchiæ, uncleated blood corpuscles, but no amnion or allantois. The division contains two classes, Fishes and Amphibia. Called also Branchiate Vertebrata.

ĭch-thў-ŏp-tĕr-ўğ'-ĭ-ī, ĭch-thў-ŏp-tĕr-ўğ'-ĭ-ą, *s. pl.* [Gr. ἰχθύς (*ichthus*), genit. ἰχθύος (*ichthuos*) = a fish; πτερύξ (*pterux*), genit. πτέρυγος (*pterugos*) = a wing, a fin, and Lat. mas. pl. suff. *-ii*, or neut. *-ia.*]

Palæont.: In Prof. Owen's classification the third order of the class Reptilia, or Reptilea. (*Prof. Owen: Palæontology*, 1860.)

ĭch-thў-or'-nĭ-dæ, *s. pl.* [Mod. Lat. *ichthyorn(is);* Lat. fem. pl. adj. suff. *-idæ.*]

Palæont.: A family of fossil birds.

ĭch-thў-or'-nĭs, *s.* [Gr. ἰχθύς (*ichthus*), and ὄρνις (*ornis*) = a bird.]

Palæont.: A genus of fossil birds, order Odontotormæ. They had teeth sunk in distinct sockets. The vertebræ were all biconcave. *Ichthyornis dispar*, a carnivorous and probably aquatic bird, was from the Cretaceous rocks of North America.

*** ĭch-thў-ō-săr'-cō-lĭte,** *s.* [Gr. ἰχθύς (*ichthus*) = a fish; σάρξ (*sarx*), genit. σαρκός (*sarkos*) = flesh, and λίθος (*lithos*) = a stone.]

Zool.: The name given by Desmarest to Caprinella, a genus of Hippuritidæ, from its resemblance to the flabby muscles of fishes.

ĭch'-thў-ō-sâur, *s.* [ICHTHYOSAURUS.]

Palæont.: Any species of the genus Ichthyosaurus (q.v.).

"To have breathed air like the *ichthyosaur*."—*Lyell: Elem. of Geol.* (ed. 1871), p. 338.

ĭch-thў-ō-sâu'-rĭ-ą, *s. pl.* [ICHTHYOSAURUS.]

Palæont.: An order of fossil reptiles. The teeth are lodged in grooves of the premaxillæ, the maxillæ, and the mandibles, not in distinct sockets. The fangs are deeply folded, the limbs are converted into paddles. The centra of the vertebræ are short, broad, and biconcave. (*Huxley.*)

ĭch-thў-ō-sâu'-rĭ-dæ, *s. pl.* [Mod. Lat. *ichthyosaur(us);* Lat. fem. pl. adj. suff. *-idæ.*]

Palæont.: The typical family of the order Ichthyosauria (q.v.)

ĭch-thў-ō-sâu'-rŭs, *s.* [Gr. ἰχθύς (*ichthus*) gemt. ἰχθυος (*ichthuos*) = a fish, and σαύρα (*saura*), σαῦρος (*sauros*) = a lizard.]

Palæont.: Ichthyosaur; fish-lizard; the

typical genus of the order Ichthyosauria. It consists of gigantic fossil marine reptiles, with jaws which show them to have been carniverous; and the half-digested remains of fishes and reptiles, even of their own species, found within their skeleton is a proof of the nature of their food. Their vertebræ were fish-like, their paddles like those of a porpoise or a whale, and their long powerful tail a propeller which enabled them to dart with great rapidity through the water. The genus extended from the Trias of Germany to the White Chalk of England. One of the earliest and best known species was *Ichthyosaurus communis* of Conybeare. It is from the Lias. *I. platyodon* also from the Lias at Lyme Regis, must have been more than twenty-four feet long.

Ich-thy-ō'-sĭs, *s.* [Gr. ἰχθυς (*ichthus*) = a fish, and suff. *-osis.*]

Pathol.: Fish-skin disease, characterized by the development on the skin of thick, hard, dry, imbricated scales of a dirty gray colour. There is no pain, heat, or itching. It is said to be a congenital disease and lasts through life. Oiling the skin (dugong oil being perhaps best), to keep it supple, is the only remedy of importance, with attention to the general health.

***Ich-thy-ŏt'-ō-mĭst,** *s.* [Eng. *ichthyotom(y); -ist.*] One who anatomizes or dissects fishes.

***Ich-thy-ŏt'-ō-my,** *s.* [Gr. ἰχθύς (*ichthus*) = a fish, and τομη (*tomē*) = a cutting; τέμνω (*temnō*) = to cut.] The dissection of fishes.

Ich'-thys, *s.* [Gr. = a fish.] A word found on many articles, as rings, seals, tombstones, &c., belonging to the early years of Christianity. It is supposed to have had a mystical meaning, from the fact that the several characters are the initial letters of the Greek words Ἰησοῦς Χριστός, Θεοῦ Ὑιός, Σωτήρ (*Iēsous Christos, Theou Huios, Sōtēr*) = Jesus Christ, the Son of God, the Saviour.

Ĭ'-çĭ-ca, *s.* [The native name of the plant.]

Bot.: A genus of Amyrids, family Burseridæ. It consists chiefly of tall trees with balsamic or resinous juice, unequally pinnate or ternate leaves, and racemes or heads of small whitish or greenish flowers. About twenty species are known, mostly from the warmer parts of America. *Icica guianensis* furnishes incense-wood, *I. Icicariba*, part of the American Elemi; *I. I. *Ord. Lang.:* A mental image, form, or representation of anything.

¶ In popular language *idea* is used as a synonym for opinion, belief, purpose, or intention; and in the example it has the sense of mental powers.

"To teach the young *idea* how to shoot."
Thomson: Spring, 11.

II. *Philos.:* The word idea has been taken in very many and very different senses, the history of which would be a history of philosophy. The idea of Plato (A.C. 429–347) is the pure archetypal essence in which things subsumed under the same concept participate; Aristotle (A.C. 384–322) taught that though the One, apart from and *beside* the many, does not exist, none the less must a unity be assumed as (objectively) present *in* the many: and the Stoics (Zeno, circ. A.C. 355–263) maintained the doctrines of subjective concepts formed through abstraction. Philo, who flourished about the middle of the first century, transformed the Platonic ideas into divine thoughts, having their seat in the Logos, and says, "This is the doctrine of Moses, not mine." According to Plutarch of Chæronea (towards the end of the first century), the ideas were intermediate between God and the world; they were the pattern and God the efficient cause. For Plotinus (203–270) the primordial essence was elevated above the Platonic ideas, which were emanations from the One. St. Thomas of Aquin (1227–1274), recognizes a form in which the universal exists before things—viz. as ideas in the divine mind. For Descartes (1596–1650), "ideas are the forms of things received into the soul;" for Spinoza (1632–1677), the "concepts formed by the mind as a thinking thing;" and Locke (1632–1704) says, "whatsoever the mind perceives in itself, or is the immediate object of perception, thought, or understanding, that I call an idea." In the philosophy of Leibnitz (1646–1716) ideas are the active forces of his monads; Berkeley (1684–1753) used the word as equivalent to phenomenon; Hume (1711–1776) defines ideas as "copies of perceptions," and Condillac (1715–1780) as "mental representations of objects of apprehension." Kant (1724–1804) gives the name of ideas to those "necessary conceptions of the reason for which no corresponding real objects can be given in the sphere of the senses." According to Erasmus Darwin (1731–1802), an idea is a "contraction, or motion, or configuration of the fibres which constitute the immediate organs of sense." Romagnosi (1761–1835) rejects the notion that ideas are only transformed sensations, he recognises in the mind a specific logical sense, to which he attributes the formation of universal ideas and ideal synthesis. [For the views of Fichte, Schelling, and Hegel, see IDEALISM.] James Mill (1773–1836) calls ideas "what remain after sensation has gone," and Herbart (1776–1841) "typical conceptions." Schopenhauer (1788–1860) posits as intermediate between the Universal Will and the individual in which it appears, various ideas as real species forming stages in the objectification of the Will. In English philosophical writings of the present day, idea has been replaced by, or is used as an equivalent of, concept (q. v.).

ī-dē'-al, ***ī-dē'-al,** *a.* & *s.* [Fr. *idéal*, from Lat. *idealis*, from *idea.*]

"He worships your *ideal*."
Tennyson: Princess, ii. 38.

ideal-realism, *s.*

Phil.: The teachings of an eclectic branch of the Kantian school, who attempted to build up a harmonious system without sacrificing Kant's realistic postulates to his idealistic teachings, or conversely giving up the latter in favour of the former. Schleiermacher, Ulrici, and Trendelenburg were of this section of Kantists.

"Others . . . sought to effect the harmonious union of the idealistic and realistic elements in a doctrine of *Ideal-realism*."—*Ueberweg: Hist. Philos.*, ii. 186.

***ī-dē'-a-lĕss,** *a.* [Eng. *idea*; *-less.*] Destitute of ideas.

ī-dē-al-īş-ā'-tion, *s.* [IDEALIZATION.]

ī-dē'-al-īşe, *v.t.* & *i.* [IDEALIZE.]

ī-dē'-al-īşm, *s.* [Eng. *ideal*; *-ism*; Fr. *idéalisme*; Ger. *idealismus.*]

Philos.: The name given to certain systems which deny the individual existence of object apart from subject, or of both apart from God or the Absolute. (*Larousse.*) Idealism denies the existence of bodies, holding that their appearances are merely ideas [perceptions] of the cogitant subject. Subjective idealism teaches that these ideas are produced by the mind; objective idealism that God is their author. To these two hypotheses all idealism may be reduced (*Tongiorgi: Inst. Phil., De Corp.*). Zeno of Elea, in classic times, anticipated modern idealism. The teaching of Zeno underwent many changes, till it appeared in the modified idealism of Plato, which was itself, in course of time, repeatedly added to or diminished. Berkeley [IMMATERIALISM] developing Locke, Descartes, Spinoza, and Leibnitz did much to revive idealism. Kant has been claimed as an idealist—Franck (*Dict. des Sciences* (1875), 757a) makes Kant's *idéalisme subjectif* one of the three divisions to which he refers all modifications of Ideal philosophy; but Lewes (*Hist. Philos.*, ii. 543) says Kant "never overlooks the distinction between the phenomena which the mind fashions, and the noumena which it only postulates." Fichte, Schelling, and Hegel are the founders of the great schools of German Idealism, called respectively, Subjective, Objective, and Absolute. For Fichte the object has no real existence, but is dependent upon the subject; the non-Ego is the product of the Ego (the human soul). For Schelling object and subject are equally real, and equally manifestations of the Ego (in his system the Absolute, the Substance of Spinoza). Hegel's only reality in this case is the relation between the Ego and non-Ego. [HEGELIANISM.]

ī-dē'-al-īst, *s.* [Eng. *ideal*; *-ist.*]

1. A supporter of the doctrine of idealism.

"Berkeley was sincerely and bona fide an *idealist*."

ĭd-ĕ-ŏl'-ō-gȳ, *s.* [Fr. *idéologie*, from Gr. ἰδέα (*idea*), and λόγος (*logos*) = a discourse.]

Hist. & Philos.: A term introduced by Destutt de Tracy in his *Eléments d' Idéologie* (1801–4) to designate the philosophy of the French Sensational School. The mind, according to de Tracy, is nothing but sensation, or more properly the sensibility of which sensation is the exercise. This sensibility is susceptible of impressions arising (1) from the present action of objects upon its organs, when it feels simply; (2) from past actions, when it repeats or recollects; (3) from things which have relations, and so may be compared, when it judges; and (4) from the wants of the individual, when it wills. Thus sensation, according to the nature of its objects, manifests itself as pure perception, memory, judgment, or will. The word has now come to have a more extended meaning, and its use is not confined to a particular school.

"Hence the recent celebrated name of *ideology* for the designation of the science of Mind."—*G. H. Lewes: Hist. Philos.*, ii. 249.

ĭd-ĕ-ō-prăx'-ĭst, *s.* [Gr. ἰδέα (*idea*), and πρᾶξις (*praxis*) = a transaction, business.] One who puts, or endeavours to put ideas into practice. (*Carlyle: Sartor Resartus*, bk. ii., ch. viii.)

And all the *idolatries* of heathen round."
Milton: P. R., iii. 418.

3. Excessive veneration for or attachment to any person, object, or thing. (*Shakesp: Two Gentlemen of Verona*, iv. 4.)

¶ According to Sir John Lubbock, idolatry or anthropomorphism is the fifth of six progressive stages in the history of religion. [God.]

(1) *Ethnic:* The ancient Egyptians, the Greeks, and the Romans, the modern Chinese, Burmese, Hindoos, &c., are all in that fifth stage of religious development.

(2) *Jewish:* In all countries where idolatry exists, the tendency is for the uneducated to worship the idol as if it were a deity, while the more enlightened employ it simply as an imagined aid in adoring an unseen God. Many of the denunciations against idolatry in Isaiah's prophecies are levelled chiefly at the first of these (xlii. 17, xliv. 10–17); but some censure also the higher form (xl. 18–25). When Aaron made the golden calf, he proclaimed a feast, not to it, but to Jehovah. This was on his part the higher form (Exod. xxxii. 4, 5), but the people said, "These be thy gods," and worshipped the calf itself (xxxii. 4, 8). The second commandment is directed against idolatry.

(3) *Christian:* Images had been introduced into the various churches about A.D. 300 for instruction only: gradually they began to be worshipped. About 726 a controversy arose with regard to their use. The Emperor Leo the Isaurian issued edicts against them, and carried them out with relentless rigour in 730. Between the doll of a girl and the idol of a worshipper there is a close affinity, and it is a noteworthy fact that the restoration of image-worship was brought about by a woman (the Empress Irene); this was in 780. The second Council of Nice sanctioned them in 787. But in the modern Greek Church, pictures instead of actual images are used. The latter are employed in the Roman Catholic Church. Most Protestant Churches exclude them from their places of worship, or, if they admit them, do so only for ornament. [Iconoclast.]

ĭ-dŏl'-ĭ-fȳ, *v.t.* [Eng. *idol*, s.; *i* connective, and Lat. *fio*, used as passive of *facio* = to make.] To make an idol of. (*Southey: The Doctor*, ch. cxliv.

***ĭ'-dŏl-ĭsh,** *a.* [Eng. *idol*; *-ish.*] Idolatrous.

"They have stuffed their *idolish* temples with the wasteful pillage of your estates."—*Milton: Reason of Church Government*, bk. ii. (Conc.)

***ĭ'-dŏl-ĭşm,** *s.* [Eng. *idol*; *-ism.*]

1. The worship of idols; idolatry. (*Sylvester: The Decay*, 518.)

2. Vain opinions, fancies.

"How wilt thou reason with them, how refute Their *idolisms*, traditions, paradoxes?"
Milton: P. R., iv. 234.

***ĭ'-dŏl-ĭst,** *s.* [Eng. *idol*; *-ist.*] A worshipper of idols; an idolater. (*Millon: Samson Agonistes*, 453.)

ĭ'-dŏl-īze, *v.t. & i.* [Eng. *idol*; *-ize.*]

A. *Transitive:*

* 1. To worship as an idol; to pay divine honours to; to make an idol of.

2. To pay excessive veneration or reverence to; to love to excess.

"To war with pleasure, *idolized before*"
Cowper: Expostulation, 410.

* **B.** *Intrans.:* To practise idolatry; to worship idols.

ĭ'-dŏl-īz-ĕr, *s.* [Eng. *idoliz(e)*; *-er.*] One who idolizes one who loves or venerates to excess.

"Though I be not such an *idolizer* of antiquity."—*Warburton: To Hurd*, let. 48.

***ĭ-dŏl'-ŏ-clăst,** *s.* [Gr. εἴδωλον (*eidōlon*) = an image, and κλάστης (*klastēs*) = a breaker; κλάω (*klaō*) = to break.] An iconoclast (q.v.).

ĭ-dŏl-ŏ-grăph'-ĭc-al, *a.* [Eng. *idol*, s.; *o* connective; and *graphical.*] Treating of idols or idolatry. (*Southey: Letters*, iii. 532.)

***ĭ'-dŏl-ŏŭs,** ***ĭ-dol-ouse,** *a.* [Eng. *idol*: *-ous.*] Idolatrous.

"When such an image or *idolouse* prince is thus upset."—*Bale: Image*, pt. ii.

***ĭ-dō'-nĕ-ŏŭs,** *a.* [Lat. *idoneus.*] Fit, proper, suitable; adapted for a particular purpose.

"Some other fit mineral water, or *idoneous* liquor."—*Boyle: Works*, iv. 806.

ĭ-dŏ-thē'-a, *s.* [Lat. = (in *Mythol.*) a daughter of Proteus, who aided Menelaus in obtaining information.]

I. *Zool.:* The typical genus of the family Idotheidæ (q.v.). It contains the Box-Slaters (q.v.).

2. *Bot.:* A genus of Cape Liliaceæ.

ĭ-dŏ-thē'-ĭ-dæ, *s. pl.* [Mod. Lat. *idothe(a)*; Lat. fem. pl. adj. suff. *-idæ.*]

Zool.: A family of Cursorial Isopoda. It consists of small, elongated, marine crustaceans, having the posterior abdominal feet modified into a pair of flat appendages, and the outer antennæ often very long.

ĭd'-rĭ-a-lĭn, ĭd'-rĭ-a-līne, *s.* [Idrialite.]

Chemistry:

I. (*Of both forms*): $C_{42}H_{28}O$. A white crystalline substance, extracted from idrialite. It can be obtained either by dry distillation in an atmosphere of hydrogen or carbon dioxide, or by boiling the mineral in oil of turpentine, the liquid on cooling depositing impure idrialin. It is insoluble in water even on boiling, and very slightly soluble in alcohol and ether. The best solvent is oil of turpentine or amylic alcohol. Heated with sulphuric acid, an intense blue colour is formed; with nitric acid an insoluble red powder is produced. Idrialin was long supposed to be a hydrocarbon, but it is now proved to contain oxygen.

2. (*Of the form* idrialine): [Idrialite].

ĭd'-rĭ-al-īte, *s.* [Named from the mines of Idria, in Carinthia; suff. *-ite* (*Min.*) (q.v.).]

Min.: A crystallized white mineral; composition: carbon, 94·5 to 94·8; hydrogen, 5·1 to 5·5. Called also Idrialine.

ĭ'-dȳl, ĭ'-dȳll, *s.* [Lat. *idyllium*; from Gr. εἰδύλλιον (*eidullion*) = a short, descriptive, pastoral poem; εἶδος (*eidos*) = form, resemblance, figure; Fr. *idylle*; Ital. *idillio*; Sp. *idilio.*] A short poem, the subject, or at least a necessary accompaniment of which, is a simple description of pastoral nature, life, and scenery, or of events in pastoral life: as the *idyls* of Theocritus among the ancients; Goldsmith's *Deserted Village*, &c.

¶ Tennyson has given the name "Idylls" to a series of poems founded on incidents in the Arthurian legend.

ĭ-dȳl'-lĭc, *a.* [Eng. *idyl*; *-ic.*] Of or pertaining to idyls; of the nature of an idyl; descriptive of pastoral life or scenery.

i. ē., *phr.* [Lat. *id est.*] A contraction for *id est* = that is, that is to say.

***'ĭēld,** *v.t.* [See def.] A contraction for *yield*, in the old phrase, "God *'ield* you."

ĭër-ōe', *s.* [Gael. *iar* = after; *ogha* = a grandson.] A great-grandchild. (*Scotch.*)

"His wee curlie John's *ieroe*."
Burns: Dedic. to Gavin Hamilton, Esq.

***ī'-ĕr-ŏ-măn-çy,** *s.* [Hieromancy.]

if, ***ef,** ***gef,** ***gif,** ***giff,** ***yif** ***yf,** *conj.* [A.S. *gif*; cogn. with Icel, *ef*, *if*; Dut. *of*; O.Fries. *ief*, *gef*, *ef*, *of*; O. Sax. *ef*, *of*; Goth. *iba*, *ibai*; O. H. Ger. *ibu*, *ipu*, *upi*, *upa*; Ger.

ob; Wel. o. Horne Tooke's plausible guesa that the A.S. *gif* is the imperative mood of *gifan* = to give, has no foundation, and is entirely opposed to the results of comparative philology.]

1. A hypothetical particle, introducing a conditional sentence, and = suffering or granting that, in case that, allowing that.

"*If* they have done this deed, my noble lord.
If I talk'st thou to me of *ifs*! Thou art a traitor."
Shakesp.: Richard III., iii. 4.

2. Whether.

"In doubt *if* best were, as it was."
Shakesp.: Complaint, 98.

¶ *If* was formerly frequently followed by *that.*

* **ĭ'-faith'**, *adv.* [A contraction of *in faith.*] In faith, indeed, truly.

* **ĭ'-fĕcks'**, *adv.* [A corruption of *in faith.*] In faith, truly.

ĭg-ą-sūr'-ĭc, *a.* [Fr. *igasur*, from the Pegu name of St. Ignatius-bean (q.v.); Eng. suff. *-ic.*] [IGNATIUS.] Contained in or derived from St. Ignatius's-bean, or from nux vomica.

igasuric-acid, *s.*

Chem.: One of the acids combined with strychnine and brucine in the St. Ignatius's-bean and in *nux vomica.* It crystallizes in the form of small hard granular crystals, which have a sour astringent taste, and are very soluble in water and in alcohol.

ĭg-ą-sūr'-ĭne, *s.* [Fr. *igasur*; *-ine.*] [IGASURIC.]

Chem.: An alkaloid discovered in 1853 by Desnoix, in the mother-liquors from which strychnine and brucine had been precipitated by lime. It crystallizes in feathery groups of white silky needles, which have the bitter taste and poisonous properties of strychnine and brucine. The crystals are very soluble in alcohol, slightly soluble in water, and almost insoluble in ether. By treatment with hot water, and fractional distillation, igasurine yields nine distinct bases, all crystalline, bitter, and poisonous. It resembles brucine in its behaviour towards re-agents.

ĭg-lĕȝ'-ĭ-ą-sīte, *s.* [Named from Iglesias, a town in Sardinia.]

Min.: A variety of Cerussite (q.v.).

ĭg'-lō-īte, ĭg'-līte, *s.* [From Iglo, in Transylvania, where it occurs.]

Min.: The same as ARAGONITE (q.v.).

ĭg'-loō, *s.* [Esquimaux.]

1. A hut, usually of a circular form, made of snow. [SNOW-HOUSE.]

2. An excavation made by a seal in the snow over its breathing-hole, for the protection of its young.

* **ĭg-nā'-rō**, *s.* [Ital., from Lat. *ignarus* = ignorant.] An ignorant person, a blockhead.

"It was intolerable insolence in such *ignaroes* to challenge this for Popery."—*Mountague: Appeale to Cæsar*, ch. xxxi.

Ĭg-nā'-tĭ-ŭs (t as **sh**), *s.* [From *Ignatius Loyola*, founder of the order of Jesuits.] (See the etym. and the compound.)

Ignatius's-bean, *s.*

Bot.: The seeds of the so-called *Ignatia amara;* but the genus Ignatia is now given up, having been founded on fragments of two different plants not akin to each other. St. Ignatius's-beans, called in parts of India Papeeta, have been given in cases of cholera, but, if an overdose be taken, giddiness, and convulsions will ensue. They are supposed to come from a species of Strychnos, perhaps *S. multiflora.*

ĭg'-nĕ-oŭs, *a.* [Lat. *igneus*, from *ignis* = fire.]

I. *Ord. Lang.:* Containing or of the nature of fire; fiery, emitting fire, resembling fire.

"Those *igneous* corpuscles that flow from the sun, or both of them."—*Boyle: Works*, i. 223.

2. *Bot.:* Flame-coloured, very lively scarlet, fiery red.

3. *Geol.:* Applied to rocks believed to be produced by the agency of fire. They include the Volcanic and Plutonic rocks (q.v.).

igneous-action, *s.*

Geol.: The action of fire or of great heat. Igneous-action is the antagonistic power to aqueous action. Whilst the latter, if left uncounteracted, would tend to wash away all land grain by grain or fragment by fragment, and deposit it in the sea, igneous action heaves it up again.

igneous-causes, *s. pl.* Chiefly volcanoes and earthquakes.

* **ĭg-nĕs'-çent**, *a.* & *s.* [Lat. *ignescens*, pr. par. of *ignesco* = to become fire; *ignis* = fire.]

A. *As adj.:* Emitting sparks of fire when struck, as with steel; acintillating.

B. *As subst.:* Any body which emits sparks; specif., a stone or mineral which emits sparks when struck, as with iron or steel.

* **ĭg-nĭc'-ō-lĭst**, *s.* [Lat. *ignis* = fire; *colo* = to worship; and Eng. suff. *-ist.*] One who worships fire; a fire-worshipper.

* **ĭg-nĭf'-ĕr-oŭs**, *a.* [Lat. *ignifer*; from *ignis* = fire, *fero* = to bear, and Eng. adj. suff. *-ous.*] Producing fire.

* **ĭg'-nĭ-fied**, *pa. par.* or *a.* [IGNIFY.]

* **ĭg-nĭf'-lŭ-oŭs**, *a.* [Lat. *ignifluus*; from *ignis* = fire, *fluo* = to flow, and Eng. adj. suff. *-ous.*] Flowing with fire.

* **ĭg'-nĭ-fȳ**, *v.t.* [Lat. *ignis* = fire, and *facio* (pass. *fio*) = to make.] To form into fire.

"The *ignified* part of matter was formed into the body of the sun."—*Stukeley. Palæogra. Sacra*, p. 20.

* **ĭg-nĭg'-ĕn-oŭs**, *a.* [Lat. *ignigenus*, from *ignis* = fire, and *gigno* (perf. t. *genui*) = to beget, to produce.] Produced by fire.

* **ĭg-nĭp'-ō-tençe**, *s.* [Lat. *ignis* = fire, and *potentia* = power.] Power over fire.

* **ĭg-nĭp'-ō-tent**, *a.* [Lat. *ignipotens*; *ignis* = fire, and *potens* = powerful.] Presiding or having rule over fire; fiery.

"It drives, *ignipotent*, through every vein."
Savage: On the Recovery of a Lady.

ĭg'-nĭs fāt'-ų-ŭs, *s.* & *a.* [Lat. = foolish fire; Fr. *feu follet.*]

A. *As substantive:*

Meteor.: A flame-like meteor floating in the atmosphere a few feet above the ground in marshes, above burial-grounds, or other places where there is decaying animal matter. When approached, it, as a rule, appears to recede. It has been attributed to phosphuretted or carburetted hydrogen escaping from decaying bodies, &c.

"Not even an *ignis-fatuus* rose
To make him merry with my woes."
Byron: Mazeppa, xv.

B. *As adj.:* Foolish, vain, illusory.

"An *ignis-fatuus* gleam of love?"
Byron: To a Youthful Friend.

ĭg-nīte', *v.t.* & *i.* [Lat. *ignitus*, pa. par. of *ignio* = to set on fire.]

A. *Trans.:* To set on fire; to kindle; to render luminous or red by heat.

"Ye heate with a long set of faire and warme weather had even *ignited* the aire."—*Evelyn: Memoirs* (Sept. 1666).

B. *Intrans.:* To take fire; to become luminous or red with heat.

* **ĭg-nīt'-ĭ-ble**, *a.* [Eng. *ignit(e)*; *-able.*] Capable of being ignited or set on fire; inflammable.

"Now such bodies as strike fire have sulphureous or *ignitible* parts within them."—*Browne: Vulgar Errours*, bk. ii., ch. i.

ĭg-nĭ'-tion, *s.* [Fr., from Lat. *ignitus*, pa. par. of *ignio* = to set on fire.]

1. The act of igniting, kindling, or setting on fire.

2. The state of being ignited, kindled, or set on fire.

"Now to contract this direction, there needs not a total *ignition*."—*Browne: Vulgar Errours*, bk. ii., ch. ii.

* **ĭg-nĭv'-ō-moŭs**, *a.* [Lat. *ignivomus*, from *ignis* = fire, and *vomo* = to vomit.] Vomiting or belching out fire.

"The volcanos and *ignivomous* mountains."—*Derham: Physico-Theol.*, bk. iii., ch. iii.

* **ĭg-nō-bĭl'-ĭ-tȳ**, * **ig-no-byl-y-tie**, *s.* [Lat. *ignobilitas*, from *ignobilis* = mean, ignoble; Fr. *ignobilité*; Ital. *ignobilità, ignobillà*; Sp. *ignobilidad.*] The quality or state of being ignoble; ignobleness; humbleness or meanness of birth.

ĭg-nō'-ble, *a.* [Fr., from Lat. *ignobilis*, from *i-* = *in-* = not, and * *gnobilis, nobilis* = noble; Ital. *ignobile*; Sp. *ignobil.*]

1. Of low, humble, or mean birth.; not noble, not illustrious.

"So void of pity is the *ignoble* crowd."
Dryden: Annus Mirabilis, ccl.

2. Mean, base, despicable.

"His nature at once ferocious and *ignoble*."—*Macaulay: Hist. Eng.*, ch. iii.

* 3. Worthless, useless.

* 4. Humble.

"The man we celebrate must find a tomb,
And we that worship him *ignoble* graves."
Cowper: Task, iii. 265.

* **ĭg-nō'-ble**, *v.t.* [IGNOBLE, *a.*] To make ignoble or mean; to disgrace; to dishonour.

"*Ignobling* many shores and points of lands by shipwreck."—*Bacon: Disc. in Praise of Queen Elizabeth.*

ĭg-nō'-ble nĕss, * **ig-no-ble-nesse**, *s.* [Eng. *ignoble*; *-ness.*] The quality or condition of being ignoble; meanness, humbleness; want of dignity.

"The *ignobleneese* of a servant."—*Bishop Taylor: Great Exemplar*, pt. i., disc. 3.

ĭg-nō'-blȳ, *adv.* [Eng. *ignoble(e)*; *-ly.*] In an ignoble, mean, base, or dishonourable manner; meanly, humbly, basely.

"To die a prince—or live a slave—
Thy choice is most *ignobly* brave!"
Byron: Ode to Napoleon.

ĭg-nō mĭn'-ĭ-oŭs, *a.* [Fr. *ignominieux*, from Lat. *ignominiosus*, from *ignominia* = ignominy, disgrace.]

1. Marked with disgrace or ignominy; shameful, disgraceful, infamous.

"The Romans in this *ignominious* state return to Rome."—*Lewis: Cred. Early Roman Hist.* (1855), ii. 447.

2. Despicable, disgraceful; deserving of ignominy.

3. Expressive of contempt; contemptuous, humiliating.

"The *ignominious* judgment passed by the House of Commons on his Pastoral Letter."—*Macaulay: Hist. Eng.*, ch. xix.

ĭg-nō-mĭn'-ĭ-oŭs-lȳ, *adv.* [Eng. *ignominious*; *-ly.*] In an ignominious manner; disgracefully, shamefully, contemptibly.

"In his attempt at comedy he failed *ignominiously*."—*Johnson: Life of Rowe.*

ĭg'-nō-mĭn-ȳ, * **ig-no-min-ie**, *s.* [Fr. *ignominie*, from Lat. *ignominia*, from *i-* = *in-* = not, and * *gnomen, nomen* = name, renown; Ital. & Sp. *ignominia.*]

I. Public disgrace or shame; reproach, dishonour, infamy.

"The *ignominy* and shame that was cast upon them."—*Bunyan: Pilgrim's Progress*, pt. i.

2. An act deserving disgrace; an ignominious act.

3. Ignominious treatment.

* **ĭg-nō'-mĭ-oŭs**, *a.* [Formed from *ignomy*, with suff. *-ous*, or shortened from *ignominious* for the sake of the metre.] Ignominious, disgraceful. (*Peele: Prol. to Sir Clyomon.*)

* **ĭg'-nō-mȳ**, *s.* [Prob. only a misreading for *ignominy.*] Ignominy, disgrace, dishonour.

"Hence, broker-lackey, *ignomy* and shame
Pursue thy life." *Shakesp.: Troilus*, v. 10.

ĭg-nō'-rā-mŭs, *s.* & *a.* [Lat., first person pl. pr. indic. of *ignoro* = to be ignorant.]

A. *As substantive:*

* 1. *Law:* (See extract).

"When the grand jury have heard the evidence, if they think it a groundless accusation, they used formerly to indorse on the back of the bill, '*ignoramus*'; or, we know nothing of it; intimating, that though the facts might possibly be true, that truth did not appear to them: but now they assert in English, more absolutely, 'not a true bill'; or, which is the better way, 'not found.'"—*Blackstone: Comment.*, bk. iv., ch. 23.

2. An ignorant fellow; a stupid blockhead.

"Wronged by those who would make him such an *ignoramus*."—*Jortin: Eccles. History*, an. 527.

* **B.** *As adj.:* Ignorant, stupid, blockhead.

"Let *ignoramus* poets scribble satires."
Dryden: Prol. to Duke of Guise.

ĭg'-nō-rançe, *s.* [Fr., from Lat. *ignorantia*, from *ignorans*, pr. par. of *ignoro* = to be ignorant; Sp. & Port. *ignorancia*; Ital. *ignoranza.*]

I. *Ordinary Language:*

1. A want of learning or knowledge in general or with respect to any particular subject.

2. A state of not being cognizant or aware of anything; inacquaintance.

* 3. An act committed through ignorance or inadvertence.

"Forgive us all our sins, negligences, and *ignorances*."—*Book of Common Prayer*; *Litany.*

4. Stupidity, foolishness.

"The common curse of mankind, folly, and *ignorance*."—*Shakesp. : Troilus & Cressida*, ii. 3.

II. *Roman Theol.* : The absence of knowledge in one capable of acquiring it. It is of two kinds : 1. Vincible—(1) Simple, when some, but not sufficient, pains are taken to remove it; (2) Crass, when scarcely any means are used ; and (3) Affected, when a person wishes to be ignorant, in order to sin more freely. 2. Invincible, which is held to excuse altogether from sin, since no moral guilt can be incurred without an intention, direct or remote, of violating the divine law. (*Addis & Arnold.*)

***ĭg'-nō-ran-çy, *ĭg-no-raun-cy,** *s.* [Lat. *ignorantia.*] Ignorance.

"Rocked in blyndnes and *ignorauncy*."—*Tyndall : Workes*, p. 157.

ĭg'-nō-rant, *ig-no-raunt, *a.* & *s.* [Fr. *ignorant*, from Lat. *ignorans*, pr. par. of *ignoro* = to be ignorant ; Sp., Port., & Ital. *ignorante.*]

A. *As adjective :*

1. Destitute of knowledge in general or on any particular subject ; uninstructed, uninformed, unlearned, untaught, unlettered, illiterate.

"So foolish was I and *ignorant*."—*Psalm* lxxiii. 22.

***2.** Unacquainted, unconscious.

"*Ignorant* of guilt, I fear not shame."
Dryden. (*Todd.*)

3. Dull, silly, simple, stupid.

"Either you are *ignorant* or seem so craftily."
Shakesp. : Measure for Measure, ii. 4.

***4.** Not known ; hidden, undiscovered.

"Thereof to be informed, imprison 't not
In *ignorant* concealment."
Shakesp. : Winter's Tale, i. 2.

***5.** Done unconsciously or inadvertently.

"What *ignorant* sin have I committed?"
Shakesp. : Othello, iv. 2.

***B.** *As subst.* : An ignorant, untaught, or illiterate person ; one unlettered or unskilled.

"Till we know the first springs of natural motions we are still but *ignorants*."—*Glanvill : Scepsis Scientifica*, ch. xxi.

¶ *Ignorant* is a comprehensive term ; it includes any degree, from the highest to the lowest, and consequently includes the other terms, *illiterate*, *unlearned*, and *unlettered*, which express different degrees of *ignorance.*

ĭg-nō-răn'-tīnes, *s. pl.* [Fr. *ignorantins*, from *ignorant* (*Littré*). Either a corruption of *Fontains* (from St. Yon, near Rouen), or from the rule, which their founder strictly enforced, that none of them should learn Latin (*Mrs. R. F. Wilson : Christian Brothers*, p. 5, note).]

Religious Orders : A term adopted from the French, and applied to the members of a religious society of men living in community, founded in 1680, by the Ven. J. B. de la Salle, canon of Rheims, for the spread of education among the poor. Their title is Brothers of the Christian Schools, or, shortly, Christian Brothers. (*McClintock & Strong.*)

ĭg'-nō-rant-ĭsm, *s.* [Eng. *ignorant* ; *-ism.*] The same as OBSCURANTISM (q.v.).

ĭg'-nō-rant-ĭst, *s.* [Eng. *ignorant* ; *-ist.*] The same as OBSCURANTIST (q.v.).

ĭg'-nō-rant-lў, * ig-no-raunt-ly, *adv.* [Eng. *ignorant* ; *-ly.*]

1. In an ignorant manner ; without knowledge, instruction, or information.

"We sometimes mistake his blunders for beauties, and are so *ignorantly* fond as to copy them."—*Watts.*

2. Without intention ; inadvertently ; through ignorance or inacquaintance.

ĭg-nō-rā'-ti-ō (ti as shĭ) ĕ-lĕn'-chī, *phr.* [Lat.]

Logic : An overlooking of an adversary's counterposition to an argument.

ĭg-nōre', *v.t.* [Fr. *ignorer*, from Lat. *ignoro* = to be ignorant : *i-* = *in-* = not, and the root *gno*, seen in **gnosco*, *nosco* = to know ; Sp. & Port. *ignorar* ; Ital. *ignorare.*]

I. *Ordinary Language :*

*1. Not to know ; to be ignorant of.

"Rather to *ignore* the being of God than deny it."—*Boyle : Works*, ii. 56.

2. To pass over without notice ; to disregard ; to leave out of account ; to act as if one were ignorant of : as, To *ignore* facts.

II. *Law :* To throw out as unsupported by sufficient evidence. [BILL, *s.* B. I. 2 (8).]

***ĭg-nōre'-mĕnt,** *s.* [Eng. *ignore* ; *-ment.*] The act of ignoring ; the state of being ignored.

***ĭg-nŏs'-çĭ-blo,** *a.* [Lat. *ignoscibilis*, from *ignosco* = to pardon.] Capable of pardon ; pardonable.

***ĭg-nōte',** *a.* & *s.* [Lat. *ignotus* : *i-* = *in-* = not, and *gnotus*, *notus* = known.]

A. *As adj.* : Unknown.

"Such very *ignote* and contemptible pretenders."—*Phillips.*

B. *As subst.* : An unknown person ; one of little or no importance. (*Hacket : Life of Williams*, ii. 144.)

ĭg-uan'-a (u as w), *s.* [Sp., from Carib *yuana* a word used by Oviedo, A.D. 1525.]

Zool. : The typical genus of the family Iguanidæ. The teeth are three-lobed, placed in the inner edge of the jaw ; the body and the head compressed ; the palate mostly toothed ; the throat with a pendulous dewlap, the edge of which is toothed. The Common American Iguana is yellowish green above, marbled with pure green, the tail ringed with brown. It has a crest of large dorsal spines. It is from four to five feet long. It is common in the warmer parts of America. Its flesh is delicious, but unwholesome. It lives chiefly on trees. There are many other species.

ĭg-uan'-ĭ-dæ (u as w), *s.* [Mod. Lat., &c. *iguan(a)* ; Lat. fem. pl. adj. suff. *-idæ.*]

Zool. : A family of reptiles, order Lacertilia. The tongue is short and thick, the eyes with round pupils, the scales imbricated, those on the belly small and rhombic. Feet adapted for walking ; toes unequal. Tail with more or less distinct whorls of scales, which are commonly spinous. Found in the warmer parts of America. Known genera about sixty ; species fifty or more.

ĭg-uan'-ō-dŏn (u as w), *s.* [Mod. Lat., &c. *iguan(a)*, and Gr. ὀδους (*odous*), genit. ὀδόντος (*odontos*) = a tooth.]

Palæont. : The typical genus of the family Iguanodontidæ (q.v.). The teeth resemble those of Iguana. The fore feet are comparatively small, the hinder ones large. The animal seems to have walked on the hind legs, thus making an approach to birds. The species *Iguanodon Mantelli*, called after Dr. Mantell, the discoverer of the genus, was found near Maidstone in the Kentish Rag or Lower Greensand and Marine Limestone. According to Mantell it was between thirty and forty feet long.

ĭg-uan-ō-dŏn'-tĭ-dæ (u as w), *s. pl.* [Mod. Lat. *iguanodon* ; Lat. fem. pl. adj. suff. *-idæ.*]

Ĭl'-ĭ-ad, *s.* [Lat. *Ilias*, genit. *Iliadis*, from Gr. Ἰλιάς (*Ilias*), genit. Ἰλιάδος (*Iliados*), from Ἴλιος (*Ilios*) = the city of Ilus or Troy, named after Ἶλος (*Ilos*) the grandfather of Priam, and son of Tros.] A celebrated epic poem in the Greek language, consisting of twenty-four books. Its composition is generally ascribed to Homer, of whose parentage, birth, and life nothing is known for certain. It is, however, a matter of dispute as to whether the poem is a homogeneous whole, or a series of ballads or rhapsodies on different episodes in the Trojan War, united into a continuous poem. It is further doubtful whether, in the latter case, the union was made by Homer himself, or by some person after his time. It is said that Pisistratus, tyrant of Athens, first collected and arranged the *Iliad* and *Odyssey* in the form in which we now have them. The chief sub-

ject of the poem is the wrath of Achilles, and the consequent troubles thence arising, whence we have the phrase *Ilias malorum* = an Iliad of woes or troubles, a world of disasters. The action of the poem is confined to the tenth and last year of the siege of Troy.

Il-ĭ-ad-īzed, *a.* [Eng. *Iliad*; *-ize.*] Celebrated or related in the Iliad. (*Nashe: Lenten Stuffe.*)

ĭ'-lĭ-çĭn, *s.* [Lat. *ilex*, genit. *ilic(is)*; *-in* (*Chem.*).]

Chem.: A bitter principle extracted from the leaves of the holly (*Ilex aquifolium*). In its crude state it is a jelly, but when purified it crystallizes in the form of brownish-yellow crystals, which are intensely bitter. Ilicin is soluble in water and alcohol, but insoluble in ether. It has been recommended as a febrifuge, in doses of from six to twenty grains.

ĭ-lĭ-çĭn'-ō-æ, *s. pl.* [Lat. *ilex*, genit. *ilic(is)*; fem. pl. adj. suff. *-inea.*]

Bot.: The same as AQUIFOLIACEÆ (q.v.).

Il-lūm-ĭ-nā'-tī, *s. pl.* [Nomin. masc. pl. of Lat. *illuminatus.*] [ILLUMINATE, *a.*]

Church History, &c.:

1. A name given to the newly baptized in the early ages of the Church. (*Goschler.*)

2. Another name for the Hesychasts (q.v.).

3. A Spanish sect, known vernacularly as Alumbrados. Their founders were Catherine de Jesus, a Carmelite nun, and John de Willelpando, a native of Tenerilfe. They rejected the sacraments, and held that by mental prayer they might attain such perfection as to dispense with good works, and that they might commit any crime without sin. Ignatius Loyola, while a student at Salamanca (1527), was tried by an ecclesiastical commission for sympathy with the views of this sect, but declared innocent.

4. An obscure sect of French Familists, which arose in Picardy in 1634. Like their predecessors they ran into wild Antinomianism.

5. The name given to many secret societies professing high aims. The Rosicrucians (q.v.) were so-called, but generally by this title are designated the members of a society formed at Ingolstadt, in 1776, by Adam Weishaupt, Professor of Canon Law, and an ex-Jesuit. It had some resemblance to, and received substantial support from, Freemasonry, and many educated men of liberal views joined it. Its objects were religious and political emancipation, its ideal form of government republican, and its religion deistic. Espionage and a kind of confession, which Weishaupt's experience among the Jesuits led him to adopt, caused dissensions. The Baron von Knigge, one of the principal members, quarrelled with Weishaupt; the order was suppressed by edict, March 2, 1785, and Weishaupt was degraded and banished. The Illuminati were supposed to exercise great political influence; but it is now believed that the views of Barruel and Robison on that subject were exaggerated.

"The association of which I have been speaking is the Order of *Illuminati.*"—*Robison: Proofs of a Conspiracy* (1797), p. 15.

Il-lūm-ĭ-nā'-tion, *s.* [Lat. *illuminatio,* from *illuminatus,* pa. par. of *illumino;* Fr. *illumination;* Ital. *illuminazione;* Sp. *iluminacion.*]

Il-mĕn'-ĭc, *a.* [Eng. *ilmen(ium); -ic.*] (See the compound.)

ilmenic-acid, *s.*

Chem.: An acid supposed to exist in yttro-ilmenite. It is very little known, and some chemists contend that it is not a pure acid, but a mixture of niobic and tungstic acid.

Il'-mĕn-īte, *s.* [From the Ilmen Mountains, a branch of the Urals, in the province of Orenburg, in Siberia.]

Mineralogy:

1. According to Dana a variety of Menaccanite. Compos.: titanic acid, 45·4 to 46·92; sesquioxide of iron, 10·74 to 40·7; protoxide of iron, 14·1 to 37·86, &c. The *Brit. Mus. Cat.* makes it a distinct species.

2. Ilmenite of Brooke is Menaccanite.

Il-mĕn'-ĭ-ŭm, *s.* [Latinised from Ilmen.] [ILMENITE.]

Chem.: The hypothetical metal of ilmenic-acid.

Il-mĕn-ō-rū'-tīle, *s.* [*Ilmen(ite);* o euphonic, and Eng., &c. *rutile* (q.v.).]

Min.: A variety of rutile, containing titanic acid, 89·3, and sesquioxide of iron, 10·7.

Il'-va-īte, *s.* [Lat. *Ilva* = Elba; *-ite* (*Min.*).]

Min.: The same as LIEVRITE (q.v.). Dana prefers this latter name.

Il-ȳ-ăn'-thĭ-dæ, *s.* [Mod. Lat. *ilyanth(us)*; Lat. fem. pl. adj. suff. *-idæ.*]

Zool.: A family of *Zoantharia Malacodermata.* Corallum none, polypes single, free, with a rounded or tapering base.

Im-, *pref.* [See def.] A common prefix in English compound words. In some it is a corruption of French *em-*, by confusion with Latin *im-*; in others it represents the Latin *im-* the form which *in* takes before *b*, *m*, and *p*. It is also used by confusion with the Latin *im-* (= in) for the English prefix *in-*, before words beginning with *b* or *p*. Lastly, it represents the French *im-* = Latin *im-*, the form which the negative prefix *in-* assumes before *b*, *m*, or *p*.

I'm. A contraction for *I am.*

ĭm-a-bĕn'-zīle, *s.* [Eng., &c. *amil(de)*, with the first three letters reversed (?), and *benzile.*]

Chem.: $C_{14}H_{11}NO$. A white, crystallice, inodorous powder, obtained, together with benzilam and benzilimide, by the action of dry ammoniacal gas on benzile dissolved in hot absolute alcohol, thus: $C_{14}H_{10}O_2 + NH_3 = C_{14}H_{11}NO + H_2O$. It is insoluble in water, in boiling alcohol, and in ether, but dissolves readily in an alcoholic solution of potash. The crystals melt at 140°, but on cooling they solidify without re-crystallizing.

ĭm'-age (age as ĭj), *y-mage, *s.* [Fr., from Lat. *imaginem*, accus. of *imago*; Ital. *image, immagine*; Sp. *imagen.*]

I. *Ordinary Language:*

1. The representation or similitude of any person or thing, drawn, painted, sculptured, or otherwise prepared; an effigy; a likeness; a picture.

"Brazen *images* of canonized saints."
Shakesp.: 2 Henry VI., i. 3.

2. The appearance or semblance of a person or thing.

"*Images* of death." *Shakesp.: Macbeth*, i. 3.

3. A representation, figure, or likeness of any person or thing, used as an object of worship; an idol.

4. A copy, counterpart, likeness, or imitation.

"He, the noble *image* of my youth."
Shakesp.: 2 Henry IV., iv. 4.

5. A representation of any thing to the mind; an idea; a conception.

"When we speak of a figure of a thousand angles, we may have a clear idea of the number one thousand angles; but the *image*, or sensible idea, we cannot distinguish by fancy from the *image* of a figure that has nine hundred angles."—*Watts: Logic.*

II. *Technically:*

1. *Rhet.:* A term used to denote a metaphor expanded and made a more complete picture by the assemblage of various ideas through which the same metaphor continues to run, yet not sufficiently expanded to form an allegory.

2. *Optics:* The representation of an object formed at the focus of a lens or mirror by rays of light refracted or reflected to it from all parts of the object. The figure of the object is reversed in the image. The latter may be made to fall upon a screen, a photographic plate, or on the retina of the eye. It may also be viewed directly in a microscope or a telescope. Accidental images are those produced when a coloured object, having been placed upon a black ground, the eye, after having been fixed upon it, is turned to a white sheet. The image is of a complementary colour.

* **image-breaker,** *s.* An iconoclast.

"*Image-breakers*, foes to Papall power."
Stirling: Doomes-day; Ninth Houre.

* **image-graver, * image-maker,** *s.* A sculptor. (*North: Plutarch.*)

* 3. To be like; to resemble.

4. To form a likeness or representation of in the mind; to represent mentally; to imagine; to conceive in the mind.

"*Image* to thy mind
How our forefathers to the Stygian shades
Went quick."
Philips.

* **ĭm'-age-a-ble (age as ĭj),** *a.* [Eng. *image*; *-able.*] That may or can be imaged, or represented by an image.

* **ĭm'-age-lĕss (age as ĭj),** *a.* [Eng. *image*; *-less.*] Without an image.

* **ĭm'-ag-ĕr (ag as ĭj),** *s.* [Eng. *imag(e)*; *-er.*] A sculptor.

"Praxiteles was ennobled for a rare *imager*."—*P. Holland: Plinie*, bk. vii., ch. xxxviii.

ĭm'-ag-ĕr-ȳ (ag as ĭj), *s.* [Eng. *imag(e)*; *-ery.*]

I. *Ordinary Language:*

1. Images, pictures, statues, or imitative work generally; the work of one who makes images or sensible representations of objects; figures made by an artist.

"Each room, array'd in glistering *imagery*."
Warton: Ode 5.

2. Show, appearance, semblance, imitation.

"What can thy *imagery* of sorrow mean?"
Prior: Solomon, ii. 385.

3. Forms of the fancy; imaginary phantasms; false ideas.

"The *imagery* of a melancholic fancy."—*Atterbury*

4. Representation in writing; such descriptions as bring the image of the thing described before the mind.

"I wish there may be in this poem any instance of good *imagery*."—*Dryden.* (*Todd.*)

II. *Rhet.:* Rhetorical images collectively; figures in discourse.

* **ĭ-măğ'-ĭ-lĕt,** *s.* [Eng. *image*, s.; dimin. suff. *-let.*] A little image. (*Fuller: Worthies; Stafford.*)

"Do you not see it *imaginarily*?"—*Ford: Lady's Trial*, ii. 1.

ĭ-măğ'-ĭn-a-rў, *a.* & *s.* [Lat. *imaginarius*, from *imaginor* = to imagine; Fr. *imaginaire*; Sp. *imaginario*; Ital. *immaginario.*]

A. *As adj.:* Existing only in imagination or fancy; not real; fancied, fanciful, ideal.

"Honour, that praise which real merit gains,
Or e en *imaginary* worth obtains."
Goldsmith: Traveller.

B. *As substantive:*

Math.: An imaginary expression or quantity.

imaginary expression or quantity, *s.*

Math.: An algebraic expression or symbol having no assignable arithmetical or numerical meaning or interpretation; the even root of a negative quantity; such as—

$$\sqrt{-9}, \qquad \sqrt[4]{-a^2}, \text{ \&c.}$$

Such expressions are called imaginary, because, while the rule of signs (q.v.) holds good, it is impossible to conceive of quantities which they represent. Also called an impossible expression or quantity.

imaginary-focus, *s.*

Optics: The point towards which converging rays tend, but which they are prevented from reaching by some obstacle.

* **ĭ-măğ'-ĭn-āte,** *a.* [Lat. *imaginatus*, pa. par. of *imaginor* = to imagine.] Imaginative.

"Whereas the *imaginate* facultie of other living creatures is unmoveable, and alwaies continueth in one: in all it is alike, and the same still in every one, which causeth them alwaies to engender like to themselves, each one in their severall kind."—*P. Holland: Plinie*, bk. vii., ch. xii.

ĭm-brāke', *v.t.* An old spelling of EMBRAKE (q.v.).

* **im-brănd'**, *v.t.* [Pref. *im-* = *in-*, and Eng. *brand* (q.v.).] To arm with brands.

"She ended, and the heavenly hierarchies, Burning in zeal, thickly *imbranded* were."
G. Fletcher: Christ's Victory & Triumph.

* **im-brăn'-gle**, *v.t.* An old spelling of EMBRANGLE (q.v.).

* **im-breēd'**, *v.t.* [Pref. *im-* = in, and Eng. *breed* (q.v.).] To breed or generate within; to inbreed.

"To search the truth is a disposition *imbred* in every man."—*Hakewill: Apologie*, bk. iii., § 4.

Im-brĭ-eär'-ĭ-a, *s.* [Mod. Lat., from *imbrex* (genit. *imbricis*) = a hollow tile.]

Bot.: A genus of Sapotaceæ (q.v.). It consists of trees with eight sepals in two rows, a corolla, with its segments in three rows, and eight fertile and eight sterile stamens. The fruits of *Imbricaria malubarica* and *I. maxima* are subacid, and used as dessert fruit. They grow in Bombay, Mauritius, &c.

Im'-brĭ-cāte, ĭm'-brĭ-cāt-ĕd, *a.* [Lat. *imbricatus*, pa. par. of *imbrico* = to cover with a gutter-tile; *imbrex* (genit. *imbricis*) = a tile; *imber* (genit. *imbris*) = rain.]

1. *Ord. Lang.:* Bent or hollowed like a roof or gutter-tile.

2. *Bot.:* Overlapping anything in a parallel manner at its margin; laid one over another, like slates or tiles on a roof. Used of parts of some flowers, &c.

3. *Zoology:*

(1) In the same sense as (2).

(2) *Of the operculum of a gasteropodous mollusc:* Growing only on one side, and having the nucleus marginal, as in *Purpura*, *Phorus*, &c. Called also Lamellar.

* **ĭm'-brĭ-cāte**, *v.t.* [IMBRICATE, *a.*] To lay or lap, the one over the other, as tiles.

* **ĭm-brĭ-eā'-tion**, *s.* [IMBRICATE, *a.*]

1. The state of being imbricate; an overlapping of the edges, as in tiles or shingles.

2. A hollow or concavity like that of a gutter-tile.

"Adorned with neat *imbrications*, and many other fineries."—*Derham: Physico-Theology*, bk. viii., ch. vi.

* **ĭm'-brĭ-cā-tĭve**, *a.* [Eng. *imbricat(e)*; *-ive.*] The same as IMBRICATE (q.v.).

* **ĭm-brĭ'-ĕr**, *v.t.* [Pref. *im-* = in, and Eng. *brier*.] To entangle in a thicket. (*Hacket: Life of Williams*, ii. 192.)

* **ĭm-brō-ca'-dō**, *s.* [Sp.] Cloth of gold or silver.

* **ĭm-brō-ca'-ta**, * **ĭm-brŏc-ca'-ta**, *s.* [Ital., from *im-* = in, and *broccare* = to incite; *brocco* = a nail.] A hit or thrust.

* **ĭm-brĭght'-en** (*gh* silent), *v.t.* [Pref. *im-* = in, and Eng. *brighten* (q.v.).] To brighten up; to illumine.

"But now *imbrightened* into heavenly flame."
G. Fletcher: Christ's Triumph after Death.

* **ĭm-brĭs'-tle (tle as ęl)**, *v.t.* [Pref. *im-* = in, and Eng. *bristle*.] To make rough. (*Nashe: Lenten Stuffe.*)

* **ĭm-broĭd'-ĕr**, *v.t.* An old spelling of EMBROIDER (q.v.).

ĭm-brō'-glĭ-ō (*g* silent), *s.* [Ital., from *im-* = in, and *brogliare* = to confound, to confuse.]

1. An intricate or complicated plot, as of a play or novel.

2. A perplexing or confused state of affairs; a misunderstanding.

* **ĭm-broĭl'**, *v.t.* [EMBROIL.]

* **ĭm-brŏth'-ęl**, *v.t.* An old spelling of EMBROTHEL (q.v.).

* **ĭm-brŏwn'**, *v.t.* An old spelling of EMBROWN (q.v.).

ĭm-brûe', *v.t.* [O. Fr. *embruer* = to bedabble oneself: *em-* = in, and O. Fr. *bevre* = Lat. *bibo* = to drink. *Imbrue* is thus a doublet of *imbibe*, with which it has oftimes been confounded.]

1. To steep; to soak or drench in a fluid, as in blood.

"This sad token I *imbrue*
In the best blood of Roderick Dhu!"
Scott Lady of the Lake, iv. 28.

* 2. To pour out; to emit moisture. (*Spenser.*)

ĭm-brûed', *pa. par.* & *a.* [EMBRUED.]

* **ĭm-brûe'-mĕnt**, *s.* [Eng. *imbrue*; *-ment.*] The act of imbruing; the state or condition of being imbrued.

* **ĭm-brûte'**, *v.t.* An old spelling of EMBRUTE (q.v.).

* **ĭm-brûte'-mĕnt**, *s.* [Eng. *imbrute*; *-ment.*] The act of making brutish; the state of becoming brutish.

* **ĭm-brynge**, *a.* An old spelling of EMBRING (q.v.).

* **ĭm-bŭd'**, *v.i.* [Pref. *im-* = in, and Eng. *bud.*] To put or thrust forth buds; to bud.

"To make our spirits likewise to *imbud*."
Daniel: To the King's Majesty.

ĭm-bū', * **im-bow**, *v.t.* [Lat. *imbuo* = to cause to drink in.]

* 1. To cause to drink or suck in; to make to absorb; to tinge, to dye.

"Copper plentifully dissolved in aqua-fortis, will *imbue* several bodies with the colour of the solution."
—*Boyle: Works*, i. 782.

2. To cause to become penetrated; to tinge strongly.

"A mind *imbued*
With truth from heaven." *Cowper: Yardley Oak.*

* **ĭm-bū'-mĕnt**, *s.* [Eng. *imbue*; *-ment.*] The act of imbuing; a deep tincture.

* **im'-bŭrse**, *v.t.* [Pref. *im-* = in, and Eng. *burse* (q.v.).] To stock with money; to supply money to.

* **ĭm-bŭrse'-mĕnt**, *s.* [Eng. *imburse*; *-ment.*]

1. The act of imbursing or supplying with money.

2. Money laid up in stock.

* **ĭm-bŭsh'-mĕnt**, * **im-bushe-ment**, *s.* Old spelling of EMBUSHMENT (q.v.).

* **ĭm-bū'-tion**, *s.* [Lat. *imbutus*, pa. par. of *imbuo.*] The act of imbuing.

ĭ-mĕ-sa-tĭn, *s.* [Altered from *imasatin* (q.v.), by the substitution of *e* for *a*.]

Chem.: $C_8H_6N_2O$. A dark yellow inodorous body, obtained by the action of gaseous ammonia on a saturated alcoholic solution of isatin, containing a little powdered isatin in suspension, thus: $C_8H_5NO_2 + NH_3 = C_8H_6N_2O + H_2O$. It crystallizes in the form of straight rectangular prisms, which are insoluble in water, soluble in boiling alcohol, and slightly solnble in ether.

* **im-grame**, * **ym-grame**, *a.* [Pref. *im-* = in, and Eng. *grame* (q.v.).] Grieved, sad, doleful, harassed.

"A patrone of a benefice will haue a poore *ymgrame* soule, to beare the name of a parson."—*Wilson: The Arte of Rhetorique*, p. 37.

ĭm'-ĭde, *s.* [Altered from Eng., &c. *amide.*]

Chem.: Generally used in the plural. Imides are formed by the action of chloracids (the so-called chlorides of negative radicals) upon amides, thus: Acetamide $[NH_2(CMeO)] +$ acetylic chloride $(CMeOCl) =$ diacetimide $[NH(CMeO)_2] +$ hydrochloric acid (HCl). Imides are also formed by the substitution of a dyad negative radical for two atoms of hydrogen in ammonia, thus: succinimide $= NH(C_4H_4O_2)''$, in which two atoms of the hydrogen in ammonia have been replaced by the dyad negative radical of succinic acid.

ĭ-mĭd'-ō-gĕn, *s.* [Eng. *imid(e)*; o connective, and Gr. γεννάω (*gennaō*) = to generate.]

Chem.: A name given to the monatomic radical (NH).

ĭmidogen-bases, *s. pl.*

Chem.: A term applied to the secondary monamines. These are derived from ammonia by the replacement of two atoms of hydrogen by monad positive radicals. Dimethylamine $N(CH_3)_2H$, piperidine $N(C_5H_{10})''H$, and conine $N(C_8H_{14})''H$, are imidogen bases.

* **ĭm-ĭt-a-bĭl-ĭ-tў**, *s.* [Eng. *imitable*; *-ity.*] The quality or state of being imitable; possibility of being imitated.

ĭm'-ĭt-a-ble, *a.* [Lat. *imitabilis*, from *imitor* = to imitate; Fr. & Sp. *imitable*; Ital. *imitabile.*]

1. That may or can be imitated or copied.

* 2. Deserving of being imitated or copied; worthy of imitation.

"A great example *imitable* by all Princes."—*Bp. Taylor: Rule of Conse.*, bk. iii., ch. iii., rule 5.

* **ĭm'-ĭt-a-ble-nĕss**, *s.* [Eng. *imitable*; *-ness.*] The quality or state of being imitable.

* **ĭm'-ĭ-tan-çў**, *s.* [Eng. *imit(ate)*: *-ancy.*] Tending to imitate. (*Carlyle: Miscellanies*, iii. 67.)

ĭm'-ĭ-tāte, *v.t.* [Lat. *imitatus*, pa. par. of *imitor* = to imitate: Sp. & Port. *imitar*; Fr. *imiter.*]

1. To produce, or endeavour to produce a copy or likeness of anything in form, colour, or appearance.

2. To produce similar in qualities, style, effect, &c., to another.

"This tale is *imitated*, rather than translated, from a fragment."—*Scott: Frederick & Alice.* (Note.)

3. To follow as a model, pattern, or example; to copy in manners, conduct, actions, &c.; to follow the example of.

"He will not yet *imitate* and follow his passion."—*Sir T. More: Works*, p. 1,346.

4. To mimic; to ape; to copy the actions or movements of.

¶ *Imitation* is the generic copy, and *counterfeit* the specific: to *imitate* is to take a general likeness; to *copy*, to take an exact likeness; to *counterfeit*, to take a false likeness: to *imitate* is, therefore, almost always used in a good or an indifferent sense; to *copy* mostly, and to *counterfeit* always, in a bad sense: to *imitate* an author's style is at all times allowable for one who cannot form a style for himself. To *imitate* is the general term: to *mimic* and to *ape* are both species of vicious *imitation*. One *imitates* that which is deserving of *imitation*, or the contrary; one *mimics* either that which is not an authorized subject of *imitation*, or which is imitated so as to excite laughter. A person wishes to make that his own which he *imitates*, but he *mimics* for the entertainment of others. To *ape* is a serious though an absurd act of *imitation*; to *mimic* is a jocose act of *imitation*: to *mock* is an ill-natured and vulgar act of *imitation*. (*Crabb: Eng. Synon.*)

ĭm-ĭ-tā'-tion, *s.* [Lat. *imitatio*, from *imitatus*, pa. par. of *imitor*; Fr. *imitation.*]

I. *Ordinary Language:*

1. The act of imitating or copying.

"This primary or original copying, which in the ideas of Philosophy is *imitation*, is in the language of Criticism called invention."—*Hurd: Poetical Imitation*, § 1.

2. That which is produced, made, or done as a copy; a copy; a likeness; a semblance.

"My images are many of them copied from him, and the rest are *imitations* of him."—*Dryden: Letter to Sir R. Howard.*

II. *Music:* The repetition of a short subject by another part. The subject proposed is sometimes called the antecedent, and the passage which afterwards imitates it the consequent. Imitation by diminution is when the consequent is in notes half the length of those of the antecedent. Imitation by inversion is when the intervals of the antecedent are inverted in order to form the consequent. Imitation is said to be convertible when antecedent and consequent are interchangeable. If strict imitation be continued for any length of time, it is said to be canonical.

* **ĭm-ĭ-tā'-tion-al**, *a.* [Eng. *imitation*: *-al.*] Pertaining or relating to imitation; resembling.

* **ĭm-ĭ-tā'-tion-ĭst**, *s.* [Eng. *imitation*; *-ist.*] One who imitates; an imitator; one who is destitute of originality.

ĭm'-ĭ-tā-tĭve, *a.* & *s.* [Fr. *imitatif*, from Lat. *imitatus*, pa. par. of *imitor.*]

A. *As adjective:*

I. *Ordinary Language:*

1. Given to imitating; inclined to imitate or copy: as, Man is an *imitative* animal.

2. Aiming at imitation; designed to imitate.

"But *imitative* strokes can do no more."
Cowper: Task, i. 426.

3. Done or formed after a model, pattern, or example; done in imitation.

"For ploughing is an *imitative* toil."
Dryden: Virgil; Georgic ii. 262.

II. *Technically:*

1. *Min.:* Having a form suggestive of some other thing. Thus, botryoidal minerals are imitative of a cluster of grapes.

2. *Music:* Expressive of or designed to express the inner feelings and state of the mind, or the objects and occurrences of external life.

B. *As substantive:*

Gram.: A verb predicating imitation or resemblance.

***ĭm'-ĭ-tā-tĭve-lў,** *adv.* [Eng. *imitative; -ly.*] In an imitative manner.

ĭm'-ĭ-tā-tŏr, *s.* [Lat., from *imitatus*, pa. par. of *imitor.*] One who imitates, copies, or follows; a copier.

"Neither our good nor our bad qualities were those of *imitators.*"—*Macaulay: Hist. Eng.*, ch. iii.

***ĭm'-ĭ-tā-tŏr-shĭp,** *s.* [Eng. *imitator; -ship.*] The condition or office of an imitator.

"When to servile *imitatorship*,
Some spruce Athenian pen is prentized."
Marston: Scourge of Villainie.

***ĭm'-ĭ-tā-trĕss, *ĭm'-ĭ-tā-trĭx,** *s.* [Lat. *imitatrix.*] A female who imitates or copies.

"Friend, they either are men's souls themselves
Or the most wittie *imitatrixes* of them."
Sir Gyles Goosecappe, iii. 1. (1606).

ĭm-măc'-ụ-lāte, *a.* [Lat. *immaculatus*, from *im-* = *in-* = not; and *maculatus*, pa. par. of *maculo* = to spot; *macula* = a spot; Sp. *inmaculado*; Ital. *immaculato.*]

1. Spotless, pure; free from stain, spot, or blemish; unstained, undefiled.

"[They] kept the faith *immaculate* and pure."
Cowper: Expostulation, 208.

2. Pure, clear, transparent.

"Thou clear, *immaculate*, and silver fountain."
Shakesp.: Richard II., v. 3.

Immaculate Conception, *s.*

Roman Theol. & Ch. Hist.: The dogma defined by Pope Pius IX., on Dec. 8, 1854, that the immaculate conception of Mary is an article of divine faith. According to the dogma, in her active conception, or generation, there was nothing miraculous; but in the passive conception, or infusion of a rational soul, she was sanctified and preserved from the taint of original sin by the foreseen merits of Christ. The traditional day of Mary's conception has been honoured with a feast from the twelfth century, and found a place in the calendar in the fourteenth. In the fifteenth century, all doctors of Paris were bound to defend the doctrine, which was warmly adopted by the Franciscans and Carmelites, while the Dominicans, naturally following St. Thomas of Aquin, held the contrary view. The Council of Trent expressly excepted Mary from the decree *De Peccato Originali*, adopted in the fifth session (June 17, 1546).

ĭm-măc'-ụ-late-lў, *adv.* [Eng. *immaculate; -ly.*] In an immaculate, pure, spotless, or unblemished manner.

ĭm-măc'-ụ-late-nĕss, *ĭm-mac-u-late-nesse, *s.* [Eng. *immaculate; -ness.*] The quality or state of being immaculate; purity; freedom from spot, stain, or blemish.

"Candour and *immaculateness* of conversation is required."—*Mountague: Devoute Essayes*, pt. i., tr. 12, § 2.

***ĭm-măiled', *ĭm-mayled,** *a.* [Pref. *im-* = in, and Eng. *mailed.*] Clad in mail or armour.

Of men *immayled.*"
Browne: Britannia's Pastorals, bk. ii., s. 4.

***ĭm-măl'-lĕ-ą-ble,** *a.* [Pref. *im-* = *in-* = not, and Eng. *malleable* (q.v.).] That cannot be hammered, or wrought, or beaten with a hammer; not malleable.

"It reduces it to an *immalleable* substance."—*Boyle: Works*, iv. 319.

***ĭm-măn'-ą-cle,** *v.t.* [Pref. *im-* = in, and Eng. *manacle* (q.v.).] To manacle, to fetter, to confine; to put under restraint.

"This corporal rind
Thou hast *immanacled.*" *Milton: Comus*, 665.

***ĭm-mă-nā'-tion,** *s.* [Lat. pref. *im-* = in, and *manatio* = a flowing; *mano* = to flow.] A flowing or entering in. (*Lamb.*)

***ĭm-māne',** *a.* [Lat. *immanis* = huge, vast, savage.] Vast huge, prodigious; exceeding great.

"What *immane* difference is there between the twenty-fourth of February and commencement of March?"—*Evelyn: Sylva*, bk. i., ch. xviii.

***ĭm-māne'-lў,** *adv.* [Eng. *immane; -ly.*] In a vast or prodigious manner or degree; hugely, savagely, cruelly.

"A man of excessive strength, valiant, liberal, and fair of aspect, but *immanely* cruel."—*Milton: Hist. Eng.*, bk. i.

***ĭm'-mą-nențce, *ĭm'-mą-nĕn-çў,** *s.* [Lat. *immanens*, pr. par. of *immaneo.*] [Immanent.] The quality or state of being immanent; inherence, indwelling.

***ĭm'-mą-nęnt,** *a.* [Lat. *immanens*, pr. par. of *immaneo* = to remain in: *im-* = *in-* = in, and *maneo* = to remain; Fr. *immanent.*] Staying or remaining in; not passing out of the subject; limited to the subject or associated acts; having no external effect; inherent, internal, not transient.

"Logicians distinguish two kinds of operations of the mind; the first kind produces no effect without the mind, the last does. The first they call *immanent* acts; the second transitive. All intellectual operations belong to the first class; they produce no effect upon any external object."—*Reid: On the Intellectual Powers*, ess. 2, ch. xiv.

***ĭm-măn'-ĭ-fĕst,** *a.* [Pref. *im-* = *in-* = not, and Eng. *manifest* (q.v.).] Not manifest; not plain or clear.

"A time not much unlike that which was before time *immanifest* and unknown."—*Browne: Vulgar Errours*, bk. vi., ch. vi.

***ĭm-măn'-ĭ-tў,** *s.* [Fr. *immanité*, from Lat. *immanitatem*, accus. of *immanitas*, from *immanis* = vast, savage, cruel.] Barbarity, cruelty, savageness.

Ĭm-măn'-ụ-ęl, *s.* [Heb. עִמָּנוּאֵל (*Immanuel*) = God with us; Gr. Ἐμμανουήλ (*Emmanouēl.*)

Scrip.: The name which was to be given to a child who, it was prophesied by Isaiah, was to be born of הָעַלְמָה (*haalmah*), *i.e.*, *the* virgin, not *a* virgin, as in the A.V. At the time the words were uttered, the kingdom of Judah was threatened with political extinction by a hostile confederacy, consisting of the kingdoms of Israel and Syria. For the encouragement of King Ahaz it was stated that before the child Immanuel should be old enough to discern between good and evil, "the land," as it has been rendered, "shall be forsaken, of whose two kings thou art afraid" (Isa. vii. 10-16). In Matt. i. 23 the prophecy is applied to the miraculous birth of Jesus from the Virgin Mary.

"The stretching out of his wings shall fill the breadth of thy land, O *Immanuel.*"—*Isaiah* viii. 8.

***ĭm-măr-çĕs'-çĭ-ble, *ĭm-măr-çĕs'-sĭ-ble,** *a.* [Lat. pref. *im-* = *in-* = not; and *marcesco* = to fade.] Unfading.

"The crown that thou hast laid up for me is *immarcescible.*"—*Bp. Hall: A Holy Rapture*, § 11.

***ĭm-măr-çĕs'-çĭ-blў, *ĭm-mar-çĕs'-sĭ-blў,** *adv.* [Eng. *immarcescible; -ly.*] Unfadingly.

"Not fading and corruptible, but *immarcessibly* eternal."—*Bp. Hall: Invisible World*, bk. iii., § 12.

ĭm-mar'-ġĭn-āte, *a.* [Pref. *im-*, and Lat. *marginatus.*]

"Invincible of pleasure, uncouquered by travels, and in gratuities and liberality *immatchable.*"—*P. Holland: Plutarch*, p. 1,041.

***ĭm-măţch'-lĕss,** *a.* [Pref. *im-* = *in-* = not, and Eng. *matchless* (q.v.).] Incomparable; peerless. (*G. Markham: Tray. of Sir R. Grinvile; Dedic.*)

Ĭm-mą-tĕr'-ĭ-ąl, *a.* & *s.* [Fr.] [Material.]

A. *As adjective:*

1. Not consisting or composed of matter; incorporeal, spiritual.

"Angels are spirits *immaterial* and intellectual."—*Hooker: Eccles. Polity.*

2. Of no essential weight, importance, or consequence; unimportant.

*** B.** *As subst:* That which is incorporeal, or not composed of matter.

"As well might nothing bind immensity,
Or passive matter *immaterials* see."
Harte: Essay on Satire.

ĭm-mą-tĕr'-ĭ-ąl-ĭşm, *s.* [Pref. *im-* = *in-* = not, and Eng. *materialism.*]

Phil.: A term sometimes so widely taken as to be a synonym for Idealism (q.v.) or Phenomenalism; more usually limited to the doctrine of George Berkeley, Bishop of Cloyne (1684-1753). Prof. A. C. Fraser (*Works of G. Berkeley*, i. 120) reduces this system to three principles:—(1) The negation of Matter, as signifying an imperceiving and unperceived substance and cause; (2) The affirmation, as Substance proper, of the Ego; and, as Cause proper, of a reasonable will; (3) The affirmation of Matter, as consisting of the ideas, objects, or perceptions of sense; of material substances usually called sensible things; and of material causes or uniform antecedents in the order of sensible changes.

"Berkeley was the founder of a doctrine of universal *Immaterialism.*"—*Ueberweg: Hist. Philos.*, ii. 88.

ĭm-mą-tĕr'-ĭ-ąl-ĭst, *a.* & *s.* [Pref. *im-* = *in* = not, and Eng. *materialist.*]

A. *As adj.:* Inculcating or in any way connected with immaterialism (q.v.).

"The *immaterialist* theory of an essentially spiritual universe."—*A. C. Fraser: Berkeley*, p. 79.

B. *As subst.:* A believer in any form of immaterialism (q.v.).

"It is not, therefore, to be expected that any man, whether materialist or *Immaterialist*, should have exactly just notions of the Deity."—*Berkeley: Hylas & Philonous*, dial. 3.

ĭm-mą-tĕr ĭ-ăl'-ĭ-tў, *s.* [Eng *immaterial; -ity.*] The quality or state of being immaterial or incorporeal; freedom from or absence of matter.

"The notion of the soul's *immateriality* evidently facilitates the belief of a resurrection."—*Clarke: A Third Defence.*

*** ĭm-mą-tĕr'-ĭ-ąl-īze,** *v.t.* [Eng. *immaterial; -ize.*] To make immaterial or incorporeal; to free from matter.

"Though assiduity in the most fixed cogitation be no trouble to *immaterialized* spirits, yet is it more than our embodied souls can bear."—*Glanvill: Sceptis Scientifica*, ch. xii.

ĭm-mą-tĕr'-ĭ-ąl-lў, *adv.* [Eng. *immaterial; -ly.*]

1. In an immaterial or incorporeal manner; without matter.

"Visible species of things strike not our senses *immaterially.*"—*Browne: Vulgar Errours*, bk. iii., ch. vii.

2. In an unimportant manner or degree.

ĭm-mą-tĕr'-ĭ-ąl-nĕss, *s.* [Eng. *immaterial; -ness.*] The quality or state of being immateriality.

*** ĭm-mą-tĕr'-ĭ-āte,** *a.* [Pref. *im-* = *in-* = not; Eng. *materiate* (q.v.).] Not consisting of matter; incorporeal, immaterial.

"Any such transmission and influx of *immateriate* virtues."—*Bacon: Nat. Hist.*, § 900.

ĭm-mą-tūre, *a.* [Lat. *immaturus*, from *im-* = *in-* = not, and *maturus* = ripe.]

* **I.** *Lit.:* Not mature or ripe; not come to perfection. (*Milton: P. L.*, vii. 277.)

II. *Figuratively:*

1. Not perfect, not complete; not perfected or completed; not matured.

"The land enterprise of Panama was an ill-measured and *immature* counsel."—*Bacon: Henry VII.*

2. Not having reached full age; young.

"Though *immature* I end my glorious days."
Rowe: Lucan, v. 948.

3. Too early; coming before the natural time; premature.

"We . . . call not that death *immature*, if a man lives till seventy."—*Taylor: Holy Living & Dying.*

ĭm-mą-tūred, *a.* [Pref. *im-* = *in-* = not, and Eng. *matured.*] Not matured; not perfected or completed.

"He punishes . . . obstinacy with *impenitence*, and *impenitence* with damnation."—*Bp. Taylor: Sermons,* vol. i., ser. 8.

ĭm-pĕn'-ĭ-tĕnt, *a.* & *s.* [Fr., from Lat. *impœnitens*, from *im-* = *in-* = not, and *pœnitens* = penitent (q.v.); Itsl. & Sp. *impenitente.*]

A. *As adj.:* Not penitent; not repentant for sin or guilt.

"To remit the sins of *impenitent* sinners was a profane abuse of the power which Christ had delegated to his ministers."—*Macaulay: Hist. Eng.,* ch. xxi.

* **B.** *As subst.:* One who does not or will not repent; a hardened sinner.

ĭm-pĕn'-ĭ-tĕnt-ly, *adv.* [Eng. *impenitent; -ly.*] In an impenitent manner; without repentance, remorse, or contrition; obdurately.

ĭm-pĕn'-nāte, *a.* [Pref. *im-* = *in-* = not, and *pennate* (q.v.).]

Ornith.: Having short wings covered with scale-like feathers. [IMPENNES.]

* **ĭm-pĕnned',** *pa. par.* or *a.* [IMPEN.]

ĭm-pĕn'-nēs, *s. pl.* [Nom. pl. of Mod. Lat. *impennis*, from Lat. *im-* = not, and *penna* = a wing, a feather.]

Ornith.: The name given by Illiger to a family or tribe of Swimming Birds having short wings covered with scale-like feathers. It includes the Divers, the Auks, the Penguins, &c.

* **ĭm-pĕn'-noŭs,** *a* [Lat. *im-* = *in-* = not, and *penna* = a wing; Eng. adj. suff. *-ous.*] Having no wings; wanting wings; wingless.

"It is generally conceived an earwig hath no wings, and is reckoned among *impennous* insects by many."—*Browne: Vulgar Errours,* bk. iii., ch. xxxvii.

* **ĭm-pēo'-ple,** *v.t.* Another spelling of EMPEOPLE (q.v.).

* **ĭm'-pĕr-ant,** *a.* [Lat. *imperans*, pr. par. of *impero* = to command.] Commanding.

* **ĭm'-pĕr-āte,** *a.* [Lat. *imperatus*, pa. par. of *impero* = to command.] Done by express order or direction; not involuntary; commanded.

"These I call the *imperate* acts of divine providence. —*Hale: Orig. of Mankind,* ch. i., p. 36.

* **ĭm-pĕr'-a-tĭv-al,** *a.* [Eng. *imperativ(e); -al.*] Pertaining or peculiar to the imperative mood.

ĭm-pĕr'-a-tĭve, *a.* & *s.* [Fr. *impératif*, from Lat. *impérativus*, from *imperatus*, pa. par. of *impero* = to command; Ital. & Sp. *imperativo.*]

A. *As adjective:*

I. *Ordinary Language:*

1. Expressive of command; containing a command or express direction; commanding; authoritative.

"The suits of kings are *imperative.*"—*Bp. Hall: Contemplations; David & Bathsheba.*

2. That cannot be avoided, evaded, or neglected; that must be attended to; compulsory; obligatory: as, an *imperative* duty.

II. *Gram.:* A term applied to that mood of a verb which expresses command, entreaty, or exhortation.

B. *As substantive:*

Gram.: That mood of a verb which expresses command, entreaty, or exhortation.

"If we declare our meaning in . . . the form of a command or request, it is the *imperative.*"—*Beattie: Moral Science,* pt. ii., ch. i., § 3.

¶ *Categorical Imperative:*

Philos.: The name by which Kant designates the great principles of the Moral Law, to show that morality is not a mere synonym of interest, nor founded on experience; but that it prescribes to us *a priori* what we ought and what we ought not to do, presupposing our liberty to obey or to disobey.

"If we ask for explanation of particular right and wrong, and for guidance in particular duty, the *Categorical Imperative* is more likely to give heat than light; or, if it be a light, it is rather the beacon on the hill-top than the lamp to illuminate the domestic chamber."—*W. Wallace: Kant,* p. 216.

ĭm-pĕr'-a-tĭve-lў, *adv.* [Eng. *imperative; -ly.*] In an imperative manner; with command or authority; authoritatively; as a command.

"The words, though they are delivered *imperatively*, yet are a plain promise."—*Bp. Bull: Sermons,* vol. i., ser. 1.

ĭm-pĕr-ā'-tor, *s.* [Lat.]

1. *Rom. Antiq.:* A title originally bestowed upon a victorious leader on the field of battle by his soldiers; towards the end of the commonwealth it was conferred by the senate. It might be conferred more than once on the same person. Augustus and his successors constantly assumed this title, and it became the peculiar appellation of supreme power. Still later it became equivalent to the modern emperor.

2. *Zool.:* A genus of gasteropodous mollusca, family Turbinidæ. About twenty species are known from South Africa, India, Australia, and New Zealand.

ĭm-pĕr-a-tōr'-ĭ-a, *s.* [Lat., fem. sing. of *imperatorius* = pertaining to a general. Named by Linnæus from its supposed forceful medicinal virtues.]

Bot.: A sub-genus of Peucedanum (q.v.). It contains one British species, *Peucedanum* (*Imperatoria*) *Ostruthium.*

* **ĭm-pĕr-a-tōr'-ĭ-al,** *a.* [Lat. *imperatorius*, from *imperator.*] [EMPEROR.]

1. Commanding; imperative; authoritative; with command.

2. Of or pertaining to the office or title of imperator: as, *imperatorial* laurels.

* **ĭm-pĕr-a-tōr'-ĭ-an,** *a.* [Eng., &c. *imperator; -ian.*] Imperial. (*Gauden: Tears of the Church,* 143.)

ĭm-pĕr-a-tōr'-ĭn, *s.* [Lat., &c. *imperator(ia); -in* (*Chem.*).]

Chem.: $C_{12}H_{12}O_3$. Peucedanin. A neutral substance destitute of taste and smell, obtained from the root of the masterwort by digesting it in boiling alcohol and purifying, by means of ether, from a brown resinous body with which it is contaminated. It crystallizes in tufts of colourless, transparent prisms, which melt at 75° without loss of weight. It is insoluble in water, partly soluble in boiling alcohol, but very soluble in ether. The alcoholic solution of imperatorin has a burning aromatic taste, and produces a sensation of scratching in the throat.

* **ĭm-pĕr-a-tōr'-ĭ-oŭs,** *a.* [Lat. *imperatorius.*] Befitting an emperor; imperial. (*Hacket: Life of Williams,* ii. 9.)

* **ĭm-pĕr'-a-tōr-ў,** * **im-per-a-tor-ie,** *a.* [Lat. *imperatorius.*] Pertaining to or containing power, command, or authority.

"[I] will impart
To thee the mightie *imperatorie* art."
Chapman: Hymn to Hermes.

ĭm-pĕr-çēĭv'-a-ble, *a.* [Pref. *im-* = *in-* = not, and Eng. *perceivable* (q.v.).] That cannot be perceived: imperceptible.

ĭm-pĕr fĕc'-tion, *s.* [Pref. *im-* = *in-* = not and Eng. *perfection* (q.v.); Fr. *imperfection*, from Lat. *imperfectio*; Sp. *imperfeccion*; Ital. *imperfezione.*] [IMPERFECT.]

1. The quality or state of being imperfect; a want of perfection; a fault, moral or physical; a defect. (*Pope: Essay on Man*, i. 115.)

2. A deficiency, a gap; something imperfect or defective.

¶ An *imperfection* in a person arises from his want of *perfection*, and the infirmity of his nature; there is no one without some point of imperfection which is obvious to others, if not to himself; he may strive to diminish it, although he cannot expect to get altogether rid of it: a *defect* is a deviation from the general constitution of man; it is what may be natural to the man as an individual, but not natural to man as a species; in this manner we may speak of a *defect* in speech, or a *defect* in temper. (*Crabb: Eng. Synon.*)

ĭm-pĕr'-fĕct-lў, *adv.* [Eng. *imperfect*; *-ly.*] In an imperfect manner or degree; not completely, not fully.

"Oh make me thus *imperfectly* happy before my time."—*Bp. Hall: Occasional Meditations*, med. 91.

ĭm-pĕr'-fĕct-nĕss, *s.* [Eng. *imperfect*; *-ness.*] The quality or state of being imperfect; imperfection. (*Boyle: Works*, iii. 424.)

* **ĭm-pĕr'-fŏr-ą-ble,** *a.* [Lat. *im-* = *in-* = not, and *perforo* = to perforate (q.v.).] That cannot be perforated, pierced, or bored through.

ĭm-pĕr-fŏr-ā'-tą, *s. pl.* [IMPERFORATE.]

Lockt legs; and down fell both on earth, close by
each other's side."
Chapman: Homer; Iliad xxiii.

3. Contained in substance or essence, or by fair inference, but not actually expressed; deducible by inference or implication.

implied-contracts, *s. pl.*

Law: (See extract).

"*Implied contracts* are such as reason and justice dictate, and which therefore the law presumes that every man undertakes to perform. As, if I employ a person to do any business for me, or perform any work, the law implies that I undertook, or contracted, to pay him as much as his labour deserves. If I take up wares from a tradesman without any agreement of price, the law concludes that I contracted to pay their real value. And there is also one species of *implied contracts* which runs through and is annexed to all other contracts, conditions, and covenants—viz., that if I fail in my part of the agreement, I shall pay the other party such damages as he has sustained by such my neglect or refusal."—*Blackstone: Comment.*, bk. ii., ch. 26.

implied-trusts, *s. pl.*

Law: Trusts arising from an equitable construction put upon the facts, conduct, or situation of parties. They are of two kinds: those depending upon the presumed intent of the parties, and those not so depending.

"France is revolted from the English quite;
Except some petty towns of no *import*."
Shakesp.: 1 Henry VI., i. 1.

¶ The import trade of the United States has for years been very considerable, though much less than that of Great Britain, which country imports vast quantities of raw materials and of food stuffs which here are products of the soil, and form the great bulk of our exports. The imports to this country, it is true, embrace large quantities of food stuffs—sugar, for instance, being the largest single item imported. Raw materials are also imported in considerable quantities. But to these must be added large supplies of manufactured goods. In the fiscal year 1890–91 the imports to the United States were valued at $844,916,196. These were divided as follows: Food and animals, $284,715,737; raw materials, $196,393,669; articles partly or wholly manufactured, $242,682,768; luxuries, &c., $113,758,879. Of these much the greatest single item was sugar and molasses, valued at $108,458,621. Much the largest sum of imports came from Great Britain and Ireland, aggregating $194,723,262. The total value of imports to Great Britain, in 1882, was £413,019,608. From the United States there were imports valued at £88,352,613, from France £39,090,381, from Germany £25,570,985, from Holland £25,320,709, from Australia and New Zealand £25,136,875, from Russia £21,047,722, from Bengal and Burmah £21,845,499, from Belgium 14,932,674, from Bombay and Sind £13,337,218, from Spain £11,488,265, from China £9,936,092, from the Dominion of Canada £9,878,268, &c. [FREE-TRADE.]

"Have you heard any *imputation* to the contrary?"—*Shakesp.: Merchant of Venice*, v. 3.

II. *Theol.:* The verb impute occurs fifteen times in the Authorised Version; the noun imputation not at all. The Calvinistic doctrine is that Adam's sin of disobedience in Paradise is imputed to all his natural descendants, making each person who comes into the world chargeable with the guilt of Original Sin (q.v.). On the other hand, God justifies those effectually called, not by counting faith itself, or any other act of obedience, as merit, but by imputing to them as righteousness the obedience and satisfaction rendered by Christ, which they receive, and on which they rest by faith, the gift of God. The ninth of the Thirty-nine Articles recognises the doctrine of Original Sin; the eleventh teaches that we are accounted righteous only for the merit of our Lord and Saviour by faith, but the word impute is not employed. [IMPUTE, II., 1. 2.]

***ĭm-pūt'-ą-tĭve**, *a.* [Lat. *imputativus*, from *imputatus*, pa. par. of *imputo*; Fr. *imputatif*; Ital. & Sp. *imputativo.*] Coming by imputation; imputed.

ĭn- (1), *pref.* [IN, *pref.*] The English preposition *in* used as a prefix, with the simple force of in or within: as, *in*sight, *in*come, *in*bred, *in*land, &c.

ĭn- (2), *pref.* [Lat.] An adverbial or prepositional prefix, used in words derived from the Latin, or from the Latin through the French. It has three forces:

(1) That of the preposition or adverb *in*, as in *in*vade, *in*nate, *in*close, &c.

(2) An intensifying or augmenting force, as in *im*poverish.

(8) A negative force. This is the most common use, as the prefix can be added to almost all adjectives and adverbs. *In-* becomes *i-* before *gn*, as in *ignoble*; *il-* before *l*, as in *illegal*; *im-* before *m*, *b*, or *p*, as in *immense*, *imbibe*, *impure*; *ir-* before *r*, as in *irrational*. In many cases the words have reached us from the Latin through the French, as *incapable*, *incarnation*, &c. *In-* is used to form a large number of words correlative to others beginning with *e-* or *ex-*, as *inhale*, *exhale*.

ĭn-a-bĭl'-ĭ-tў, * **ın-a-bĭl-ĭ-tie,** * **ĭn-a-bўl-ĭ-te,** *s.* [Pref. *in-* (2), and Eng. *ability* (q.v.).] The quality or state of being unable; lack or want of ability, capacity, or power, whether physical, intellectual, or moral; want or lack of resources; incompetence, powerlessness, disability.

"His own utter *inability* to stand before the power of the Almighty."—*Stillingfleet: Works*, vol. ii., ser. 9.

¶ *Inability* denotes the absence of *ability* in the most general and abstract sense. *Disability* implies the absence of *ability* only in particular cases: the *inability* lies in the nature of the thing, and is irremediable; the *disability* lies in the circumstances, and may sometimes be removed. (*Crabb: Eng. Synon.*)

* **ĭn-ā'-ble,** *v.t.* [Enable.]

* **ĭn-ā'-ble-mĕnt,** *s.* [Enablement.]

"*Inarching* is a method of grafting, which is commonly called grafting by approach. This method of grafting is used when the stock and the tree may be joined: the branch to be *inarched* is fitted to the stock

at the proposed point of junction. The rind and wood on one side are pared away about three inches in length, as is the stock or branch in the place where the graft is to be united; a little tongue is cut upwards in the graft, and a notch made in the stock to admit it, to prevent their slipping, and for better union. The joint is clayed or waxed as usual. After four months the graft may be cut from the mother tree, sloping it off close to the stock. The operation is always performed in April or May, and is commonly practised upon oranges, myrtles, jasmines, walnuts, firs, and pines, which will not succeed by common grafting or budding."—*Miller: Gardener's Dict.*

Compar. Religions:

1. *Ethnic*: An incantation is a formula, either said or sung, supposed to add force to magical ceremonies. Incantations in classic times were employed: (1) To control the powers of Nature (Hor., *Ep.* v. 45, 46; xvii. 4, 5; Virg., *Ecl.* viii. 69; *Æn.* iv. 489); (2) to compel the attendance and assistance of supernatural beings (Senec., *Medea* iv.; Virg., *Æn.* iv. 490); (3), as love-spells (Theoc., *Id.* ii.; Virg., *Ecl.* viii.), in which sense they linger to the present day; and (4) as a means of inflicting injury (Hor., *Ep.* xvii. 27–29). Occasionally they were used in sympathetic medicine (q.v.). An interesting theory that incantations are survivals of ill-remembered and mutilated formulæ of the worship of Isis will be found in Pluche (*Histoire du Ciel* (ed. 1740), ii. 24). [Magic.]

"The Kur-án (ch. cxiii.) . . . treats charms and *incantations* as capable of producing evil consequences."—*Smith: Dict. of the Bible*, ii. 194.

2. *Jewish*: In the Authorised Version these are called enchantments. Those who practised them are coupled with dreamers. They were not to be hearkened to (Jer. xxvii. 9). Nor was any one of the Israelites to practise enchantments (Lev. xix. 26). Yet the Ten Tribes did so (2 Kings xvii. 17).

***in-căn'-ta-tòr-ў**, *a.* [Lat. *incantatus*, pa. par. of *incanto*; Ital. *incantatorio*.] Dealing by enchantment; magical.

3. Any offering to a superior being.

"*Incense* kindled at the muse's flame" *Gray : Elegy.*

II. *Technically :*

1. *Bot. :* The resin or gum of Olibanum.

2. *Comparative Religions :*

(1) *Ethnic :* Sir G. Birdwood (in *Encyc. Brit.*, ed. 9th, xii. 718, sqq.), considers that religious censing of persons and things grew out of purificatory fumigation. Tylor (*Prim. Cult.*, 1873, ii. 383) is of opinion that incense is the natural outcome of animism, which might reasonably hold that offerings reduced to smoke or vapour by the medium of fire were fittingly consumed by or transmitted to spiritual beings. (Cf. Genesis viii. 21 ; Hom., *Il.* i. 317 ; Ovid, *Met.*, xii. 154.) An inscription in the valley of Hammamat states that an Egyptian nobleman was sent by Pharoah Sankhara (B.C. 2500) "to bring back odoriferous gums" from Punt, now identified with the Somali country ; the marbles of Nineveh furnish examples of offering incense to the Sun-god (2 Kings xxiii. 5) ; and the Hindus employed it from the remotest antiquity. The progress in classic times from "fumigations with herbs and chips of fragrant wood" is shown in the *θύον* (cf. *θύος*) of Homer, and the *λιβανώτος* of later writers ; in the *herbæ Sabinæ* and *laurus* of Ovid (*Fast.* i. 343, 344), and the *mascula thura* of Virgil (*Ecl.* viii. 65).

(2) *Jewish :* קְטֹרֶת (*qetoreth*) קְטֹרָה (*qetorah*). This is sometimes confounded with לְבֹנָה (*lebonah*), frankincense, which is the name of a plant. Incense was compounded of stacte, onycha, galbanum, and pure frankincense, an equal part of each by weight. Any one making a similar composition was to be cut off from the people of God. (Exod. xxx. 34–38.) Incense was to be burnt every morning and evening on the "altar of incense." (Exod. xxx. 7, 8.) On the great day of atonement a handful of it, put on a censer of burning coals when the priest went within the veil to the Most Holy Place, was to rise in a cloud covering the mercy seat (Lev. xvi. 12, 13). It was used also on extraordinary occasions, at times of great public calamity, as plague (Num. xvi. 46–50). Only the priests might burn incense (2 Chron. xxvi. 16–21 ; Luke i. 8, 9). Probably it symbolised the acceptable prayers of saints (Psalm cxli. 2 ; Rev. viii. 4).

(3) *Christian :* In the Roman and Greek Churches it is used in all the solemn offices. It is mentioned in the first *Ordo Romanus*, probably of the seventh century. It is also used in the Catholic and Apostolic Church. [IRVINGITES.] In the Anglican Church the use of incense was gradually abandoned after the reign of Edward VI. until the ritualistic revival of the present day ; but it has never been formally prohibited. The Protestant churches of the United States and Europe do not employ incense in their ritual.

incense-breathing, *a.* Exhaling incense or sweet odours : as, the *incense-breathing* morn. (*Gray : Elegy.*)

incense-tree, *s.*

I. *Ord. Lang.:* To cut.

"Cutting or *inciding* the foreskin should be mentioned here as a practice adopted amongst them."—*Cook: Third Voyage*, bk. iii., ch. ix.

2. *Med.:* (See extract).

"Medicines are said to *incide* which consist of pointed and sharp particles; as acids, and most salts, by which the particles of other bodies are divided from one another."—*Quincy.*

ĭn'-çĭ-dençe, *s.* [Fr., from Low Lat. *incidentia*, from *incidens*, pr. par. of *incido* = to fall upon: *in-* = in, on, and *cado* = to fall; Sp. *incidencia*; Ital. *incidenza.*]

I. *Ordinary Language:*

1. The act or state of falling on or upon; a falling, a fall.

* 2. That which falls out or happens; an incident.

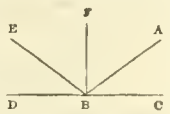
"The determination of these meaner *incidences*."—*Bp. Hall: Contempt.; Salomon's Choise.*

II. *Phys.:* The manner of falling on, or the direction in which a body, or a ray of light, heat, &c., falls upon any surface.

"In equal *incidences* there is a considerable inequality of refractions."—*Newton: Opticks.*

¶ (1) *Angle of incidence:*

Optics, Physics, &c.: An angle formed by two straight lines, one the line of incidence [2] of a ray of light or heat, or of an elastic body moving to strike a plane, and the other a perpendicular to that plane. The angle formed by the perpendicular and the line of departure taken by the elastic body is called the angle of reflection, and is always equal to the former one. If in the figure, C D be the plane, A B the line of incidence, and F B a perpendicular to C D, then A B F is the angle of incidence, and F B E the angle of reflection. Formerly these terms were more commonly applied to the angles A B C and E B D [2].



(2) *Line of incidence:*

Optics, Physics, &c.: The straight line taken by a ray of light or heat, or an elastic body moving to strike a plane at an acute or right angle. [1.]

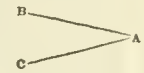
2. *Geom. & Math.:* The mutual approach, tendency, or leaning of two bodies, lines, or planes towards each other, so as to make an angle where they meet, or where the lines of their direction meet. This angle is called the *angle of inclination*. Thus in the figure, the angle B A C is the angle of inclination of the two lines B A, C A.



"The other lying at an *inclination* of twenty-three and a half degrees."—*Derham: Astro-Theology*, bk. iv., ch. iv.

3. *Pharm.:* The act by which a clear liquor is poured off from some fæces or sediment by only stooping the vessel; also called decantation.

¶ For the difference between *inclination* and *bent*, see Bent; for that between *inclination* and *disposition*, see Disposition.

¶ *Inclination of an orbit:*

Astron.: The angle at which the orbit meets the ecliptic.

* **ĭn-clĭn'-a-tŏr-ĭ-lў,** *adv.* [Eng. *inclinatory*; *-ly.*] In an inclined manner; obliquely with inclination or deviation.

"Whether they be refrigerated *inclinatorily*, or somewhat equinoxially."—*Browne: Vulgar Errours*, bk. ii., ch. ii.

* **ĭn-clĭn'-a-tŏr-ў,** *a.* [Lat. *inclinat(us)*, pa. par. of *inclino*; Eng. adj. suff. *-ory.*] Having the quality of leaning or inclining.

"If that *inclinatory* virtue he destroyed by a touch."
—*Browne: Vulgar Errours*, bk. ii., ch. iv.

In-clīne', * **ŏn-clīne',** * **in-clyne,** *v.t. & t.* [Fr. *incliner*, from Lat. *inclino* = to incline: *in* = towards, and *clino* = to lean; O. Fr. *encliner*; Sp. & Port. *inclinar*; Ital. *inclinare.*]

"To this his steps the thoughtful prince *inclined*."
Pope: Homer; Odyssey i. 533.

2. To bend down, to bow, to stoop: as, To *incline* the head or body as an act of reverence or civility.

"Then softe himself *inclyning* on his knee
Down to that well." *Spencer: F. Q.*, II. ii. 8.

II. *Fig.:* To dispose, to turn; to give a tendency, propensity, or inclination to.

"*Incline* our hearts to keep this law."—*Book of Common Prayer: Response to Commandments.*

ĭn'-clīne, *s.* [Incline, *v.*] An inclination; an inclined plane; an ascent or descent, as in a road; a gradient.

In-clīned', *pa. par. & a.* [Incline, *v.*]

A. *As pa. par.:* (See the verb).

B. *As adjective:*

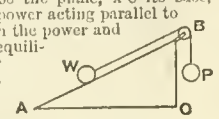
1. *Ord. Lang.:* Deviating from the normal line or direction; having a tendency; disposed. (*Lit. & fig.*)

"But yet his horse was not a whit
Inclined to tarry there." *Cowper: John Gilpin.*

II. *Bot.:* Bent out of a perpendicular direction, or into a curve with the convex side uppermost.

inclined-plane, *s.*

Physics: One of the mechanical powers. It consists of a plane, inclined obliquely to the horizon. If A B be the plane, A C its base, B C its height, P a power acting parallel to the plane A B, then the power and the weight are in equilibrio, if the power be to the weight as the height of the plane to its length. The velocity acquired by a body descending an inclined plane is the same as if it had fallen perpendicularly from the same height. The inclined-plane is used for the descent of bodies; also for the ascent, by vehicles, &c., of hills far too steep to be directly scaled by wheeled carriages.



INCLINED-PLANE.

Inclined-plane wheels:

Mach.: A name for Hooker's gearing.

inclined-strata, *s. pl.*

Geol.: Strata which dip at an angle with the horizon.

ĭn-clĭn'-ĕr, *s.* [Eng. *Inclin(e)*; *-er.*] One who or that which inclines; spec., an inclined dial.

ĭn-clĭn'-ĭng, *pr. par.* or *a.* [Incline, *v.*]

1. *Ord. Lang.:* (See the verb).

2. *Bot.:* Falling back from the perpendicular. Similar to reclining, but in a greater degree.

ĭn-clĭn-ŏm'-ĕt-ĕr, *s.* [Eng. *incline*; *o* connective, and Eng. *meter.*]

1. An instrument to detect the inclination or dip, the vertical element of the magnetic force. [Dipping-needle.]

2. [Batter-rule].

* **ĭn-clĭp',** *v.t.* [Pref. *in-* (1), and Eng. *clip* (q.v.).] To embrace, to surround, to encircle.

"Whate'er the ocean pales, or sky *inclips*,
Is thine." *Shakesp.: Ant. & Cleop.*, II. 7.

* **ĭn-clŏĭs'-tĕr,** *v.t.* [Pref. *in-* (1), and *cloister* (q.v.).] To shut up in a cloister; to enclose.

"*Incloisters* here this narrow floor."
Lovelace: Death of Mrs. Elizabeth Filmer.

ĭn-clōsĕ', *v.t.* [Enclose.]

1. To shut in, to shut up; to surround or confine on all sides; to encompass; to close in all round.

* 5. Inspiration.

"A lowly-minded Christian talks of no immediate *incomes* or communications."—*Glanvill: Sermon* i.

income-tax, *s.*

1. *Polit. Econ.*: A tax, for State purposes, upon a person's income. Theoretically, it looks the fairest of all taxes and the most consistent of all with Free Trade, for it allows a man unrestrictedly to make his income from any honest source he pleases, and then taxes him according to its amount. Practically speaking, it is far from fair. One man makes £500 a year from the interest of money invested in the Funds, without ever trenching on his capital; a professional man pays the same sum on £500, dependent for its continuance on his health; and, worse than all, a life annuitant on the payment which means part of his capital as well as his interest. Then there is such an impossibility of raising a tax on small incomes that the great mass of the people pay nothing at all. The tax is, moreover, inquisitorial, demoralising, and fitted to sow disaffection to the government. Most people keenly feel being asked to state their income; the unconscientious call it less than it really is, and in many cases the conscientious man, after making a correct return, finds it rejected; the State, by its officers, thus impeaching his veracity and honesty.

2. *English Hist.*: This tax bears a certain relation to the subsidies sometimes required from the commons and clergy when war was meditated; but in its modern form it came into existence on January 9, 1799, during the protracted and expensive struggle with France, consequent on the Revolution of 1789. On incomes above £150 it was, in 1803, five per cent., raised, in 1805, to six and a half per cent., and, in 1806, to ten per cent. It was abolished in 1816, soon after peace was concluded. The first Afghan war and the protectionist system having deranged the finances of the country during the Liberal administration which came to an end in 1841, Sir Robert Peel, who succeeded to power, proposed and carried a bill imposing income-tax for three years. It became law on Jan. 22, 1842, and enabled its author to remove many vexatious imposts interfering greatly with commerce, while yielding but little to the revenue. Since then it has never been abolished, but has often varied in amount. In 1855, during the Crimean war, it rose to 1s. 4d. in the pound, levied on all incomes above £150; it was lowest in 1874. It gradually rose to 8d. in 1885, and has varied since. Each penny of the tax produces about £2,000,000.

¶ In the United States an income-tax was imposed in 1863, to help meet the exigencies of the Civil War, and remained in existence until 1871. Exemption was first fixed at $600, then at $1,000, and finally at $2,000. Incomes up to $5,000 paid 5 per cent., those between $5,000 and $10,000, 7 per cent., those over $10,000, 10 per cent. The amount received from this tax varied greatly, as the exemption limit was changed. In 1866 it produced $61,000,000; in 1867, only $27,418,000. The tariff bill of 1894 contained an income-tax provision, as a measure to replace the revenue expected to be lost by the decrease of duties. In this the exemption was fixed at $4,000, a tax of 2 per cent. to be laid on all the increments of income above this amount, but on May 20, 1895, the Supreme Court decided the income-tax feature unconstitutional, whereupon that portion of the bill became at once inoperative and was never enforced.

***ĭn-cŏm'-ĭ-tȳ,** *s.* [Pref. *in-* (2), and Eng. *comity* (q.v.).] Want of comity or courtesy; incivility, rudeness.

ĭn-cŏm-mĕns-ū-ra-bĭl'-ĭ-tȳ, *s.* [Eng. *incommensurable*; *-ity.*] The quality or state of being incommenaurable.

"Aristotle mentions the *incommensurability* of the diagonal of a square to its side."—*Reid: On the Intell. Powers*, ess. 6, ch. vii.

ĭn-cŏm-mĕns'-ū-ra-ble, *a.* & *s.* [Pref. *in-* (2), and Eng. *commensurable* (q.v.).]

A. *As adj.:* Two quantities of the same kind are incommensurable with respect to each other, when they have not a common unit—that is, when there is no quantity of the same kind so small that it is contained in both an exact number of times. Thus the diagonal and side of a square are incommensurable, for it has been shown that if we denote the side of the square by 1, the diagonal will be denoted by $\sqrt{2}$; but $\sqrt{2}$ is incommensurable with 1, because the square root of an imperfect square cannot be expressed in exact terms of 1.

"The one hundred and seventeenth proposition of Euclid's tenth book proves the side and diagonal of a square to be *incommensurable*."—*Boyle: Works*, iv. 418.

B. *As subst.:* One of two or more quantities which are incommensurable.

* **ĭn-crĕm'-a-ble,** *a.* [Lat. *in-* = not, and *cremo* = to burn.] Not consumable by fire; incapable of being burnt.

"Incombustible sheets made with a texture of asbestos, *incremable* flax, or salamander's wool.—*Browne: Urne Burial,* ch. iii.

* **ĭn'-crĕ-māte,** *v. t.* [Pref. *in-* (1), and Eng. *cremate* (q.v.).] The same as CREMATE. (*Annandale.*)

* **ĭn-crĕ-mā'-tion,** *s.* [Lat. *incrematus,* pa. par. of *incremo* = to burn, to consume by fire.] The act of burning or consuming by fire; a conflagration.

ĭn'-crĕ-mĕnt, *s.* [Lat. *incrementum,* from *increscо* = to increase; Fr. *incrément;* Ital. and Sp. *incremento.*]

I. *Ordinary Language:*

1. The act or process of increasing; a growing or increasing in bulk, quantity, number, value, or amount; increase; augmentation.

"That gave it foundation and *increment* and firmness."—*Bp. Taylor: Liberty of Prophesying,* § 16.

2. That which is added to an original stock, and by which the original stock is increased or augmented; an addition; an increase.

"This stratum is expanded at top, serving as the seminary that furnisheth matter for the formation and *increment* of animal and vegetable bodies."—*Woodward: On Fossils.*

3. Produce; production; increase.

" The loosen'd roots then drink
Large *increment.*" *Philips: Cider,* ii.

II. *Technically:*

1. *Math.:* A quantity, generally variable, added to the indepeodent variable in a variable expression. The function also undergoes a corresponding change, which is called an increment, or decrement, according as the function is increasing or decreasing. When the increment or decrement is infinitely small, it is called a differential (q.v.).

2. *Rhet.:* An amplification without a strict climax, as in the following passage:

"Finally, brethren, whatsoever things are true, whatsoever things are honest, whatsoever things are just, whatsoever things are pure, whatsoever things are lovely; whatsoever things are of good report; if there be any virtue and if there be any praise, think of these things."—*Phil.* iv. 18.

* **ĭn'-crĕ-pāte,** *v.t.* [Lat. *increpatum,* aup. of *increpo* = to make a noise, to chide.] To chide; to rebuke; to reprove.

"Which words are only an *increpation* of them, not any reflection upon God."—*South: Sermons,* vol. viii., ser. 1.

* **ĭn-crĕs'-cent,** *a.* [Lat. *increscens,* pr. par. of *increscо* = to increase (q.v.).]

* 1. *Ord. Lang.:* Increasing, growing, swelling.

"Between the *increscent* and decrescent moon."
Tennyson: Gareth & Lynette, 578.

2. *Her.:* A term employed to denote the moon when represented with the horns towards the dexter side of the shield.

* **ĭn-crĕst',** *v.t.* [Pref. *in-* (1), and Eng. *crest* (q.v.).] To cover or adorn as with a crest.

"Which did their top with coral red *increst.*"
Drummond: Sonnets, pt. i., *s.* 13.

ĭn-crĕ'-tion-a-rў, *a.* [First element from Lat. *increscо* = to grow, to increase, on the analogy of *accretion,* from *accresco;* Eng. suff. *-ary.*] (For def. see extract.)

"I have used *incretionary* as implying an accumulation of mineral matter from the circumference of a cavity towards its centre, as in the case of an agate."—*Dawkins: Cave-Hunting,* p. 57. (Note.)

ĭn-crĭm'-ĭ-nāte, *v.t.* [Low Lat. *incriminatus,* pa. par. of *incrimino:* Lat. *in-* = in, into, and *crimen* (genit. *criminis*) = a charge, a crime.] To charge with or involve in a crime or fault; to accuse; to criminate.

* **ĭn-crĭm'-ĭ-nāt-ŏr-ў,** *a.* [Eng. *incriminat(e); -ory.*] Tending to incriminate; charging with crime.

* **ĭn-crōach',** *v.* [ENCROACH.]

* **ĭn-crōach'-mĕnt,** *s.* [ENCROACHMENT.]

* **ĭn-crū'-çi-āt-ĕd** (**çi** as **shi**), *a.* [Lat. *in-* = not, and *cruciatus* = tortured.] Free from torture or torment.

* **ĭn-crū-ĕn'-tal,** *a.* [Lat. *incruentus,* from *in-* = not, and *cruentus* = bloody; *cruor* = blood.] Not bloody; not attended with bloodshed.

ĭn-crŭst', *v.t.* [Fr. *incruster,* from Lat. *incrusto,* from *in-* = in, on, and *crusta* = a crust; Ital. *incrostare;* Sp. *incrustar.*] To cover with or as with a crust or hard coating; to form a crust upon the surface of.

"A black *incrusted* substance, which he found in Mendippe hills."—*Boyle: Works,* vi. 387.

* **ĭn-crŭs'-tāte,** *v.t.* [Lat. *incrustatus,* pa. par. of *incrusto* = to incrust (q.v.).] To incrust; to attach as a crust.

"It is strewed upon, or, as it were, *incrustated* about, small branches of the Canadian pine."—*Cook: Third Voyage,* bk. iv., ch. iii.

ĭn-crŭs'-tāte, *a.* [INCRUSTATE, *v.*]

Botany:

1. Coated with earthy matter.

2. A term used of seeds growing so firmly to their pericarp that they seem to have but one integument.

ĭn-crŭs-tā'-tion, *s.* [Fr., from Lat. *incrustatio,* from *incrustatus,* pa. par. of *incrusto* = to incrust (q.v.).]

I. *Ord. Lang.:* The act of incrusting or forming a crust or hard coating upon the surface of any substance; the act of lining or covering with a foreign substance, as marble, stone, &c.; the state of being incrusted.

"The old foundation became quite lost in these new *incrustations.*"—*Warburton: Div. Legation,* bk. iv., § 4.

II. *Technically:*

1. *Masonry:* A facing or covering to a wall of a different material from that of which it is mainly built, such as marble or stone.

"A chapell built by Lewis XIII., all of jasper, with several *incrustations* of marble in the inside."—*Evelyn: Memoirs; Fontainbleau* (an. 1644).

2. *Carp.:* [VENEERING].

3. *Steam-engine:* The deposit from the water adhering to the inside of a boiler.

* **ĭn-crŭst'-mĕnt,** *s.* [Eng. *incrust; -ment.*] An incrustation.

* **ĭn-crўs'-tal-līz-a-ble,** *a.* [Pref. *in-* (2), and Eng. *crystallizable* (q.v.).] Not crystallizable; uncrystallizable.

ĭn'-cu-bāte, *v.i.* [Lat. *incubatus,* pr. par. of *incubo: in* = on, and *cubo* = to lie down.] To sit, as on eggs for hatching.

ĭn-cu-bā'-tion, *s.* [Lat. *incubatio,* from *incubatus,* pa. par. of *incubo;* Fr. *incubation.*]

I. *Ordinary Language:*

1. *Lit.:* The act of sitting upon eggs for the purpose of hatching young.

"The eggs of birds . . . require to be hatched by the *incubation* of females or other birds."—*Boyle: Works,* iii. 590.

2. *Fig.:* A brooding, as of a hen upon eggs.

"But the *incubation* of this Spirit of God did not so much excite as give a new vital power to the several parts of the chaos."—*Hale: Orig. of Mankind,* p. 293.

II. *Technically:*

1. *Path.:* The maturation of morbific matter introduced into the system.

2. *Compar. Relig.:* The act of sleeping for oracular dreams. The sick who visited the temples of Æsculapius had to spend at least one night in his sanctuary (Paus., ii. 27, § 2), observing certain rules prescribed by the priests, and the fitting remedies were usually revealed by the god in a dream. Cicero (*de Div.,* ii. 59) jestingly asks why this power should only be exercised by Æsculapius and Serapis, and not by other divinities.

"It was in allusion to this *incubation* that the temples of Æsculapius contained statues of Sleep and Death."—*Smith: Dict. Biol. & Myth.,* ii.

¶ (1) *Artificial incubation:* The hatching of eggs by means of heat artificially applied. The Egyptians have long done so successfully by means of heated ovens. Some years ago it was calculated that a hundred million chickens were thus annually produced in Egypt. Artificial Incubation is now employed with much success in the United States, and great numbers of chickens are thus raised.

(2) *Period of incubation:*

Path.: The period that elapses between the introduction of morbific matter into the body, and the commencement of the disease thence resulting. In measles this is from ten to fourteen days; in scarlet fever, four to six days; in small-pox, twelve days; and in chicken-pox, four (?) days.

ĭn'-cu-bā-tĭve, *a.* [Eng. *incubat(e); -ive.*] Of or pertaining to incubation or the period of incubation; relating to the period during which a disease exists in the system without showing itself.

ĭn'-cu-bā-tŏr, *s.* [Eng. *incubat(e); -or.*]

1. One who or that which incubates; a bird which shows a disposition to sit upon eggs, as distinguished from one which does not.

2. An apparatus or device for hatching eggs by artificial heat.

ĭn-cūb'-a-tŏr-ў, *a.* [Eng. *incubat(e); -ory.*] Serving for incubation.

* **ĭn-cūb'-a-ture,** * **ĭn-cūb'-ĭ-ture,** *s.* [Lat. *incubito,* freq. from *incubo* = to lie upon.] The act of incubating; incubation.

* **ĭn-cūbe',** *v.t.* [Pref. *in-* (1), and Eng. *cube* (q.v.).] To make a cube of; to fix firmly and solidly.

"To inglobe or *incube* herself among the Presbyters."—*Milton: Reason of Church Govern.,* bk. i., ch. vi.

ĭn-cūb'-oŭs, *a.* [Lat. *incubo* = to lie in or upon; Eng. suff. *-ous.*]

Bot. (*Of the leaves of Jungermanniaceæ*): Imbricated over each other from the base to the apex. Opposed to succubous (q.v.).

ĭn'-cu-bŭs, *a.* [Lat., from *incubo* = to lie upon; Fr. *incube.*]

I. *Ordinary Language:*

1. *Lit.:* [II. 2].

2. *Fig.:* Anything which weighs heavily, as upon the mind; a heavy weight or burden; an incumbrance; a dead weight.

"The Duke of York was an intolerable *incubus.*"—*J. S. Brewer: English Studies,* p. 190.

II. *Technically.*

1. *Anthrop.:* A lascivious spirit appearing only by night, credited with the power of producing supernatural births by actual intercourse with women. Such a belief existed among the Jews, "for a wicked spirit loveth her" (Tobit vi. 41). Allusion to it is found in Augustine's *De Civ. Dei* (xv. 23); in the Middle Ages it was fully accepted by theologians and lawyers, and scores of women were burnt for an impossible crime. How long a belief in incubi lingered in England may be seen in Burton's *Anat. of Melancholy* (pt. iii., § 2, mem. 1.) where copious references are given; and Leuret (*Fragmens Psychologiques* (Paris, 1834), p. 257) may be consulted for the views of St. Bernard and those of the physicians of La Salpetrière on the subject. [LAMIA, SUCCUBUS.] According to Tylor (*Prim. Cult.* (1873), ii. 190), a belief in incubi still exists among many races of low culture. [NIGHTMARE, VAMPIRE.]

2. *Path.:* A sensation of an oppressive weight at the epigastrium during sleep, and of an incapability of moving or speaking; nightmare (q.v.).

ĭn-cŭl'-cāte, *v.t.* [Lat. *inculcatus,* pa. par. of *inculco* = to tread in: *in-* = in, into, and *calco* = to tread.] To impress upon the mind by frequent admonitions; to enforce by constant repetitions; to instil into the mind.

"Two persons charged to *inculcate* moderation."—*Macaulay: Hist. Eng.,* ch. vi.

ĭn-cŭl-cā'-tion, *s.* [Lat. *inculcatio,* from *inculcatus,* pa. par. of *inculco.*] The act or pro-

cess of inculcating or impressing upon the mind by frequent admonitions.

"The days that are to follow must pass in the *inculcation* of precepts already collected."—*Rambler*, No. 151.

ĭn-cŭl'-cā-tŏr, *s.* [Lat., from *inculcatus*, pa. par. of *inculco*.] One who inculcates or enforces.

"The greatest example and *inculcator* of this suspension [of assent]."—*Boyle: Works*, iv. 183.

***ĭn-cŭlk'**, *v.t.* [Lat. *inculco* = to tread in.] To inculcate; to reiterate.

"Their bookes be open, and the wordes playne, *inculked* agayne and againe."—*Sir T. More: Workes*, p. 260.

***ĭn-cŭlp'**, *v.t.* [Lat. *in-* = in, and *culpa* = a fault.] To bring into blame.

"Why should mine honest proceeding and care be *inculped* therewithal?"—*Shelton: Don Quixote*, bk. ii., ch. vi.

***ĭn-cŭl'-pa-ble**, *a.* [Lat. *inculpabilis*, from *in-* = not, and *culpabilis* = blamable, culpable (q.v.).] Not culpable; unblamable; without fault; free from blame; blameless.

"No ignorance of things, lying under necessary practice, can be totally *inculpable*."—*South: Works*, vol. viii., ser. 10.

***ĭn-cŭl'-pa-ble-nĕss**, *s.* [Eng. *inculpable*; *-ness*.] The quality or state of being inculpable; blamelessness.

"The great thing to be attended to . . . is the culpableness or *inculpableness*."—*Sharp: Works*, vol. ii., *A Dis of Conscience*.

***ĭn-cŭl'-pa-blў**, *adv.* [Eng. *inculpab(le)*; *-ly*.] Unblamably, blamelessly, without blame.

"They are *inculpably* ignorant."—*Bp. Taylor: Great Exemplar*, pt. iii., dis. 17.

***ĭn-cŭl'-pāte**, *v.t.* [Low Lat. *inculpatus*, pa. par. of *inculpo*, from Lat. *in-* = in, into, and *culpa* = fault, blame.] To expose or bring into fault or blame; to accuse of crime; to impute crime to; to incriminate.

***ĭn-cŭl-pā'-tion**, *s.* [Low Lat. *inculpatio*, from *inculpo*.] The act of inculpating or incriminating; incrimination; the state of being inculpated or incriminated.

***ĭn-cŭl'-pa-tŏr-ў**, *a.* [Eng. *inculpat(e)*; *-ory*.] Tending to inculpate or incriminate; incriminatory; it is the opposite to *exculpatory* (q.v.).

***ĭn-cŭlt'**, *a.* [Lat. *incultus*, from *in-* = not, and *cultus*, pa. par. of *colo* = to cultivate; Fr. *inculte*.]

I. Uncultivated, untilled.

"Her forests huge
Incult, robust, and tall, by Nature's hand,
Planted of old." *Thomson: Autumn*, 883.

2. Rude, unpolished, uncivilized.

***ĭn-cŭl'-tĭ-vāte**, ***ĭn-cŭl'-tĭ-vāt-ĕd**, *a.* [Pref. *in-* (2), and Eng. *cultivate*.]

1. Not cultivated, uncultivated, untilled.

2. Uncivilized, unpolished.

"The barbarism of the *incultivate* heathen."—*Glanvill: Vanity of Dogmatizing*, ch. xii.

***ĭn-cŭl-tĭ-vā'-tion**, *s.* [Pref. *in-* (2), and Eng. *cultivation* (q.v.).] A state of want of cultivation; an uncultivated state.

"That state of *incultivation* which Nature in her luxuriant fancies loves to form."—*Berrington: History of Abeillard*, p. 108.

***ĭn-cŭl'-ture**, *s.* [Pref. *in-* (2), and Eng. *culture* (q.v.).] Want or neglect of culture.

"The *inculture* of the world would perish into a wilderness."—*Feltham: Resolves*, pt. ii., res. 49.

* I. *Ord. Lang.:* An anvil.

2. *Anatomy:*

(1) *Human:* One of the small bones of the ear. It stands between the malleus and the stapes, and is connected with them by articular surfaces. It does not resemble an anvil so closely as it does a tooth with two fangs widely separated. These constitute a body and two processes. (*Quain.*)

(2) *Compar.:* The incus is represented only by a ligament in birds, by a cartilage in sphenodon (*Hatteria*) and other reptiles, and by the hyo-mandibular bone in osseous fishes. (*Huxley.*)

***ĭn-cūse′, *ĭn-cŭss′,** *v.t.* [Lat. *incussus*, pa. par. of *incutio* = to strike upon: *in-* = in, on, and *quatio* = to shake.] To impress by striking or stamping with a hammer, as a coin. (*Daniel: Hist. Eng.*, p. 4.)

***ĭn-cŭss′-ĭon (ss as sh),** *s.* [INCUSE.] The act of striking; concussion.

***ĭn-cūte′,** *v.t.* [Lat. *incutio* = to strike upon.] To strike in. (*Becon: Works*, i. 63.)

***ĭn′-da-gāte,** *v.t.* [Lat. *indagatus*, pa. par. of *indago* = to trace out, to track.] To trace out; to seek or search out.

***ĭn-da-gā′-tion,** *s.* [Lat. *indagatio*, from *indagatus*, pa. par. of *indago*.] The act or process of searching or seeking out; search, inquiry, investigation.

"Part hath been discovered by himself, and some by human *indagation*."—*Browne: Vulgar Errours*, bk. i., ch. x.

***ĭn′-da-gā-tĭve,** *a.* [Eng. *indagat(e); -ive.*] Searching, investigating; given or inclined to investigation.

***ĭn′-da-gā-tŏr,** *s.* [Lat., from *indagatus*, pa. par. of *indago*.] One who searches out, seeks into, or investigates; a searcher; an investigator.

"Searched into by such skilful *indagators* of nature."—*Boyle: Works*, i. 465.

***ĭn-dăm′-aged (aged as ĭjd),** *a.* [Pref. *in-* (2), and Eng. *damaged* (q.v.).] Not damaged, unhurt.

***ĭn-dart′,** *v.t.* [ENDART.]

***ĭnde,** *a.* [INDIGO.]

I. *Ord. Lang.:* Indigo or azure-coloured.

II. *Her.:* A name applied to azure, from the sapphire, because India is the principal source of supply for these gems.

***ĭn-dĕbt′** (*b* silent), *v.t.* [O. Fr. *endetter, endebter* = to bring into debt: *en-* = in, into, and *dette, debte* = a debt (q.v.).] To bring into debt; to bring under obligation.

"Thy fortune hath *indebted* thee to none."
Daniel: To the King's Majesty.

ĭn-dĕbt′-ĕd (*b* silent), *a.* [INDEBT.]

1. Being under a debt or obligation; having incurred a debt; bound to repayment or restitution.

"He began to flatter the common people, and specially those that were *indebted*."—*North: Plutarch*, p. 128.

2. Morally bound or obliged by something received for which restitution, return, or gratitude is due.

"Grant her *indebted* to what zealots call
Grace undeserved." *Cowper: Truth*, 483.

ĭn-dĕbt′-ĕd-nĕss (*b* silent), *s.* [Eng. *indebted; -ness.*]

1. The state of being indebted or in debt.

2. The amount of debts owing; debts collectively.

3. The state of being morally indebted or bound.

***ĭn-dĕbt′-mĕnt** (*b* silent), *s.* [Eng. *indebt; -ment.*] The state of being indebted; indebtedness.

"If thou wilt needs wilfully live and dye in a just *indebtment*."—*Bp. Hall: Balm of Gilead.*

ĭn-dē′-çen-çy, *ĭn-dē′-çençe, *s.* [Lat. *indecentia*, from *indecens* = unbecoming, indecent (q.v.); Fr. *indécence*; Itsl. *indecenza*; Sp. *indecencia.*]

1. The quality or state of being indecent or unbecoming.

2. The quality or state of being indecent or indelicate.

"He will in vain endeavour to reform *indecency* in his pupil, which he allows in himself."—*Locke: On Education.*

3. That which is indecent or unbecoming.

"Of the *indecencies* of an Heroick Poem, the most remarkable are those that shew disproportion."—*Hobbes: On the Pref. before Gondibert.*

4. That which is indecent or indelicate either in words or actions; a word or action which is a violation of modesty, and partaking more or less of the nature of lewdness or obscenity.

"They who, by speech or writing, present to the ear or to the eye of modesty any of the *indecencies*."—*Beattie: Moral Science*, pt. i., ch. ii., § 6.

ĭn-dē′-çent, *a.* [Fr., from Lat. *indecens* = unbecoming: *in-* = not, and *decens* = becoming, decent (q.v.); Ital. & Sp. *indecente.*]

* 1. Unbecoming, unseemly, disgracing, humiliating.

"Repeated and *indecent* overthrow."
Milton: P. L., vi. 601.

2. Unbecoming; unfit for modest eyes or ears; offensive to modesty or delicacy; indecorous, indelicate, immodest, gross, obscene.

"Their barbarous, yet their not *indecent* glee."
Byron: Childe Harold, ii. 72.

¶ *Indecency* is less than *immodesty*, but more than *indelicacy*; these both respect the outward behaviour, but *immodesty* springs from illicit or uncurbed desire; *indelicacy* from want of education.

indecent-assault, *s.*

Law: An assault more or less inconsistent with decency.

indecent-book, *s.*

Law: An obscene book. The sale of indecent books, prints, or photographs is a misdemeanour. By 20 & 21 Vic. c. 83, houses where they are suspected to be kept may be summarily searched and the books or prints destroyed.

ĭn-dē-çĭd′-u-ąte, *a.* [Pref. *in-* (2), and Eng. *deciduate* (q.v.).]

Zool.: Non-deciduate; not having decidua.

ĭn-dē-çĭd′-u-ŏŭs, *a.* [Pref. *in-* (2), and Eng. *deciduous* (q.v.).]

* 1. *Ord. Lang.:* Not falling down or off.

"The *indeciduous* and unshaken locks of Apollo."—*Browne: Vulgar Errours*, bk. v., ch. xxi.

Bot.: Not deciduous; used of leaves, petals, &c.

***ĭn-dĕç′-ĭ-ma-ble,** *a.* [Fr. *indécimable*, from Lat. *in-* = not, and Low Lat. *decimo* = to pay a tithe; Lat. *decima* = a tenth part; *decem* = ten.] [DECIMAL.] Not liable to decimation or the payment of tithes.

ĭn-dē-çĭ′-phĕr-a-ble, *a.* [Pref. *in-* (2), and Eng. *decipherable* (q.v.).] Not decipherable; incapable of being deciphered or interpreted.

***ĭn-dē-çĭ′-phĕr-a-blў,** *adv.* [Eng. *indecipherab(le); -ly.*] So as to be indecipherable.

ĭn-dē-çĭ′-sion, *s.* [Pref. *-in* (2), and *decision* (q.v.).] Want of decision; want of firmness or determination of the will; a wavering of the mind; irresolution.

"A strange appearance of *indecision* and insincerity."—*Macaulay: Hist. Eng.*, ch. iv.

ĭn-dē-çĭ′-sĭve, *a.* [Pref. *in-* (2), and Eng. *decisive* (q.v.).]

1. Not decisive; not bringing to a final or decisive issue; not final or conclusive.

"The campaign had everywhere been *indecisive*."—*Macaulay: Hist. Eng.*, ch. xvi.

2. Not coming to a decision; undecided; wanting in decision; prone to indecision; irresolute, wavering, vacillating, hesitating.

ĭn-dē-çĭ′-sĭve-lў, *adv.* [Eng. *indecisive; -ly.*] In an indecisive manner.

***ĭn-dē-çĭ′-sĭve-nĕss,** *s.* [Eng. *indecisive; -ness.*] The quality or state of being indecisive; an unsettled state.

ĭn-dē-clĭn′-a-ble, *a.* & *s.* [Lat. *indeclinabilis*, from *in-* = not, and *declinabilis* = declinable (q.v.).]

A. *As adjective:*

Gram.: That cannot be declined; not declinable; not varied by terminations; having no cases.

"In order to express by one *indeclinable* word what would otherwise have required two or three words."—*Beattie: Moral Science*, pt. i., ch. i., § 8.

B. *As subst.:* A word which cannot be declined.

***ĭn-dē-clĭn′-a-blў,** *adv.* [Eng. *indeclinab(le); -ly.*]

1. *Ord. Lang.:* Without declension or turning away; without variation.

"To follow *indeclinably* the discipline of the Church of England."—*Mountague: Appeale to Cæsar*, p. 111.

2. *Gram.:* Without declension or variation of terminations.

ĭn-dē-cŏm-pōs′-a-ble, *a.* [Pref. *in-* (2), and Eng. *decomposable* (q.v.).] That cannot be decomposed; not liable or subject to decomposition or resolution into the primary constituent elements.

ĭn-dē-cŏm-pōs′-a-ble-nĕss, *s.* [Eng. *indecomposable; -ness.*] The quality or state of being indecomposable; incapability of decomposition.

ĭn-dē-cōr′-ŏŭs, ĭn-dĕc′-ŏr-ŏŭs, *a.* [Lat. *indecorus*, from *in-* = not, and *decorus* = becoming; *decus* = an honour.] Not decorous; unbecoming; violating propriety, decorum, or good manners; contrary to the rules of good breeding; impolite, uncivil, unseemly.

"It was useless and *indecorous* to attempt any thing by mere struggle."—*Burke: Army Estimates*, 1790.

ĭn-dē-cōr′-ŏŭs-lў, ĭn-dĕc′-ŏr-ŏŭs-lў *adv.* [Eng. *indecorous; -ly.*] In an indecorous, unseemly, or unbecoming manner.

ĭn-dē-cōr′-ŭm, *s.* [Lat. = what is unbecoming; neut. sing. of *indecorus* = unbecoming, indecorous (q.v.).]

1. A want of decorum; violation of propriety or the established rules of good breeding, or the form of respect due to station and age.

2. An indecorous or unbecoming act; a breach of decorum.

"Some slight *indecorums* therefore, we may reasonably expect to find."—*Warburton: Divine Legation*, bk. vi., § 2.

ĭn-dēēd′, *ĭn-dēde′, *adv.* [Prep. *in*, and *deed.*]

1. In reality, in truth, of a truth, in very fact. It is used variously: sometimes emphatically, as in (1); sometimes as noting an admission or concession, as in (2); sometimes as an interjection or expression of surprise, or as calling for affirmation or confirmation, as in (3).

(1) "If it so be that they *indede* so dyd."
Surrey: Virgile; Æneis bk. ii.

(2) "Against these forces were prepared to the number of near one hundred ships; not so great of bulk *indeed*, but of a more nimble motion."—*Bacon.*

(3) "None but mine own people." "*Indeed?*"—*Shakesp.: Merry Wives of Windsor*, iv. 2.

¶ The two elements of the word, are sometimes found separated by the word *very*, to add emphasis to the statement.

"*In* very *deed* for this cause have I raised thee."—*Exodus* ix. 26.

ĭn-dē-făt-ĭ-ga-bĭl′-ĭ-tў, *s.* [Eng. *indefatigable; -ity.*] The quality or state of being indefatigable; unweariedness, persistence.

ĭn-dē-făt′-ĭ-ga-ble, *a.* [Fr., from Lat. *indefatigabilis* = not to be wearied: *in* = not, and *defatigo* = to tire out; from *de* = down, extremely, and *fatigo* = to tire, to weary.] That cannot be fatigued or tired out; not yielding to fatigue or exertion; unceasing in

exertions or efforts; unwearied in labour; untiring or unremitting in work.

"He was *indefatigable*, and at length successful in his attempts."—*Macaulay: Hist. Eng.*, ch xi.

ĭn-dĕ-făt'-ĭ-gą-ble-nĕss, *s.* [Eng. *indefatigable; -ness.*] The quality or atate of being indefatigable; indefatigability.

"They come short of his *indefatigableness*."—*Parnell: Life of Zoilus.*

ĭn-dĕ-făt'-ĭ-gą-blў, *adv.* [Eng. *indefatigab(le); -ly.*] Without weariness or fatigue; unremittingly; untiringly.

"He exerted himself *indefatigably* to improve their discipline."—*Macaulay: Hist. Eng.*, ch. xvi.

***ĭn-dĕ-făt-ĭ-gā'-tion,** *s.* [Lat. *indefatigatus* = unwearied.] The quality or atate of being unwearied; unweariedness.

ĭn-dĕ-fēaṣ-ĭ-bĭl'-ĭ-tў, *s.* [Eng. *indefeasible; -ity.*] The quality or state of being indefeasible: as, the *indefeasibility* of a title.

ĭn-dĕ-fēaṣ'-ĭ-ble, * **ĭn-dĕ-fēaṣ'-ą-ble,** * **ĭn-dĕ-fēiṣ'-ĭ-ble,** *a.* [Pref. *in-* (2), and Eng. *defeasible* (q.v.).] Not defeasible; that cannot be made void; not to be defeated.

"Doctrine of *indefeasible* hereditary right."—*Macaulay: Hist. Eng.*, cb. xiv.

ĭn-dĕ-fēaṣ'-ĭ-blў, *adv.* [Eng. *indefeasib(le); -ly.*] In a manner not to be made void.

"As truly and as *indefeasibly* royal as the House of Stuart."—*Macaulay: Hist. Eng.*, ch xvi.

* **ĭn-dĕ-fĕct'-ĭ-bĭl-ĭ-tў,** *s.* [Eng. *indefectible; -ity.*] The quality or state of being indefectible; freedom from liability to defect, decay, or failure.

"He alone hath infallibility and *indefectibility*."—*Bp. Hall: True Peace Maker.*

* **ĭn-dĕ-fĕct'-ĭ-ble,** *a.* [Pref. *in-* (2), and Eng. *defectible* (q.v.).] Not defectible; not liable to defect, decay, or failure.

"A state of *indefectible* virtue and happiness."—*Clarke: Letter to Mr. Dodwell.*

* **ĭn-dĕ-fĕct'-ĭve,** *a.* [Pref. *in-* (2), and Eng. *defective* (q.v.).] Not defective; free from defect; perfect; complete.

"Seven are my daughters, of a form divine
With seven fair sons, an *indefective* line."
Croxall: Ovid; Metamorphoses vi.

* **ĭn-dĕ-fēiṣ'-ĭ-ble,** *a.* [INDEFEASIBLE.]

* **ĭn-dĕ-fĕn-sĭ-bĭl'-ĭ-tў,** *s.* [Eng. *indefensible; -ity.*] The quality or state of being indefensible.

ĭn-dĕ-fĕn'-sĭ-ble, *a.* [Pref. *in-* (2), and Eng. *defensible* (q.v.).] Not defensible; incapable of being defended, maintained, justified, or vindicated: as, A town is *indefensible;* A line of conduct is *indefensible.*

ĭn-dĕ-fĕn'-sĭ-blў, *adv.* [Eng. *indefensib(le); -ly.*] In a manner that cannot be defended, maintained, justified, or vindicated.

"Some of the terms of expression are still *indefensibly* indelicate."—*Muckle: Lusiad*, bk. ix. (Note 32.)

* **ĭn-dĕ-fĕn'-sĭve,** *a.* [Pref. *in-* (2), and Eng. *defensive* (q.v.).] Having no defence; defenceless.

"The sword awes the *indefensive* villager."—*Sir T. Herbert: Travels*, p. 337.

* **ĭn-dĕ-fĭc'-ĭęn-çў (c as sh),** *s.* [Pref. *in-* (2), and Eng. *deficiency* (q.v.).] The quality of not being deficient; fulness; completeness.

"The *indeficiency* of faith."—*Strype: Life of Parker* (an. 1598).

* **ĭn-dĕ-fĭc'-ĭent (c as sh),** *a.* [Pref. *in-* (2), and Eng. *deficient* (q.v.).] Not deficient; full; perfect.

"The *indeficient* spring no winter fears."
G. Fletcher: Christ's Triumph after Death

ĭn-dĕ-fīn'-ą-ble, *a.* [Pref. *in-* (2), and Eng. *definable* (q.v.).] Not definable; that cannot be defined; incapable or insusceptible of definition; inexplicable.

ĭn-dĕ-fīn'-ą-blў, *adv.* [Eng. *indefinab(le); -ly.*] In an indefinable manner or degree; so as not to be capable of definition.

ĭn-dĕf'-ĭ-nĭte, *a.* [Pref. *in-* (2), and Eng. *definite* (q.v.).]

I. *Ordinary Language:*

1. Not limited or defined; not determinate; not precise, exact, or certain; vague, not in exact or precise terms.

"The time of this last is left *indefinite*."—*Dryden: Art of Poetry.*

2. Having no definite, determinate, or certain limits; large beyond the comprehension of man, though not absolutely without limits. It is often contrasted with *infinite.*

"Though it is not infinite, it may be *indefinite;* though it is not boundless in itself, it may be so to human comprehension."—*Spectator.* (*Todd.*)

3. Infinite, without limit.

"*Indefinite* and omnipresent God!"
Thompson: Sickness, v.

II. *Technically:*

1. *Bot.* (*Of stamens, &c.*): Not definite; not constant in number, usually more than twenty.

2. *Math.:* Unbounded or unlimited. If the direction of a line only is given, it is supposed to extend in both directions from any point of it without limits; such a line is, properly speaking, an indefinite line. If we speak of that portion of a straight line which lies entirely on one side of any point of it, it is said to extend indefinitely in that direction. A plane extends indefinitely in all directions, unless limited by a boundary: it may be limited in one or more directions by a line or lines, and indefinite in all other directions. [SPACE.]

indefinite-inflorescence, *s.*

Bot.: Inflorescence with the flowers arising from the axils of the leaves, thus leaving the terminal bud to develop and become a twig or branch, lengthening indefinitely.

indefinite-proposition, *s.*

Logic: A proposition having for its subject a common term without any sign to indicate distribution or non-distribution: as, Man is mortal.

indefinite-term, *s.*

Logic: A privative or negative term, in that it does not define or mark out an object by a positive attribute as a definite term does: as, *unorganized*; not-Cæsar.

ĭn-dĕf'-ĭ-nĭte-lў, *adv.* [Eng. *indefinite; -ly.*]

1. In an indefinite manner or degree; without certain or settled limitation.

"If the world be *indefinitely* extended, that is, so far as no human intellect can fancy any bounds of it."—*Ray: On the Creation.*

2. Without certainty or precision; vaguely.

"And besides, it was left somewhat *indefinitely*, when it should determine or expire."—*Bacon: Henry VII.*, p. 111.

ĭn-dĕf'-ĭ-nĭte-nĕss, * **in-def-i-nite-nesse,** *s.* [Eng. *indefinite; -ness.*] The quality or state of being indefinite, undefined, unlimited, or not precise or certain; vagueness.

"The *indefinitenesse* of the charge implies a generality."—*Sp. Hall: Best Bargaine.*

ĭn-dĕ-fĭn'-ĭ-tūde, *s.* [Eng. *indefinit(e); -ude.*]

1. Indefiniteness; want of certainty or precision; vagueness.

2. Number or quantity not limited by our comprehension, but yet finite.

"They arise to a strange and prodigious multitude, if not *indefinitude*, by their various positions."—*Hale: Orig. of Mankind*, p. 15.

* **ĭn-dĕ-fĭn'-ĭ-tў,** *s.* [Eng. *indefinit(e); -y.*] Indefinitude, vagueness. (*North: Examen*, p. 144.)

* **ĭn-dĕ-flōūr'-ĭsh-ĭng,** *a.* [Pref. *in-* (2), and Lat. *defloro* = to take away flowers.] Ever flourishing or blooming.

"Where beauties *indeflourishing* abide."
G. Fletcher: Christ's Victory.

ĭn-dĕ-hĭs'-çęnçe, *s.* [Pref. *in-* (2), and Eng. *dehiscence* (q.v.).] The quality or state of being indehiscent.

ĭn-dĕ-hĭs'-çent, *a.* [Pref. *in-*, and Lat. *dehiscens*, pr. par. of *dehisco* = to gape.]

Bot. (*Of a fruit*): Not dehiscing, not opening when ripe. Example: the hazel nut.

* **ĭn-dĕ-lāyed',** *a.* [Pref. *in-* (2), and Eng. *delayed.*] Not delayed, postponed, or put off.

"With promise to make my return *indelayed*."—*Strype: Memorials* (an. 1558).

* **ĭn-dĕ-lāy'-ĕd-lў,** *adv.* [Eng. *indelayed; -ly.*] Without delay.

"That the order might be *indelayedly* taken."—*Strype: Memorials* (an. 1553).

* **ĭn-dĕ-lĕct'-ą-ble,** *a.* [Pref. *in-* (2), and Eng. *delectable* (q.v.).] Not delectable; not pleasing; unamiable. (*Richardson: Clarissa*, viii. 327.)

* **ĭn-dĕ-lĭb'-ĕr-ąte,** *a.* [Pref. *in-* (2), and Eng. *deliberate* (q.v.).] Not premeditated; done without premeditation; not deliberate.

"The *indeliberate* commissions of many sins."—*Government of the Tongue.*

* **ĭn-dĕ-lĭb'-ĕr-āt-ĕd,** *a.* [Pref. *in-* (2), and Eng. *deliberated* (q.v.).] The same as INDELIBERATE (q.v.).

* **ĭn-dĕ-lĭb'-ĕr-ate-lў,** *adv.* [Eng. *indeliberate; -ly.*] Without premeditation; unintentionally.

ĭn-dĕl-ĭ-bĭl'-ĭ-tў, *s.* [Fr. *indélébilité*, from *indelébile* = indelible (q.v.).] The quality or state of being indelible.

"The *indelibility* of the sacred character."—*Bishop Horsley: Speech*, April 13, 1804.

ĭn-dĕl'-ĭ-ble, * **in-del-e-ble,** *a.* [Fr. *indélébile*, from Lat. *indelebilis*, from *in-* = not, and *delebilis* = that can be destroyed; *deleo* = to destroy; Sp. *indeleble;* Ital. *indelebile.*]

1. *Lit.:* That cannot be blotted out or effaced; incapable of being effaced, cancelled, or obliterated.

"Putting these on an *indelible* blacke colour."—*Purchas: Pilgrimage*, bk. viii., ch. iii., § 7.

2. *Figuratively:*

(1) Incapable of being destroyed, wiped out, or cleared away.

"Thou canst but live to blot with shame
Indelible thy mother's name."
Cowper: From the Greek, by Palladas.

(2) That cannot be annulled.

ĭn-dĕl'-ĭ-ble-nĕss, *s.* [Eng. *indelible; -ness.*] The quality or state of being indelible; indelibility.

ĭn-dĕl'-ĭ-blў, *adv.* [Eng *indelib(le); -ly.*] In an indelible manner; so as to be indelible.

"Such was my scheme of life, which I impressed *indelibly* upon my memory."—*Idler*, No. 101.

ĭn-dēl'-ĭ-brōme, *s.* [Eng. *indeli(ble*), and *brom(ine).*]

Chem.: $C_{16}H_8Br_4N_2O_4$. A very insoluble yellow powder, produced by the action of bromine on isamic acid. It is insoluble in water, alcohol, and ether, and is unacted upon by ammonia and potash, even when boiling. It melts when carefully heated, and on cooling crystallizes in the form of needles.

ĭn-dĕl'-ĭ-cą-çў, *s.* [Pref. *in-* (2), and Eng. *delicacy* (q.v.).]

1. The quality or state of being indelicate; a want of delicacy or a nice sense of propriety and decorum; a want of regard of refinement in manners and in the treatment of others; a want of careful avoidance of matters or subjects offensive or hurtful to others; coarseness in manners or language. [INDECENCY.]

"Novelists whose heaviness is but slightly relieved by their *indelicacy*."—*Notes & Queries*, Feb. 19, 1881, p. 159.

2. An indelicate act or word; an indecency.

ĭn-dĕl'-ĭ-cąte, *a.* [Pref. *in-* (2), and Eng. *delicate* (q.v.).]

1. Not delicate; wanting in delicacy, refinement, or good breeding; coarse, unrefined.

"Mean and *indelicate* enough to let a foreign prince pay them."—*Macaulay: Hist. Eng.*, ch. ii.

2. Offensive to refined minds; contrary to delicacy, modesty, or the established rules of good breeding; coarse, indecent.

"Such *indelicate* greediness might disgust the benefactor."—*Macaulay: Hist. Eng.*, ch. iv.

ĭn-dĕl'-ĭ-cąte-lў, *adv.* [Eng. *indelicate; -ly.*] In an indelicate manner; indecently.

ĭn-dĕm-nĭ-fĭ-cā'-tion, *s.* [Eng. *indemnify;* c connective, and suff. *-ation.*]

1. The act of indemnifying, saving harmless, or securing against damage, loss, or penalty; the state of being indemnified.

2. The act of reimbursing or indemnifying for any damage, loss, or penalty incurred.

3. That which indemnifies, saves harmless, or secures against damage, loss, or penalty.

ĭn-dĕm'-nĭ-fў, *v.t.* [Lat. *indemnis* = unharmed, from *in-* = not, and *damnum* = harm, hurt; Eng. suff. *-fy* (q.v.).]

1. To save harmless; to secure from damage, loss, or penalty.

2. To reimburse, to compensate, to make good, or to repay, for damage, loss, or penalty incurred.

"*Indemnifying*, at least in part, such native families as had been wrongfully despoiled."—*Macaulay: Hist. of Eng.*, ch. vi.

* 3. To keep safe; to save unharmed; to protect.

"They will *indemnify* them from all that shall fall out on this occasion."—*Sir. W. Temple: To Lord Arlington*

ĭn-dĕm'-nĭ-tў, *s.* [Fr. *indemnité*, from Lat. *indemnitatem*, accus. of *indemnitas* = security from damage; *indemnis* = unharmed: Sp. *indemnidad*; Ital. *indemnità*.] [INDEMNIFY.]

1. Security given to save a person harmless, or to secure him against damage, loss, or penalty, which he may incur.

2. Indemnification or compensation for damage, loss, or penalties incurred.

"I will use all means, in the ways of amnesty and *indemnity*, which may most fully remove all fears and bury all jealousies in forgetfulness."—*Eikon Basilike.*

¶ *Act of Indemnity:*

English: An Act designed to relieve the Government or any of its officers from penalties when they have been compelled by exceptional circumstances to omit the performance of some duty, or to violate or even to suspend some law. In every Session of Parliament an Act of Indemnity used to be passed for the relief of those who had neglected to take the necessary oaths of office, and one also received the sanction of Parliament to condone the governmental suspension of the Bank Charter Act during the financial panics of 1848 and 1857. The term is specifically applied (1) to an Act passed in 1660, granting a free and general pardon to all the subjects of Charles II., saving such as were excepted by the Parliament; and (2) to an Act passed May 20, 1690, to exempt the followers of James II. from the penal consequences of their former deeds.

* **ĭn-dĕ-mŏn-strą-bĭl'-ĭ-tў,** *s.* [Pref. *in-* (2), and Eng. *demonstrability* (q.v.).] The quality or state of being indemonstrable.

* **ĭn-dĕ-mŏn'-strą-ble,** *a.* [Lat. *indemonstrabilis*, from *in-* = not, and *demonstrabilis* = demonstrable (q.v.).] Not demonstrable; that cannot be demonstrated or proved by reasoning.

"All of them as *indemonstrable* as the conclusion to be inferred from them."—*Boyle: Works*, i. 560.

* **ĭn-dĕ-mŏn'-strą-ble-nĕss,** *s.* [Eng. *indemonstrable*; *-ness.*] The quality or state of being indemonstrable; indemonstrability.

ĭn-dĕn-ĭ-zā'-tion, *s.* For this and cognate words see ENDENIZATION, &c.

ĭn-dĕnt', *v.t.* & *i.* [Low Lat. *indento* = to notch with teeth, from Lat. *in-* = in, into, and *dens* (genit. *dentis*) = a tooth; O. Fr. *endenter*; Ital. *indentare*. The word is a law term. In making duplicates of deeds, it was usual to cut or *indent* the edges alike, so that they would tally with each other upon comparison. The deeds with edges so cut were called *indentures*, and the verb to *indent* came also to mean to execute a deed or make a compact. (*Skeat.*)]

A. *Transitive:*

I. *Ordinary Language:*

* 1. To cut into points or notches like a row of teeth; to notch, to jag.

"The practice of *indenting* has been abandoned."—*Blackstone: Comment.*, bk. ii., ch. 20.

* 2. To form with indentations, jagged or rough edges or borders.

"The coast seemed to be *indented* into creeks and projecting points."—*Cook: Second Voyage*, bk. iii., ch. xii.

* 3. To dent, to dint.

"With shields *indented* deep in glorious wars."
Pope: Homer; Odyssey xix. 87.

II. *Technically:*

1. *Law:* To bind out or apprentice by indenture; to indenture; to contract: as, To *indent* an apprentice.

2. *Print.:* To set in farther from the margin or leave a blank space in, at the beginning of a line.

* **B.** *Intransitive:*

I. *Literally.*

1. To be notched or jagged with indentations or irregularities like a row of teeth.

2. To wind in and out; to run zigzag.

"Then shalt thou see the dew-bedabbled wretch
Turn and return, *indenting* with the way."
Shakesp.: 1 *Henry IV.*, iii. 1.

3. To make a contract; to contract; to bargain.

"Shall we buy treason? and *indent* with fears,
When they have lost and forfeited themselves?"
Shakesp.: 1 *Henry IV.*, i. 3.

II. *Fig.:* To move to one side and the other; to pursue a zigzag course.

"Not winding or *indenting* so much as to the right hand of fair pretences."—*Milton: Doctrine of Divorce*, bk. ii., ch. xiv.

ĭn'-dĕnt, *s.* [INDENT, *v.*]

* **I.** *Ordinary Language:*

1. A cut or notch in the margin of any thing; an indentation or recess.

"It shall not wind with such a deep *indent*."
Shakesp.: 1 *Henry IV.*, iii. 1.

2. A stamp, an impression, a dent.

3. A covenant. (*Puttenham: Eng. Poesie*, bk. iii., ch. xxiv.)

4. A certificate or indented certificate issued by the United States Government at the close of the Revolution for the principal or interest of the public debt.

II. *Technically:*

1. *Carp.:* A notch, as in scarfing timbers together.

2. *Print.:* The blank space or set-in at the commencement of a paragraph.

ĭn-dĕn-tā'-tion, *s.* [Low Lat. *indentatio*, from *indento* = to indent (q.v.).]

I. *Ordinary Language:*

1. The act of indenting or cutting with notches in the margin, like a row of teeth.

2. A notch or cut in the margin of anything; a recess; a depression like a notch.

"Tarentum, situated in the deep *indentation* of the southern gulf of Italy."—*Lewis: Cred. Early Roman Hist.* (1855), ii. 434.

II. *Technically:*

1. *Arch.:* A zigzag moulding; the shark's-tooth moulding; denticulation.

2. *Print.:* The act of indenting or beginning a line or series of lines farther in from the margin than the rest.

ĭn-dĕnt'-ĕd, *pa. par.* & *a.* [INDENT, *v.*]

A. *As pa. par.:* (See the verb).

B. *As adjective:*

I. *Ordinary Language:*

1. Cut or notched in the margin like a row of teeth, or the teeth of a saw; having indentations.

"*Indented* shore to shore responsive still."
Thomson: Liberty, iv. 463.

2. Bound by an indenture or contract: as, an *indented* apprentice.

3. Zigzag, winding.

"And with *indented* glides did slip away
Into a bush." *Shakesp.: As You Like It*, v. 3.

II. *Her.:* Notched like the teeth of a saw, but smaller than dancette (q.v.). Applied to one of the lines of partition; ordinaries are also thus borne.

INDENTED.

indented-chisel, *s.* A boring-chisel whose face is in steps.

indented-line, *s.*

Fort.: A line consisting of alternate long and short faces, with salient and receding angles, each face giving a flanking fire along the front of its neighbour.

indented-parapet, *s.*

Fort.: A parapet, the interior slope of which has vertical recesses where men may stand and fire along the front of the work.

* **ĭn-dĕnt'-ĕd-lў,** *adv.* [Eng. *indented*; *-ly.*] In an indented manner; with indentations.

ĭn-dĕnt-eē', *a.* [Fr.]

Her.: Having indents not joined to each other, but set apart.

ĭn-dĕnt'-ĭl-leў, *a.* [INDENT.]

Her.: Having long indents, somewhat resembling piles conjoined; said of an ordinary.

ĭn-dĕnt'-ĭng, *pr. par., a., & s.* [INDENT, *v.*]

A. & **B.** *As pr. par. & particip. adj.:* (See the verb).

C. *As subst.:* The act of cutting indentations or notches in; an indentation; a winding.

"Through large *indentings* draws his lubric train."
Welsted: Ovid: Metam. xv.

* **ĭn-dĕnt'-mĕnt,** *s.* [Eng. *indent*; *-ment.*] An indenture; a deed; a contract.

"Some *indentments* or some bond to draw."
Hall: Satires, bk. iv., sat. 2.

ĭn-dĕn'-ture, *s.* [Low Lat. *indentura*, from *indento* = to indent (q.v.); O. Fr. *endenture.*]

* 1. *Ord. Lang.:* The act of indenting; the state of being indented; an indentation.

2. *Law:* A deed under seal, entered into between two or more parties. [INDENT, *v.*, A II. 1.]

"Whose tempers, inclinations, sense, and wit,
Like two *indentures*, did agree so fit."
Butler: Human Learning, pt. ii.

ĭn-dĕn'-ture, *v.t.* & *i.* [INDENTURE, *s.*]

A. *Transitive:*

* 1. *Ord. Lang.:* To indent; to make indentations in; to wrinkle, to furrow.

"Though age may creep on and *indenture* the brow."
Wolfe: An Autumnal Song.

2. To bind by an indenture: as, To *indenture* an apprentice.

* **B.** *Intrans.:* To run in and out in a zigzag course; to wind; to double in running.

"By *indenturing* still the good man 'scaped."
Heywood. (*Annandale.*)

ĭn-dĕ-pĕnd'-ençe, *s.* [Pref. *in-* (2), and Eng. *dependence* (q.v.).; Fr. *indépendance*; Ital. *indipendenza*; Sp. *independencia.*]

1. The quality or state of being independent; freedom or exemption from the control, authority, or power of others; a state over which no one has any power, control, or authority; ability and liberty to conduct one's own affairs without the interference, superintendence, or control of others; self-subsistence or maintenance.

"The *independence* affected by a crowd of petty sovereigns."—*Macaulay: Hist. Eng.*, ch. xviii.

2. That which renders, or serves to render, a person independent; income or property sufficient to make one independent of others; as, He has an *independence.*

¶ *Declaration of Independence:*

Hist.: A declaration of independence of Great Britain, put forth on July 4, 1776, by the Congress of the revolted American colonies, and signed by the representatives of the following thirteen states: New Hampshire, Massachusetts, Rhode Island, Connecticut, Delaware, Maryland, Virginia, North Carolina, South Carolina, New York, New Jersey, Pennsylvania, and Georgia. They have since developed into the now very powerful United States.

Independence Day, *s.* The fourth of July. [See DECLARATION OF INDEPENDENCE.]

† **ĭn-dĕ-pĕnd'-ęn-çў,** *s.* [Eng. *independence*; *-y.*]

1. *Ord. Lang.:* Independence; freedom from the control of others.

2. *Eccles.:* The principles of the religious body known as Independents; Congregationalism.

ĭn-dĕ-pĕnd'-ęnt, *a., adv., & s.* [Pref. *in-* (2), and Eng. *dependent* (q.v.); Fr. *indépendant*; Ital. *independente.*]

A. *As adjective:*

I. *Ordinary Language:*

1. Not dependent upon or subject to the control, power, or authority of another; not relying on others; not subordinate; free to manage one's own affairs without the interference of others; free.

"One unchangeable and *independent* Being."—*Clarke: On the Attributes*, prop. 2.

¶ It is followed by *of* when that from which one is free is named; formerly also by *from*, *on*, or *upon.*

"*Independent of* the great." *Cotton: Fable* 1.

2. Affording the means of independence.

"Some had *independent* means; some lived by literature."—*Macaulay: Hist. Eng.*, ch. xiv.

3. Not liable to be led by others; not obsequious; self-asserting, self-directing, outspoken: as, He is very *independent.*

4. Free from bias or prejudice: as, a man of *independent* spirit.

5. Expressive of or proceeding from a spirit of independence; bold, free; as, an *independent* air or manner.

II. *Technically:*

1. *Ch. Hist.:* Of or pertaining to the Independents or Congregationalists (q.v.).

¶ Of small sects the following figure in the Registrar-General's books for 1883: *Independent* Church of England, *Independent* Methodists, *Independent* Religious Reformers, *Independent* Unionists.

2. *Math.:* A quantity is said to be independent of another with which it is connected, when it does not depend upon it for its value. In this case, the term is nearly synonymous with *arbitrary*, but not quite. Equations are independent when they have no connection with each other; that is, when the quantities entering the different equations are not at all dependent upon each other.

B. *As adv.:* Irrespective; not to mention; without taking note or regard (followed by *of*): as, *Independent of* this, I have other reasons.

C. *As substantive:*

Ch. Hist. (*Pl.*): The same as CONGREGATIONALISTS (q.v.).

"They that we call *Independents*, are only such as hold that no classis or synods have a superiority over any particular church."—*Milton: Def. of the People of England.*

independent-piece, *s.*

Shipbuild.: The main piece of the head or beak-shaped projection from the stem of a vessel.

independent-seconds watch, *s.*

Horol.: A watch in which the action of the centre seconds-hand is independent of the regular going works of the watch. It has two separate trains of wheels and separate springs, so that the regular time may be maintained when the centre seconds-hand is stopped by pressing the stop-pin on the outside of the case. The centre seconds is set in conformity with the other works by a square at the back of the case. For great nicety in timing, quarter- and fifth-second watches are now made, and are capable of being stopped at these fractional parts of a second.

***ĭn-dē-pĕnd'-ĕnt-ĕd,** *a.* [Eng. *independent*; *-ed.*] Made independent; formed on the model of the Independents or Congregationalists (q.v.).

"Associated or *independented* and new-fangled Churches."—*Gauden: Tears of the Church*, p. 43.

***ĭn-dē-pĕnd'-ĕnt-ĭşm,** *s.* [Eng. *independent*; *-ism.*] The same as INDEPENDENCY, 2 (q.v.). (*Gauden: Tears of the Church*, p. 564.)

ĭn-dē-pĕnd'-ĕnt-lў, *adv.* [Eng. *independent*; *-ly.*]

1. In an independent manner; without control; without being dependent.

2. Irrespective; without taking note or regard; independent. (Followed by *of.*)

***ĭn-dē-pĕnd'-ĭng,** *a.* [Pref. *in-* (2), and Eng. *depending* (q.v.).] Not depending upon another; independent.

"An *independing* and self-subsisting agent."—*Bp. Hall: Invisible World*, bk. ii., § i.

***ĭn-dē-pōş'-a-ble,** *a.* [Pref. *in-* (2), and Eng. *deposable* (q.v.).] Not deposable; that cannot be deposed.

***ĭn-dĕp'-ra-vate,** *a.* [Lat. *indepravatus* = uncorrupted.] [DEPRAVATE.] Pure; unspotted; incorrupted. (*Davies: Holy Roode*, p. 28.)

***ĭn-dĕp'-rē-ca-ble,** *a.* [Pref. *in-* (2), and Eng. *deprecable* (q.v.).] That cannot be deprecated.

***ĭn-dĕp-rē-hĕns'-ĭ-ble,** *a.* [Pref. *in-* (2), and Eng. *deprehensible* (q.v.).] Incapable of being found out or detected.

"Calling the second a case perplexed and *indeprehensible*."—*Bp. Morton: Discharge, &c.* (1633), p. 174.

***ĭn-dē-prĭv'-a-ble,** *a.* [Pref. *in-* (2), and Eng. *deprivable* (q.v.).]

1. Incapable of being deprived; not liable to deprivation.

2. That cannot be taken away.

"Durable, self-derived, and (if I may use the expression) *indeprivable*."—*Harris: Dialogue concerning Happiness*, pt. i.

***ĭn-dē-scrīb'-a-ble,** *a.* & *s.* [Pref. *in-* (2), and Eng. *describable* (q.v.).]

A. *As adj.:* Not describable; incapable of being described.

B. *As subst.* (*Pl.*): A euphemism for trousers.

"Mr. Trotter . . . gave four distinct slaps on the pocket of his mulberry *indescribables*."—*Dickens: Pickwick*, ch. xvi.

***ĭn-dē-scrĭp'-tĭve,** *a.* [Pref. *in-* (2), and Eng. *descriptive* (q.v.).] Not descriptive; not furnishing or containing a true or proper description.

***ĭn-dē-şĕrt',** *s.* [Pref. *in-* (2), and Eng. *desert* (3), s. (q.v.).] Want of desert, merit, or worth.

"To think the fame of his merit a reflection on their own *indeserts*."—*Addison: Spectator*, No. 256.

***ĭn-dĕs'-ĭ-nent,** *a.* [Pref. *in-* (2), and Eng. *desinent* (q.v.).] Not desinent; not ceasing or leaving off; unceasing.

"More noble, more *indesinent*, and indefeasible than the first."—*Baxter. On the Soul*, pt. 351.

***ĭn-dĕs'-ĭ-nent-lў,** *adv.* [Eng. *indesinent*; *-ly.*] Unceasingly; without cessation. (*Ray: On the Creation*, pt. ii., p. 361.)

***ĭn-dē-şĭr'-a-ble,** *a.* [Pref. *in-* (2), and Eng. *desirable* (q.v.).] Not desirable; undesirable.

ĭn-dē-strŭct-ĭ-bĭl'-ĭ-tў, *s.* [[Eng. *indestructible*; *-ity.*] The quality or state of being indestructible.

"Gold, from its brilliant colour and *indestructibility*, must have been the first metal to catch the eye of man."—*Dawkins: Early Man in Britain*, ch. xi.

ĭn-dē-strŭct'-ĭ-ble, *a.* [Pref. *in-* (2), and Eng. *destructible* (q.v.).] Not destructible; not liable to destruction; incapable of being destroyed.

"Primitive and *indestructive* bodies."—*Boyle: Works*, i. 538.

ĭn-dē-strŭct'-ĭ-blў, *adv.* [Eng. *indestructible*; *-ly.*] In an indestructible manner; so as to be indestructible.

***ĭn-dē-tĕr'-mĭn-a-ble,** *a.* & *s.* [Pref. *in-* (2), and Eng. *determinable* (q.v.).]

A. *As adjective:*

1. Not determinable; that cannot be determined, defined, or fixed.

"The duration of the world was by the old philosophers held to be *indeterminable*."—*Boyle: Works*, iv. 11.

2. That cannot be determined, or ended; interminable.

"His memory is *indeterminable* and unalterable."—*Bp. Taylor: Great Exemplar*, pt. i., ad. § 3.

B. *As subst.:* That which cannot be determined, defined, or settled.

"To condemn such *indeterminables* unto him that demanded on what hand Venus was wounded."—*Browne: Vulgar Errours*, bk. vii., ch. i.

ĭn-dē-tĕr'-mĭn-a-blў, *adv.* [Eng. *indeterminable*; *-ly.*] In an indeterminable manner.

ĭn-dē-tĕr'-mĭn-ate, *a.* [Lat. *indeterminatus* = undefined, from *in-* = not, and *determinatus*, pa. par. of *determino* = to define, to determine (q.v.).] Not determinate; not settled or fixed; not definite; indefinite; undefined; not precise.

"Subjects which are essentially *indeterminate*, and can never yield any useful result."—*Lewis: Cred. Early Roman Hist.* (1855), ii. 554.

indeterminate-analysis, *s.*

Math.: A branch of analysis which has for its object the solution of indeterminate problems. Indeterminate analysis may be of the first, second, or higher degrees, according as the equations arising are of the first, second, or higher degrees. [EQUATION.]

indeterminate-coefficients, *s. pl.*

Math.: A method of analysis invented by Descartes, the principle of which consists in this, that if we have an equation of this form—

$$A + Bx + Cx^2 + Dx^3 + \&c. = 0,$$

in which the coefficients A, B, C, D, &c., are constant, and x a variable quantity, which may be supposed as small as we please, then each of these coefficients taken separately is necessarily equal to 0.

indeterminate-equation, *s.*

Math.: An equation is indeterminate when the unknown quantities which enter it admit of an infinite number of valnes; the equation of the right line is an example of an indeterminate equation; in general most of the equations nsed in analysis are indeterminate. Whenever an equation contains more than one arbitrary or nnkoown quantity, that, considered by itself, is indeterminate, for any number of sets of values may be attributed to all the unknown quantities, except one, and the value of that one deduced. A group of equations containing more unknown quantities than there are equations is indeterminate.

indeterminate-inflorescence, *s.*

Bot.: The same as INDEFINITE-INFLORESCENCE (q.v.). (*Gray.*)

indeterminate-problem, *s.*

Math.: A problem is indeterminate when it admits of an infinite number of solutions. This will always be the case when there are fewer imposed conditions than there are unknown or required parts; for, in that case, the equations which express the imposed conditions will be fewer than the number of unknown quantities which enter them; consequently, they will be indeterminate, and of course the problem itself will also be indeterminate.

indeterminate-quantity, *s.*

Math.: A quantity is indeterminate when it admits of an infinite number of values. In the equation of a straight line, $y = ax + b$, x represents the abscissa of any point of the line, and is indeterminate when considered only with reference to its value; when considered with reference to its connection with y, it is independent of it, provided we agree to assume it as the independent variable. [INDEPENDENT.]

indeterminate-series, *s.*

Math.: A series whose terms proceed by the powers of an indeterminate quantity.

ĭn-dē-tĕr'-mĭn-ate-lў, *adv.* [Eng. *indeterminate*; *-ly.*] In an indeterminate manner; indefinitely. (*Hale: Orig. of Mankind*, p. 106.)

ĭn-dē-tĕr'-mĭn-ate-nĕss, *s.* [Eng. *indeterminate*; *-ness.*] The quality or state of being indeterminate; want of preciseness; indefiniteness.

***ĭn-dē-tĕr-mĭn-ā'-tion,** *s.* [Pref. *in-* (2), and Eng. *determination* (q.v.).]

1. Want of determination; want of a fixed and steady mind or purpose; an unsettled or wavering state, as of the mind.

"The *indetermination* of her thoughts was a trouble."—*Bishop Taylor: Great Exemplar*, pt. i., § 7.

2. Want of fixed or determined direction.

***ĭn-dē-tĕr'-mĭned,** *a.* [Pref. *in-* (2), and Eng. *determined* (q.v.).]

1. Not determined; not settled; unsettled.

2. Not limited; infinite.

"The eternal height of *indetermined* space."
Brooke: Universal Beauty, v.

***ĭn-dē-vĭr'-ğĭn-ate,** *a.* [Pref. *in-* (2), and Eng. *devirginate* (q.v.).] Not devirginate; not deprived of virginity.

"Pallas, the seede of Ægis-bearing Jove;
Who still lies *indevirginate*."
Chapman: Homer; Hymn to Venus.

***ĭn-dē-vōte',** *a.* [Lat. *in-* = not, and *devotus* = devoted, devont.] Not devoted to religion; not devout; irreligious.

"There are so many of the same arguments, and so *indevote* an age."—*Bentley: Letter*, p. 151.

***ĭn-dē-vōt'-ĕd,** *a.* [Pref. *in-* (2), and Eng. *devoted* (q.v.).] Not devoted.

"Mr. Cowley's connections with some persons *indevoted* to the excellent chancellor."—*Hurd: Dial. 8; On Retirement.* (Note).

***ĭn-dē-vō'-tion,** *s.* [Pref. *in-* (2), and Eng. *devotion* (q.v.).] Want of devotion or devotedness; irreligion.

"We live in an age of *indevotion*."—*Bishop Taylor: Great Exemplar*, pt. i. ad. § 5.

***ĭn-dē-vōût',** *a.* [Pref. *in-* (2), and Eng. *devout* (q.v.).] Not devout; not religious; irreligious.

"Kindled by the eloquence of an *indevout* preacher."—*Boyle: Works*, ii. 457.

***ĭn-dē-vōût'-lў,** *adv.* [Eng. *indevout*; *-ly.*] In an indevout or irreligious manner.

***in-dew,** *v.t.* & *i.* [INDUE.]

ĭn'-dĕx (pl. **ĭn-dĕx-ĕş** in ord. lang., **ĭn'-dĭ-çēş** in math.), *s.* [Lat.]

I. *Ordinary Language:*

1. That which serves to point ont; that which shows or manifests; a discoverer.

"My lips might prove the *index* to my fault."
Drayton: Rosamond to King Henry.

2. A pointer; that which serves to direct or point out, as the hand of a watch or clock, a finger or arm of a balance or measnring apparatus which moves along a graduated scale, or in relation to a line or central mark; a finger-post which points ont the road to any place, &c.

3. A table of the contents of a book; a table of reference in alphabetical order.

"An *index* is the bag and baggage of a book, of more use than honour."—*Fuller: Pisgah Sight* (*Directions for Index*).

* 4. A preface, prelude, or prologue to a play or story.

"An *index* and obscure prologue to the history of lust and foul thoughts."—*Shakesp.: Othello*, ii. 1.

II. *Technically:*

1. *Anat.:* [Index-finger].

2. *Astron.:* A brass rule accompanying the plane-table, furnished with perpendicular sight-vanes at each extremity; an alidade.

3. *Math.:* The index of a radical is a number written over the radical sign to denote the degree of the root to be extracted. Thus, in the expressions

$$\sqrt[3]{a},\quad \sqrt[4]{b},\quad \&c.,$$

3, 4, &c., are called indices. An index is generally a whole number greater than 2. When the square root is indicated, the index is generally omitted, being understood. [Exponent.]

4. *Print.*: The sign or figure ☞, used to direct attention to any particular word or passage.

¶ (1) *Congregation of the Index:*

Ch. Hist.: A congregation founded by Pius V. in 1571. It consists chiefly of cardinals, nominated by the Roman Pontiff, with other members, who are called consultors. The secretary is always a Dominican. Its duty is to examine and correct, or prohibit the reading of, books which it deems heretical, or which contain matter dangerous to faith or morals.

¶ (2) *Index of a globe:* A little style or pointer fitted on the north pole of an artificial terrestrial globe, which, by turning with the globe, serves to point to certain divisions of the hour circle.

(3) *Index of a logarithm:* The integral part which precedes the logarithm and is always one less than the number of integral figures in the given number. It is also called the *characteristic*. [Logarithm.]

(4) *Index of refraction:*

Optics: The ratio between the sines of the incident and refracted angle. Called also the Refractive Index.

index-correction, *s.*

Astron.: A correction requisite to counterbalance the index-error of an astronomical instrument.

index-error, *s.*

Astron.: The error in the reading of a mathematical instrument, arising from the zero of the index not being completely adjusted to that of the limb; an error equal to that of zero-adjustment.

index-expurgatorius, *s.*

Ch. Hist.: A book issued by the Roman Congregation of the Index (q.v.). It contains passages, condemned as heretical, from current literature, in order that such passages may be expunged before the books containing them pass into general use.

index-finger, *s.* The fore-finger, from its being used in pointing.

index-gauge, *s.* An instrument having jaws whose distance apart is indicated by a pointer and dial, or other means.

index-glass, *s.* A mirror at the centre of motion of the index-arm of a quadrant or sextant, which moves with the index, and from which a ray of light from one of two given objects (one of which is, say, the sun) is reflected to another mirror, called the horizon-glass, fixed to one of the arms, and thence to a sight-hole in the other arm.

index-hand, *s.* The same as Index, II. 4.

* **index-learning,** *s.* Superficial knowledge, such as may be gained from the cursory perusal of a book or a study of its index.

"How *index-learning* turns no student pale."
Pope: Dunciad, i. 279.

index-prohibitorius, *s.*

Ch. Hist.: A list of books which may not be read by Roman Catholics, cleric or lay, on pain of excommunication. Livy (xxxix. 16) testifies to the practice of burning books of magic in pagan Rome, and the Ephesian converts who used "curious arts" voluntarily did the same (Acts xix. 19). Prior to the invention of printing, there were many cases in which the Roman Pontiffs had suppressed the writings of authors whom they judged heretical. The Council of Constance (1415) ordered the books of Huss to be burnt, and Leo X. condemned the writings of Luther. In the seventeenth session (Feb. 26, 1562) of the Council of Trent a commission was appointed to compile an Index of Prohibited Books and a code of general rules on the subject. The first Index was published (1564) in the pontificate of Pius IV., and various editions have since appeared.

ĭn'-dĕx, *v.t.* [Index, *s.*] To provide with an index or alphabetical table of contents; to place in an index or table of reference.

ĭn'-dĕx-ĕr, *s.* [Eng. *index; -er.*] One who makes an index.

* **ĭn-dĕx'-ĭ-cal,** *a.* [Eng. *index; -ical.*] Pertaining to, or having the form of, an index.

* **ĭn-dĕx'-ĭ-cal-lў,** *adv.* [Eng. *indexical; -ly.*] After the manner of an index.

ĭn'-dĕx-ĭng, *s.* [Eng. *index; -ing.*] The act or art of drawing-up an index or of inserting subjects in an index.

"With a view to establishing a uniform method of *indexing*."—*Athenæum*, July 21, 1883, p. 83.

* **ĭn-dĕx-tĕr'-ĭ-tў,** *s.* [Pref. *in-* (2), and Eng. *dexterity* (q.v.).] Want of dexterity; want of readiness; want of skill; awkwardness, clumsiness.

"The *indexterity* of our consumption-curers demonstrates their dimness in beholding its causes."—*Harvey: On Consumption.*

"Every *Indiaman* that arrived in the Thames was bringing unwelcome news from the East."—*Macaulay: Hist. Eng.*, ch. xviii.

In'-dĭ-an, *a.* & *s.* [Eng. *Indi(a); -an*; Fr. *Indien.*]

A. *As adjective:*

I. *Ordinary Language:*

I & 2. [II., 1, 2.]

3. Made of Indian corn. (*American.*)

II. *Technically:*

1. *Geog., &c.:* Of or belonging to either the East or West Indies or their productions.

2. *Ethnol. & Hist.:* Of or belonging to the natives of India or the aborigines of America.

B. *As substantive:*

1. A native of India.

2. One of the aborigines of America; a red man.

¶ The connection between 1 and 2 is that the expedition of Columbus, by which America was found, was intended to seek out a new route to India. When land was found, it was believed to be part of India or some land adjacent to it. When the mistake was discovered, the appellation *West* Indies was given to distinguish the new region from the long-known *East* Indies.

Indian-architecture, *s.*

Arch.: The architecture existing in, and to a certain extent peculiar to, India. No remains exist earlier than the third century B.C., when the Emperor Asoka made Booddhism the religion of India. After that period there arose (1) Boodhist architecture (q.v.), followed by (2) Jaina architecture (q.v.). Of styles more distinctively Hindoo there were four—viz., (3) the Southern, (4) the Northern, and (5) the Modern Hindoo; and (6) the Cashmirian. Temples, &c., of the Southern Hindoo style exist within the area formed by a line drawn east and west from Madras to Mangalore, constituting a triangle having each side 400 miles. The chief race is the Tamul. The temples are divided into a square Viman (the temple proper), with a pyramidal roof of one or more stories, Mantapas (porches), Gopuras (gate-pyramids), and Choultries (pillared halls). The most splendid example is the temple at Tanjore, its base being a square of 82 ft.; the height, two stories; the pyramidal roof, fourteen; the height, 180 or 200 ft. The Kylas of Ellora is of the Southern Hindoo style. The Northern Hindoo is rarer, and is of Aryan origin. The finest temples are in Orissa, especially Bobaneswar, built about A.D. 657. They have a curved spire, sometimes surrounded by other spires. The Modern Hindoo style is this ancient one modified by Muhammadan styles. The Cashmirian type of temple has two or four roofs and dormer windows; and in some cases has pillars like Doric, the legacy perhaps of the old Greek Bactrian kingdom. There is also a trefoiled arch of unknown origin. (*Fergusson: Architecture.*) [Temple.]

Indian-turnip, *s.*
Bot.: (1) *Arisæma atrorubens;* (2) the tubers of *Psoralea esculenta.*

Indian-wheat, *s.*
Bot.: A name for maize or Indian-corn (q.v.).

Indian-yellow, *s.* A pigment produced from the urine of the camel, and imported in the form of fetid balls into this country from India, where it has long been in use. It has a great power of resisting the sun's rays.

In-dĭ-an-eër, *s.* [Eng. *Indian; -eer.*] An Indiaman. (*Goodrich & Porter.*)

ĭn-dĭ-an-īte, *s.* [Named from India, where it occurs.]
Min.: A variety of Anorthite. It is granular, and of a white, gray or reddish colour.

***ĭn'-dĭc-al,** *a.* [Lat. *index* (genit. *indicis*) = an index; Eng. adj. suff. *-al.*] Connected with an index. [INDEX-LEARNING.]
"There is a lazy kind of learning which is only *indical.*"—*Fuller: Worthies; Norfolk.*

ĭn'-dĭ-cạn, *s.* [Lat. *indic(um)* = a blue pigment, probably indigo; Eng. suff. *-an.*]
Chem.: $C_{26}H_{31}NO_{27}$. A clear brown syrup of bitter and repulsive taste, existing in many species of plants, but especially in Dyer's-wood (*Isatis tinctoria*). It is extracted from the dried leaves with alcohol, the resulting greenish tincture being allowed to evaporate spontaneously. The residue is next treated with water, filtered, and the filtrate shaken with cupric hydrate, and again filtered. On the removal of the copper by means of sulphydric acid, the clear solution is found to contain almost pure indican. It is soluble in water, alcohol, and ether, and on boiling with dilute acids, it is decomposed into indigo-blue and indiglucin. It cannot be dried without decomposing. Indican is sometimes found in the urine of man, both in health and disease. It has also been found in the blood of man, and in the blood and urine of the ox.

ĭn'-dĭ-căn-ĭn, *s.* [Eng. *indican; -in.*]
Chem.: $C_{20}H_{23}NO_{12}$. A yellow or brownish-yellow bitter syrup, produced together with indiglucin by the action of soda-ley or baryta-water on indican, the indiglucin being separated by means of ether, in which it is insoluble. It is soluble in water, alcohol, and ether.

ĭn'-dĭ-cant, *a. & s.* [Lat. *indicans,* pr. par. of *indico* = to point out.]
A. *As adj.:* Indicating or serving to indicate a disease or its remedy.
B. *As subst.:* That which indicates or points out the nature of a disease or its remedy.

ĭn'-dĭ-cāte, *v.t. & i.* [Lat. *indicatus,* pa. par. of *indico* = to point out or towards: *in-* = towards, and *dico* = to proclaim, to make known; Sp. *indicar;* Ital. *indicare;* Fr. *indiquer.*]
I. *Ordinary Language:*
1. To show, to point out, to denote, to make known.
"To *indicate* the hour, day of the month, tides, age of the moon, and the like."—*Glanvill: Vanity of Dogmatizing,* ch. v.

A. *As pa. par.:* (See the verb).
B. *As adj.:* Pointed out, denoted, marked, shown.

indicated horse-power, *s.*
Steam: The horse-power up to which an engine really works; the true effective power of an engine, as distinguished from the nominal. [HORSE-POWER, 2.]

ĭn-dĭ-cā'-tion, *s.* [Lat. *indicatio,* from *indicatus,* pa. par. of *indico* = to indicate (q.v.); Fr. *indication;* Sp. *indicacion;* Ital. *indicazione.*]
I. *Ordinary Language:*
1. The act of indicating or pointing out.
"The description and *indication* of hours."—*Hale: Orig. of Mankind,* p. 340.
2. That which indicates, or serves to indicate or point out; a mark, sign, or token; an intimation; a symptom.
"While they were waiting for some *indication* of his wishes."—*Macaulay: Hist. Eng.,* ch. xiii.
* 3. Information or intelligence given.
* 4. Explanation; display.
"These be the things that govern nature principally, and without which you cannot make any true analysis and *indiction* of the proceedings of nature."—*Bacon: Nat. Hist.*
II. *Med.:* Any symptom, sign, or occurrence in a disease which points out or tends to direct towards suitable or proper remedies.
"*Indication* is of four kinds: vital, preservative, curative, and palliative."—*Quincy.*

ĭn-dĭc'-ạ-tĭve, *a. & s.* [Lat. *indicativus,* from *indicatus,* pa. par. of *indico* = to point out; Fr. *indicatif;* Ital. & Sp. *indicativo.*]
A. *As adjective:*
1. *Ord. Lang.:* Pointing or serving to point out; indicating; denoting; giving notice or intimation of something not visible or obvious.
"The truth is productive of utility, and utility *indicative* of truth."—*Warburton: Alliance between Church & State,* ch. ii.
2. *Gram.:* A term applied to that mood of a verb which affirms, or denies, or asks questions.
"The instance of Isaac blessing Jacob, which in the several parts was expressed in all forms, *indicative,* optative, enunciative."—*Bp. Taylor: Divine Institution of the Office Ministerial.*
B. *As substantive:*
Gram.: The indicative mood.

ĭn-dĭc'-ạ-tĭve-lў, *adv.* [Eng. *indicative; -ly.*] In a manner to indicate, show, or point out.

ĭn'-dĭ-cā-tŏr, *s.* [Lat., from *indicatus,* pa. par. of *indico;* Fr. *indicateur;* Ital. *indicatore.*]
I. *Ord. Lang.:* One who or that which indicates or points out.
II. *Technically:*
1. *Anat.:* [INDICATOR-MUSCLE].
2. *Chem.:* A reagent used in volumetric analysis to indicate, by change of colour, the exact point at which the precipitation of any chemical body from a solution is completed. Thus, in estimating the amount of hydrochloric acid present in a solution, a standard solution of silver nitrate is used, but as it is difficult to determine the exact point at which the action is completed, a few drops of a solution of yellow potassic chromate, the indicator, are added. As soon as the hydrochloric acid is entirely precipitated as silver chloride, the silver nitrate attacks the indicator, producing a faint blood-red tinge, an evidence that all the chlorine has entered into combination with the silver, and that the slight excess has formed the silver chromate. Indicators are also used to determine, by change of colour, the precise point at which a liquid ceases to be either acid or alkaline. The chief reagents used as indicators are yellow potassic chromate, potassic ferrocyanide, indigo, carmine, litmus, turmeric, Porrier's orange, tropœolin, phenolphthalein, eosin, rosalic acid, &c.
3. *Steam-Engine:* An instrument for measuring the horse-power of a steam-engine. It consists of a small vertical cylinder having a piston, kept down by a spring. The piston-rod carries a pencil moving vertically across a card vibrated horizontally by the piston-rod of the engine under measurement. Steam is admitted beneath the indicator-piston from the cylinder of the engine measured, and the pencil marks on the card the varying steam pressure in the cylinder, whence the power of the engine may be computed.
4. *Optics:* A finger working in the field of a microscope to point out a special object within the field of view.
5. *Telegraphy:* The dial and mechanism of a dial telegraph. The face has the letters and figures arranged in two concentric circles. The motion of the hand is continuous in one direction, advancing one letter at each closing of the circuit. The movement is effected by clock-work driving a scape-wheel, the teeth of which are alternately engaged and released upon opening and closing the circuit, by means of a pawl operated intermediately from the armature of the electro-magnets.
6. *Rail. Eng.:* The gradient post of a railway.
7. *Furnace:* A gauge in a blast-furnace to indicate the proper height of a charge.
8. *Ornith.:* The typical genus of the family Indicatorinæ (q.v.). *Indicator major* is the Larger, and *I. minor* the Lesser Honey-guide of South Africa.

indicator-card, *s.* A card containing a diagram drawn by the working steam by means of an Indicator. [INDICATOR, 3.]

indicator-muscle, *s.*
Anat.: A muscle called also *Extensor indicis.* It extends the index-finger.

indicator-telegraph, *s.* An electric telegraph in which the signals are given by the deflections of a magnetic needle.

ĭn-dĭ-cā-tŏ-rī'-næ, *s. pl.* [Lat. *indicator;* fem. pl. adj. suff. *-inæ.*]
Ornith.: A sub-family of Cuculidæ (Cuckoos). The bill is short, subconic, the feet very short. They are found in forests in Africa and Borneo, and in the jungles of India.

ĭn-dĭc'-ą-tŏr-ў, *a.* [Eng. *indicat(e); -ory.*] Indicating or serving to indicate or make known.

ĭn-dĭ-cā'-vĭt, *s.* [Lat., = he has shown; third pers. sing. perf. indic. of *indico* = to indicate or show.]

Eccles. Law: A writ of prohibition against proceeding in the spiritual court in certain cases, when the suit belongs to the common-law courts. It lies for the patron of a church whose incumbent is sued in the spiritual court by another clergyman for tithes amounting to a fourth part of the profits of the advowson.

"Too much talking is ever the *indice* of a foole."—*Ben Jonson: Discoveries.*

ĭn'-dĭ-çēş, *s. pl.* [Index, *s.*]

ĭn-dĭ'-cĭ-ą (c as sh), *s. pl.* [Lat., pl. of *indicium* = a sign, from *index* (genit. *indicis*).]

Law: Discriminating marks, signs, tokens, or indications.

* **ĭn-dĭç'-ĭ-ble,** *a.* [Lat. *indico* = to point out.] That can be indicated or pointed out.

"The calamity will be *indicible.*"—*Evelyn: Memoirs* (Sept. 9, 1665).

ĭn'-dĭc-ō-līte, *s.* [Lat. *indicum* = a blue pigment, indigo (?); Gr. 'Ινδικός (*Indikos*), as adj. = Indian; as subst. = a dark-blue dye, indigo, &c. So named from its indigo-blue colour.]

Min.: A variety of Tourmaline (q.v.).

ĭn-dĭct' (c silent), * **ĭn-dīte',** *v.t.* [Lat. *indictus*, pa. par. of *indico* = to accuse: *in-* = in, against, and *dico* = to say, to tell; O. Fr. *endicter, enditer.*]

* **I.** *Ordinary Language:*

1. To compose, to write, to indite (q.v.).

2. To proclaim; to appoint publicly or by public authority.

"The Consuls used to *indict* a meeting of the Senate."—*Milton: Defence of People of England.*

II. *Law:* To accuse or charge with a crime or misdemeanour by way of indictment (q.v.).

ĭn-dĭct'-ą-ble (c silent), *a.* [Eng. *indict; -able.*]

1. Capable of being indicted: liable to be indicted: as, an *indictable* offender.

2. That forms a subject or ground of indictment: as, an *indictable* offence.

* **ĭn-dĭct-ēē'** (c silent), *s.* [Eng. *indict; -ee.*] A person indicted.

ĭn-dĭct'-ĕr (c silent), *s.* [Eng. *indict; -er.*] One who indicts.

* **ĭn-dĭc'-tion,** *s.* [Lat. *indictio* = (1) a declaration or imposition of a tax, an impost, (2) a cycle of fifteen years (see etym. of the compound), from *indictus*, pa. par. of *indico*; Fr. *indiction.*]

1. The act of proclaiming or declaring publicly.

"Secular princes did use to indict, or permit the *indiction* of, synods of bishops."—*Taylor: Rule of Conscience*, bk. iii., ch. iv.

2. A proclamation; a public declaration.

¶ *Cycle of indiction:*

1. *Calendar:* A period of fifteen years, not founded on any astronomical occurrence, but fixed first by Constantine the Great as a fiscal arrangement. It began on Jan. 1, A.D. 313. The Popes adopted it in the year 1582, when the Calendar was reformed, that year being the tenth of the indiction. The year of the indiction corresponding to any year of our era is thus found: Add 3 to the date, divide the sum by 15, and the remainder is the year of the indiction, the remainder 0 indicating the fifteenth of the cycle. Thus $\frac{1884+3}{15} = 125$, with a remainder of 12. Twelve, therefore, is the indiction of that year. There are three other indictions besides Constantine's, the Cæsarean or Imperial, the Roman or Pontifical, and that of the Parliaments of France.

2. *Roman Antiquities:* [Cycle, ¶ (3)].

* **ĭn-dĭc'-tĭve,** *a.* [Lat. *indictivus*, from *indictus*, pa. par. of *indico.*] Proclaimed; published, or declared publicly.

"Entirely the same with the *indictive* funeral."—*Kennet: Antiq. of Rome*, bk. ii., ch. xv.

ĭn-dĭct'-mĕnt (c silent), * **ĭn-dīght'-mĕnt** (*gh* silent), * **ĭn-dīte'-mĕnt,** *s.* [Eng. *indict; -ment.*]

Law: The act of indicting or charging a person with a crime or misdemeanour; the state of being indicted: a formal charge against a person or persons for a crime or misdemeanour.

1. *Eng. Law:* A written accusation of one or more persons of a crime or misdemeanour, preferred to and presented upon oath by a grand jury. Properly, an indictment is not so called until it has been found a true bill by the grand jury, up to which time it is called a bill. If the grand jury are of opinion that the evidence is not sufficient to support the charge, they indorse the bill "not found," or "ignoramus" (q.v.); if the contrary, "a true bill."

"Was it not monstrous, they asked, that a culprit should be denied a sight of his *indictment?*"—*Macaulay: Hist. of Eng.*, ch. xviii.

2. *Scots Law:* A form of process by which a criminal is brought to trial at the instance of the Lord-Advocate, in whose name it runs. It is addressed to the panel, and charges the accused with the crime for which he is to be tried.

* **ĭn-dĭct'-ŏr** (c silent), * **ĭn-dīght'-ĕr** (*gh* silent), *s.* [Eng. *indict; -or.*] One who indicts; an indicter.

"There passeth a double jurie, the *indictors*, and the tryors."—*Bacon: Henry VII.*, p. 146.

ĭn-dĭf'-fĕr-ençe, * **ĭn-dĭf'-fĕr-ęn-çў,** *s.* [Fr., from Lat. *indifferentia*, from *indifferens* = having no difference: *in-* = not, and *differens*, pr. par. of *differo* = to differ.]

1. The quality or state of being indifferent; a state of mind in which a person does not incline to one side more than the other; freedom from bias or prejudice; impartiality; neutrality.

"Requesting that they might speak before the senate and be heard with *indifference.*"—*P. Holland: Livy*, p. 1,214.

2. A state of mind in which a person takes no interest in a matter which comes before him; unconcernedness, carelessness, apathy, negligence.

"It is our *indifferency* and lukewarmness that makes it so natural."—*Bp. Taylor: Works*, vol. i., ser. 13.

3. A state in which there is no difference, or in which no reason, moral or physical, preponderates; a state in which there is no choice between two or more things.

"Attain the wise *indifference* of the wise."
Tennyson: A Dedication.

4. The quality or state of being of indifferent quality; mediocrity; the state of being barely passable in quality.

* **ĭn-dĭf'-fĕr-ençed,** *a.* [Eng. *indifference(e); -ed.*] Having an appearance of indifference. (*Richardson: Clarissa*, iii. 186.)

ĭn-dĭf'-fĕr-ęnt, *a., s., & adv.* [Fr., from Lat. *indifferens.*]

A. *As adjective:*

1. Not making difference between parties or sides; not inclining to one side more than another; impartial, unbiassed, unprejudiced.

"No judge *indifferent.*"
Shakesp.: Henry VIII., ii. 4.

2. Not making a difference; having no preponderating weight or influence; of no importance; of little moment.

3. Feeling no anxiety, care, or interest respecting anything; careless, heedless, unconcerned, apathetic.

"The *indifferent*, a large portion of every society, were glad that the anarchy was over."—*Macaulay: Hist. Eng.*, ch. xvi.

4. Of a middling or barely passable quality; neither good nor bad, but rather bad than good; mediocre.

"They may flatter an *indifferent* beauty, but the excellencies of nature can have no right done to them."—*Dryden: Don Sebastian.* (Dedic.)

5. Regarded without affection or with feelings different from those with which others are regarded.

"Things *indifferent* to the shepherd's thoughts."
Wordsworth: Michael.

* **B.** *As subst.:* An indifferentist (q.v.).

"He was . . . the first great *indifferent.*"—*J. Morley: Voltaire*, ch. iii.

* **C.** *As adv.:* Tolerably, passably, to a moderate degree.

"It is *indifferent* cold, indeed, my lord."
Shakesp.: Hamlet, v. 2.

¶ *Controversy about indifferent things:* [Adiaphoristic].

* **ĭn-dĭf'-fĕr-ęnt-ĭşm,** *s.* [Eng. *indifferent; -ism.*] The quality or state of being indifferent, systematic indifference or apathy; lukewarmness; the principles or opinions of an indifferentist.

ĭn-dĭf'-fĕr-ęnt-ĭst, *s.* [Eng. *indifferent; -ist.*] One who is indifferent, neutral, or unconcerned in any cause; specif., one who holds that all religious sects, creeds, and doctrines are equally good so long as a person is persuaded in his own mind that he holds the truth.

ĭn-dĭf'-fĕr-ęnt-lў, *adv.* [Eng. *indifferent; -ly.*]

And I will look on death *indifferently.*"
Shakesp.: Julius Cæsar, i. 2.

3. Only passably well, tolerably, very moderately.

ĭn-dĭ-fŭl'-vĭn, *s.* [Eng. *indil(can); Lat. fulv(us)* = yellow, and *-in* (*Chem.*).]

Chem.: A brittle reddish-yellow resin, obtained of various composition, by treating indican with dilute sulphuric acid, and purifying by means of cold water, and warm dilute soda-ley. The name is applied to two compounds, distinguished as α indifulvin, $C_{22}H_{20}N_2O_3$, and β indifulvin, $C_{41}H_{38}N_4O_3$.

ĭn-dĭ-fŭs'-çĭn, *s.* [Eng. *indil(can); Lat. fusc(us)* = dark-coloured, and *-in* (*Chem.*).]

Chem.: $C_{24}H_{20}N_2O_2$. A brown powder produced by the action of dilute sulphuric acid on indican, which has been exposed to the air for some time. It is insoluble in boiling water, slightly soluble in boiling alcohol, but very soluble in alcoholic ammonia.

ĭn-dĭ-fŭs'-cōne, *s.* [Eng. *indifusc(ine); -one* (*Chem.*).]

Chem.: $C_{22}H_{20}N_2O_5$. A brown powder, obtained in the same manner as indifuscin, and possessing the same charactera, but differing in composition.

* 2. Not to be received and patiently endured.

* **ĭn-dī-ĝĕst'-ĭ-blў,** *adv.* [Eng. *indigestible*; *-ly.*] So as to be indigestible; not digestibly.

ĭn-dī-ĝĕst'-ĭon (ion as yŭn), *s.* [Pref. *in-* (2), and Eng. *digestion* (q.v.).]

Path.: Dyspepsia, difficulty of digestion, with slowness and long retention of the food in the stomach, great distress after eating, uneasiness at the pit of the stomach, fetid eructations, and unaltered ingesta in the stools. Digestion is much retarded, deficiency and abnormality of the gastric juice being a common occurrence. Gluttony, drunkenness, overanxiety, and sedentary habits are the chief causes; the avoidance of these the remedy, with appropriate treatment to improve the character of the gastric juice. Heartburn or water-brash is an unpleasant accompaniment. Indigestion is often hereditary, and the forms it assumes are very many and intractable, but on the whole it is rather an abnormal functional difficulty owing to reflex action than a distinct disease. It is accompanied by nausea and sometimes vomiting. Alkalis, charcoal, pepsin, &c., have been found useful.

* **ĭn-dī-ĝĕst'-ĭve,** *a.* [Eng. *indigest(ion)*; *-ive.*] Dyspeptic; affected by indigestion. (*Dickens: Edwin Drood*, ch. x.)

* **ĭn-dĭĝ'-ĭ-tāte,** *v.t.* & *i.* [Lat. *indigito*, from *in-* = in, towards, and *digitus* = the finger.]

A. *Trans.:* To point out; to show by the fingers.

"The depressing this finger, which in the left hand implied but six, in the right hand *indigitated* six hundred."—*Browne: Vulgar Errours*, bk. iv., ch. iv.

B. *Intrans.:* To speak or communicate ideas by means of signs made with the fingers; to point with the finger; to compute on the fingers.

* **ĭn-dĭĝ-ĭ-tā'-tion,** *s.* [INDIGITATE.] The act of pointing out or showing, as by the fingers.

"Which things I conceive no obscure *indigitation* of providence."—*More: Against Atheism.*

ĭn-dī-glû'-çĭn, *s.* [Eng. *indi(can)*; *glu(cose)*, and *-in* (*Chem.*).]

Chem.: $C_6H_{10}O_6$. A light yellow syrup, having a faintly sweet taste, obtained by boiling indican with dilute sulphuric acid, indiglucin and indigo blue being produced, the latter of which is precipitated. It is soluble in water and in alcohol, but insoluble in ether. On being heated it swells up, and gives off an odour of burnt sugar. It reduces Fehling's solution, but will not ferment.

* **ĭn-dĭgn'** (*g* silent), * **in-digne,** *a.* [Fr. *indigne*, from Lat. *indignus*, from *in-* = not, and *dignus* = worthy; Sp. *indigno*; Ital. *indegno.*]

ĭn'-dĭ-gō, *s.* & *a.* [Fr. *indigo*, a mispronunciation of Sp. *indico*, from Lat. *indicum.*] [INDICOLITE.]

A. *As substantive:*

1. *Chem. & Comm.:* A vegetable dyestuff, yielding a beautiful and very durable blue dye. Many tropical and sub-tropical plants contain a substance, probably a glucoside, which, on being extracted and allowed to ferment, produces impure indigo. The plants from which it is chiefly obtained are the various species of Indigofera, *Isatis tinctoria*, *Polygonum tinctorium*, &c. In order to prepare indigo on a large scale, the leaves and stems of the respective plants are steeped in water until fermentation sets in, which occupies from twelve to fourteen hours. The yellow-coloured liquid is then drawn off into shallow vessels and exposed to the air for two or three hours, when, in consequence of the oxidation of the indigo-white first formed, commercial indigo is deposited in the form of a sandy-looking powder. This latter is washed, boiled in water for two or three hours, filtered, and the residue pressed into cubical cakes and dried by heat. Commercial indigo is by no means pure indigo blue; it contains indigo-gluten, indigo-brown, and indigo-red, together with insoluble impurities. Indigo prepared in Java by Sayer's process contains from 66 to 71 per cent. of indigo blue, and only 2½ per cent. of ash, whilst ordinary commercial indigo seldom contains more than 65 per cent. of indigo blue, with not less than 15 per cent. of ash. Indigo is tasteless, odourless, and of an intense blue colour, passing into purple. It is insoluble in water, cold alcohol, and ether, slightly soluble in boiling alcohol, but very soluble in concentrated sulphuric acid.

2. *Colours:* The deepest blue.

3. *Bot:* Indigo is yielded by several plants, as *Indigofera tinctoria* and *I. argentea*, *Wrightia tinctoria*, *Marsdenia tinctoria* and *Gymnema tingens.* (*Treas. of Bot.*) [INDIGO-PLANT.]

¶ Bastard indigo is *Amorpha fruticosa*; Chinese Indigo, *Isatis indigotica*; Egyptian Indigo, *Tephrosia Apollinea*; False Indigo, an American name for *Baptisia*; Native Indigo, *Isatis tinctoria*; and Wild Indigo, *Baptisia tinctoria.*

B. *As adjective:*

1. Of or belonging to indigo or the plant by which it is produced.

2. Deep blue.

indigo-berry, *s.*

Bot.: *Randia latifolia.*

indigo-bird, *s.*

Ornith.: The *Cyanospiza cyanea* of Baird. A North American finch; blue, tinged with ultramarine on head, throat, and breast, elsewhere with verdigris-green; lores and angles of chin velvet-black; wing-feathers brown, edged with bluish-brown; length 5½ in.; wing-spread 7½ in. The female is smaller, and yellowish-brown, with the wings darker. (*Ripley & Dana.*)

indigo-blue, *s.* [INDIGOTIN.]

indigo-brown, *s.*

Chem.: A dark-coloured, transparent resin, extracted from indigo by boiling it in a solution of potassic hydrate. It is tasteless and quite neutral, and unites both with acids and bases. It is of uncertain composition, but in many characters it resembles indihumin.

indigo-copper, *s.*

Min.: The same as COVELLITE (q.v.).

indigo-gluten, *s.*

Chem.: A yellow transparent substance extracted from commercial indigo by means of dilute acetic acid. It is soluble in water and in alcohol, has a taste resembling extract of meat, and behaves in many respects like ordinary vegetable gluten.

indigo-green, *s.*

Pigments: A green obtained from indigo by adding potash to an alcoholic solution of an alkaline hyposulphate of indigo. (*Weale.*)

indigo-mill, *s.* An iron cistern, which, rounded at bottom, has a lid with two leaves between, which works a rock-shaft, vibrated by a crank, and swinging a frame carrying six rollers, which triturate the indigo to a fine paste.

indigo-plant, *s.*

Bot.: (1) *Indigofera tinctoria* and other species of Indigofera (q.v.); (2) *Polygonum tinctorium.*

indigo-purple, *s.* A purple obtained from indigo by the action of fused sulphate of sodium. (*Weale.*)

indigo-red, *s.*

Chem.: One of the colouring matters found in commercial indigo. It may be obtained by exhausting indigo with hydrochloric sulphuric acid, then with a strong caustic alkaline lye. After washing the residue with water, it is boiled with alcohol of a specific gravity of 0·83. On distilling the alcoholic solution, indigo-red is left as an amorphous dark-brown powder. It is insoluble in water and dilute acids, but soluble in strong alcohol, and in ether. Indigo-red may also be obtained from the fresh leaves of *Polygonum tinctorium.*

indigo-white, *s.*

Chem.: $C_{16}H_{12}N_2O_2$. A white powder produced by the action of reducing agents on pure indigo-blue. It may be prepared by digesting for twenty-four hours a mixture of indigotine, hydrate of calcium, sulphate of iron, and water in a closed flask filled with hydrogen. The clear solution is then decanted by means of a siphon filled with hydrogen into a vessel containing hydrochloric acid and ammonium sulphite. The precipitate of indigo-white which is formed is filtered and dried at 100°, in a stream of hydrogen. Pure indigo-white is a white powder with a silky lustre. It is tasteless and inodorous, insoluble in water, but soluble in aqueous alkalis, in alcohol, and in ether. When indigo-white is dissolved in an alkaline liquid, and the liquid over-saturated with hydrochloric acid, air being excluded, the precipitated white flocks slowly unite to crystalline scales, which oxidize with great rapidity to indigo-blue on being exposed to the air.

indigo-yellow, *s.*

Chem.: A clear yellow substance, obtained by heating hypo-sulphindigotate of calcium with lime-water in contact with air. It is soluble in water and in alcohol, but insoluble in ether. When heated it swells up and emits an odour resembling burnt animal matter. The yellow aqueous solution is completely precipitated by basic acetate of lead.

ĭn-dĭ-gŏf'-ĕr-ą, *s.* [Eng., &c. *indigo*, and Lat. *fero* = to bear.]

Bot.: The typical genus of the papilionaceous sub-tribe *Indigoferæ* (q.v.). It consists of annual and perennial herbs or shrubs, generally with pinnate leaves, rose-purple, bluish, or white racemose flowers, cylindrical and four-sided, straight or curved legumes, the seeds, as a rule, numerous. More than two hundred species are known, from Africa, America, Asia, and Australia. Several of these *Indigoferæ* furnish indigo. That more commonly cultivated in India is *I. tinctoria*. It is a shrub three or four feet high, with long, narrow legumes. *I. cærulea*, another Indian species, is much commended by Roxburg. *I. Anil* is the West Indian indigo. Its powdered leaf is administered in bepatitis. *I. argentea* is cultivated in India and the Barbary States, and *I. disperma* in parts of America.

ĭn-dĭ-gō-fĕr'-ĕ-æ, *s. pl.* [Mod. Lat. *indigofer(a)*; Lat. fem. pl. adj. suff. *-eæ*.]

Bot.: A sub-tribe of papilionaceous plants, tribe Leteæ.

ĭn'-dĭ-gō-ĝĕn, ĭn'-dĭ-gō-ĝēne, *s.* [Eng., &c. *indigo*, and *gen*, root of γεννάω (*gennaō*) = to produce.] White indigo, produced by oxidizing indigo-blue.

ĭn'-dĭ-gō-lĭte, *s.* [INDICOLITE.]

ĭn-dĭ-gŏm'-ĕ-tĕr, *s.* [Eng. *indigo*, and *meter*.] An instrument for ascertaining the strength of indigo.

ĭn-dĭ-gŏm'-ĕ-trў, *s.* [Eng., &c. *indigo*, and Gr. μετρον (*metron*) = a measure.] The act, art, or process of measuring the strength of indigo.

ĭn'-dĭ-gō-tāte, *s.* [Eng., &c. *indigot(ic)*; *-ate* (*Chem.*).]

Chem.: A compound of indigotic acid, with a base or metallic oxide: thus, *indigotate* of potash.

ĭn-dĭ-gŏt'-ĭc, *a.* [Eng., &c. *indigot(in)*; *-ic*.] Pertaining to or derived from indigotin (q.v.).

indigotic-acid, *s.*

Chem.: An acid formed by the long-continued action of dilute nitric acid on indigo. It is identical with nitrosalicylic acid, under which it will be treated.

ĭn'-dĭ-gō-tĭn, *s.* [Eng., &c. *indigo*; *t* euphonic, and *-in* (*Chem.*).]

Chem.: $C_{16}H_5NO_2$ (Indigo-blue), the pure blue colouring matter of indigo. It is obtained from commercial indigo, by reducing it to indigo-white, by means of reducing agents, such as ferrous salts, grape-sugar, &c., the resulting yellow solution of the indigo-white metallic compound, on exposure to the air, depositing indigo-blue in small crystals. It may also be obtained synthetically, by heating a mixture of isatine with phosphorous trichloride, phosphorous- and chlor-acetyl, in sealed tubes, at 70° to 80° for several hours. On pouring the product into water, blue flocks of indigotine separate. It is a deep-blue, crystalline substance, with metallic lustre, insoluble in water, alcohol, and ether. On heating to 300°, it is converted into a purple-red vapour, which condenses again to crystals of pure indigotine. By dry distillation with solid potassic hydrate it yields aniline. Indigotine is isomeric with cyanide of benzoyl.

ĭn-dĭ-hūm'-ĭn, *s.* [Eng. *indi(can)*, and *humin* (q.v.).]

Chem.: $C_{16}H_9NO_3$. A product of the decomposition of indican by heating it with dilute-sulphuric acid. It is a brown powder, insoluble in water and in alcohol, but very soluble in soda-ley. When heated, it burns without melting.

* **ĭn-dĭl'-ą-tŏr-ў,** *a.* [Pref. *in-* (2), and Eng. *dilatory* (q.v.).] Not dilatory; not slow.

"To give them a new form of *indilatory* execution."—*Cabbala, Sup. Cornwallis to the Sp. King* (1654).

* **ĭn-dĭl'-ĭ-ĝençe,** *s.* [Pref. *in-* (2), and Eng. *diligence* (q.v.).] Want of diligence; sloth, slothfulness.

"The *indiligence* of an idle tongue."—*Ben Jonson: Discoveries.*

* **ĭn-dĭl'-ĭ-ĝent,** *a.* [Pref. *in-* (2), and Eng. *diligent* (q.v.).] Not diligent; slothful, idle.

"A person that hath right on his side is cold, *indiligent*, lazie, and unactive."—*Bp. Taylor*, pt. ii., ser. 7. (*Richardson.*)

* **ĭn-dĭl'-ĭ-ĝent-lў,** * **ĭn-dĭl'-ĭ-ĝent-lў,** *adv.* [Eng. *indiligent*; *-ly*.] In a slothful, idle manner; without diligence.

"I had spent some years (not altogether *indiligently*) under the ferule of such masters as the place afforded."—*Bp. Hall, Specialties in the Life of.*

* **ĭn-dĭ-mĭn'-ĭsh-ą-ble,** *a.* [Pref. *in-* (2), and Eng. *diminishable* (q.v.).] Not diminishable; incapable of being diminished; not capable of or liable to diminution.

"To slight and brave the *indiminishable* majesty of our highest court."—*Milton: Of Reform. in England.*

ĭn'-dĭne, *s.* [Eng. *ind(igo)*; suff. *-ine* (*Chem.*).]

Chem.: $C_{16}H_{10}N_2O_2$. A dark rose-coloured crystalline powder, obtained by rubbing in a mortar sulphisatyde with alcoholic potassic hydrate, and washing the rose-coloured mass with water, $C_{16}H_{12}N_2O_2S_2 + 2KOH = C_{16}H_{10}N_2O_2 + 2H_2O + K_2S_2$. It crystallizes in fine microscopic needles, which are insoluble in water, and but very slightly soluble in alcohol and in ether. On heating indine with excess of alcoholic solution of potassic hydrate, it dissolves, and on cooling deposits black crystals of potassium indine, $C_{16}H_9KN_2O_2$. Indine is isomeric with indigotine.

* **ĭn-dĭpped',** **ĭn-dĭpt',** *a.* [Pref. *in-* (1), and Eng. *dipped*, *dipt*.] Dipped.

"*Indipt* in blood." *Fletcher: Christ's Triumph.*

ĭn'-dĭ-rĕct, *a.* [Fr., from Lat. *indirectus*, from *in-* = not, and *directus* = direct (q.v.).]

1. Not direct; not straight or rectilinear; deviating from the direct or straight line or course.

2. Not pointed, aimed, or done directly at or against an object; not tending or leading to a purpose, object, or aim, by the plainest and most obvious means or course, but obliquely and consequentially; not open or straightforward; as, an *indirect* accusation, an *indirect* attack.

"They may be under no temptation to supply themselves by *indirect* ways."—*Burnet: Own Time* (Couc.).

3. Not resulting directly or immediately from a cause, but following consequentially and remotely: as, *indirect* damage, *indirect* claims.

4. Not fair, not honest; tending or intended to mislead or deceive.

"Fy, what an *indirect* and peevish course
Is this?" *Shakesp.: Richard III.*, iii. 1.

indirect-claims, *s. pl.* Claims for damages indirectly done. After the American Civil War, claims were made by the United States upon Great Britain for compensation for the damages, direct and indirect, done by the *Alabama* and other Confederate cruisers to the American marine. The Arbitration Committee chosen to decide upon these demands disallowed the indirect claims as being contrary to international law.

indirect-demonstration, *s.*

Logic & Geom.: A method of demonstration in which the truth of a proposition is established by showing that the supposition of its contrary cannot be true. It is also known as negative demonstration or *Reductio ad absurdum*. (ABSURD, II.)

indirect-evidonce, *s.*

Law: Evidence deduced by inference as to the truth of a disputed fact, not from the actual knowledge of a witness, but from collateral circumstances.

indirect-taxes, *s. pl.* [TAX.]

* **ĭn-dĭ-rĕct'-ĕd,** *a.* [Pref. *in-* (2), and Eng. *directed* (q.v.).] Not directed or addressed to any particular person or thing.

ĭn-dĭ-rĕct'-lў, *adv.* [Eng. *indirect*; *-ly*.]

1. In an indirect line or course; not in a direct or straight line; obliquely.

2. Not directly; not in direct or express terms; not by direct means.

"Thy head, all *indirectly*, gave direction."
Shakesp.: Richard III., iv. 4.

* 3. Unfairly; not fairly; not honestly; without right.

"Your crown and kingdom *indirectly* held."
Shakesp.: Henry V., ii. 4.

ĭn-dĭ-rĕct'-nĕss, *s.* [Eng. *indirect*; *-ness*.]

* 1. The quality or state of being indirect or oblique.

2. The quality of being indirect or not straightforward; as, the *indirectness* of the attack.

* 3. Unfairness, dishonesty, fraud.

"King David found this deflection and *indirectness* in our minds."—*Mountague: Devoute Essayes*, pt. i., tr. x., § 8.

ĭn-dĭr'-ĕ-tĭn, *s.* [Eng., &c. *indi(go)*; *ret(ene)*, and suff. *-in*. (*Chem.*)]

Chem.: $C_{18}H_{17}NO_5$. A dark-brown shining resin, produced, together with other bodies, by heating indican with dilute sulphuric acid. It is soluble in alcohol and in the aqueous alkalis, and is precipitated from its ammoniacal solution by barium, calcium, and silver salts. When heated it melts, burns with a smoky flame, and leaves chareoal.

ĭn-dĭ-rū'-bĭn, *s.* [Eng., &c. *indi(go)*; *rubi(an)*, from *Rubia tinctoria* = madder, and suff. *-in* (*Chem.*).]

Chem.: C_8H_5NO. A crystalline compound, obtained by the decomposition of indican by means of an acid, but more abundantly by treating Indian woad leaves in an alkaline solution of stannous chloride, the liquid depositing indiruhin on exposure to the air. It is insoluble in water and in aqueous alkalis, but soluble in alcohol. It crystallizes in metallic glistening needles, which appear red by transmitted light. It is insoluble in dilute sulphuric acid, even on boiling, but dissolves readily in concentrated sulphuric acid. Indirubin is isomeric with indigo-blue, and resembles indigo-root in many of its properties.

ĭn-dĭs-tĭnct', *a.* [Fr., from Lat. *indistinctus*, from *in-* = not, and *distinctus* = distinct (q.v.); Ital. & Sp. *indistinto.*]

1. Not distinct; not separate in such a manner as to be clearly perceptible by itself; not having the lines of separation distinct, clear, or plain; not readily distinguishable; confused.

"Their minute parts become more *indistinct.*"—*Reid: Inquiry into the Human Mind*, ch. vi., § 22.

2. Not presenting clear or well-defined images; faint, dim: as, *indistinct* vision.

3. Obscure to the mind; not clear; confused, vague.

"Thy *indistinct* expressions seem
Like language uttered in a dream."
Cowper: To Mary.

4. Not clearly audible; faint.

"The city swarms intense. The public haunt . . .
Hums *indistinct.*" *Thomson: Winter*, 632.

¶ *Indistinct* is negative; it marks simply the want of distinctness: *confused* is positive; it marks a positive degree of *indistinctness.* A thing may be *indistinct* without being *confused;* but it cannot be *confused* without being *indistinct:* two things may be *indistinct*, or not easily distinguished from each other; but many things, or parts of the same things, are *confused:* two letters in a word may be *indistinct;* but the whole writings or many words are *confused.* (*Crabb: Eng. Synon.*)

*** ĭn-dĭs-tĭnct'-ĭ-ble,** *a.* [Pref. *in-* (2); Eng. *distinct*, and auff. *-ible.*] Not distinguishable; indistinguishable.

* 4. To invite, to ask.

"She will *indite* him to some supper."
Shakesp.: Romeo & Juliet, ii. 4

B. *Intrans.:* To write, to compose.

"Wounded I sing, tormented I *indite.*"
Herbert: Joseph's Coat.

ĭn-dīt'-ĕr, *s.* [Eng. *indit(e); -er.*] One who indites.

*** ĭn-dīte'-mĕnt,** *s.* [Eng. *indite; -ment.*]

1. The act of inditing.

2. An indictment (q.v.).

ĭn'-dĭ-ŭm, *s.* [Lat. *indicum* = a blue pigment.]

Chem.: A very rare metal (sym. In., at. wt. 113·4), occurring in minute quantities in zinc ores. It was discovered by F. Reich and Th. Richter, in 1863, in the zinc-blende of Freiburg. The metal itself is of a lead-gray colour, soft, malleable, fusible, but not very volatile. It resists oxidation up to a temperature beyond its melting point, 176°, but when heated to redness takes fire in the air, burning with a blue flame, and giving off a brownish smoke. It is readily attacked by nitric acid, but dissolves slowly in hydrochloric and sulphuric acids. From the solution of its salts, indium is precipitated by ammonia and potash as a hydrate, insoluble in excess of either reagent. It is also completely precipitated from neutral solutions of its salts by sulphuretted hydrogen. Indium oxide, In_2O_3, is a pale yellow powder, becoming darker when heated. The sulphide is an orange yellow powder, insoluble in acetic acid, but soluble in the mineral acids. Indium chloride, $InCl_3$, is volatilised at a red heat, but undergoes decomposition when heated in the air. All the salts of indium impart a violet tint to the flame of a Bunsen burner. The spectrum of the metal is very characteristic, consisting of two bright indigo-coloured bands, and it was the production of these bands which led to the discovery of the metal. Its specific gravity is 7·421 at 16·8°.

*** ĭn-dĭ-vĭd'-a-ble,** *a.* [Pref. *in-* (2), and Eng. *dividable* (q.v.).] Not dividable; that cannot be divided; incapable of division.

"Scene *individable* or poem unlimited."—*Shakesp.: Hamlet*, ii. 2.

*** ĭn-dĭ-vĭd'-ĕd,** *a.* [Pref. *in-* (2), and Eng. *divided* (q.v.).] Not divided, undivided.

"A representation of the blessed *individed* Trinity."
—*Bp. Patrick: On Genesis* xviii. 2.

ĭn-dĭ-vĭd'-ŭ-al, *a.* & *s.* [Lat. *individuus*, from *in-* = not, and *dividuus* = divisible, from *divido* = to divide; Eng. suff. *-al;* Fr. *individuel;* Sp. *individual;* Ital. *individuale.*]

A. *As adjective:*

* 1. Subsisting as a single indivisible entity or distinct being; one; single.

"Mind has a being of its own, distinct from that of all other things, and is a pure, unmingled, *individual* substance."—*Search: Light of Nature*, vol. iii., pt. i., ch. v.

* 2. Undivided; not to be parted with or disjoined; inseparable.

"Henceforth an *individual* solace dear."
Milton: P. L., iv. 486.

3. Pertaining to one only; peculiar to or characteristic of a single person or thing: as, *individual* exertions.

B. *As substantive:*

1. *Ord. Lang.:* A single person, animal, or thing of any kind; especially a single human being; a being or thing incapable of separation or division in a certain relation without destruction of its identity.

"An *individual* is a sacred mark."
Cowper: Expostulation, 434.

2. *Zool.:* A being equal to the whole result of the development of a single ovum. In the case of the higher animals this is but a single existence; in the case of the lower ones it may be multitudes held together by a certain bond of union.

ĭn-dĭ-vĭd'-ŭ-al-ĭsm, *s.* [Eng. *individual; -ism.*]

1. The quality of being individual or distinct; individuality.

2. An excessive regard to one's own interests; self-interest, selfishness.

3. A system or condition in which each individual works for his own ends in social, political, or religious matters. [Socialism.]

"The selfishness of the small proprietor has been described by the best writers as *individualism.*"—*Edinburgh Review*, Jan., 1871, p. 22.

*** ĭn-dĭ-vĭd-ŭ-al-ĭst'-ĭc,** *a.* [Eng. *individual; -istic.*] Pertaining to or promoting the good of the individual.

ĭn-dĭ-vĭd-ŭ-ăl'-ĭ-tў, *s.* [Eng. *individual; -ity.*]

I. *Ordinary Language:*

1. The quality or state of being distinct or individual; separate or distinct nature or existence.

"*Individuality* is left out of this scheme of government."—*Burke: On a Regicide Peace*, let. 2.

2. Idiocrasy, distinctive character, sharply marked temperament, distinctive personality.

"He is always reaching out after perfect *individuality*, and always falling helplessly upon the other side."
—*Pall Mall Gazette*, July 16, 1884.

II. *Technically:*

1. *Phren.:* One of the intellectual powers, and the first of the perceptive division. Its locality is just above the nose, with Comparison above it, and Calculation to the right and left.

2. *Zool.:* The state or quality of constituting an individual (q.v.).

¶ The separate individuality of every viable human being, which seems so clear to civilized races, is by no means universally recognised by peoples of low culture. Speaking of the Couvade (q.v.), Tylor (*Early Hist. Mankind*, 1878, pp. 295, 296) says:

"It shows us a number of distinct and distant tribes deliberately holding the opinion that the connection between father and child is not only, as we think, a mere relation of parentage, affection, and duty, but that their very bodies are joined by a physical bond, so that what is done to the one acts directly upon the other."

ĭn-dĭ-vĭd-ŭ-al-ĭz-ā'-tion, *s.* [Eng. *individualiz(e); -ation.*] The act of individualizing; the state of being individualized; individuation.

ĭn-dĭ-vĭd'-ŭ-al-ĭze, *v.t.* [Eng. *individual; -ize.*] To mark out or select as an individual, or to distinguish from other individuals by peculiar or distinctive characteristics; to connect with one particular individual; to individuate.

"The *individualizing* principle."—*Ueberweg: Hist. Philos.*, i. 455.

ĭn-dĭ-vĭd'-ŭ-al-ĭz-ĕr, *s.* [Eng. *individualiz(e); -er.*] One who individualizes.

ĭn-dĭ-vĭd'-ŭ-al-lў *adv.* [Eng. *individual; -ly.*]

1. Separately; by itself; to the exclusion of others; singly.

"The Revolution Society . . . have not a single vote for a king amongst them, either *individually* or collectively."—*Burke: French Revolution.*

* 2. Not separately; incommunicably.

* 3. Indivisibly.

"The present moment of time is *individually* one."
—*Clarke: Answer to the Sixth Letter.*

"The matter of which any individual object consists is limited and distinguished by *individuating* accidents."—*Ueberweg: Hist. Philos.*, i. 458.

2. To distribute to individuals.

B. *Intrans.:* To become or break up into individuals.

* **ĭn-dĭ-vĭd-ū-ā'-tion,** *s.* [Eng. *individu(ate); -ation.*] The act of individuating; the state of being individuated; the act of endowing with individuality; individualization; individuality.

"Others deny the immortality of the soul in its *individuation.*"—*Hale: Orig. of Mankind,* p. 108.

¶ *Principle of Individuation:*

Philos.: The English translation of the term *principium individuationis,* introduced by the Schoolmen to denote that principle which individuates an ens from all other entia whatsoever. Albertus Magnus and Thomas of Aquin placed this principle in matter, "in so far as this is the bearer or substratum of forms;" Duns Scotus held that "not matter, but form, is the individualizing principle;" Leibnitz affirmed the nominalistic thesis: "Omne individuum sua tota entitate individuatur;" while for Schopenhauer "time and space constitute the principle of individuation." (*Ueberweg: Hist. Philos.*)

* **ĭn-dĭ-vĭd'-ū-āt-ŏr,** *s.* [Eng. *individuat(e); -or.*] One who or that which individuates; an individualizer.

* **ĭn-dĭ-vĭd'-ū-ĭ-fȳ,** * **ĭn-dĭ-vĭd'-ū-ĭ-fīe,** *v.t.* [Lat. *individuus* = indivisible, and *facio* (pass. *fio*) = to make.] To individualize.

"The statute of additions was made in the first of King Henry the Fifth to *individuate* and separate persons from those of the same name."—*Fuller: General Worthies of England.*

* **ĭn-dĭ-vĭd-ŭ'-ĭ-tȳ,** *s.* [Lat. *individuitas,* from *individuus* = indivisible.] The state of being an individual; individual existence. (*Fuller: Pisgah Sight,* III., pt. ii., vi. 9.)

* **ĭn-dĭ-vĭd'-ū-ŭm,** *s.* [Lat., neut. sing. of *individuus* = indivisible.] An individual.

"It cannot mean that every *individuum* should give his suffrage."—*Culverwell: Light of Nature,* ch. iv.

* **ĭn-dĭ-vīne',** *a.* [Pref. *in-* (2), and Eng. *divine.*] Unholy.

"A Turkish providence most *indivine.*"
Davies: Microcosmos, p. 57.

* **ĭn-dĭ-vĭn'-ĭ-tȳ,** *s.* [Pref. *in-* (2), and Eng. *divinity* (q.v.).] Want of divinity or of divine power.

"How openly did the oracle betray his *indivinity* unto Cræsus."—*Browne: Vulgar Errours,* bk. i., ch. x.

ĭn-dĭ-vĭs-ĭ-bĭl'-ĭ-tȳ, *s.* [Eng. *indivisible; -ity.*] The quality or state of being indivisible.

ĭn-dĭ-vĭs'-ĭ-ble, *a.* & *s.* [Fr., from Lat. *indivisibilis,* from *in-* = not, and *divisibilis* = divisible (q.v.).]

A. *As adjective:*

1. *Ord. Lang.:* Not divisible; that cannot be divided, separated, or broken up; not separable into parts.

"For that sphere or orb of light, though it be in some sense extended, yet it is truly *indivisible.*"—*H. More: Antidote against Atheism,* App. ch. x.

2. *Math.:* That which cannot be exactly divided. One quantity is said to be indivisible by another when no commensurable expression can be found, which, being multiplied by the latter, will give the former.

B. *As substantive:*

1. *Ord. Lang.:* That which cannot be divided or broken up into parts; a very minute part or division.

2. *Geom.:* In ancient geometry the same as infinites—small or infinitely small quantities. According to the views of the first inventor of indivisibles, lines are made up of an infinite number of points, surfaces of an infinite number of lines, and volumes of an infinite number of surfaces. This corresponds with the idea of fluents and fluxions, as originally conceived.

"Logical or mathematical demonstrations, which seem to consist in *indivisibles.*"—*Hale: Orig. of Mankind,* p. 129.

ĭn-dĭ-vĭs'-ĭ-ble-nĕss, *s.* [Eng. *indivisible; -ness.*] The quality or state of being indivisible; indivisibility.

"By the *indivisibleness* of his essence from their presences."—*Mountague. Devoute Essayes,* pt. i., tr. ii., § 2.

ĭn-dĭ-vĭs'-ĭ-blȳ, *adv.* [Eng. *indivisibl(e); -ly.*] In an indivisible manner; so as to be indivisible; undividedly.

"They jointly and *indivisibly* carry on one and the same design."—*South: Sermons,* vol. iv., ser. 7.

* **ĭn-dĭ-vĭ'-sion,** *s.* [Pref. *in-* (2), and Eng. *division* (q.v.).] A state of not being divided; union, oneness.

* **ĭn-dĭ-vŭl'-sīve-lȳ,** *adv.* [Pref. *in-* (2); Eng. *divulsive,* and suff. *-ly.*] Inseparably; so as not to be torn or rent asunder.

"They so naturally and *indivulsively* cleave to the same."—*Cudworth: Intell. System,* p. 866.

Ĭn-dō-, *pref.* [India.] Derived from, in part belonging to, or in any way connected with India (q.v.).

Indo-Briton, *s.*

Ord. Lang. & Ethnol.: One of the race intermediate between the natives of India and the British. As a rule, the father is British, the mother Hindoo or Mohammedan. A more specific word than Eurasian (q.v.).

Indo-Chinese, *a.* Of or pertaining to Indo-China, the south-eastern peninsula of Asia, or to its people, or their languages.

"Others approximate to the *Indo-Chinese* form."—*Prichard: Nat. Hist. Man* (1848), 240.

Indo-English, *a.* Of or relating to the English who are born or reside in India.

¶ The common term is Anglo-Indian, though Indo-English is really the more accurate.

Indo-European, *a.*

Philol.: The same as Aryan or Indo-Germanic (q.v.).

Indo-Germanic, *a.*

Philol.: A term sometimes used as equivalent to Aryan (q.v.), and sometimes applied to the Teutonic languages to denote their relationship with the Sanscrit.

Indo-Muhammadan, Indo-Mahomedan, *a.* Of or pertaining to the Mahomedan inhabitants of India.

"*Indo-Mahomedan* folk-lore."—*Notes & Queries,* Aug. 20, 1864, p. 142.

* **ĭn-dŏç-ĭ-bĭl'-ĭ-tȳ,** *s.* [Lat. *indocibilitas,* from *indocibilis* = indocile.] The quality or state of being indocible; indocility.

* **ĭn-dŏç'-ĭ-ble,** *a.* [Pref. *in-* (2), and Eng. *docible* (q.v.).] Not docible; unteachable; insusceptible of instruction or training; intractable.

"A disposition not only sottish, but *indocible.*"—*Milton: Observ. Articles of Peace.*

* **ĭn-dŏç'-ĭ-ble-nĕss,** *s.* [Eng. *indocible; -ness.*] The quality or state of being indocible; indocility.

ĭn-dō'-çĭle or **ĭn-dŏç'-ĭle,** *a.* [Fr., from Lat. *indocilis,* from *in-* = not, and *docilis* = teachable, docile (q.v.).] Not docile; unteachable, intractable; incapable of being instructed.

"Whose hearts *indocile* to the sacred lore
Of Wisdom." *Blacklock: Memory of Constantia.*

ĭn-dō-çĭl'-ĭ-tȳ, *s.* [Fr. *indocilité,* from *indocile.*] The quality or state of being indocile; unteachableness, intractableness.

"It is no small comfort to me . . . that I discover my *indocility.*"—*Burke: Letter to Sir H. Langrishe.*

ĭn-dŏc'-trĭn-āte, *v.t.* [Formed as if from a Lat. *indoctrino,* from *in-* = in, and *doctrina* = learning; *doceo* = to teach.] To teach, to instruct.

ĭn-dŏc-trĭn-ā'-tion, *s.* [Indoctrinate.] The act of indoctrinating or teaching; the state of being indoctrinated; instruction in the rudiments or principles of any science.

"Postulates very accomodable unto junior *indoctrinations.*"—*Browne: Vulgar Errours,* bk. i., ch. viii.

ĭn'-dō-ĭn, *s.* [Eng., &c. *ind(igo)o; -in (Chem.).*]

Chem.: $C_{32}H_{20}N_4O_5$. A body obtained by heating a solution of orthonitropropiolic acid with terrous sulphate. It resembles indigotine in appearance, but differs from it in being readily soluble in cold sulphuric acid, forming at once a blue solution. It is also soluble in cold aniline, and in sulphurous acid.

ĭn'-dōle, *s.* [Eng., &c. *ind(igo),* and Lat. *ole(um)* = oil.]

Chem.: $C_8H_7N = C_6H_4\langle^{CH_2\cdot CH}_{N}$. A crystalline substance obtained from indigo by converting it into isatin, dioxindole, and finally into oxindole, and reducing the oxindole by means of zinc-dust. It may also be prepared by passing an aniline derivative, such as ethyl-aniline, through a red-hot tube. From the brown oily liquid formed, the indole may be separated by picric acid, the picrate of indole being decomposed by ammonia. Indole melts at 52°, and boils with partial decomposition at 245°. Its vapour density is 4·45; soluble in ether.

ĭn'-dō-lençe, * **ĭn'-dō-len-çy,** *s.* [Lat. *indolentia* (first used by Cicero, not happily, as a Latin synonym of the Greek word *ἀπάθεια* (*apatheia*)), from *in-* = not, and *dolens* = grieving; *doleo* = to grieve.]

* 1. A state of freedom from passion or pain.

"Inordinateness of affections may sometimes make some men like some beasts; but *indolency,* absence, emptiness, privation of affections, makes any man, at all times, like elaves, like dirt."—*Donne: Sermons,* p. 156. (1640.)

2. The quality or state of being indolent; habitual laziness; aversion to exertion or labour; indisposition to exert one's self; idleness; sloth; inactivity.

"The demon *Indolence* thy toil o'erthrows."
Thomson: Castle of Indolence, ii. 81.

ĭn'-dō-lent, *a.* [Lat. *in-* = not, and *dolens* = grieving; Ital. & Sp. *indolente.*]

I. *Ordinary Language:*

* 1. Free from pain or suffering.

2. Habitually idle or lazy; indisposed to exertion or labour; slothful; listless; sluggish; inactive.

"The *indolent* apathy characteristic of the Spanish administration."—*Macaulay: Hist. Eng.,* ch. xxiv.

* **II.** *Med.:* Causing no pain: as, an *indolent* tumour.

ĭn'-dō-lent-lȳ, *adv.* [Eng. *indolent; -ly.*]

* 1. With freedom from pain; without pain.

2. In an indolent manner; without activity, action, or exertion; lazily; sluggishly.

"In rural quiet *indolently* laid."
Beattie: Virgil; Past. 1.

ĭn'-dō-līne, *s.* [Eng. *ind(igo); (alcoh)ol,* and suff. (*Chem.*) *-ine.*]

Chem.: $C_{16}H_{14}N_2$. A dark-coloured resin obtained by heating, in sealed tubes, indigo-blue with barium hydrate, zinc-dust, and water, and exhausting the product with alcohol. It is insoluble in water, but soluble in alcohol, ether, and chloroform, to which it imparts a blue fluorescence. On heating with zinc-dust, it sublimes in long pale-yellow needles. By treating indoline with nitric acid, an orange-yellow dinitro-compound is obtained, $C_{16}H_{12}N_2(NO_2)_2$, soluble in alcohol, but insoluble in water.

* **ĭn-dŏm'-ą-ble,** *a.* [Lat. *indomabilis,* from *in-* = not, and *domabilis* = tamable; *domo* = to tame.] Untamable; indomitable.

ĭn-dŏm'-ĭt-ą-ble, *a.* [Lat. *in-* = not, and Eng. *domito,* freq. of *domo* = to tame; Fr. *indomptable.*] Untamable; unconquerable; invincible.

"His *indomitable* courage."
Longfellow: Song of Hiawatha, iv.

* **ĭn-dŏmp'-ą-ble,** * **ĭn-dŏmpt'-ĭ-ble,** *a.* [Indomitable.]

ĭn'-doŏr, *a.* [Eng. *in,* and *door.*] Being or done within doors; domestic: as, *indoor* work, an *indoor* servant.

ĭn-doŏrs', *adv.* [Eng. *in,* and *doors.*] Within doors; inside a house; at home: as, He is *indoors.*

ĭn-dō-phē'-nĭn, *s.* [Eng. *ind(ig)o; phen(ol),* and suff. (*Chem.*) *-in.*]

Chem.: $C_{20}H_{15}NO$. A compound prepared by shaking together a solution of isatin in 30 parts of concentrated sulphuric acid, with pure benzene, until a blue colour is produced. To separate the indophenin, the mixture is poured into water, filtered, and the residue washed with a dilute solution of soda. $C_8H_5NO_2 + 2C_6H_6 = C_{20}H_{15}NO + H_2O$. It is sparingly soluble in alcohol, ether, and chloroform, but dissolves freely in strong sulphuric acid and in phenol. By the action of reducing agents, colourless compounds are obtained, which turn blue on exposure to the air. Indophenin strongly resembles indigotine, both in appearance and in many of its characters.

ĭn-dō-phē'-nŏls, *s. pl.* [Eng. *ind(igo),* and *phenols.*]

Chem.: A name given to a class of blue colouring matters, used in dyeing, obtained by the action of nitroso-derivatives of tertiary aromatic amines or phenols on alkaline solutions of phenols at the ordinary, or at a raised temperature, the formation being facilitated by adding a reducing agent. They are all

sparingly soluble in alcohol, but dissolve readily in phenol, and in concentrated sulphuric acid. When heated, they slowly sublime in the form of blue needles resembling indigo. The indophenols are affected by acids more than indigo, but are said to resist soap and chlorine better.

* **ĭn-dŏrs'-ą-ble,** *a.* [ENDORSABLE.]

* **ĭn-dŏrs-ā'-tion,** *s.* [Eng. *indors(e)*; *-ation.*] The act of indorsing; indorsement.

ĭn-dorse', *v.t.* [Low Lat. *indorso*, from Lat. *in-* = in, upon, and *dorsum* = the back.]

* 1. To place or set upon the back.

"Elephants *indorsed* with towers."
Milton: P. R., iii. 329.

2. To endorse (q.v.).

ĭn'-dorse, *s.* [ENDORSE.]

ĭn-dorsed', *a.* [ENDORSE.]

Her.: Placed back to back.

ĭn-dors-eē', *s.* [Eng. *indors(e)*; *-ee.*] The person to whom a note or bill of exchange is indorsed, or assigned by indorsement; the converse of indorser.

ĭn-dorse'-mĕnt, *s.* [ENDORSEMENT.]

ĭn-dors'-ẽr, ĭn-dors'-ŏr, *s.* [Eng. *indors(e)*; *-er*, *-or.*] A person who indorses a note or bill of exchange; an endorser.

* **ĭn-dŏw',** *v.t.* [ENDOW.]

* **ĭn-dŏw'-mĕnt,** *s.* [ENDOWMENT.]

ĭnd-ŏx'-ўl, *s.* [Eng. *ind(igo)*, and *(hydr)oxyl.*]

Chem.: $C_6H_4\langle^{C(OH)}_{N}\rangle CH_2$. A browniah oil, formed with evolution of carbonic anhydride, when indoxylic acid is heated above its melting point. It is volatile in steam, and gives to water a blue fluorescence. Indoxyl possesses both acid and basic properties, and, like indoxylic acid, is converted into indigo by oxidation.

indoxyl-compounds, *s. pl.*

Chem.: Compounds of the indigo group. Ethyl indoxylate, $C_{11}H_{11}NO_3$, a crystalline body obtained by reducing nitropropiolic acid with ammonium sulphide. It contains an hydroxyl group (HO), and has the character of a phenol. It melts at 121°. At a greater heat it is converted into indigo. By the action of concentrated sulphuric acid, ethyl indoxylate is converted into indigo-sulphonic acid.

ĭn-dŏx-ўl'-ĭc, *a.* [Eng. &c. *indoxyl* (q.v.); *-ic.*] (See the compound.)

indoxylic-acid, *s.*

Chemistry:

$C_9H_7NO_3 = C_6H_4\langle^{C(OH)}_{N}\rangle CH{\cdot}COOH$. This acid is prepared by decomposing ethyl indoxylate. It melts at 123°, and, on exposing an alkaline solution of it to the air, indigo is formed.

INDRA.

(From a Soapstone carving from Nepál; now in the Indian Museum, South Kensington.)

Ĭn'-drą, *s.* [O. Sansc., from *indu* = a drop of rain.]

Religions: An ancient Hindoo god, the personification of the sky. In Vedic times he was the supreme object of worship, corresponding in position, not in etymology, to the Zeus of the Greeks and the Jupiter of the Romans. Thus, of the first 444 Vedic hymns dedicated to gods, 178 are addressed to Indra, while to the second god in position, Agni (Lat. *Ignis* = fire), there are only 147, and to Vishnoo, afterwards so celebrated, only two. Yet Indra was not uncreated; he had a mother. He encompasses the waters and the sky, reaches up to heaven, has placed the sun in the sky, grasps the thunderbolt, is worshipped by libations of Soma (a species of Asclepias), is a bestower of wealth, &c. (*Muir: Sanscrit Texts*, &c.)

¶ At a later period representations were sometimes made of him, thoroughly personified as a man with four arms and hands, riding on an elephant.

ĭn-draught (ught as ft), *s.* [Pref. *in-* (1), Eng. *draught* (q.v.).]

* 1. An opening or inlet into the land into which the sea flows.

"The greatest *indraughts* of rivers or lagunes have commonly the strongest tides."—*Dampier: Voyages*, vol. ii., pt. iii., ch. viii.

2. The flow of sea-water at some depth into a land-locked basin to replace that removed by evaporation or outflow at the surface, as in the Red Sea.

* 3. An opening; an inlet.

"From the four cardinal winds four *indraughts* that command." *Drayton: Poly-Olbion*, s. 19.

* **ĭn'-drâwn,** *a.* [Pref. *in-* (1), and Eng. *drawn* (q.v.).] Drawn in.

* **ĭn-drĕad',** *v.i.* [Pref. *in-* (intens.), and Eng. *dread.*] To fear, to be afraid. (*Hildson: Judith*, i. 57.)

* **ĭn-drĕnch,** *v.t.* [Pref. *in-* (intens.), and Eng. *drench* (q.v.).] To overwhelm with water; to drown; to drench.

"They lie *indrench'd*."
Shakesp.: Troilus & Cressida, i. 1.

ĭn'-drĭs, *s.* [Malagasy.]

Zool.: The typical genus of the sub-family Indrisinæ. *Indris brevicaudatus* is a lemur, about three feet high, found in Madagascar.

ĭn-drĭs-ī'-næ, *s. pl.* [Mod. Lat. *indris*; Lat. fem. pl. adj. suff. *-inæ.*]

Zool.: A sub-family of Lemuridæ, type Indris (q.v.).

* **ĭn-dū'-bĭ-ŏŭs,** *a.* [Lat. *in-* = not, and *dubius* = doubtful.]

I. Not doubtful; not doubting; unsuspecting.

"The vulgar vanity of reposing an *indubious* confidence in those anti-pestilential spirits."—*Harvey: On Consumption.*

2. Not doubtful; certain, sure.

ĭn-dū'-bĭt-ą-ble, *a.* & *s.* [Fr., from Lat. *indubitabilis*, from *in-* = not, and *dubitabilis* = doubtful; *dubito* = to doubt; Sp. *indubitable*; Ital. *indubitabile.*]

A. *As adj.:* Not to be doubted; not doubtful; certain; unquestionable; too evident or plain to admit of doubt.

"That the Americans are able to bear taxation is *indubitable*."—*Johnson: Taxation No Tyranny.*

B. *As subst.:* A matter or thing which cannot be doubted.

ĭn-dū'-bĭt-ą-ble-nĕss, *s.* [Eng. *indubitable*; *-ness.*] The quality or state of being indubitable.

ĭn-dū'-bĭt-ą-blў, *adv.* [Eng. *indubitab(le)*; *-ly.*] Undoubtedly; unquestionably; incontrovertibly; beyond question or doubt.

"Upon such grounds as are *indubitably* demonstrable."—*Boyle: Works*, v. 638.

* **ĭn-dū'-bĭt-ąte,** *a.* [Lat. *indubitatus*, from *in-* = not, and *dubitatus*, pa. par. of *dubito* = to doubt.] Not doubted or doubtful; indubitable; unquestioned.

"Held then the *indubitate* heirs of the crown."—*Bacon: Henry VII.*

* **ĭn-dū'-bĭt-ąte,** *v.t.* [Lat. *indubito.*] To bring into doubt; to cause to be doubted.

ĭn'-dūce, *v.t.* [Lat. *induco* = to lead in or on; *in-* on, and *duco* = to lead; Sp. *inducir*; Ital. *indurre*; Fr. *induire.*]

I. *Ordinary Language:*

* 1. To lead or bring on.

"Rich foreign mould on their ill-natur'd land
Induce laborious." *Philips: Cider*, i.

* 2. To introduce; to bring into view; to lead or bring forward.

* 3. To put or draw on or over.

"O'er the seat . . . *induced* a splendid cover."
Cowper: Task, i. 32.

* 4. To bring on, to cause, to produce, to give rise or origin to.

"To *induce* another state by depraving the present."
—Cranmer: Letter to Mr. Hooker.

5. To lead or draw on, as by persuasion, entreaty, or solicitation; to prevail on, to incite, to influence by motives.

"They had been *induced* by nursery tales to clamour for the blood of fellow subjects."—*Macaulay: Hist. of Eng.*, ch. ii.

* 6. To bring forward or offer by way of induction or inference; to infer, to conclude.

* 7. To bring forward by way of illustration: to instance.

"To exprobate their stupidity, he *inducetb* the providence of storks."—*Browne: Vulgar Errours*, bk. iii. ch. xxvii.

* 8. To bring on; to superinduce.

"Schism is marked out by the apostle as a kind of petrifying crime, which *induces* that induration to which the fearful expectation of want of consequent."
—Decay of Piety.

II. *Physics:* To cause by proximity without contact or transmission. Used of the production of a particular electric or magnetic condition in a body by placing another body, in an opposite electric state, in proximity to it but without actual contact.

ĭn-dūçed', *pa. par.* or *a.* [INDUCE, *v.*] (See the compound.)

induced-currents, *s. pl.*

Elect. & Magn.: Electric currents developed in conductors in proximity to other conductors traversed by intermittent or fluctuating currents; also, electric currents developed in conductors moving in the field of a magnet, or in conductors within the field of a moving magnet.

ĭn-dūç'-ĭng, *pr. par.* or *a.* [INDUCE, *v.*] (See the compound.)

inducing-currents, *s. pl.*

Elect. & Magn.: Currents which produce induced-currents (q.v.).

ĭn-dūçe'-mĕnt, *s.* [Eng. *induce*; *-ment.*]

I. *Ordinary Language:*

1. The act of inducing; the state of being induced.

2. That which induces; that which leads the mind to will and to act; any argument, reason, or fact which tends to persuade or influence the mind; a motive, a reason, a ground, a temptation, an incitement.

"Then mark the *inducement!*"
Shakesp.: Henry VIII., ii. 4.

II. *Law:* That which leads to something else; a term used specially in various cases to signify a statement of facts alleged by way of previous explanation to other material facts.

ĭn-dūç'-ẽr, *s.* [Eng. *induc(e)*; *-er.*] One who or that which induces, persuades, or influences; an inducement.

"As if he were the great impeller and *inducer* of men to sin."—*South: Works*, vol. viii., ser. 4.

ĭn-dū'-çĭ-æ (or çĭ as shĭ), *s. pl.* [Lat. = a truce, an armistice.]

Scots Law: The days which intervene between the citation of a defender and the day of appearance in the action or process.

* **ĭn-dūç'-ĭ-ble,** *a.* [Eng. *induc(e)*; *-ible.*]

1. Capable of being induced, brought on, or made to take place.

"*Inducible* from the restless commotions of outward causes."—*Barrow: Works*, vol. iii., ser. 9.

2. Capable of being inferred by induction; that may be inferred or gathered.

"*Inducible* from the like testimonies."—*Browne: Vulgar Errours*, bk. vi., ch. vi.

ĭn-dŭct', *v.t.* [Lat. *inductus*, pa. par. of *induco* = to lead or bring in.] [INDUCE.]

* 1. *Ord. Lang.:* To bring or lead in; to introduce.

"So soone as any one is *inducted* and brought in thither, she or he is delivered to the priests."—*P. Holland: Livius*, p. 1,029.

2. *Eccles. Law:* To introduce, as to a benefice or office; to put in actual possession of an ecclesiastical benefice or of any office, with the customary forms and ceremonies.

"Induction is performed by a mandate from the bishop to the archdeacon, and is done by giving the clerk corporal possession of the church, as by holding the ring of the door, tolling a bell, or the like: and is a form required by law, with intent to give all the parishioners due notice, and sufficient certainty of their new minister, to whom their tithes are to be paid. And when a clerk is thus presented, instituted, and *inducted* into a rectory, he is then, and not before, in full and complete possession, and is called in law *persona impersonata*, or parson imparsonee."—*Blackstone: Comment.*, bk. i., ch. 11.

ĭn-dŭct'-ĕ-ŏŭs, *a.* [Eng. *induct*; *-eous.*]

Elect.: Rendered electropolar by induction

or brought into the opposite electrical state by the influence of inductive bodies.

* **ĭn-dŭc'-tĭle,** *a.* [Pref. *in-* (2), and Eng. *ductile* (q.v.).] Not ductile; not capable of being drawn out into threads, as a metal.

* **ĭn-dŭc-tĭl'-ĭ-tў,** *s.* [Pref. *in-*(2), and Eng. *ductility* (q.v.).] The quality or state of being inductile.

ĭn-dŭc'-tion, *s.* [Fr., from Lat. *inductionem*, acc. of *inductio* = an introducing, from *inductus*, pa. par. of *induco* = to lead or bring in; Sp. *induccion*; Ital. *induzione*.] [INDUCE.]

I. *Ordinary Language:*

* 1. The act of inducting or bringing in; introduction; a bringing in or putting into an office. (*P. Holland: Livius*, p. 379.)

2. A beginning; a commencement; a start.

"These promises are fair, the parties sure,
And our *induction* full of prosperous hope."
Shakesp.: 1 *Henry IV.*, iii. 1.

* 3. That which serves to introduce something else; an introduction; a preface, as of a play or poem; an introductory scene in a play; a prologue.

* 4. An inducement. (*Milton: Reasons of Church Government*, pref.)

II. *Technically:*

1. *Eccles.:* The act of putting the parson, after institution (q.v.), into actual possession of the church or glebe, or the making of a clerk the complete incumbent of a church. [INDUCT, 2.]

2. *Elect.:* The action which electrified bodies exert at a distance on bodies in a natural state. An insulated conductor, charged with either kind of electricity, so acts on bodies in a natural state placed near it as to decompose the neutral fluid, attracting the opposite kind of electricity, and repelling the same kind. [INDUCTION-COIL.]

3. *Logic & Philos.:* Whately (*Logic*, bk. iv., ch. i., § 4) notes the ambiguity of this word, it being employed (*a*) to designate the process of investigation and collecting facts; and (*b*) the deducing of an inference from those facts. It is also loosely used in the sense of an inference from observed facts. Cicero (*Top.* x.) says that induction (*ἐπαγωγή*) was much used by Socrates; though Lewes (*Hist. Phil.*, i. 162) doubts whether the Socratic Method was really an anticipation of that of Bacon. J. S. Mill's "summary" definition, "Generalization from Experience" (*Logic*, bk. iii., ch. iii., § 1), is a crystallization of a sentence from Aristotle (*Met.* i. 1). [INDUCTIVE-METHOD.]

"*Induction*, then, is that operation of the mind, by which we infer that what we know to be true in a particular case or cases, will be true in all cases which resemble the former in certain assignable respects. In other words, induction is the process by which we conclude that what is true of certain individuals of a class is true of the whole class, or that what is true at certain times will be true in similar circumstances at all times. This definition excludes from the meaning of the term Induction various logical operations, to which it is not unusual to apply that name."—*J. S. Mill: Logic*, bk. iii., ch. ii., § 2.

4. *Magnetism:* The action which magnetized bodies exert at a distance on bodies in a natural state.

5. *Nat. Science, &c.:* A consequence, inference, or general principle drawn from a number of particular facts or phenomena. As Whewell says the inductive philosophy ascends from particular facts to general principles, and then descends again from these general principles to particular applications. (*Lyell.*)

¶ (1) *Currents of induction:* [INDUCED-CURRENTS].

(2) *Coefficient of magnetic induction:* A coefficient expressing the ratio of the intensity of the induced magnetization to the intensity of the field. (*Everett: The C. G. S. System of Units* (1878), ch. x., p. 59.)

induction-coil, *s.*

Elect. Mach.: An induction-coil consists essentially of two separate coils of insulated wire wound round a soft-iron core. The following are the dimensions of a coil, reputed to be the largest in the world. It has two primary circuits and two cores, the inner one being a bundle of insulated soft-iron wires, 44 in. long and 3½ in. in diameter, round which are wound 660 yds. of covered copper wire, weighing 55 lbs. The second core is a cylinder formed of similar wires to the first, and is 3·8 in. in thickness, surrounded by 504 yds. of wire, weighing 84 lbs. The secondary coil is 280 miles long, wound in four sections of about 200 layers each, the two outer sections having slightly thicker wire than the others. The total resistance of the secondary coil is about 110,200 ohms. This instrument gives, with thirty quart Grove cells, a spark in air 42 in. in length. [CONDENSER.]

induction-pipe, *s.*

Steam-Eng.: The pipe which leads the live steam to the cylinder.

induction-valve, *s.*

Steam-Eng.: The valve which controls the entry-port for live steam to the cylinder.

ĭn-dŭc'-tion-al, *a.* [Eng. *induction*; *-al.*] Of or pertaining to induction; proceeding or obtained by induction; inductive.

ĭn-dŭc'-tĭve, *a.* [Eng. *induct*; *-ive.*]

* I. *Ordinary Language:*

1. Leading or drawing on; persuasive, alluring, tempting. (*Milton: P. L.*, xi. 519.)

2. Tending to produce or cause; productive. (*Hale: Orig. of Mankind.*)

II. *Technically:*

1. *Logic:* Proceeding by induction; leading to inferences; drawing conclusions from premises. (*Reid: Inquiry into the Human Mind*, ch. vi., § 24.)

2. *Electricity:*

(1) (*In an active sense*): Producing induction; acting by means of induction.

(2) (*In a passive sense*): Susceptible of induction; capable of being acted on by induction.

inductive method, *s.*

Logic & Phil.: The employment of induction in scientific inquiry. The inductive method of the ancients consisted in ascribing the character of general truths to all propositions which are true in all the instances of which we have knowledge. Bacon exposed the insufficiency of this method, and physical investigation has now far outgrown the Baconian conception. (*Mill: Logic.*)

inductive-power, *s.*

Elect.: The name given by Faraday to the property which bodies possess of transmitting the electric influence.

¶ *Specific inductive capacity:*

Elect.: The inductive capacity or power of each body.

inductive-sciences, *s. pl.* Those sciences which are based upon induction, or which admit of inductive reasoning, as astronomy, chemistry, botany, &c.

* **ĭn-dŭc'-tĭve-lў,** *adv.* [Eng. *inductive*; *-ly.*] In an inductive manner; by way of induction or inference; inferentially.

"This I shall make appear *inductively*."—*South: Works*, vol. viii., ser. 7.

ĭn-dŭc-tŏm'-ĕ-tĕr, *s.* [Eng. *induct(ion)*; *o* connective, and Eng. *meter* (q.v.).] An instrument or apparatus for ascertaining the force of electrical induction, or for comparing the specific inductive capacities of various substances.

ĭn-dŭc'-tō-phōne, *s.* A device by which telephonic communication can be established between a moving train and fixed stations by alternating induction currents from the train with intermittent currents in stationary conductors.

ĭn-dŭc'-tŏr, *s.* [Lat., from *inductus*, pa. par. of *induco*.] One who inducts; specifically, a person who inducts another into an office or benefice.

ĭn-dŭc-tŏr'-ĭ-ŭm (pl. **ĭn-dŭc-tŏr'-ĭ-ŭms**), *s.* [Lat. = a covering.]

Elect.: The same as INDUCTION-COIL (q.v.).

ĭn-dŭc'-tō-scōpe, *s.* An instrument for detecting induction.

ĭn-dŭc'-trĭc, ĭn-dŭc'-trĭc-al, *a.* [Eng. *induct(or)*; *-ic, -ical.*]

Elect.: Acting by or in a state of induction; of or relating to induction.

ĭn-dūe', *v.t.* [Lat. *induo* = to put on, to clothe with.]

* 1. To put on, as clothes or dress; to clothe, to invest.

"*Indued* with robes of various hue she flies."
Dryden: Ovid; Metamorphoses x.

* 2. To endow, to furnish.

3. To endow mentally or intellectually.

"Not less *indued* with every gentle grace."
Hoole: Orlando Furioso, bk. xxxvi.

* **ĭn-dūe'-mĕnt,** *s.* [Eng. *indue*; *-ment.*] The act of indumg; the state of being indued.

ĭn-dŭlge', *v.t. & i.* [Lat. *indulgeo*, a word of doubtful origin.]

A. *Transitive:*

1. To encourage by compliance or giving way; to give free course to; to give way to; not to oppose or restrain; to yield to.

"Her lovers must toll, feel every inquisitude, *indulge* every caprice, and perhaps at last be jilted into the bargain."—*Goldsmith: The Bee*, No. 6.

2. To yield to the desires, humours, or wishes of; to gratify in desires; to humour to excess.

3. To harbour; to entertain favourably.

"Very ignorant persons might perhaps *indulge* a hope that Lewis had not been an accessory before the fact."—*Macaulay: Hist. Eng.*, ch. xix.

* 4. To grant as a favour, not as a right; to yield or bestow in answer to requests or solicitations.

"Ancient privileges, favours, customs, and acts of grace *indulged* by former kings to their people."—*Bishop Taylor: Holy Living*, ch. iii., § 2.

B. *Intrans.:* To indulge one's self; to be indulgent; to yield, to give way. (Formerly followed by *to*.)

* **ĭn-dŭlge'-mĕnt,** *s.* [Eng. *indulge*; *-ment.*] The act of indulging; indulgence.

"The liberty of too frequent *indulgments*."—*Wood: Athenæ Oxon.*, vol. ii.

ĭn-dŭl'-gĕnce, *s.* [Fr., from Lat. *indulgentia*, from *indulgens*, pr. par. of *indulgeo* = to indulge; Sp. *indulgencia*; Ital. *indulgenza*.]

I. *Ordinary Language:*

1. The act of indulging, gratifying, or yielding to the humours, wishes, desires, or caprices of; forbearance from restraint or control.

"To draw invidious comparisons between the rapacity of the landlord and the *indulgence* of the chief."—*Macaulay: Hist. Eng.*, ch. xiii.

2. An indulgent act; that with which one is indulged or gratified; a favour granted; liberality.

"Another clause granted similar *indulgence* to the members of the two universities."—*Macaulay: Hist. Eng.*, ch. xiv.

3. Readiness to forgive a fault; tolerance, leniency.

"Let your *indulgence* set me free."
Shakesp.: Troilus & Cressida, Epil. xx.

II. *Technically:*

1. *Roman Theol.:* A remission of the punishment which is still due to sin after sacramental absolution, the remission being valid in the court of conscience and before God, and being made by an application of the treasure of the Church on the part of a lawful superior. (*Amort* in *Addis & Arnold.*) Indulgence may be either (1) Plenary, remitting the whole, or (2) Partial, remitting a portion of the temporal punishment due to sin. The former are granted by the Pope to the whole church; the latter by primates, metropolitans, and bishops within their respective jurisdiction. The Council of Trent (Sess. xx., cap. 9) ordains that indulgences must be given everywhere gratis.

2. *Ch. Hist.:* Canonical penances in the early church were very severe, and, in times of persecution, it was the custom for martyrs awaiting death to give weaker brethren, who had lapsed or been guilty of other grievous sin, a letter (*libellus pacis*) to the bishop, asking that he might be restored. From the seventh century to the Crusades indulgences were granted in the form of commutation; almsgiving to the poor, to monasteries, or to churches, and pilgrimages, being substituted for so many years, months, or days of canonical penance. It is a common idea that in the Middle Ages the power attributed to indulgences was extended from canonical penance to purgatory; but Roman theologians quote Cyprian (*de Laps.* xxxvi.) to show that in the third century the belief existed that indulgences satisfied not only the rigours of ecclesiastical penance, but the justice of God. Urban II. granted plenary indulgence in the Council of Clermont to those who should go at their own expense on the then contemplated Crusade. In the ninth century Pascal I. and John VIII. bestowed indulgences on the souls of those who had died fighting for the Church; and Sixtus V., in his Constitution (Nov. 27, 1477), lays down that such indulgences are only granted "by way of suffrage." At first

such indulgences were issued sparingly, but, after a time, they were granted in numbers and for comparatively unimportant objects. In 1300 they were sold over Europe in connection with the Jubilee. Early in the sixteenth century they were farmed out, the farmers employing agents to retail them to the people at a profit. These subordinates puffed their wares without much attention to theological precision. One of these, John Tetzel, a Dominican friar, so filled Luther with indignation as to lead him, on Oct. 31, 1517, to affix theses on that and cognate subjects to the door of the cathedral church of Wurtemburg, and thus commence the Reformation.

"*Indulgences* had been originally, in the primitive Church, simple relaxations of penance to those who showed extreme sorrow for sin."—*Blunt: Reformation of the Church of England*, 37.

¶ *Declaration of Indulgence:*

1. [Declaration, ¶ (2).]

2. Two declarations issued by James II. on April 4, 1687, and April 27, 1688. Their tenor was similar to that of the Declaration of Charles [I]. The Order in Council that the second Declaration of James should be read in all churches and chapels called forth the petition which led to the prosecution of the Seven Bishops. On the night of their acquittal (June 30) an invitation to William was dispatched, and, on December 11, James fled from Whitehall and virtually abdicated.

***in-dŭl'-gen-çy**, ***in-dŭl'-gen-çie**, *s.* [Lat. *indulgentia*, from *indulgens* = indulgent.] Indulgence.

"This kind dealing and *indulgencie* of the nobles."—*P. Holland: Livius*, p. 50.

in-dŭl'-gent, *a.* [Fr., from Lat. *indulgens*, pr. par. of *indulgeo* = to indulge.] Ready or disposed to indulge or gratify the wishes, humours, or caprices of another; compliant; complaisant; forbearing restraint or control; mild, not severe: as, an *indulgent* parent.

"*Indulgent* listener was he to the tongue
Of garrulous age." *Wordsworth: Excur.*, bk. i.

¶ An *indulgent* parent is seldom a prudent parent; but a *fond* parent does not rise above a fool: all who have the care of young people should occasionally relax from the strictness of the disciplinarian, and show an *indulgence* where a suitable opportunity offers; a *fond* mother takes away from the value of *indulgences* by an invariable compliance with the humors of her children. (*Crabb: Eng. Synon.*)

***in-dŭl-ğĕn'-tial**, *a.* [Eng. *indulgent*; *-ial.*] Relating to the Indulgences of the Roman Catholic Church.

"Fitted with rare *indulgential* priveleges."—*Brevint: Saul & Samuel*, c. 10.

in-dŭlğ'-ent-lў, *adv.* [Eng. *indulgent*; *-ly.*] In an indulgent manner; with indulgence; mildly; without restraint or severity.

"My cousin Dryden accepted one from me so very *indulgently*."—*Dryden: Letter to Mrs. Steward*, Let. 44.

in-dŭl'-ğĕr, *s.* [Eng. *indulg(e)*; *-er.*] One who indulges.

"And if (as Saint Peter saith) the severest watchers of their nature have task hard enough, what shall he hoped of the *indulgers* of it?"—*Mountague: Devoute Essayes*, pt. i., tr. xiii., § 5.

***in-dŭl'-ğĭ-ate**, *v.t.* [As if from the sup. of a Low Lat. *indulgiare.*] To indulge. (*Sandys: Travels*, p. 293.)

in'-du-lin, *s.* [Eng. *ind(igo)*, and *(ani)line*, with transposition and change of letters (?).]

Chem.: A term applied commercially to a series of aniline colours, obtained by treating the bases of magenta refuse with aniline and acetic acid. The magenta refuse is first thoroughly freed from the salts of manvaniline, rosaniline, and chrysaniline by means of boiling water acidulated with hydrochloric acid. The undissolved violaniline is then mixed with acetic acid and aniline, and heated to between 140° and 160°, until the mass dissolves and gives the desired shade in alcohol acidulated with acetic acid. There are two kinds of indulin, the one soluble in alcohol, the other in water. Spirit-soluble indulin dyes wool, silk, and cotton different shades of blue or gray. The water-soluble indulins dye fabrics light and dark shades of gray, even approaching black; but the blacks are not satisfactory either in colour or durability.

in-dŭlt', ***in-dŭlt'-ō**, *s.* [Ital. *indulto* = a pardon, from Lat. *indultus*, pa. par. of *indulgeo* = to indulge.]

1. *Comm.:* In Spain a duty or custom paid to the king for all goods imported.

2. *Eccles.:* In the Roman Catholic Church, a privilege granted by the Pope to a corporation or individual authorizing something to be done which the common law of the Church does not sanction. The indults of bishops, issued by Papal authority, mitigating the rigour of the Lenten fast, are cases in point.

in dū mĕnt, in-du-mĕn'-tŭm, *s.* [Lat. *indumentum* = a garment, from *induo* = to put on.]

1. *Bot.:* (*Of the form* indumentum): A hairy covering.

† 2. *Law* (*Of the form* indument): An endowment.

3. *Ornith.* (*Of the form* indumentum): The feathery covering of birds.

in-dū'-plĭ-çate, *a.* [Pref. *in-* (2), and *duplicatus*, pa. par. of *duplico* = to double.]

Bot. (*Of æstivation*): Having the margins bent abruptly inwards, and the external face of these edges applied to each other without any twisting, as the flowers of some species of Clematis. (*Lindley.*)

in-dū'-plĭ-cāt-ive, *a.* [Eng. *induplicat(e)*; *-ive.*]

Bot.: The same as Induplicate (q.v.).

***in-dür'-ançe**, *s.* [Endurance.]

in-dur-ăs'-çent, *a.* [Lat. *indurescens*, genit. *indurescentis*, pr. par. of *induresco* = to become hard, from *induro* = to make hard.]

Bot.: Hardening by degrees, as the permanent petioles of a tragacanth bush. (*Treas. of Bot.*)

***in'-du-rāte**, *v.t. & i.* [Indurate, *a.*]

A. *Transitive:*

1. *Lit.:* To make hard, to harden.

2. *Fig.:* To harden; to make unfeeling or insensible to feeling; to render obdurate or hardened.

"And love's and friendship's finely pointed dart
Fall blunted from each *indurated* heart."
Goldsmith: Traveller.

B. *Intrans.:* To become hard, to harden.

"Plants and ligneous bodies may *indurate* under water."—*Browne: Vulgar Errours*, bk. ii., ch. v.

***in'-du-rate**, *a.* [Lat. *induratus*, pa. par. of *induro* = to make hard: *in-* = in, and *durus* = hard.] Hardened, obdurate, indurated.

"They repented not, for their hearts were *indurate*."—*Tyndall: Works*, p. 29.

***in-du-rā'-tion**, *s.* [Low Lat. *induratio*, from Lat. *induratus*, pa. par. of *induro* = to make hard, to indurate; Fr. *induration*; Sp. *induracion*; Ital. *indurazione.*]

I. *Literally:*

1. The act or process of hardening.

"The *induration* of the fluid substances of an egg into a chick."—*Boyle: Works*, i. 438

2. The state of becoming hard or of being hardened.

"*Induration* by assimulation appeareth in the bodies of trees and living creatures."—*Bacon: Nat. Hist.*, § 90.

¶ There may be induration of the brain, the heart, the liver, the pylorus, and the spinal cord.

II. *Fig.:* Hardness of heart; obduracy; insensibility.

"They be children of *induration* and of blasphemy."—*Barnes: Works*, p. 282.

***in-dūre'**, *v.t.* [Endure.]

In'-dŭs, *s.* [Lat. = an Indian.]

Astron.: The Indian; a constellation of Bryer, between Sagittarius and the South Pole. It figures also as one of Lacaille's Southern Constellations. No star in it exceeds the third magnitude.

in-dūş'-ĭ-ă (pl. **in-dūş'-ĭ-æ**), *s.* [Mod. Lat., not classical.]

Entom.: The same as Indusium, 2.

in-dūş'-ĭ-al, *a.* [Lat. *indusi(um)*; Eng. adj. suff. *-al.*]

Geol.: Having indusia; consisting in large measure of indusia (q.v.).

indusial-limestone, *s.*

Geol.: A limestone, of Eocene age, from Auvergne, containing numerous cases of fossil caddis-worms, some of them formed of shells cemented together.

in-dū'-sĭ-ate, *a.* [Lat. *indusiatus* = having on an under garment.]

Bot. (*Of a stigma*): Having an indusium (q.v.).

in dūş'-ĭ-ŭm, *s.* [Lat. = the under garment of a Roman woman.]

1. *Botany:*

(1) A cup consisting of hairs enclosing the stigma in the Goodeneaceæ (q.v.). (*Lindley.*)

(2) A membranous skin, usually an extension of the epidermis covering the sori in some ferns.

2. *Entom.:* A case of a Caddis worm, the larva of Phryganea. The case may be of gravel, small shells, &c., cemented together.

in-dŭs'-trĭ-al, *a.* [Eng. *industry*; *-al.*] Of or pertaining to industry; characterized by industry; pertaining to those manufacturing or other occupations through which marketable commodities are produced; pertaining to the industries of a country or those productive occupations in which large numbers of persons are employed.

industrial-accession, *s.*

Scots Law: The addition made to the value of an object by human art or labour exercised thereon.

industrial-exhibition, industrial-museum, *s.* An exhibition or museum of the various industrial productions of one or more countries.

industrial-school, *s.* A school for teaching one or more branches of industry; a school for the reclaiming and education in some industry of poor neglected children, or of children who have been convicted of some crime.

¶ Industrial schools, of varied character, have been and are being established in the United States, some for the teaching of certain trades, others to teach the use of tools and the general working of material. Schools of this kind, under the name of Manual Training Schools, have recently been added to the public school system in most of the states.

in-dŭs'-trĭ-al-ĭşm, *s.* [Eng. *industrial*; *-ism.*]

1. That state of society in which all the members co-operate for the common good; opposed to militancy (q.v.).

"*Industrialism* must not be confounded with industriousness. Though the members of an industrially-organized society are habitually industrious, and are indeed, when the society is a developed one, obliged to be so; yet it must not be assumed that the industrially-organized society is one in which, of necessity, much work is done. Where the society is small, and its habitat so favourable that life may be comfortably maintained with but little exertion, the social relations which characterize the industrial type may co-exist with but very moderate productive activities. It is not the diligence of its members which constitutes the society an industrial one in the sense here intended, but the form of co-operation under which their labours, small and great in amount, are carried on."—*H. Spencer: Prin. of Sociology*, pt. v., ch. xviii.

2. Employment in some industrial pursuit; industry.

***in-dŭs'-trĭ-al-lў**, *adv.* [Eng. *industrial*; *-ly.*] In an industrial manner; with reference to industry.

in-dŭs'-trĭ-oŭs, *a.* [Fr. *industrieux*, from Lat. *industriosus*, from *industria* = industry.]

1. Given to or characterized by industry; diligent and assiduous in business or study; not slothful; hardworking; constant, regular, and persevering in attention to business; the opposite to *slothful* or *idle.*

"*Industrious* poverty is a state by no means unfavourable to virtue."—*Macaulay: Hist. Eng.*, ch. xiv

2. Diligent or laborious to a particular end or in a particular pursuit; the opposite to *remiss* or *slack.*

"Being nimbler jointed than the rest
And more *industrious*."
Spenser: Muiopotmos, 122.

* 3. Designed; done for the purpose.

in-dŭs'-trĭ-oŭs-lў, *adv.* [Eng. *industrious*; *-ly.*]

1. In an industrious, diligent, or assiduous manner; with habitual and constant diligence and assiduity.

"Being besides *industriously* inclined."
Drayton: Legend of Thomas Cromwell.

2. Diligently, assiduously, zealously, eagerly.

"Especially when they are so *industriously* proclaimed and aggravated."—*Addison: Spectator*, No. 256.

* 3. Of set purpose or design; with design; with care. (Cf. Lat. *ex industriâ.*)

in-dŭs-trĭ-ŭs-nĕss, *s.* [Eng. *industrious; -ness.*] The act or quality of being industrious; industry. (*H. Spencer: Prin. of Sociology*, pt. v., ch. xviii.)

in'-dŭs-trў. * **in-dus-tree,** *s.* [Fr. *industrie*, from Lat. *industria*, from *industrius* = industrious, diligent; Ital. & Sp. *industria.*]

I. Habitual diligence in any employment, bodily or mental; constant and assiduous attention to business; assiduity; steady application to any business or pursuit; the opposite to *sloth* or *idleness.*

"The funds destined for the maintenance of *industry* are much greater in proportion to those which are likely to be employed in the maintenance of idleness, than they were two or three centuries ago."—*Smith: Wealth of Nations*, bk. ii., ch. iii.

2. The industrial arts generally, or any branch of them; those productive employments or occupations in which large numbers of persons are employed.

* ¶ *Of industry:* On purpose. (*Chapman: Bussy d'Ambois*, iii.) [Lat. *ex industriâ.*]

† **in-dū'-vĭ-æ,** *s. pl.* [Lat. = clothes, garments.] [INDUVIUM.]

Bot.: The withered remains of leaves which, not being articulated with the stem, cannot fall off, but decay upon it. Called also Reliquiæ.

in-dū'-vĭ-al, *a.* [Lat. *induvi(um)* (q.v.); Eng. suff. *-al.*]

Bot. (*Of a calyx*): Having an induvium (q.v.).

in-dū'-vĭ-ate, *a.* [Lat. *induvi(æ)*; Eng. suff. *-ate.*]

Bot.: Withering on its stem, forming indnviæ (q.v.).

in-dū-vĭ-ŭm, *s.* [Lat. = the bark which clothes a tree.]

Bot.: The large membranous orange pouch around the fruit of Physalis.

I. *Ordinary Language:*

1. The quality or state of being unequal; a difference or want of equality in any respect; want of uniformity; diversity; disparity.

"Sympathy is rarely strong where there is a great *inequality* of condition."—*Macaulay: Hist. Eng.*, ch. x.

2. The quality or state of being uneven or not level; unevenness, want of levelness.

3. An uneven place or spot; a depression or elevation of the ground.

4. Insufficiency or unfitness for any office or purpose; inadequacy, incompetency.

5. Difference or disparity of rank or station.

"If so small *inequality* between man and man make in them modesty a commendable virtue, who respecting superiors as superiors, can neither speak nor stand before them without fear."—*Hooker.*

6. Unlikeness, dissimilarity.

"In some places, by the nature of the earth, and by the situation of woods and hills, the air is more unequal than in others; and *inequality* of air is ever an enemy to health."—*Bacon.*

II. *Technically:*

1. *Alg.:* The expression of two unequal quantities, connected by the sign of inequality. Thus, $2 < 3$, $4 > 1$, are inequalities, and are read, 2 less than 3, 4 greater than 1. Every inequality consists of two parts: that on the left of the sign of equality, is called the first member; that on the right is called the second member. Two inequalities are said to exist in a direct sense, when the first members are both greater, or both less, than the second members. They exist in a contrary sense when the first member is greater than the second in one inequality, and the second greater than the first in the other.

2. *Astron.* (*Pl.*): All the alterations or calculations rendered necessary by the unequal motion of a planet.

¶ *Inequality of long period:*

Astron.: A term applied to two planets, whose periodic times are different, so that their conjunctions take place successively at different points in their respective orbits, the return to their first position not being made for a long period of time. (*Prof. Airy's Popular Astron.* (6th ed.), pp. 233, 273.)

* **ĭn-ē-quā'-tion,** *s.* [Pref. *in-* (2), and Eng. *equation* (q.v.).]

Alg.: The same as INEQUALITY (q.v.).

* **ĭn-ē-quĭ-dĭs'-tant,** *a.* [Pref. *in-* (2), and Eng. *equidistant* (q.v.).] Not equidistant.

ĭn-ē-quĭ-lăt'-ĕr-al, *a.* [Pref. *in-* (2), and Eng. *equilateral* (q.v.).]

1. *Zoology:*

(1) *Of Molluscs:* Having the two sides unequal, as an ordinary bivalve shell.

(2) *Of the Foraminifera:* Having the convolutions of the shell obliquely wound round an axis instead of lying in the same plane.

2. *Bot.:* Unequal-sided; unequal.

* **ĭn-equit-a-ble (equit** as **ĕk'-kwĭt),** *a.* [Pref. *in-* (2), and Eng. *equitable* (q.v.).] Not equitable, not just, not fair

1. Destitute of the power of motion, or of active resistance to motive power applied; motionless.

"But that it is *inert* and stupid of it self—then it must be moved from some other."—*More: Antidote against Atheism*, bk. ii., ch. i.

2. Inactive, dull, slothful, sluggish, indisposed to move or act. (*Cowper: Task*, i. 623.)

ĭn-ĕr'-ti-a (ti as **shĭ),** *s.* [Lat. = want of art, unskilfulness; *iners*, genit. *inertis* = without art or skill, lazy.]

Physics: The incapability of matter to change its state, whether that be one of motion or rest. If in motion, it will continue so for ever unless some counteractive force, like that of gravity, act upon it. If at rest, it will ever remain so unless a counteractive impulse set it in motion. The resistance which, especially at first, it gives to such a force operating to move it is called *vis inertiæ* = the power of inertia.

* **ĭn-ĕr'-tion,** *s.* [Eng. *inert*; *-ion.*] Want of activity or exertion, inertness, inertia. (*Mad. D'Arblay: Camilla*, bk. i., ch. v.)

* **ĭn-ĕrt'-ĭ-tūde,** *s.* [Low Lat. *inertitudo*, from *iners* (genit. *inertis*) = inert (q.v.).] The same as INERTNESS (q.v.).

ĭn-ĕrt'-lў, *adv.* [Eng. *inert*; *-ly.*] In an inert manner; sluggishly; dully; without motion or exertion.

"Suspend a while your force *inertly* strong."
Pope: Dunciad, iv. 7.

ĭn-ĕrt'-nĕss, * **in-ert-nesse,** *s.* [Eng. *inert*; *-ness.*]

1. The quality or state of being inert or destitute of the power of self-motion; inertia.

2. Sluggishness, dulness, want of activity or exertion, habitual indisposition to exertion or action.

"The incapacity and *inertness* of Gastanaga."—*Macaulay: Hist. Eng.*, ch. xix.

* **ĭn-ĕr'-û-dīte,** *a.* [Lat. *ineruditus*, from *in-* = not, and *eruditus* = erudite (q.v.).] Not erudite, not learned, unlearned.

* **ĭn-ĕs-cāp'-a-ble,** *a.* [Pref. *in-* (2), and Eng. *escapable.*] Inevitable; not to be avoided.

¶ *Papal Infallibility:*

1. *Roman Theology:* A Papal claim thus asserted on July 18, 1870, in the Œcumenical Council, held in the Vatican under the presidency of Pope Pius IX.:—

"We teach and define that it is a dogma divinely revealed; that the Roman Pontiff, when he speaks *ex cathedrâ*, that is, when in discharge of the office of Pastor and Doctor of all Christians, by virtue of his supreme apostolic authority he defines a doctrine regarding faith or morals to be held by the Universal Church, by the divine assistance promised to him in blessed Peter, is possessed of that infallibility with which the divine Redeemer willed that His church should be endowed for defining doctrine regarding faith or morals; and that therefore such definitions of the Roman Pontiff are irreformable (*i.e.*, in the words used by Pope Nicholas I., Note 13, and in the Synod of Quedlinburg, A.D. 1085, 'it is allowed to none to revise its judgment, and to sit in judgment upon what it has judged' (*Labbé*, vol. xii., p. 679), of themselves and not from the consent of the Church.

"But if any one—which may God avert—presume to contradict this our definition, let him be anathema." (*Vaughan: The Vatican Council*, pt. ii., p. 119.)

2. *Church Hist.*: Till the decision of the Vatican Council in favour of the Pope's infallibility [1], this opinion, though for centuries it had had numerous advocates, especially in Italy, had never been authoritatively decided. When it ceased to be an open question, some German bishops, of whom Professor Döllinger, of Munich, was the most noted, seceded from the Roman Church, and in September, 1871, took the name of Old Catholics (q.v.).

1. Total loss of reputation or character; bad repute; public disgrace or reproach.

"Strangely made up of *infamy* and glory."—*Macaulay: Hist. Eng.*, ch. iv.

2. The quality of being infamous; scandalousness; extreme baseness or vileness; as, the *infamy* of a crime.

II. *Law:* That loss of character or position which attaches to conviction of a crime, and which formerly rendered the person convicted incapable of being a witness or a juror.

in'-fan-çў, *in-fan-cye, *s.* [Fr. *enfance*, from Lat. *infantia*, from *infans* = an infant (q.v.); Sp. & Port. *infancia*; Ital. *infanzia.*]

I. *Ordinary Language:*

1. *Literally:*

(1) The state of being an infant.

(2) The time during which one is an infant; the earliest years of life.

"Leaving to wild neglect whate'er
Even from my *infancy* was dear!"
Scott: Rokeby, v. 11.

* (3) Inexpressiveness; silence. (*Milton: Hist. Eng.*, bk. v.)

2. *Fig.*: The first or earliest age or years of anything; the beginning or time of earliest existence: as, the *infancy* of an art.

II. *Law:* The period from a person's birth until he attains the age of twenty-one; nonage; minority. [Infant, A. II.]

***in-făn'-deŭs,** *a.* [Lat. *infandus* = unspeakable: *in-* = not, and *fandus* = fit to be spoken; *for* = to speak.] Too odious or horrible to be spoken or mentioned; unspeakable.

"This *infandous* custom of swearing."—*Howell: Letters*, bk. i., s. v., let. 11.

***in-făn'-gle-mĕnt,** *s.* [Pref. *in-* (1); Eng. **fangle*, and suff. *-ment.*] A scheme, a trick.

***in fang-thef,** *s.* [A.S. *infangentheof*: *in-* = in; *fangen* = to take, to seize, and *theof* = a thief.]

Old Law: The privilege of a lord of a manor which empowers him to judge any thieves taken within his fee.

ĭn'-fant, *en-faunt, *faunt, *in faunt, *s.* & *a.* [Lat. *infans* (genit. *infantis*) = one who cannot speak, an infant: *in-* = not, and *fans*, pr. par. of *for* = to speak; Fr. *enfant*; Ital., Sp., & Port. *infante.*]

A. *As substantive:*

I. *Ordinary Language:*

1. A child during the earliest years of his life; a young child.

"There shall be no more thence an *infant* of days."—*Isaiah* lxv. 20.

* 2. The child or son of a king or prince; a childe.

"The *infant* harkned wisely to her tale."
Spenser: F. Q., VI viii. 25.

II. *Law:* A person under the age of twenty-one years.

"*Infants* have various privileges, and various disabilities; but their very disabilities are privileges, in order to secure them from hurting themselves by their own improvident acts. An *infant* cannot be sued but under the protection, and joining the name, of his guardian, for he is to defend him against all attacks as well by law as otherwise; but he may sue either by his guardian, or by his prochein amy, or alone for wages in the county courts. In criminal cases, an *infant* of the age of fourteen years may be capitally punished; but under the age of seven he cannot. The period between seven and fourteen is subject to much uncertainty; for the *infant* shall, generally speaking, be judged *prima facie* innocent: yet if he was *doli capax*, and could discern between good and evil at the time of the offence committed, he may be convicted, and undergo judgment and execution of death, though he has not attained to years of puberty or discretion."—*Blackstone: Comment.*, bk. i., ch. 13.

B. *As adjective:*

I. Young; not mature; infantile.

"Yet oft before his *infant* eye would run
Such forms as glitter in the Muse's ray
With orient hues." *Gray: Progress of Poesy.*

2. Pertaining to or designed for infants; as, an *infant* school.

infant-school, *s.* [School.]

***in'-fant,** *v.t.* [Infant, *s.*]

1. To procreate; to bear or bring forth as a child.

"And yet but newly he was *infanted*."
G. Fletcher: Christ's Victory & Triumph.

2. To produce.

"This worthy motto . . . is of the same batch and *infanted* out of the same fears."—*Milton: Reform in England*, bk. ii.

in-făn'-ta, *s.* [Sp. & Port., fem. of *infante* = an infant (q.v.).] In Spain and Portugal any princess of the royal blood except the eldest daughter when heir-apparent.

ĭn-făn'-tê, *s.* [Sp. & Port.] [Infant.] In Spain and Portugal any son of the king except the eldest son or heir-apparent.

***in'-fant-heed,** *s.* [Eng. *infant*; *-hood.*] The state of being an infant; infancy.

in-făn-tĭ-çĭd'-al, *a.* [Eng. *infanticid(e)*; *-al.*]

1. Of or pertaining to infanticide; of the nature of infanticide.

2. Practising infanticide.

"Probably no nation can justly escape the charge of being descended of *infanticidal* ancestors."—*E. Marshall: A Phrenologist among the Todas*, ch. xxiii.

in-făn'-tĭ-çĭde, *s.* [Lat. *infanticidium* = child murder: *infans* (genit. *infantis*) = an infant, and *cædo* (in comp. *cido*) = to kill.]

I. *Ord. Lang. & Law:* The crime of infanticide in civilized countries practically exists only in the case of illegitimate children; but with regard to these, for obvious reasons, it prevails to a large extent. The common law regards infanticide as murder, but juries almost uniformly refuse to convict on the capital charge, and return a verdict of concealment of birth. Under the Scotch law the crime is more adequately punished.

"The present law as to the crime of *infanticide* errs mainly from good intentions."—*Trans. Nat. Ass. Prom. Soc. Science* (1877), p. 284.

II. *Anthropology, &c.*: The practice of destroying a portion of the offspring—in the majority of cases, the female children—among certain nations or tribes. It appeared in the earliest times, and still lingers among some undeveloped races. Marshall (*A Phrenologist among the Todas*, ch. xxiii.) defines it as "an artifice for restricting the expansive capacities of the race." J. F. M'Lennan (*Primitive Mar-*

riage, pp. 165, 166), speaking of the struggles of primitive man, says there is no doubt that the origin of infanticide "is everywhere referable to that early time," and that it "led at once to polyandry within the tribe, and the capturing of women from without" (p. 137). Lubbock (*Origin of Civil.*, pp. 129, 130) thus accounts for female infanticide:—"Girls are, and did not hunt. They weakened their mothers when young, and when grown up were a temptation to surrounding tribes;" but declines to accept the practice "as the true cause of exogamy." Darwin (*Descent of Man*, pt. iii., ch. xx.) says: "The trouble experienced by the women in rearing children, their consequent loss of beauty, the higher estimation set on them when few, and their happier fate, are assigned by the women themselves, and by various observers, as additional motives for infanticide." In Sparta it was used as one means of securing what Spencer calls the "survival of the fittest," and was defended by Plato (*Rep.* v.) and Aristotle (*Pol.* vii. 14, 10). Allusions to exposure of children in Roman times occur in Plautus (*Cist.*, i. 3, 18), Terence (*Heaut.* iv. 1, 37), Ovid (*Amor.* ii. 14), Juvenal (vi. 592), and Tacitus (*Hist.* v. 5; *Germ.* 19). St. Augustine (*de Civ. Dei*, iv. 11) says the Romans had a goddess Levana, so called "quia levat infantes." Lubbock (*Prehistoric Times*) and Gerland (*Ueber des Aussterben der Naturvölker*) are two of the best authorities on the subject, and contain excellent bibliographies and exact references. [POLYANDRY.]

III. *Indian History:*

1. The murder by high-caste Rajpoots of their female children, once most extensive, arose from pride of caste. Public opinion requiring the father to expend an extravagant sum on his daughter's marriage and dowry if she lived, he considered it more economic to have her put to death in infancy. Major Walker induced them to give up the unnatural practice, but on his return to Europe it revived. To British remonstrance the answer was, "Pay our daughters' marriage portions, and they shall live." The government took a different method—it imposed on a father sanctioning the murder of his infant child an enormous fine, and the practice soon ceased.

2. Till lately some of the aboriginal tribes, especially the Khoonds, sacrificed children as votive offerings to the Earth-goddess. The Anglo-Indian Government were for a long time unable to put down the practice, but the persistent kidnapping of native children from British-Indian soil, having furnished a *casus belli*, war was declared against the Khoonds, who by the treaty of peace were required to give up female infanticide. [GEHENNA, SACRIFICE, *s.*] Prior to 1822 female infanticide, arising apparently through the pressure of population on the means of subsistence, existed among the Todas of the Neelgherry Hills. (*Marshall: A Phrenologist Among the Todas.*)

* **ĭn'-făn-tīle,** *a.* [O. Fr., from Lat. *infantilis*, from *infans* = an infant; Sp. & Port. *infantil*; Ital. *infantile.*] Pertaining to infants or infancy; characteristic of infancy.

"The fly lies all the winter in these balls in its *infantile* state."—*Derham: Physico-Theol.*, bk. viii., ch. vi.

* **ĭn'-fant-lў,** *a.* [Eng. *infant*; *-ly.*] Like an infant; infantile, childish, infantlike.

"He utters such single matter in so *infantly* a voice."—*Beaum. & Flet., Queen of Corinth*, iii. 1.

ĭn'-făn-trў, * **in-făn-ter-ye,** * **in-făn-ter-y,** *s.* [Fr. *infanterie*, from Ital. *infanteria* = (1) a band of infants or young attendants, (2) foot-soldiers, from *infante* = an infant (q.v.); Sp. *infanteria.*]

I. *Ordinary Language:*

1. In the same sense as II.

"The principall strength of an armie consisteth in the *infanterie* or foot."—*Bacon: Henry VII.*, p. 74.

* 2. Infants or children collectively; a collection or number of children.

"No careful nurse would wet her watchful eye,
When any pang should gripe her *infantry*."
Browne: Britannia's Pastorals, bk. ii., s. 1.

II. *Mil.:* Foot soldiers armed with rifle and bayonet. Formerly the flank companies of each line battalion were, respectively, "Grenadier" and "Light" companies, and the deployment of the lines or the advance of the columns in battle was either covered by these companies, or by separate light infantry regiments, which were extended as skirmishers. With the introduction of long-range fire, the attack by lines or columns became too dangerous; the former from their slowness, the latter from their denseness. The infantry could no longer advance covered by a weak screen of skirmishers. Battalions, therefore, formed for attack with two companies firing, two supporting, and four in local reserve, the whole working on a narrow front; and, finally, the company formed the fighting tactical unit, and was distributed in a similar manner. But the skirmishers no longer merely cover the advance of troops in rear. They form the fighting-line themselves, and reinforced as loss occurs, and strengthened finally by the local reserve, they break down the defence first with preponderating fire, and then with the bayonet. Ancient nations largely depended in battle on their infantry. Then foot soldiers became less employed, the use of cavalry being one feature of the age of chivalry. The formation by Louis VI., of France (1108–1137), of the communal militia, followed by similar action on the part of Frederick I. the Emperor of Germany (1152 to 1190), and Henry II. of England (1154 to 1189) again brought infantry into note, and modern warfare is mainly carried on by their aid. In the United States the war basis of the infantry company is 100 men. On the peace basis the companies seldom have more than 48 men on their rolls, and a much smaller number on duty. They are armed with Springfield breech-loading rifles. During the Civil War a trowel bayonet was used, which was of service in making rifle pits.

* **ĭn-farçe',** *v.t.* Another spelling of ENFARCE (q.v.).

II. *Technically:*

* 1. *Law:* Contamination by illegality, as in the case of contraband goods.

2. *Med.:* A term which has been vaguely used for the contamination of the human body by morbific particles, whether there has or

has not been contact with a person similarly affected, but more specifically applied to the contamination of the atmosphere or water by such agency, and through them of the human body. Marshes with decaying animal or vegetable matter send forth miasma when they begin to dry; emanations from putrid substances, &c., where human beings are unduly crowded, poison the atmosphere, and through it bring on inflammatory and other diseases. When the morbific matter has been absorbed, there follows a period of incubation (q.v.). The best counteractive is an abundant supply of fresh air. There are also various disinfectants. [ZYMOTIC.]

¶ For the difference between *infection* and *contagion*, see CONTAGION.

***ĭn-fĕst'-ĭve** (2), *a.* [Infest, *a.*] Annoying, hurtful. (*Chapman: Homer; Iliad* viii.)

***ĭn-fĕs-tĭv'-ĭ-tў,** *s.* [Pref. *in-* (2), and Eng. *festivity* (q.v.).] Want or absence of festivity or mirth; cheerlessness, mournfulness.

***ĭn-fĕst'-ŭ-ŏŭs, *ĭn-fĕst'-ĭ-ŏŭs,** *a.* [Lat. *infestus* = hostile.] Mischievous, hurtful, harmful.

"With this *infestious* skill."
Daniel: To Sir T. Egerton, Kt.

***ĭn-feŭd-ā'-tion, *in-feod-ā'-tion** (eo as ū), *s.* [Lat. *in-* = in, into, and *feudum* = a feud, a fee.]

Law:

1. The act of putting one in possession of an estate or fee.

2. The act of granting tithes to laymen.

***ĭn-fĭb-ŭ-lā'-tion,** *s.* [Lat. *infibulatus*, pa. par. of *infibulo* = to buckle together; *in-* = in, into, and *fibula* = a clasp, a buckle.]

1. The act of clasping or fastening together as with a clasp or buckle.

2. The act of attaching a ring, clasp, buckle, &c., to the organs of generation, to prevent copulation.

ĭn'-fĭ-dĕl, *s. & a.* [O. Fr. *infidele* (Fr. *infidèle*), from Lat. *infidelis* = (1) unfaithful, faithless, (2) later, unbelieving with regard to the Christian faith: *in-* = not, and *fidelis* = that may be relied upon, trusty; *fides* = trust, faith, reliance, confidence, belief; Prov. *infizel, enfizel*; Sp. & Port. *infiel*; Ital. *infedele.*]

A. *As substantive:*

1. *From the Christian standpoint:* One who does not believe in the Christian faith. It includes heathens, &c. It is founded on 2 Cor. vi. 15 and 1 Tim. v. 8. The Greek word is ἄπιστος (*apistos*) = (1) passive, not to be trusted, (2) active, not trusting, not believing. Specif., one who does not believe that Christianity or any other religion has been divinely revealed, though such evidence as exists on the subject has been laid before him. The "infidel" may be a Deist, believing in a God (Deist), or an Atheist, denying or at least seriously doubting his existence; or an Agnostic, considering that he has not sufficient evidence to form an opinion on the subject. But in this second sense a Jew, a Mohammedan, a Brahmanist, a Boddhist, or a Polynesian idolater, is not regarded as an infidel. He may have had no opportunity of judging respecting Christianity, and thus cannot have deliberately rejected it.

"On her white breast a sparkling cross she bore,
Which Jews might kiss and *infidels* adore."
Pope: Rape of the Lock, ii. 8.

2. *From the standpoint of the Mohammedan or other non-Christian faiths:* One who does not believe in the religion of the person using the term "infidel."

B. *As adj.:* Unbelieving; advanced by infidels: as, *infidel* objections to the Bible.

2. *Med.:* The filtering of fluids into the tissues or organs; used spec. of the lardaceous, waxy, cholesterine or albuminous infiltration of the liver, spleen, and kidneys; called also then "amyloid degeneration." It generally follows on tuberculosis, suppuration, diseases of the bone, or syphilis.

ĭn'-fĭ-ma spē'-cĭ-ēş (ci as shĭ), *s.* [Lat.]

Logic: The lowest species, containing only individuals.

ĭn'-fĭn-ite, * **in-fin-it,** *a. & s.* [Lat. *infinitus*, from *in-* = not, and *finitus* = finished, finite; Sp., Ital., & Port. *infinito*; Fr. *infini.*]

A. *As adjective:*

I. *Ordinary Language:*

1. Not finite; having no bounds or limits; without limit; unbounded; boundless; not limited or circumscribed; applied to time, space, the Supreme Being or His attributes: as, The goodness of God is *infinite.*

"Sinking down through *infinite* depths in the darkness." *Longfellow: Evangeline*, ii. 5.

2. Indefinitely large or numerous; exceedingly great in number, quality, or degree.

"A fellow of *infinite* jest."
Shakesp.: Hamlet, v. 1.

II. *Music:* A term applied to certain forms of the canon, because they could be played for ever, inasmuch as the ending leads to the beginning; called also perpetual canon.

B. *As substantive:*

* I. *Ordinary Language:*

1. That which is indefinite; an infinite space or extent; infinity.

"Although the life of it be stretched with *infinite* of time."—*Chaucer: Boethius*, bk. v.

2. The Supreme Being; the Almighty.

3. An infinite or incalculable number; infinity.

"With *infinite* of pearls and finest gold."
Fanshaw. (*Annandale.*)

4. The utmost range, bounds, or limits; infinity; boundlessness.

"It is past the *infinite* of thought."
Shakesp.: Much Ado About Nothing, ii. 3.

II. *Math.:* [Infinity, II.].

infinite decimal, *s.*

Arith.: A decimal which is indeterminate, or which may be carried to infinity; thus, if the diameter of a circle is 1, the circumference is 3·14159265 . . . &c., to infinity.

infinite quantities, *s. pl.*

Math.: [Infinity].

infinite series, *s.*

Math.: A series, the terms of which go on increasing or decreasing without coming to an end.

¶ *Arithmetic of infinites:* A method invented by Dr. Wallis for the summation of infinite series.

¶ For the difference between *infinite* and *boundless*, see Boundless.

ĭn'-fĭn-ite-lў, *adv.* [Eng. *infinite*; *-ly.*]

1. To an infinite degree or extent; without limits or bounds.

"Whatever is less than infinite, is still *infinitely* distant from infinity."—*Brooke: Universal Beauty*, bk. iv. (Note.)

2. To a very great degree or extent; immensely; exceedingly.

"He knows their value when he finds them, and is *infinitely* pleased."—*Dryden: Parallel of Poetry & Painting.*

ĭn'-fĭn-ite-nĕss, *s.* [Eng. *infinite*; *-ness.*] The quality or state of being infinite; infinity; boundlessness; immensity; exceeding greatness or extent.

"The *infiniteness* of the divine condescention."—*Sharp: Sermons*, vol. i., ser. 11.

ĭn-fĭn-ĭ-tĕs'-ĭ-mal, *a. & s.* [Formed from Lat. *infinitus*, on analogy of Eng. *centesimal*; Fr. *infinitésimal*; Ital. *infinitesimale*; Sp. *infinitesimal*, from Fr. *infinitésime*, Sp. *infinitisimo*, Ital. *infinitissimo* = exceedingly small.]

A. *As adj.:* Infinitely, immeasurably, or indefinitely small; smaller or less than any assignable quantity.

"Vibrations of the small, and, as one may say, *infinitesimal* medullary particles."—*Hartley: Observations of Man*, pt. i., prop. 4.

B. *As substantive:*

1. *Ord. Lang.:* An infinitely or indefinitely small quantity.

"Infinites are composed of finites, in no other sense, than as finites are composed of *infinitesimals*."—*Dr. Clarke: Fourth Reply to Leibnitz.*

2. *Math.:* A quantity less or smaller than any assignable quantity; a quantity so small as not to be comparable with any finite quantity. Infinitesimals are of different orders. No quantity is great or small except in comparison with some other quantity. An infinitely small quantity of the first order is one that is infinitely small with respect to a finite quantity, that is, so small that it may be contained in it an infinite number of times. An infinitely small quantity of the second order is one that

is infinitely small with respect to an infinitely small quantity of the first order. In general, an infinitely small quantity of nth order is one which is infinitely small with respect to an infinitely small quantity of the $(n-1)$th order. When several quantities, either finite or infinitesimal, are connected by the signs plus or minus, all except those of the lowest order may be neglected without affecting the value of the expression.

ĭn-fĭn-ĭ-tĕs'-ĭ-măl-lў, *adv.* [Eng. *infinitesimal; -ly.*] In an infinitesimal manner or degree; to an infinitesimal degree or extent; in an infinitely small quantity, degree, or extent.

* **ĭn-fĭn-ĭ'-tion,** *s.* [Lat.] Boundlessness; infinity. (*Davis: Wittes Pilgrimage.*)

ĭn-fĭn-ĭt-īv'-al, *a.* [Eng. *infinitive(e); -al.*] Of or belonging to the infinitive mood.

ĭn-fĭn'-ĭ-tīve, *a.* & *s.* [Fr. *infinitif*, from Lat. *infinitivus* = unlimited, indefinite, from *infinitus* = infinite (q.v.); Ital., Sp., & Port. *infinitivo.*]

A. *As adjective:*

* **1.** *Ord. Lang.:* Infinite.

"He's an *infinitive* thing upon my score."—*Shaksp.: 2 Henry IV*, ii. 1.

2. *Gram.:* A term applied to that mood of a verb which expresses the action of the verb without limitation of person or number. It was originally simply an abstract noun, and is still used as a noun in the nominative and objective cases: as, To *hunt* is pleasant.

"That which is called the *infinitive* mode, should, according to the true analogy of that speech, be stiled a participle substantive."—*Wilkins: Real Characters*, pt. iv., ch. vi.

B. *As substantive:*

* **1.** *Ord. Lang.:* An endless quantity. (*G. Markham: Sir R. Grinvile.* Ded.)

2. *Gram.:* The infinitive mood of a verb.

"They should not have repeated the error of insisting that the *infinitive* was a mere noun."—*Tooke: Diversions of Purley*, vol. i., ch. ix.

ĭn-fĭn'-ĭ-tĭve-lў, *adv.* [Eng. *infinitive; -ly.*] *Gram.:* After the manner of an infinitive mood.

ĭn-fĭn-ĭ'-tō, *a.* [Ital.] Perpetual, as an infinite canon.

ĭn-fĭn'-ĭ-tūde, *s.* [Fr., from Lat. *infinitus* = infinite.]

1. The quality or state of being infinite; infiniteness, infinity.

"Thou, the third subsistence of Divine *Infinitude*."—*Milton: Of Reformation in England*, bk. ii.

2. Infinity; infinite extent; immensity.

"Boundless the deep, because I Am, who fill *Infinitude*." *Milton: P. L.*, vii. 169.

3. An infinite or boundless number; infinity.

"We see all the good sense of the age cut out, and minced into almost an *infinitude* of distinctions."—*Addison: Spectator.*

4. Infinity of time; eternity.

"Such wide and undetermined prospects are as pleasing to the fancy, as speculations of eternity or *infinitude* are to the understanding."—*Addison: Spectator*, No. 412.

* **ĭn-fĭn'-ĭ-tu-ple,** *a.* [Formed from *infinite*, on analogy of *centuple, quadruple*, &c.] Multiplied an infinite number of times.

ĭn-fĭn'-ĭ-tў, * **in-fin-ĭ-tee,** *s.* [Fr. *infinité*, from Lat. *infinitatem*, accus. of *infinitas*, from *infinitus* = infinite (q.v.); Sp. *infinidad*; Ital. *infinità.*]

I. *Ordinary Language:*

1. The quality or state of being infinite.

"One whose *infinity* passeth all nombre, that is almightye."—*Sir T. More: Workes*, p. 636.

2. Unlimited extent of time, space, quality, degree, &c.; immensity, boundlessness, infinitude.

"There is *infinity* of goodness."—*Hooker: Eccles. Polity.*

3. Endless or infinite number or quantity; exceeding multitude.

"An *infinity* of bad symptoms."—*Arbuthnot: On Diet.*

II. *Math.:* A term employed in mathematics to express a quantity greater than any assignable quantity of the same kind. Mathematically considered, infinity is always a limit of a variable quantity, resulting from a particular supposition made upon the varying element which enters into it. In the fraction $\frac{a}{x}$, let a retain the same value throughout, whilst x is arbitrary. If x becomes exceedingly small with respect to a, the value of the fraction becomes exceedingly great, and, finally, when x becomes smaller than any assignable quantity, this value is called infinity, and expressed by the symbol ∞. In arithmetic, infinity is the limit or last term of the series of natural numbers. This series is an arithmetical progression, with 1 for a common difference. It is plain that if a term be taken sufficiently remote, it may be regarded as greater than any assignable number, or as infinite. In like manner, the limit of the decreasing series of natural numbers, 0, — 1, — 2, — 3, may be regarded as minus infinity; hence, the two limits of all numbers, both positive and negative, are $+\infty$ and $-\infty$.

ĭn-fīrm', *a.* [Lat. *infirmus*, from *in-* = not, and *firmus* = firm, strong; Fr. *infirme*; Ital. *infermo*; Sp. & Port. *enfermo.*]

1. Not firm, strong, or sound; weak or feeble in body or health.

"The present elector is old and *infirm*."—*Sir W. Temple: Memoirs from the Peace* (1679).

in-form'-ant, *s.* [Fr., from Lat. *informans*, pr. par. of *informo.*]

* 1. One who or that which gives form, life, or vitality.

"The matter can be actuated at once but by a single *informant*: and space is replenisht by one corporal inexistence."—*Glanvill: Vanity of Dogmatising*, ch. xvi.

2. One who informs or furnishes information or intelligence.

* 3. One who informs against or accuses another; an informer.

"It was the last evidence of the kind. The *informant* was hanged."—*Burke: On the Affairs of India.*

¶ The *informant* is he who informs for the benefit of others, and the *informer* to the molestation of others. The *informant* is thanked in making the communication: for his civility undergoes a great deal of odium, the *informer* by no one, not even by those who employ him. (*Crabb: Eng. Synon.*)

in for-mā pâu'-pĕr-is, *phr.* [Lat., = as a poor man.]

Law: When a person has just cause of suit, but is too poor to support the charges of an action, he is allowed, on making oath that he is not worth £5, besides his wearing apparel and the matter involved in the action, to sue *in forma pauperis*—*i.e.*, without paying fees of court, counsel, or solicitor.

in-fŏr-mā'-tion, * **in-for-ma-ci-on**, *s.* [*Fr. information*, from Lat. *informationem*, acc. of *informatio*, from *informatus*, pa. par. of *informo* = to give form or shape to, to inform; Sp. *informacion*; Ital. *informazione.*]

1. The act of informing or communicating knowledge or intelligence.

2. The state of being informed, or acquainted with matters.

3. That which is communicated by word or writing; news, intelligence, notice, advice.

"*Information* having been given me about two or three months since."—*Sir W. Temple: Let. to Col. Sidney*, April 29, 1667.

¶ In this sense used by police officers to signify knowledge, however obtained, leading to the arrest or conviction of a criminal. The words, "From *information* I received," have almost become a formula in police evidence.

* 4. Knowledge acquired from reading or instruction, or from the use of the senses and intellectual powers: as, He is a man of great *information.*

II. *English Law:*

1. A written statement or declaration made usually on oath before a magistrate, previous to the issuing of a summons or warrant against a person charged with a crime, or an offence punishable summarily.

"In the case of an *information* being laid, and substantiated by proper evidence, a warrant may be issued in the first instance; and upon this warrant, which may be executed in any other district than that in which it is issued, after being backed or indorsed by a justice of that district, the person charged may be taken, and brought before the justices; who have authority to issue summonses, and to compel the attendance, at the hearing, of witnesses for the prosecutor, complainant, or defendant, as the case may be. The *information* or complaint must then be heard and adjudicated upon by the justices, according to the ordinary course of legal proceedings."—*Blackstone: Comment.*, bk. iv., ch. 20.

2. (See extract.)

"An *information* in the Exchequer is a method of recovering money or other chattels, or for obtaining satisfaction in damages for any personal wrong committed in the lands or other possessions of the crown. The most usual *informations* are those of intrusion and debt; intrusion, for any trespass committed on the lands of the crown; and debt, upon any contract for moneys due to the crown, or for any forfeiture due to the crown upon the breach of a penal statute. An *information* of intrusion may also be resorted to in the case of a purpresture upon public property: which occurs when one encroaches, or makes that several to himself, which ought to be common to many. *Informations* of debt are most commonly used to recover forfeitures occasioned by transgressing those laws which are enacted for the establishment and support of the revenue; in which cases the crown now recovers and is liable to pay costs, if unsuccessful, as if the suit were between subject and subject."—*Blackstone: Comment.*, bk iii., ch. 9.

3. An *information* in the Court of Queen's Bench is a writ of *quo warranto* against one who claims or usurps any office, franchise, or liberty, to inquire by what authority he supports his claim, in order to determine the right.

4. An *information* in the Court of Chancery is a suit on behalf of the Crown or Government as to the misapplication of a public charity, or on behalf of the estate of a lunatic or an idiot. (*Blackstone: Com.*, bk. iii., ch. 17.)

5. Generally in criminal law, an *information* is a substitute for an ordinary indictment filed by the Attorney-General or Master of the Crown office, in such cases of misdemeanour as tend to disturb the peace or the government: as libels on judges, magistrates, or public affairs, bribery at elections, &c.

"Fear of public derision and of a criminal *information* generally induced him to keep his fancies to himself."—*Macaulay: Hist. Eng.*, ch. iii.

III. *Scots Law:* A written argument allowed in the Court of Justiciary on the occurrence of cases of difficulty.

* **in-form'-a-tĭve**, *a.* [Fr. *informatif*; Ital. & Sp. *informativo.*] Having power to animate or give vitality.
